In the Shadow of the Gods Dominic Lieven 2022-06-07 A dazzling account of the men (and occasional woman) who led the world's empires, a book that probes the essence of leadership and power through the centuries and around the world. From the rise of Sargon of Akkad, who in the third millennium BCE ruled what is now Iraq and Syria, to the collapse of the great European empires in the twentieth century, the empire has been the dominant form of power in history.

Dominic Lieven's expansive book explores strengths and failings of the human beings who held those empires together (or let them crumble). He projects the power, terror, magnificence, and confidence of imperial monarchy, tracking what they had in common as well as what made some rise to glory and others fail spectacularly, and at what price each destiny was reached. Lieven's characters—Constantine, Chinggis Khan, Trajan, Suleyman, Hadrian, Louis XIV, Maria Theresa, Peter the Great, Queen Victoria, and dozens more—come alive with color, energy, and detail: their upbringings, their loves, their crucial spouses, their dreadful children. They illustrate how politics and government are a gruelling business: a ruler needed stamina, mental and physical toughness, and self-confidence. He or she needed the sound judgement of problems and people which is partly innate but also the product of education and experience. A good brain was essential for setting priorities, weighing conflicting advice, and matching ends to needs. A diplomatically astute marriage was often even more essential. Emperors (and the rare empresses) could be sacred symbols, warrior kings, political leaders, chief executive officers of the government machine, heads of a family, and impresarios directing the many elements of "soft power" essential to any regime's survival. What was it like to live and work in such an extraordinary role? What qualities did it take to perform this role successfully? Lieven traces the shifting balance among these elements across eras that encompass a staggering array of events from the rise of the world's great religions to the scientific revolution, the expansion of European empires across oceans, the great twentieth century conflicts, and the triumph of nationalism over imperialism. The rule of the emperor may be over, but Lieven shows us how we live with its political and cultural legacies today.

One summer. Two rivals. A plot twist they didn't see coming... Nora Stephens' life is books—she's read them all—and she is not that type of heroine. Not the plucky one, not the laidback dream girl, and especially not the sweetheart. In fact, the only people Nora is a heroine for are her clients, for whom she lands enormous deals as a cutthroat literary agent, and her beloved little sister Libby. Which is why she agrees to go to Sunshine Falls, North Carolina for the month of August when Libby begs her for a sisters' trip away—with visions of a small town transformation for Nora, who she's convinced needs to become the heroine in her own story. But instead of picnics in meadows, or run-ins with a handsome country doctor or bulging-forearmed bartender, Nora keeps bumping into Charlie Lastra, a bookish brooding editor from back in the city. Medical Heroes and Heretics Wayne Martin 1977 Orthodox science -- particularly in the medical

profession -- has for centuries resisted change. It traces back at least as far as Socrates who was done to death for corrupting youth with his innovative ideas. In recent times, practically all the great advances in medicine have been made against a powerfully entrenched orthodoxy. Wayne Martin's book is about some of the men involved -- then and now: Oliver Wendell Holmes, Sr., who made physicians wash their hands; Louis Pasteur, who postulated the connection between bacteria and certain diseases; Frederick Banting, who discovered insulin; Jonas Salk, who solved the mystery of polio, to mention but a few. These men all braved the wrath of the medical establishment of their day. Heretics they were, but Heroes they became. Similarly, today a group of brave pioneers are fighting the same fight. They are, says the author, the heroes of tomorrow: Ernst Krebs, Jr., Evan Shute, Dean Burk, Denis Burkitt, Virginia Livingston and a dozen others, all of whose careers and findings are described here by a man who has pursued his topic for the past ten years.

Things Fall Apart Chinua Achebe 2009-06-05 THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a "strong man" of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within.

River of the Gods Candice Millard 2022-05-17 NEW YORK TIMES BESTSELLER • The harrowing story of one of the great feats of exploration of all time and its complicated legacy—from the New York Times bestselling author of *The River of Doubt* and *Destiny of the Republic* A BEST BOOK OF THE YEAR: THE WASHINGTON POST • GOODREADS "A lean, fast-paced account of the almost absurdly dangerous quest by [Richard Burton and John Speke] to solve the geographic riddle of their era." —The New York Times Book Review For millennia the location of the Nile River's headwaters was shrouded in mystery. In the 19th century, there was a frenzy of interest in ancient Egypt. At the same time, European powers sent off waves of explorations intended to map the unknown corners of the globe - and extend their colonial empires. Richard Burton and John Hanning Speke were sent by the Royal Geographical Society to claim the prize for England. Burton spoke twenty-nine languages, and was a decorated soldier. He was also mercurial, subtle, and an iconoclastic atheist. Speke was a

young aristocrat and Army officer determined to make his mark, passionate about hunting, Burton's opposite in temperament and beliefs. From the start the two men clashed. They would endure tremendous hardships, illness, and constant setbacks. Two years in, deep in the African interior, Burton became too sick to press on, but Speke did, and claimed he found the source in a great lake that he christened Lake Victoria. When they returned to England, Speke rushed to take credit, disparaging Burton. Burton disputed his claim, and Speke launched another expedition to Africa to prove it. The two became venomous enemies, with the public siding with the more charismatic Burton, to Speke's great envy. The day before they were to publicly debate, Speke shot himself. Yet there was a third man on both expeditions, his name obscured by imperial annals, whose exploits were even more extraordinary. This was Sidi Mubarak Bombay, who was enslaved and shipped from his home village in East Africa to India. When the man who purchased him died, he made his way into the local Sultan's army, and eventually traveled back to Africa, where he used his resourcefulness, linguistic prowess and raw courage to forge a living as a guide. Without Bombay and men like him, who led, carried, and protected the expedition, neither Englishman would have come close to the headwaters of the Nile, or perhaps even survived. In *River of the Gods* Candice Millard has written another peerless story of courage and adventure, set against the backdrop of the race to exploit Africa by the colonial powers.
