Exploring the City Ulf Hannerz 1980 Within a relatively short time, urban anthropology has emerged as one of the most vital fields of anthropology. During its formative period, however, it has lacked intellectual coherence. Exploring the City is a bold first attempt to provide just such a coherent and unified theoretical understanding of urbanism. Hannerz draws upon the urban perspectives of other disciplines as well, such as history, sociology, and geography, to bring intellectual unity to the history and development of urban anthropology.

The New Populism Marco Revelli 2019-07-09 A crisp and trenchant dissection of populism today The word 'populism' has come to cover all manner of sins. Yet despite the prevalence of its use, it is often difficult to understand what connects its various supposed expressions. From Syriza to Trump and from Podemos to Brexit, the electoral earthquakes of recent years have often been grouped under this term. But what actually defines 'populism'? Is it an ideology, a form of organisation, or a mentality? Marco Revelli seeks to answer this question by getting to grips with the historical dynamics of so-called 'populist' movements. While in the early days of democracy, populism sought to represent classes and social layers who asserted their political role for the first time, in today's

post-democratic climate, it instead expresses the grievances of those who had until recently felt that they were included. Having lost their power, the disinherited embrace not a political alternative to -isms like liberalism or socialism, but a populist mood of discontent. The new populism is the 'formless form' that protest and grievance assume in the era of financialisation, in the era where the atomised masses lack voice or organisation. For Revelli, this new populism the child of an age in which the Left has been hollowed out and lost its capacity to offer an alternative.

Fly Away Kristin Hannah 2013-04-23 Return to the world of FIREFLY LANE—now a Netflix series—from #1 New York Times bestselling author Kristin Hannah. Once, a long time ago, I walked down a night-darkened road called Firefly Lane, all alone, on the worst night of my life, and I found a kindred spirit. That was our beginning. More than thirty years ago. Tully and Kate. You and me against the world. Best friends forever. But stories end, don't they? You lose the people you love and you have to find a way to go on. . . . Tully Hart has always been larger than life, a woman fueled by big dreams and driven by memories of a painful past. She thinks she can overcome anything until her best friend, Kate Ryan, dies. Tully tries to fulfill her deathbed promise to Kate--to be there for Kate's children--but Tully knows nothing about family or motherhood or taking care of people. Sixteen-year-old Marah Ryan is devastated by her mother's death. Her father, Johnny, strives to hold the family together, but even with his best efforts, Marah becomes unreachable in her grief. Nothing and no one seems to matter to her . . . until she falls in love with a young man who makes her smile again and leads her into his dangerous, shadowy world. Dorothy Hart--the woman who once called herself Cloud--is at the center of Tully's tragic past. She repeatedly abandoned her daughter, Tully, as a child, but now she comes back, drawn to her daughter's side at a time when Tully is most alone. At long last, Dorothy must face her darkest fear: Only by revealing the ugly secrets of her past can

she hope to become the mother her daughter needs. A single, tragic choice and a middle-of-the-night phone call will bring these women together and set them on a poignant, powerful journey of redemption. Each has lost her way, and they will need each one another--and maybe a miracle--to transform their lives. An emotionally complex, heart-wrenching novel about love, motherhood, loss, and new beginnings, *Fly Away* reminds us that where there is life, there is hope, and where there is love, there is forgiveness. Told with her trademark powerful storytelling and illuminating prose, Kristin Hannah reveals why she is one of the most beloved writers of our day.

The Individual and Society in the Middle Ages Walter Ullmann 2019-12-01 Originally published in 1966. *The Individual and Society in the Middle Ages*, based on three guest lectures given at Johns Hopkins University in 1965, explores the place of the individual in medieval European society. Looking at legal sources and political ideology of the era, Ullmann concludes that, for most of the Middle Ages, the individual was defined as a subject rather than a citizen, but the modern concept of citizenship gradually supplanted the subject model from the late Middle Ages onward. Ullmann lays out the theological basis of the political theory that cast the medieval individual as an inferior, abstract subject. The individual citizen who emerged during the late Middle Ages and the Renaissance, by contrast, was an autonomous participant in affairs of state. Several intellectual trends made this humanistic conception of the individual possible, among them the rehabilitation of vernacular writing during the thirteenth century and the growing interest in nature, natural philosophy, and natural law. However, Ullmann points to feudalism as the single most important medieval institution that laid the groundwork for the emergence of the modern citizen.

Geography and Literature William E. Mallory 1989-01-01 Evocative descriptions of geographical places by novelists and poets are of great benefit both to students of literature and geography. They foster a deeper appreciation of the essences of and they frequently allow a sense of place to be felt more strongly by the reader. *Geography and Literature* is a uniquely interdisciplinary effort. The essays of distinguished creative writers, literary critics, and geographers, appraising literary places, demonstrate that literary landscapes are rooted in reality, and that the geographer's knowledge can help ground even highly symbolic literary landscapes in this reality. The book is divided into five sections, based on various approaches to landscape or place in literature. The domain is wide and includes such diverse areas as José Maria Arguedas's Peru, Turgenev's Russia, Bennett's Stoke-on-Trent, Cather's Nebraska, and Chrétien de Troyes's symbolic Arthurian landscapes. Contributors include César Caviedes, Jim Wayne Miller, Kenneth Mitchell, D. C. D. Pocock, Peter Preston, and Susan J. Rosowski. Students of geography and literature should find the collection useful. The avid student of human, social, cultural, and historical geography will become aware of factors exogenous to geography that stimulate appraisal and appreciation of place—and one of them is literary description. Similarly, the student of literature will gain an awareness of the actual or factual basis of a geographer's appraisal. Ultimately, it is hoped, such a collection can bridge the gap between the geographer's factual descriptions and the writer's flights of imagination, hence giving the world—both in geographical and literary terms—a more unified shape.

Politics and Culture in Renaissance Naples Jerry H. Bentley 2014-07-14 Examining the cultural

history of Renaissance Naples with an emphasis on humanism, the author also evaluates Naples in the broader context of fifteenth-century Italy and Renaissance Europe in general. He addresses several prominent themes of Renaissance history: patron-client relationships, the development of a realistic, Machiavellian approach to matters of statecraft and diplomacy, and the influence of Neapolitan humanists on European culture in general. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Alternative Modernities Giuseppe Vacca 2020-10-23 Antonio Gramsci lived the Great War as a “historic break,” a profound experience that left an indelible mark on the development of his political thought. Translated into English for the first time, *Alternative Modernities* reconstructs and analyses this critical period of Gramsci’s intellectual formation through a systematic analysis of his writings from 1915 to 1935. For Gramsci, Soviet Communism, “Americanism,” and the “new” Fascist State were the principle responses to the crisis of the old world order. He portrayed them as the three protagonists of twentieth-century modernity, alternatives destined to tragically clash in the worldwide struggle for hegemony. Among the arguments in his *Prison Notebooks*, Gramsci casts doubt on the political strategy of Soviet Communism and the theoretical underpinnings of “official Marxism.” Instead, he suggests a radical revision of Marxism by breathing life into a new interpretation whose fundamental concepts are: politics as the struggle for hegemony, the “passive

revolution” as a historical paradigm of modernity, and the philosophy of praxis as the welding between visions of the worlds, historical analyses, and political strategies. Gramsci’s intuitions culminate in a new theory of the political subject, supported by a reflection upon the 20th century that still speaks to us today, pointing the way toward a new narrative of world history.

Processing the Past Francis X. Blouin Jr. 2012-12-18 Processing the Past explores the dramatic changes taking place in historical understanding and archival management, and hence the relations between historians and archivists. Written by an archivist and a historian, it shows how these changes have been brought on by new historical thinking, new conceptions of archives, changing notions of historical authority, modifications in archival practices, and new information technologies. The book takes an "archival turn" by situating archives as subjects rather than places of study, and examining the increasingly problematic relationships between historical and archival work. By showing how nineteenth- and early twentieth-century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space, the book sets the background to these changes. In the past, authoritative history was based on authoritative archives and mutual understandings of scientific research. These connections changed as historians began to ask questions not easily answered by traditional documentation, and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies. The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks, training, and purposes, as well as different understandings of the authorities that govern their work. Processing the Past moves toward bridging this divide by speaking in one voice to these very different audiences. Blouin and

Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other, and indeed, whether their now different notions of what is archival and historical will ever again be joined.

Unnaturally French Peter Sahlins 2018-08-06 In his rich and learned new book about the naturalization of foreigners, Peter Sahlins offers an unusual and unexpected contribution to the histories of immigration, nationality, and citizenship in France and Europe. Through a study of foreign citizens, Sahlins discovers and documents a premodern world of legal citizenship, its juridical and administrative fictions, and its social practices. Telling the story of naturalization from the sixteenth to the early nineteenth centuries, *Unnaturally French* offers an original interpretation of the continuities and ruptures of absolutist and modern citizenship, in the process challenging the historiographical centrality of the French Revolution. *Unnaturally French* is a brilliant synthesis of social, legal, and political history. At its core are the tens of thousands of foreign citizens whose exhaustively researched social identities and geographic origins are presented here for the first time. Sahlins makes a signal contribution to the legal history of nationality in his comprehensive account of the theory, procedure, and practice of naturalization. In his political history of the making and unmaking of the French absolute monarchy, Sahlins considers the shifting policies toward immigrants, foreign citizens, and state membership. Sahlins argues that the absolute citizen, exemplified in Louis XIV's attempt to tax all foreigners in 1697, gave way to new practices in the middle of the eighteenth century. This "citizenship revolution," long before 1789, produced changes in private and in political culture that led to the abolition of the distinction between foreigners and citizens. Sahlins shows how the Enlightenment and the political failure of the monarchy in France laid the foundations for the development of an exclusively political citizen, in opposition to the

absolute citizen who had been above all a legal subject. The author completes his original book with a study of naturalization under Napoleon and the Bourbon Restoration. Tracing the twisted history of the foreign citizen from the Old Regime to the New, Sahlins sheds light on the continuities and ruptures of the revolutionary process, and also its consequences.

Undoing Time Eleanor Canright Chiari 2012 The walls of Le Nuove prison in Turin are scarred by graffiti, bullets and blood. Opened in 1870, Le Nuove was one of Italy's first panoptical prisons. During the Second World War it was occupied by the Nazis, who executed and deported anti-Fascist and Jewish prisoners held there. In the 1970s it housed left-wing 'terrorists', who spearheaded violent riots that spread to prisons across Italy. The prison staff became targets and four were shot dead. When Le Nuove finally closed down in October 2003, the memories of the tragic events that occurred there became obstacles to its demolition. Combining oral history, anthropology and micro-history, this book examines the cultural memory of Le Nuove via interviews, archives and the material traces left within the building itself. The volume examines issues such as the relationship between memory and place, forgetting, and the problems of a global cultural heritage increasingly focused on places of suffering. By following the architecture of the prison in her narrative, the author actively engages with the many layers of time competing to give meaning to the prison today, as well as addressing the hidden stories, myths and silences that condition any study of cultural memory.

Wittgenstein and Derrida Henry Staten 1984-01-01 "By linking Wittgenstein with Derrida, Staten suggests that the intellectual relevance of deconstruction is wider than the English-speaking public has recognized."?Studies in the Humanities "This work is altogether first rate. It is informative, faithful, rigorous and completely original in its problematization. It is an original theoretical advance

which I believe will mark an essential step forward in the field."?Jacques Derrida "Staten has plenty of philosophical acuity and critical sensitivity as well as wide philosophical scholarship, and he writes in a clear, muscular style which illuminates the issues sometimes profoundly without in any way concealing their difficulty and complexity. . . . Wittgenstein and Derrida should be essential reading not only for anyone interested in the current critical debate but also for philosophers."?Bernard Harrison, University of Sussex, England This book examines Aristotle, Kant, and especially Husserl to bring to light Derrida's development of the classical philosophical concepts of form (eidos), verbal formula (logos), the object-in-general, and time. The later work of Wittgenstein is then examined in detail and Wittgenstein's "zigzag" writing in the Philosophical Investigations is interpreted as deconstructive syntax, directed, like Derrida's work, against the dominance of the philosophical concern with the form of an entity. Henry Staten is a professor of English and philosophy at the University of Utah.

Geography and Revolution David N. Livingstone 2010-08-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. *Geography and Revolution* examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United

States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, *Geography and Revolution* is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

Excavating Modernity Joshua Arthurs 2013-09-20 The cultural and material legacies of the Roman Republic and Empire in evidence throughout Rome have made it the "Eternal City." Too often, however, this patrimony has caused Rome to be seen as static and antique, insulated from the transformations of the modern world. In *Excavating Modernity*, Joshua Arthurs dramatically revises this perception, arguing that as both place and idea, Rome was strongly shaped by a radical vision of modernity imposed by Mussolini's regime between the two world wars. Italian Fascism's appropriation of the Roman past—the idea of Rome, or *romanità*—encapsulated the Fascist virtues of discipline, hierarchy, and order; the Fascist "new man" was modeled on the Roman legionary, the epitome of the virile citizen-soldier. This vision of modernity also transcended Italy's borders, with the Roman Empire providing a foundation for Fascism's own vision of Mediterranean domination and a European New Order. At the same time, *romanità* also served as a vocabulary of anxiety about modernity. Fears of population decline, racial degeneration and revolution were mapped onto the barbarian invasions and the fall of Rome. Offering a critical assessment of *romanità* and its effects, Arthurs explores the ways in which academics, officials, and ideologues approached Rome not as a site of distant glories but as a blueprint for contemporary life, a source of dynamic values to shape the present and future.

Migrant Children in Europe G.G. Valtolina 2013-03-05 The rights of children are outlined in article 24 of the Charter of fundamental rights of the European Union; the binding catalogue of rights

which institutions and member states are bound to respect when applying EU law. Although this article has undoubtedly been taken very seriously since the Charter was adopted in 2000, there are indications that in a number of cases it has not been possible for children in the EU to exercise fully the rights it envisaged. One such case involves migrating Romanian children, and concerns have been expressed that the rights of this group of migrant children have not always been fully taken into account. This book is the result of the two-year project "Children's rights in Action", funded by the European Union, which focuses on the needs of children migrating from Romania to Italy and Spain in order to identify good practices, reduce their vulnerability and protect their rights. The book presents the impact that limited access to the rights guaranteed by EU law have had on the actual conditions of life for Romanian children in migration across Europe. Although the book shows that the rights enshrined in article 24 of the EU Charter are not yet fully and equally ensured in some EU countries, it also describes the ways in which local communities and civil society actors have often operated to fill the gap and enabled such children to exercise their rights despite legislative and political shortcomings.

New Business Models and Value Creation: A Service Science Perspective Lino Cinquini

2013-03-12 The contemporary economic landscape features the prevalence of the service sector in economic systems, the pervasive servitisation of manufacturing, innovations in traditional business models and new value creation models, thanks to the new possibilities offered by the web, ICT and other enabling technologies. In this evolving context, this book provides qualified contributions on the topic of service science from a managerial perspective. A multidisciplinary perspective is adopted, dealing with both the structural-technological and dynamic-relational aspects of managing complexity. In addressing the contribution that service science can make to business value creation,

this book covers relevant issues such as product servitisation, business modelling, value cocreation with customers, performance measures and the role of ICT. It also presents some innovative experiences of management models in service organisations operating in the environmental, energy and health-care sectors. This book aims to enhance the value of the results of research intertwined with the development of a new training curriculum started four years ago at the Scuola Superiore Sant'Anna of Pisa (Italy) with the evolution of the "Master in Management of Innovation" into the new "Master in Management, Innovation and Service Engineering" (MAINS).

Strangers at Our Door Zygmunt Bauman 2016-06-20 Refugees from the violence of wars and the brutality of famished lives have knocked on other people's doors since the beginning of time. For the people behind the doors, these uninvited guests were always strangers, and strangers tend to generate fear and anxiety precisely because they are unknown. Today we find ourselves confronted with an extreme form of this historical dynamic, as our TV screens and newspapers are filled with accounts of a 'migration crisis', ostensibly overwhelming Europe and portending the collapse of our way of life. This anxious debate has given rise to a veritable 'moral panic' - a feeling of fear spreading among a large number of people that some evil threatens the well-being of society. In this short book Zygmunt Bauman analyses the origins, contours and impact of this moral panic - he dissects, in short, the present-day migration panic. He shows how politicians have exploited fears and anxieties that have become widespread, especially among those who have already lost so much - the disinherited and the poor. But he argues that the policy of mutual separation, of building walls rather than bridges, is misguided. It may bring some short-term reassurance but it is doomed to fail in the long run. We are faced with a crisis of humanity, and the only exit from this crisis is to recognize our growing interdependence as a species and to find new ways to live together in

solidarity and cooperation, amidst strangers who may hold opinions and preferences different from our own.

The Fascist Dictatorship in Italy Gaetano Salvemini 1927

The State of Sovereignty Douglas Howland 2009 The State of Sovereignty examines how it came to pass that the nation-state became the prevailing form of governance in the world today. Spanning the 19th and 20th centuries and addressing colonization and decolonization around the globe, these essays argue that sovereignty is a set of historically contingent practices, and not something that accrues naturally to states. The contributors explore the different ways in which sovereign political forms have been defined and have defined themselves, placing recent debates about nations and

national identity within a broader history of sovereignty, territory, and legality.

Globalizing the student rebellion in the long '68 Andrés Payà Rico, 2018-09-28 This volume brings us closer to the dynamics of the educational world, especially students, from a wide range of national and regional scenarios, with a special focus on Europe and Latin America. In this way, a plural panorama is shown, in which the stories centered on the usual protagonists of the 1968 processes are accompanied by other scenarios, often considered secondary, but which this volume inserts in a more general story that helps us understand how the processes of the 60s were not concrete or national, but got an absolute regional and global significance. We see a complex process of transnational demand that ranged from Eastern Europe, included in the Soviet bloc, to the very heart of the Western Hemisphere, with the United States as the main axis, passing through the politically varied Western Europe, submitted to the same processes and cultural influences. In this sense, to the works that deal with the United States and France, are added others focused on Italy, Spain and Brazil, as priority focus areas, together with other European and Latin American landscapes: Great Britain, Portugal, Greece, Slovakia, Hungary, Chile, Uruguay and Mexico, without missing, in addition, the case of one of the most unique actors on the international scene: the State of Israel. With this volume, we want to continue advancing in the knowledge of the educational world of the second half of the 20th century. Great are the challenges of this world at the beginning of the 21st century and many of them were already evident in 1968. Others have materialized as a result of those events. To confront both of them, we must first identify and analyze them, as well as being aware of their magnitude. We hope that all this work can contribute to this aim.

Mediterranean Diasporas Maurizio Isabella 2015-11-19 *Mediterranean Diasporas* looks at the relationship between displacement and the circulation of ideas within and from the Mediterranean basin in the long 19th century. In bringing together leading historians working on Southern Europe, the Balkans, and the Ottoman Empire for the first time, it builds bridges across national historiographies, raises a number of comparative questions and unveils unexplored intellectual connections and ideological formulations. The book shows that in the so-called age of nationalism the idea of the nation state was by no means dominant, as displaced intellectuals and migrant communities developed notions of double national affiliations, imperial patriotism and liberal imperialism. By adopting the Mediterranean as a framework of analysis, the collection offers a fresh contribution to the growing field of transnational and global intellectual history, revising the genealogy of 19th-century nationalism and liberalism, and reveals new perspectives on the intellectual dynamics of the age of revolutions.

Producing Culture and Capital Sylvia Yanagisako 2020-06-16 *Producing Culture and Capital* is a major theoretical contribution to the anthropological literature on capitalism, as well as a rich case study of kinship and gender relations in northern Italy. Drawing on ethnographic and archival research on thirty-eight firms in northern Italy's silk industry, Sylvia Yanagisako illuminates the cultural processes through which sentiments, desires, and commitments motivate and shape capitalist family firms. She shows how flexible specialization is produced through the cultural dynamics of capital accumulation, management succession, firm expansion and diversification, and the reproduction and division of firms. In doing so, Yanagisako addresses two gaps in Marx's and Weber's theories of capitalism: the absence of an adequate cultural theory of capitalist motivation

and the absence of attention to kinship and gender. By demonstrating that kinship and gender are crucial in structuring capitalist action, this study reveals these two gaps to be different facets of the same omission. A process-oriented approach to class formation and class subjectivity enables the author to incorporate the material and ideological struggles within families into an analysis of class-making and self-making. Yanagisako concludes that both "provincial" and "global" capitalist orientations and strategies operate in an industry that has always been integrated into regional and international relations of production and distribution. Her approach to culture and capitalism as mutually constituted processes offers an alternative to both universal models of capitalism as a mode of production and essentialist models of distinctive "cultures of capitalism."

Risorgimento in Exile Maurizio Isabella 2009-08-27 Exile represented a fundamental experience in shaping Italian national identity. This book investigates the contribution of the Italian exile community in Europe and Latin America in the post Napoleonic era to imagining a new Italian political and economic community. By looking at the writings of such exiles, the book challenges recent historiography regarding the lack of genuine liberal culture in the Risorgimento. It argues that these émigrés' involvement in debates with British, continental, and American intellectuals, points to the emergence of liberalism and Romanticism as international ideologies shared by a community of patriots from Southern Europe as well as Latin America, and demonstrates that the Risorgimento first developed as a variation upon such global trends.

Camorristi, Politicians and Businessmen Felia Allum 2017-12-02 "This work presents a detailed study of the political role of a criminal organization, the Neapolitan Camorra, in its historical context, that of Naples over the last fifty years. In Campania, until 1991, the population tacitly accepted the relationship between the Camorra and the local political elite (based on the exchange

of votes for state contracts and protection), and because of the lack of reliable sources it could not seriously be studied by political scientists. In 1991, however, a law was passed which gave generous remission of sentences to criminals who wanted to cooperate with the police. Following this, many members of the Camorra revealed important aspects of the criminal, economic and political activities of their organization. This new information has permitted a re-examination of the Camorra and has provided material for the story to be told."

They discuss issues surrounding the impact of instant access on cities, daily lives, transportation, privacy, social and economic networks, community and education.

Managing Population Decline in Europe's Urban and Rural Areas Gert-Jan Hospers 2014-11-18 This book explores the challenges population decline presents for Europe's urban and rural areas. It features recent demographic data and trends not only for Europe as a whole, but also for selected countries, and compares growth and shrinkage from a historical as well as a theoretical perspective. In addition, the book critically reviews relevant notions from geography, sociology, and public administration. It also identifies good practices across Europe. Throughout, theories are complemented with concrete examples and proposals are made on how to tackle demographic shrinkage in European cities and villages, from attempts to attract new residents to the countryside to innovative ways to guarantee public services. In the end, the authors conclude that solving the challenges caused by population decline require novel ways of thinking and provide answers to such

future-oriented questions as: how to ensure the quality of life in an environment that is inhabited by fewer and older people, what investments are needed, and which actors should be involved. *Managing Population Decline in Europe's Urban and Rural Areas* offers detailed coverage of an underestimated and complex governance issue that asks for solutions in which citizens have to play an important role. It concludes that shrinkage requires a rethink of the specific tasks and roles of government and presents a way forward based on initiatives currently underway throughout Europe. The book will be a valuable resource for population policy makers as well as students and researchers interested in human geography, urban planning, rural development, European studies, public administration, and other social sciences.

Surrounded by Water Andrea Corsale 2016-02-08 This work provides insights into the physical and human geography of Sardinia, the second largest Mediterranean island, with its complex, varied, changing and often hidden features. The title, “Surrounded by Water”, recalls the identity of a land whose coastlines and surrounding seas have symbolically represented social, economic, political, cultural bridges or walls, meeting or colliding places, over its long and difficult history. Landscapes, seascapes and cityscapes are presented and analysed, together with other aspects, through a descriptive focus and original contributions provided by some local experts, in order to offer scholars and students across the globe a complex and multi-dimensional view of the reality of Sardinia through the lens of its geography. Each chapter of the book offers an in-depth and concise analysis of a specific topic, through the description of its characteristics and its current variations within the territory of the island. These descriptive aspects will be complemented with insights related to the research experiences and findings provided by the authors. This book will contribute to stirring new and modern interest about Sardinia, about further regional geographic studies, and about academic, scientific and cultural exchanges, among peoples and countries with both similar and different histories, identities, issues and hopes.
