Hazardous Materials Awareness and Operations Iafc 2010-03-10

A fire fighter's ability to recognize an incident involving hazardous materials is critical. They must possess the knowledge required to identify the presence of hazardous materials and weapons of mass destruction (WMD), and have an understanding of what their role is within the response plan. Hazardous Materials Awareness and Operations will provide fire fighters and first responders with these skills and enable them to keep themselves and others safe while mitigating these potentially deadly incidents. Hazardous Materials Awareness and Operations is the center of an integrated teaching and learning system that combines groundbreaking content with dynamic new features to support instructors and to help prepare students for the job. The text meets and exceeds the requirements for Fire Fighter I and II certification and satisfies the core competencies for operations level responders including the eight mission-specific responsibilities for first responders within the 2008 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. Additionally, the material presented also exceeds the hazardous materials response requirements of the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA). Hazardous Materials Awareness and Operations provides in-depth coverage of: the properties and effects of hazardous materials and WMDs; how to calculate potential danger and initiate a response plan; selection, use, advantages, and disadvantages of personal protective equipment; performing mass and technical decontamination; performing evidence preservation and sampling; performing product control. Performing air monitoring and sampling; performing victim rescue and recovery; and responding to illicit laboratory incidents. Listen to a Podcast with Hazardous Materials Awareness and Operations author Rob

Schnepp to learn more about this training program! Rob discusses the NFPA 472 standard, changes in responder training operations, and the importance of writing a "street smart" textbook. To listen now, visit:

In an effort to reduce the number of line-of-duty firefighting injuries and deaths, while at the same time being proactive in the fire service training and leadership, authors Richard Kolomay and Robert Hoff have drawn upon their combined 50+ years of firefighting experience to put together this comprehensive guide. The Combat Position Christopher Brennan 2011 Firefighting is combat and should be viewed as a warrior's calling. Firefighters

put themselves in harm's way to protect others, a selflessness rooted in the same noble drive as the military warriors who defend our nation. This book about combat is meant to be a guide for those who seek to follow a warrior's path, the path of the fire service warrior. Today's firefighter must be a warrior who will unflinchingly put his very life in harm's way to accomplish a mission, but who is also fully informed about the path being chosen. Embracing the philosophy of the fire service warrior, and striving for the ready position--the synthesis of physical and mental readiness that allows for optimum fireground performance--can reduce firefighter injuries and fatalities. The Combat Position: Achieving Firefighter Readiness will be an invaluable tool for firefighters, company officers, chief officers, and instructors.
