Storia del medio evo dalla caduta dell'impero romano d'Occidente alla morte di Enrico VII di Lussemburgo (476-1313) Giovanni Bragagnolo 1894
Earthly Paradise Milad Doueihi 2009 Paradise has shaped our poetic and religious imagination and informed literary and theological accounts of man's relation with his creator, with language and history. Doueihi contemplates the philosophical reception and uses of Paradise, marked by the rise of critical and historical methods in the Early Modern period.

The Seven Spiritual Weapons Catherine of Bologna 2011-07-18 St. Catherine of Bologna, much venerated in her own city, has been little known outside of her native region but interest in her is now increasing. The outline of her life is clear and her own work, *The Seven Spiritual Weapons*, tells a good deal about her inner experiences and early years in the cloister. The introduction to this translation situates her life in the history of Ferrara and Bologna and studies how the external history of the community impinged on Catherine's own religious experience and how it was interwoven with her successful struggle against depression.

L'antica profezia Andrea Mattioli 2021-04-01 A Genova è appena avvenuto un macabro omicidio. Una donna - legata alle più alte sfere del Vaticano - è stata brutalmente uccisa, e con il suo sangue è stata disegnata una stella a cinque punte. Dietro a questo atto orribile sembra celarsi un progetto ancor più diabolico: il piano per scatenare una vera e propria Apocalisse. Il maestro André Vallé è chiamato per risolvere il caso, grazie al suo eccezionale intuito e alla sua straordinaria cultura. Affronterà un'avventura che lo porterà a scoprire luoghi occulti, rituali satanici e officine alchemiche, viaggiando da Genova a Lucedio, dalla Sacra di San Michele fino a Roma. Riuscirà a fermare l'Apocalisse?

Astronomy Before the Telescope C. B. F. Walker 1996 This book is the most comprehensive and authoritative survey to date of world astronomy before the invention of the telescope in AD 1609. International experts in every field have contributed chapters examining what observations were made, what instruments were used, the effect of developments in mathematics and measurement, and the diversity of early views of cosmology and astrology. A final chapter shows the importance to modern astronomers of the celestial observations recorded by their ancient predecessors, and especially their relevance to astrophysics, solar system studies and geophysics.

Geography and Revolution David N. Livingstone 2010-08-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. *Geography and Revolution* examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, *Geography and Revolution* is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

Frederick the Second Ernst Kantorowicz 2017-06-20 FREDERICK THE SECOND is the story of the remarkable man whose power and sphere of

influence straddled the worlds of Christendom and of Islam. The last of the Hohenstaufens, Holy Roman Emperor and King of Sicily and Jerusalem, Frederick II was an energetic and versatile ruler, a man of great ambition in whose lifetime the conflict between Emperor and Pope reached a new intensity. Excommunicated three times by the Church, he was an absolute monarch whose power, defended in almost continuous struggle, extended over much of Germany and Italy as well as the Holy Land. Frederick was a complex man of cultured tastes and licentious manners who had unusually wide intellectual interests. At his Sicilian court scholars of all religions were welcomed--Christian, Jewish, Mohammedan. He founded the University of Naples in 1224 and was a patron of the arts and sciences. The life of this dynamic man is fully explored in Ernst Kantorowicz's notable biography, filled with dramatic incident and absorbing detail, and written with style and scholarship.

The Art and Culture of Early Greece, 1100-480 B.C. Jeffrey M. Hurwit 1985 This handsomely illustrated book offers a broad synthesis of Archaic Greek culture. Unlike other books dealing with the art and architecture of the Archaic period, it places these subjects in their historical, social, literary, and intellectual contexts. Origins and originality constitute a central theme, for during this period representational and narrative art, monumental sculpture and architecture, epic, lyric, and dramatic poetry, the city-state (polis), tyranny and early democracy, and natural philosophy were all born.

The Man of Numbers Keith Devlin 2012-11-01 In 1202, a 32-year old Italian finished one of the most influential books of all time, which introduced modern arithmetic to Western Europe. Devised in India in the seventh and eighth centuries and brought to North Africa by Muslim traders, the Hindu-Arabic system helped transform the West into the dominant force in science, technology, and commerce, leaving behind Muslim cultures which had long known it but had failed to see its potential. The young Italian, Leonardo of Pisa (better known today as Fibonacci), had learned the Hindu number system when he traveled to North Africa with his father, a customs agent. The book he created was *Liber abbaci*, the 'Book of Calculation', and the revolution that followed its publication was enormous. Arithmetic made it possible for ordinary people to buy and sell goods, convert currencies, and keep accurate records of possessions more readily than ever before. *Liber abbaci*'s publication led directly to large-scale international commerce and the scientific revolution of the Renaissance. Yet despite the ubiquity of his discoveries, Leonardo of Pisa remains an enigma. His name is best known today in association with an exercise in *Liber abbaci* whose solution gives rise to a sequence of numbers - the Fibonacci sequence - used by some to predict the rise and fall of financial markets, and evident in myriad biological structures. In *The Man of Numbers*, Keith Devlin recreates the life and enduring legacy of an overlooked genius, and in the process makes clear how central numbers and mathematics are to our daily lives.

The Carolingian Economy Adriaan Verhulst 2002-10-17 This book is about the economy of the Carolingian empire (753-877), which extended from the Pyrenees and the northern shores of the Mediterranean to the North Sea, and from the Atlantic coast to the Elbe and Saale rivers. It is the first comprehensive evaluation of the topic to appear in English in over twenty years. Aspects of land and people, agrarian production and technique, craft and industry, and regional and international commerce are analysed, and the Carolingian economy is reassessed in a European context.

Litigation and Cooperation Lene Rubinstein 2000 Syn \diamond goroi are widely known in Athenian law to have served as supporting speakers and aids to the main prosecutors within a courtroom. Lene Rubinstein argues that these people were an important part of court practice and social and political litigation, though largely ignored in many previous studies of Athenian politics. Her study draws extensively on the speeches of syn \diamond goroi, revealing their multi-functionality as witnesses, as co-speakers alongside the main prosecutor and as part of a collaborative legal team.

Tell Me More Eleanor Duckworth 2001 In this wonderful collection, Duckworth and six of her colleagues describe learners (who range in age from five to adulthood) coming to connect with different subject matters—from politics to poetry, medicine to mapping. Their findings not only provide good readable stories, but also offer a unique look at people involved in real learning. "Duckworth and colleagues illustrate, with powerful and lively teaching examples, how theory related to the construction of knowledge by students can be implemented in the classroom. This book is a singular contribution to the literature on teaching and learning." —James A. Banks, University of Washington, Seattle "Duckworth has given us case studies of 'mid-wife' teaching at its very best. We see the fledgling ideas actually developing and gaining strength. Duckworth articulates her craft with the greatest care and insight. She gives her readers the sense they themselves are attendant at the birth of ideas, the miracle of creation." —Mary Field Belenky, co-author of *Women's Ways of Knowing* "Tell Me More is a fascinating and pioneering account of people working together over many weeks, struggling to invent ideas. This book is a must read for teachers and others who want to come to grips with fundamental problems facing all undefeated educators: What is thinking? How does it grow?" —Howard E. Gruber, Teachers College, Columbia University "These essays, in their concrete dailyness, give us a vision of what's possible, some crafterly advice about how to proceed, and the courage to try." —Deborah Meier, Principal, Mission Hill Elementary School, Boston
