Handbook of Research on Children's and Young Adult Literature Shelby Wolf 2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

School Crisis Response Jeffrey C. Roth 2022-10-14 School Crisis Response introduces a unique educational approach that provides compelling scenarios for the development of school crisis responders. There are many books describing the how-to of school crisis response, but few describe the thoughts and emotions to help guide the application of skills learned. This book provides narratives about traumatic events to supplement concepts with lessons from actual crises. The author documents the perspective of a team leader, vividly illustrating real events to confront the challenges, decisions, and problem-solving demanded to effectively stabilize emotional reactions, ameliorate trauma, and support resilience and recovery. While encouraging reflection, educating, and strengthening new and experienced responders, this book celebrates the vital work of school psychologists, counselors, administrators, teachers, social workers, and nurses who provide extraordinary service under the most difficult circumstances. It combines an intellectual, evidence-based "in the head" understanding of how to do crisis response with an emotional, empathetic "in the heart" understanding of how it feels to do it.

Developing Social Competency in Young Children Christine A. Schmidt 2019-07-02 Social competency is a set of skills that provide children with the tools and abilities to successfully navigate the world around them. *Developing Social Competency in Young Children* looks at each of the seven Cs of social competence—communication, community building, coping, confidence, conflict resolution, control, and curiosity. During any given day, a child will enter and exit many group situations. More often than not, children lack the knowledge, experience, or emotional intelligence to be socially competent in all situations. There is not a switch or a specific age when children automatically become socially competent and adults often assume that when children reach a certain age or milestone they will know how to effectively employ the seven Cs of social competency without being taught. These skills must be taught and environments need to be designed to encourage the development of these skills while intentionally providing opportunities to test and hone them. *Developing Social Competency in Young Children* examines the role of the adult in

designing the environment and using intentional strategies to maximize a child's success. At the end of each skill discussed, there are parent and staff educational tips and strategies that can be used in everyday life.

Helping Those Experiencing Loss Robert J. Grover Professor Emeritus 2011-07-13 This book provides a guide for grieving youth and adults as well as extensive descriptive lists of recommended professional literature resources. Grief caused by loss is both a very common human experience and a highly individualized one. For example, children experience a number of losses that are unique to their young age—such as sibling and parent death, adoption, or divorce—and should be given special consideration by professionals and parents helping them in these situations. For gay, lesbian, or cohabiting heterosexual couples that suffer the loss of a partner, societal standards often deny the survivors in these relationships the right to grieve. *Helping Those Experiencing Loss: A Guide to Grieving Resources* is a book like no other, supplying compassionate information for navigating the emotional distress that every man and woman will experience in their lifetime, as well as a comprehensive guide to the literature of bereavement and grieving. It explains the grieving process, interpreting the results of research on the topic in plain language and addressing specific groups: children, young adults, parents who have lost a child, adults who have lost spouses, and the aging population.

Life and Loss Linda Goldman 2013-11-20 Many clinicians recognize that denying or ignoring grief issues in children leaves them feeling alone and that acknowledging loss is crucial part of a child's healthy development. Really dealing with loss in productive ways, however, is sometimes easier said than done. For decades, *Life and Loss* has been the book clinicians have relied on for a full and nuanced presentation of the many issues with which grieving children grapple as well as an honest exploration of the interrelationship between unresolved grief, educational success, and responsible citizenry. The third edition of *Life and Loss* brings this exploration firmly into the twenty-first century and makes a convincing case that children's grief is no longer restricted only to loss-

identified children. Children's grief is now endemic; it is global. Life and Loss is not just the book clinicians need to understand grief in the twenty-first century—it's the book they need to work with it in constructive ways.
