Thomas Paine. Major Works: Common Sense / The American Crisis / The Rights Of Man / The Age Of Reason / Agrarian Justice Thomas Paine 2017-03-16 Thomas Paine (or Pain; February 9, 1737 [O.S. January 29, 1736] - June 8, 1809) was an English-American political activist, philosopher, political theorist, and revolutionary. One of the Founding Fathers of the United States, he authored the two most influential pamphlets at the start of the American Revolution, and he inspired the rebels in 1776 to declare independence from Britain. His ideas reflected Enlightenment-era rhetoric of transnational human rights. He has been called "a corsetmaker by trade, a journalist by profession, and a propagandist by inclination." Matters of Justice Helga Baitenmann 2020-05-01 After the fall of the Porfirio Díaz regime, pueblo representatives sent hundreds of petitions to Pres. Francisco I. Madero, demanding that the executive branch of government assume the judiciary's control over their unresolved lawsuits against landowners, local bosses, and other villagers. The Madero administration tried to use existing laws to settle land conflicts but always stopped short of invading judicial authority. In contrast, the two main agrarian reform programs undertaken in revolutionary Mexico--those implemented by Emiliano Zapata and Venustiano Carranza--subordinated the judiciary to the executive branch and thereby reshaped the postrevolutionary state with the

support of villagers, who actively sided with one branch of government over another. In *Matters of Justice* Helga Baitenmann offers the first detailed account of the Zapatista and Carrancista agrarian reform programs as they were implemented in practice at the local level and then reconfigured in response to unanticipated inter- and intravillage conflicts. Ultimately, the Zapatista land reform, which sought to redistribute land throughout the country, remained an unfulfilled utopia. In contrast, Carrancista laws, intended to resolve quickly an urgent problem in a time of war, had lasting effects on the legal rights of millions of land beneficiaries and accidentally became the pillar of a program that redistributed about half the national territory.

In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Delve into what it was like to live during the eighteenth century by reading the first-hand accounts of everyday people, including city dwellers and farmers, businessmen and bankers, artisans and merchants, artists and their patrons, politicians and their constituents. Original texts make the American, French, and Industrial revolutions vividly contemporary. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

Fair and Equitable Benefit-Sharing in Agriculture (Open Access) Elsa Tsioumani 2020-07-16 This book explores the emergence and development of the legal concept of fair and equitable benefit-sharing, and its application in agriculture. Developed in the 1990s, the concept of fair and equitable benefit-sharing has been deployed in an ever-wider variety of international instruments, including those on biodiversity, climate change and human rights. A lack of clarity persists, however, on what fair and equitable benefit-sharing requires and entails, and whether its implementation supports or eventually undermines equity and justice. This book examines these questions in the area of land, food and agriculture, addressing for the first time several instances of the agricultural production chain, including research and development, land governance and land use and access to markets. It identifies challenges regarding implementation of the concept as enshrined in environmental treaties and soft-law instruments, with a focus on the International Treaty on Plant Genetic Resources for Food and Agriculture, the Voluntary Guidelines on Tenure and the UN Declaration on the Rights of Peasants. It investigates its role, enabling conditions and limitations, in a contradictory policy context involving environmental, food security and human rights objectives but also a growing web of multilateral and bilateral trade and investment agreements. Linking international law research with a socio-legal analysis, the book addresses four grassroots examples, which offer ideas for institutional and legal innovation from the local to the global level. This interdisciplinary title will be of great interest to students and scholars of international environmental law, agriculture, land law, development studies and global governance, as well as policymakers and practitioners working in these fields. [Agrarian Justice opposed to Agrarian Law, and to Agrarian Monopoly, etc](#) Thomas Paine 1797

Agrarian Justice Thomas Paine 2017 Tom Paine's 'Agrarian Justice' (1797) continues to inspire progressive politicians today as a source of two contemporary policies, Land Value Taxation and Universal (Basic) Income (Citizen's Income). His starting point was the belief, widespread until the end of the eighteenth century, that the Earth is the common property of humankind. Rather than advocating the common ownership of land, he proposed that landowners 'owe to the community a ground-rent', the market rent of their land. He advocated that this be paid into a fund to be used for the benefit of all, both as a lump sum payment on reaching adulthood and as a pension for older people. He is well worth reading for his passion and rhetoric. This publication also includes a riposte written in the same year by Thomas Spence, who had published a similar but more radical proposal in 1776. It also contains a 20th century re-statement of individual and common rights to the Earth and a summary of the relevance of Agrarian Justice today.
