Richard Misrach: The Mysterious Opacity of Other Beings (Signed Edition) Richard Misrach 2015-06-23 Since the publication of Richard Misrach's bestselling and critically acclaimed publication *On the Beach*, he has continued to photograph at the same location, building a body of work that has been exhibited as *On the Beach 2.0*--a reference to the technological and optical developments that have made the intensely detailed, exquisitely rendered depictions possible. *The Mysterious Opacity of Other Beings* focuses less on the abstraction of water, sand and mote-sized figures, instead honing in on the gestures and expressions of bathers adrift in the ocean. Misrach has rarely ventured into portraiture; this work is his first to focus exclusively on the human figure. Each photograph features one or more individuals crisply rendered from a distance, as they seem to levitate among turquoise waves, isolated from everything save the shifting patterns of the ocean. There is ambiguity and a sense of the uncanny in the figures suspended in the water: are they approaching the shore or moving away from it? Each image is presented both as full frame and as a series of enlarged details that enable the viewer to linger on each individual's surrender of their body to the sea.

Cities in the Wilderness Bruce Babbitt 2007-08-03 In this brilliant, gracefully written, and important new book, former Secretary of the Interior and Governor of Arizona Bruce Babbitt brings fresh thought--and fresh air--to questions of how we can build a future we want to live in. We've all experienced America's changing natural landscape as the integrity of our forests, seacoasts, and river valleys succumbs to strip malls, new roads, and subdivisions. Too often, we assume that when land is developed it is forever lost to the natural world--or hope that a patchwork of local conservation strategies can somehow hold up against further large-scale development. In *Cities in the Wilderness*, Bruce Babbitt makes the case for why we need a national vision of land use. We may have a space program, he points out, but here at home we don't have an open-space policy that can balance the needs for human settlement and community with those for preservation of the natural world upon which life depends. Yet such a balance, the author demonstrates, is as remarkably achievable as it is necessary. This is no call for developing a new federal bureaucracy; Babbitt shows instead how much can be--and has been--done by making thoughtful and beneficial use of laws and institutions already in place. A hallmark of the book is the author's ability to match imaginative vision with practical understanding. Babbitt draws on his extensive experience to take us behind the scenes negotiating the Florida Everglades restoration project, the largest ever authorized by Congress. In California, we discover how the Endangered Species Act, still one of the most effective laws governing land use, has been employed to restore regional habitat. In the Midwest, we see how new World Trade Organization regulations might be used to help restore Iowa's farmlands and rivers. As a key architect of many environmental success stories, Babbitt reveals how broad restoration projects have thrived through federal- state partnership and how their principles can be extended to other parts of the country. Whether writing of land use as reflected in the Gettysburg battlefield, the movie *Chinatown*, or in presidential political strategy, Babbitt gives us fresh insight. In this inspiring and informative book, Babbitt sets his lens to panoramic--and offers a vision of land use as grand as the country's natural heritage.

The Routledge Companion to Photography Theory Mark Durden 2019-11-07 With newly commissioned essays by some of the leading writers on photography today, this companion tackles some of the most pressing questions about photography theory's direction, relevance, and purpose. This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory. Having assimilated the histories of semiotic analysis and post-structural theory, critiques of representation continue to move away from the notion of original and copy and towards materiality, process, and the interdisciplinary. The implications of what it means to 'see' an image is now understood to encompass, not only the optical, but the conceptual, ethical, and haptic experience of encountering an image. The 'fractal' is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to photographs and lend nuances to what essentially underlies any photography theory -- that is, the relationship of the image to the real world and how we conceive what that means. Diverse in its scope and themes, *The Routledge Companion to Photography Theory* is an indispensable collection of essays and interviews for students, researchers, and teachers. The volume also features extensive images, including beautiful colour plates of key photographs.

Atlas of Material Worlds Matthew Seibert 2021-08-17 *Atlas of Material Worlds* is a highly designed narrative atlas illustrating the agency of nonliving materials with unique, ubiquitous, and often hidden influence on our daily lives. Employing new materialism as a jumping-off point, it examines the increasingly blurry lines between the organic and inorganic, engaging the following questions: What roles do nonliving materials play? Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded? If so, does this material agency change our understanding of the social structures, ecologies, economies, cosmologies, technologies, and landscapes that surround us? And, perhaps most importantly, why does material agency matter? This is the story of the world's driest nonpolar desert, pink flamingos, and cerulean blue lithium ponds; industrial shipping logistics, pudding-like jiggling substrates, and monuments of mud; galactic bodies, radioactive sheep, and the yellowcake of uranium. Put simply, this book dares readers to see the world anew, from material up. *Atlas of Material Worlds* offers this new relationship to our host environment in a time of mounting crises--accelerating climate change, ballooning socioeconomic inequality, and rising toxic nationalism--uniquely telling materialist stories for practitioners and students in landscape, architecture, and other built environment disciplines.

Design of Blast-resistant Buildings in Petrochemical Facilities Society of Civil Engineers. Task Committee on Blast Resistant Design 2010 This updated edition provides general guidelines for the structural design of blast-resistant petrochemical facilities. Information is provided for U.S. Occupational Safety and Health Administration (OSHA) requirements, design objectives, siting considerations, and load determination, and references cite sources of detailed information. Detailed coverage is provided for types of construction, dynamic material strengths, allowable response criteria, analysis methods, and design procedures. Typical details and ancillary considerations, such as doors and windows, are also included. A how-to discussion on the upgrade of existing buildings is provided for older facilities which may not meet current needs. Three example calculations are included to illustrate design procedures.

Believing Is Seeing Errol Morris 2014-05-27 Academy Award-winning director Errol Morris turns his eye to the nature of truth in photography In his inimitable style, Errol Morris untangles the mysteries behind an eclectic range of documentary photographs. With his keen sense of irony, skepticism, and humor, Morris shows how photographs can obscure as much as they reveal, and how what we see is often determined by our beliefs. Each essay in this book is part detective story, part philosophical meditation, presenting readers with a conundrum, and investigates the relationship between photographs and the real world they supposedly record. *Believing Is Seeing* is a highly original exploration of photography and perception, from one of America's most provocative observers.

The Gulf: The Making of An American Sea Jack E. Davis 2017-03-14 Winner of the 2018 Pulitzer Prize for History Winner of the 2017 Kirkus Prize for Nonfiction A National Book Critics Circle Award for Nonfiction Finalist A New York Times Notable Book of 2017 One of the Washington Post's Best Books of the Year In this "cri de coeur about the Gulf's environmental ruin" (New York Times), "Davis has written a beautiful homage to a neglected sea" (front page, New York Times Book Review). Hailed as a "nonfiction epic . . . in the tradition of Jared Diamond's best-seller *Collapse*, and Simon Winchester's *Atlantic*" (Dallas Morning News), Jack E.

Davis's *The Gulf* is "by turns informative, lyrical, inspiring and chilling for anyone who cares about the future of 'America's Sea' " (Wall Street Journal). Illuminating America's political and economic relationship with the environment from the age of the conquistadors to the present, Davis demonstrates how the Gulf's fruitful ecosystems and exceptional beauty empowered a growing nation. Filled with vivid, untold stories from the sportfish that launched Gulfside vacationing to Hollywood's role in the country's first offshore oil wells, this "vast and welltold story shows how we made the Gulf . . . [into] a 'national sacrifice zone' " (Bill McKibben). The first and only study of its kind, *The Gulf* offers "a unique and illuminating history of the American Southern coast and sea as it should be written" (Edward O. Wilson).

Spying on the South Tony Horwitz 2020-05-12 The New York Times bestselling final book by the beloved, Pulitzer-Prize winning historian Tony Horwitz. With *Spying on the South*, the best-selling author of *Confederates in the Attic* returns to the South and the Civil War era for an epic adventure on the trail of America's greatest landscape architect. In the 1850s, the young Frederick Law Olmsted was adrift, a restless farmer and dreamer in search of a mission. He found it during an extraordinary journey, as an undercover correspondent in the South for the up-and-coming New York Times. For the Connecticut Yankee, pen name "Yeoman," the South was alien, often hostile territory. Yet Olmsted traveled for 14 months, by horseback, steamboat, and stagecoach, seeking dialogue and common ground. His vivid dispatches about the lives and beliefs of Southerners were revelatory for readers of his day, and Yeoman's remarkable trek also reshaped the American landscape, as Olmsted sought to reform his own society by creating democratic spaces for the uplift of all. The result: Central Park and Olmsted's career as America's first and foremost landscape architect. Tony Horwitz rediscovers Yeoman Olmsted amidst the discord and polarization of our own time. Is America still one country? In search of answers, and his own adventures, Horwitz follows Olmsted's tracks and often his mode of transport (including muleback): through Appalachia, down the Mississippi River, into bayou Louisiana, and across Texas to the contested Mexican borderland. Venturing far off beaten paths, Horwitz uncovers bracing vestiges and strange new mutations of the Cotton Kingdom. Horwitz's intrepid and often hilarious journey through an outsized American landscape is a masterpiece in the tradition of *Great Plains*, *Bad Land*, and the author's own classic, *Confederates in the Attic*.

American Policy and the Reconstruction of West Germany, 1945-1955 Jeffrey M. Diefendorf 1993 This volume of essays by German and American historians discusses key issues of US policy toward Germany in the decade following World War II.

The World We Need Audrea Lim 2021-05-04 The inspiring people and grassroots organizations that are on the front lines of the battle to save the planet As the world's scientists have come together and declared a "climate emergency," the fight to protect our planet's ecological resources and the people that depend on them is more urgent than ever. But the real battles for our future are taking place far from the headlines and international conferences, in mostly forgotten American communities where the brutal realities of industrial pollution and environmental degradation have long been playing out. *The World We Need* provides a vivid introduction to America's largely unsung grassroots environmental groups—often led by activists of color and the poor—valiantly fighting back in America's so-called sacrifice zones against industries poisoning our skies and waterways and heating our planet. Through original reporting, profiles, artwork, and interviews, we learn how these activist groups, almost always working on shoestring budgets, are devising creative new tactics; building sustainable projects to transform local economies; and organizing people long overlooked by the environmental movement—changing its face along the way. Capturing the riveting stories and hard-won strategies from a broad cross section of pivotal environmental actions—from Standing Rock to Puerto Rico—*The World We Need* offers a powerful new model for the larger environmental movement, and inspiration for concerned citizens everywhere.

Sustainable Urban Agriculture in Cuba Sinan Koont 2016-11-30 Sinan Koont has spent the last several years researching urban agriculture in Cuba, including field work at many sustainable farms on the island. He tells the story of why and how Cuba was able to turn to urban food production on a large scale with minimal use of chemicals, petroleum, and machinery, and of the successes it achieved--along with the continuing difficulties it still faces in reducing its need for food imports--

Leveraging Synergies Between Refining and Petrochemical Processes Eberhard Lucke 2020-12-18 *Leveraging Synergies Between Refining and Petrochemical Processes* provides a detailed description of the interfaces and connections between crude oil refining and petrochemicals. It offers a view of global and regional markets and economic opportunities for synergies between these sectors. Features: Shows a global and regional market outlook for crude oil refining and petrochemical sectors Explores economic and market opportunities for taking advantage of the synergies between both sectors Analyzes the technical challenges and opportunities that come with these synergies Gives an outlook and prediction of what companies will be able to achieve in the mid-term future Provides introductory and explanatory material as well as in-depth insight into future technology and market developments This book serves as a reference for professionals in chemical engineering, oil and gas engineering, and industrial chemistry. It aims to help engineers and industry professionals understand the challenges and the potential benefits of developing expansion or optimization projects that may bridge the gap between refining and petrochemicals.

Petrochemical America Richard Misrach 2014 In fall 2012, the hardcover edition of this book was released to critical acclaim and received several awards, including the 2013 American Society of Landscape Architects Honor Award for its innovative collaborative approach and design. Now available in a smaller, more affordable paperback edition, *Petrochemical America* features Richard Misrach's haunting photographic record of Louisiana's Chemical Corridor, accompanied by landscape architect Kate Orff's Ecological Atlas series of speculative drawings developed through research and mapping of data from the region. Their joint effort depicts and unpacks the complex cultural, physical, and economic ecologies along 150 miles of the Mississippi River, from Baton Rouge to New Orleans, an area of intense chemical production that first garnered public attention as Cancer Alley when unusual occurrences of cancer were discovered in the region. This collaboration has resulted in an unprecedented, multilayered document presenting a unique narrative of visual information. *Petrochemical America* offers in-depth analysis of the causes of decades of environmental abuse along the largest river system in North America. Even more critically, the project offers an extensively researched guidebook to the ways in which the petrochemical industry has permeated every facet of contemporary life. What is revealed over the course of the book, however, is that Cancer Alley—although complicated by its own regional histories and particularities—may well be an apt metaphor for the global impact of petrochemicals on the human landscape as a whole.

Richard Misrach on Landscape and Meaning Richard Misrach 2020-06-04 In 'The Photography Workshop Series', Aperture Foundation works with the world's top photographers to distill their creative approaches, teachings, and insights on photography - offering the workshop experience in a book. Our goal is to inspire photographers of all levels who wish to improve their work, as well as readers interested in deepening their understanding of the art of photography.00In this book, Richard Misrach - well known for his sublime and expansive landscapes that focus on the relationship between humans and their environment - offers his insight on creating photographs that are visually beautiful and have cultural implications. Through images and words, he shares his own creative process and discusses a wide range of issues, from the language of color photography and the play of light and atmosphere, to transcending place and time through metaphor, myth, and abstraction.

Beyond the City Felipe Correa 2016-06-07 During the last decade, the South American continent has seen a strong push for transnational integration, initiated by the former Brazilian president Fernando Henrique Cardoso, who (with the endorsement of eleven other nations) spearheaded the Initiative for the Integration of Regional Infrastructure in South America (IIRSA), a comprehensive energy, transport, and communications network. The most aggressive transcontinental integration project ever planned for South America, the initiative systematically deploys ten east-west infrastructural corridors, enhancing economic development but raising important questions about the polarizing effect of pitting regional needs against the colossal processes of resource extraction. Providing much-needed historical contextualization to IIRSA's agenda, *Beyond the City* ties together a series of spatial models and offers a survey of regional strategies in five case studies of often overlooked sites built outside the traditional South American urban constructs. Implementing the term "resource extraction urbanism," the architect and urbanist Felipe Correa takes us from Brazil's nineteenth-century regional capital city of Belo Horizonte to the experimental, circular, "temporary" city of Vila Piloto in

Três Lagoas. In Chile, he surveys the mining town of María Elena. In Venezuela, he explores petrochemical encampments at Judibana and El Tablazo, as well as new industrial frontiers at Ciudad Guayana. The result is both a cautionary tale, bringing to light a history of societies that were "inscribed" and administered, and a perceptive examination of the agency of architecture and urban planning in shaping South American lives.

How the Word Is Passed Clint Smith 2021-06-01 This "important and timely" (Drew Faust, Harvard Magazine) #1 New York Times bestseller examines the legacy of slavery in America—and how both history and memory continue to shape our everyday lives. Beginning in his hometown of New Orleans, Clint Smith leads the reader on an unforgettable tour of monuments and landmarks—those that are honest about the past and those that are not—that offer an intergenerational story of how slavery has been central in shaping our nation's collective history, and ourselves. It is the story of the Monticello Plantation in Virginia, the estate where Thomas Jefferson wrote letters espousing the urgent need for liberty while enslaving more than four hundred people. It is the story of the Whitney Plantation, one of the only former plantations devoted to preserving the experience of the enslaved people whose lives and work sustained it. It is the story of Angola, a former plantation-turned-maximum-security prison in Louisiana that is filled with Black men who work across the 18,000-acre land for virtually no pay. And it is the story of Blandford Cemetery, the final resting place of tens of thousands of Confederate soldiers. A deeply researched and transporting exploration of the legacy of slavery and its imprint on centuries of American history, *How the Word Is Passed* illustrates how some of our country's most essential stories are hidden in plain view—whether in places we might drive by on our way to work, holidays such as Juneteenth, or entire neighborhoods like downtown Manhattan, where the brutal history of the trade in enslaved men, women, and children has been deeply imprinted. Informed by scholarship and brought to life by the story of people living today, Smith's debut work of nonfiction is a landmark of reflection and insight that offers a new understanding of the hopeful role that memory and history can play in making sense of our country and how it has come to be. Winner of the National Book Critics Circle Award for Nonfiction Winner of the Stowe Prize Winner of 2022 Hillman Prize for Book Journalism A New York Times 10 Best Books of 2021

Phantom Stories Ashlyn Paige Davis 2015 For over forty years, Richard Misrach has been photographing the American landscape, interweaving the politics and poetics of place in the form of striking, large-scale photographs. He is considered a pioneer of color photography, and his work continues to provoke questions about culpability, American identity, and the peculiarities of place, particularly in the American West. Breaking with this geographical trajectory in 1998, Misrach turned his lens to the southeast to explore the relationship between Louisiana's chemical corridor and the rest of the country. This project, *Petrochemical America* (2012), is a collaboration between Misrach and landscape architect and sustainability researcher, Kate Orff. Through a combination of Misrach's photographs and Orff's text and elaborate maps, *Petrochemical America* exposes the complex web of social, political, and environmental histories that have variously impacted the construction of place, home, and culture in an area that has come to be known as Cancer Alley. Misrach and Orff argue that Cancer Alley is not a localized phenomenon, but rather is indicative of the ideological landscape of the entire country. Through their compendium of surreal images of homes dwarfed by chemical plants, pipelines cutting through swamps, and preserved slave quarters, Misrach and Orff create an otherworldly environment, a place that is wholly American. The authors draw explicit links—through both image and text—between Louisiana's past as a slave state and its present as the largest crude oil producer in the nation. Through narratives of production, consumption, displacement, and health, the present Cancer Alley—and indeed the nation—emerge as reiterations of history. While *Petrochemical America* has been exhibited around the country, published in a book which is now in its second edition, and received critical praise, it has yet to be studied within the three histories that frame the project—race, capitalism, and the environment. Through a close reading of *Petrochemical America* in both its exhibition and photobook form, this essay seeks to explore how the project points to a new paradigm of the American landscape—a landscape that is haunted by its slaveholding past.

Toward an Urban Ecology Kate Orff 2016-07-12 Kate Orff, 2017 MacArthur Fellow, has an optimistic and transformative message about our world: we can bring together social and ecological systems to sustainably remake our cities and landscapes. Part monograph, part manual, part manifesto, *Toward an Urban Ecology* reconceives urban landscape design as a form of activism, demonstrating how to move beyond familiar and increasingly outmoded ways of thinking about environmental, urban, and social issues as separate domains; and advocating for the synthesis of practice to create a truly urban ecology. In purely practical terms, SCAPE has already generated numerous tools and techniques that designers, policy makers, and communities can use to address some of the most pressing issues of our time, including the loss of biodiversity, the loss of social cohesion, and ecological degradation. *Toward an Urban Ecology* features numerous projects and select research from SCAPE, and conveys a range of strategies to engender a more resilient and inclusive built environment.

Petrochemical Economics Duncan Seddon 2010 This compendium gives an overview of the technologies and economics in the production of olefins in the petrochemical industries. It highlights the options and costs for producing olefins using different technologies and different feedstocks at a time when the cost of carbon dioxide emissions are set to be included in the production cost. Industry professionals, engineers, research scientists and financiers will find this title a valuable resource.

Richard Misrach: Petrochemical America (Signed Edition) 2012-10-31 "The photographs in this volume are untitled: they are presented in chronological order from November 20, 2011, 4:07 p.m. to January 28, 2014, 1:12 p.m."--Colophon.

A Living Past John Soluri 2018-02-19 Though still a relatively young field, the study of Latin American environmental history is blossoming, as the contributions to this definitive volume demonstrate. Bringing together thirteen leading experts on the region, *A Living Past* synthesizes a wide range of scholarship to offer new perspectives on environmental change in Latin America and the Spanish Caribbean since the nineteenth century. Each chapter provides insightful, up-to-date syntheses of current scholarship on critical countries and ecosystems (including Brazil, Mexico, the Caribbean, the tropical Andes, and tropical forests) and such cross-cutting themes as agriculture, conservation, mining, ranching, science, and urbanization. Together, these studies provide valuable historical contexts for making sense of contemporary environmental challenges facing the region.

Richard Misrach and Guillermo Galindo: Border Cantos (Signed Edition) 2016-04-26 This project presents a unique collaboration between photographer Richard Misrach and composer and performer Guillermo Galindo. Misrach has been photographing the 2,000-mile border between the US and Mexico since 2004, with increased focus since 2009--the latest installation in his ongoing series *Desert Cantos*, a multifaceted approach to the study of place and man's complex relationship to it. Misrach and Galindo have been working together to create pieces that both document and transform the artifacts of migration. Using water bottles, clothing, backpacks, Border Patrol drag tires, spent shotgun shells, ladders and sections of the border wall itself, most of which were collected by Misrach, Galindo fashions instruments to be performed as unique sound-generating devices. He also imagines graphic musical scores, many of which also use Misrach's photographs as points of departure. A unique melding of the artist as documentarian and interpreter, the book includes several suites of photographs drawn from a number of distinct series or Cantos, some made with a large-format camera as well as an iPhone. The book contains a compilation of two dozen sculpture-instruments, graphic scores, instrument designs and links to videos of performances by Galindo.

Strangers in Their Own Land Arlie Russell Hochschild 2018-02-20 The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, The New York Times Book Review When Donald Trump won the 2016 presidential election, a bewildered nation turned to *Strangers in Their Own Land* to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the *New Republic*, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

The War on Science Shawn Otto 2016-06-07 An "insightful" and in-depth look at anti-science politics and its deadly results (Maria Konnikova, New York Times–bestselling author of *The Biggest Bluff*). Thomas Jefferson said, "Wherever the people are well informed, they can be trusted with their own government." But what happens when they aren't? From climate change to vaccinations, transportation to technology, health care to defense, we are in the midst of an unprecedented expansion of scientific progress—and a simultaneous expansion of danger. At the very time we need them most, scientists and the very idea of objective knowledge are being bombarded by a vast, well-funded war on science, and the results are deadly. Whether it's driven by identity politics, ideology, or industry, the result is an unprecedented erosion of thought in Western democracies as voters, policymakers, and justices actively ignore scientific evidence, leaving major policy decisions to be based more on the demands of the most strident voices. This compelling book investigates the historical, social, philosophical, political, and emotional reasons why evidence-based politics are in decline and authoritarian politics are once again on the rise on both left and right—and provides some compelling solutions to bring us to our collective senses, before it's too late. "If you care about attacks on climate science and the rise of authoritarianism, if you care about biased media coverage and shake-your-head political tomfoolery, this book is for you."—The Guardian

Napalm Robert M. Neer 2013-04-01 Napalm was invented on Valentine's Day 1942 at a secret Harvard war research laboratory. It created an inferno that killed over 87,500 people in Tokyo—more than died in the atomic explosions at Hiroshima or Nagasaki—and went on to incinerate 64 Japanese cities. The Bomb got the press, but napalm did the work. Robert Neer offers the first history.

Toxic Truths Thom Davies 2020-06-15 Post-truth politics have threatened science itself. Drawing on case studies from around the world, *Toxic Truths* examines enduring issues and new challenges for tackling environmental injustice in a post-truth age.

Is It Safe? Sarah A. Vogel 2013 We are all just a little bit plastic. Traces of bisphenol A or BPA, a chemical used in plastics production, are widely detected in our bodies and environment. Is this chemical, and its presence in the human body, safe? What is meant by safety? Who defines it, and according to what information? *Is It Safe?* narrates how the meaning of the safety of industrial chemicals has been historically produced by breakthroughs in environmental health research, which in turn trigger contests among trade associations, lawyers, politicians, and citizen activists to set new regulatory standards. Drawing on archival research and extensive interviews, author Sarah Vogel explores the roots of the contemporary debate over the safety of BPA, and the concerns presented by its estrogen-like effects even at low doses. Ultimately, she contends that science alone cannot resolve the political and economic conflicts at play in the definition of safety. To strike a sustainable balance between the interests of commerce and public health requires recognition that powerful interests will always try to shape the criteria for defining safety, and that the agenda for environmental health research should be protected from capture by any single interest group.

Hard Luck and Heavy Rain Joseph C. Russo 2022-11-25 In *Hard Luck and Heavy Rain* Joseph C. Russo takes readers into the everyday lives of the rural residents of Southeast Texas. He encounters the region as a kind of world enveloped in on itself, existing under a pall of poverty, illness, and oil refinery smoke. His informants' stories cover a wide swath of experiences, from histories of LGBTQ+ life and the local petrochemical industries to religiosity among health food store employees and the suffering of cancer patients living in the Refinery Belt. Russo frames their hard-luck stories as forms of verbal art and poetic narrative that render the region a mythopoetic landscape that epitomizes the impasse of American late capitalism. He shows that in this severe world, questions of politics and history are not cut and dry, and its denizens are not simply backward victims of circumstances. Russo demonstrates that by challenging classist stereotypes of rural Americans as passive, ignorant, and uneducated, his interlocutors offer significant insight into the contemporary United States.

Sacrifice Zones Steve Lerner 2012-09-14 The stories of residents of low-income communities across the country who took action when pollution from heavy industry contaminated their towns. Across the United States, thousands of people, most of them in low-income or minority communities, live next to heavily polluting industrial sites. Many of them reach a point at which they say "Enough is enough." After living for years with poisoned air and water, contaminated soil, and pollution-related health problems, they start to take action—organizing, speaking up, documenting the effects of pollution on their neighborhoods. In *Sacrifice Zones*, Steve Lerner tells the stories of twelve communities, from Brooklyn to Pensacola, that rose up to fight the industries and military bases causing disproportionately high levels of chemical pollution. He calls these low-income neighborhoods "sacrifice zones." And he argues that residents of these sacrifice zones, tainted with chemical pollutants, need additional regulatory protections. *Sacrifice Zones* goes beyond the disheartening statistics and gives us the voices of the residents themselves, offering compelling portraits of accidental activists who have become grassroots leaders in the struggle for environmental justice and details the successful tactics they have used on the fenceline with heavy industry.

Phyto Kate Kennen 2015-05-01 Winner of the 2017 CBHL Literature Award of Excellence in Landscape Design and Architecture *Phyto* presents the concepts of phytoremediation and phytotechnology in one comprehensive guide, illustrating when plants can be considered for the uptake, removal or mitigation of on-site pollutants. Current scientific case studies are covered, highlighting the advantages and limitations of plant-based cleanup. Typical contaminant groups found in the built environment are explained, and plant lists for mitigation of specific contaminants are included where applicable. This is the first book to address the benefits of phytotechnologies from a design point of view, taking complex scientific terms and translating the research into an easy-to-understand reference book for those involved in creating planting solutions. Typically, phytotechnology planting techniques are currently employed post-site contamination to help clean up already contaminated soil by taking advantage of the positive effects that plants can have upon harmful toxins and chemicals. This book presents a new concept to create projective planting designs with preventative phytotechnology abilities, 'phytobuffering' where future pollution may be expected for particular site programs. Filled with tables, photographs and detailed drawings, Kennen and Kirkwood's text guides the reader through the process of selecting plants for their aesthetic and environmental qualities, combined with their contaminant-removal benefits.

Open Veins of Latin America Eduardo Galeano 1997 [In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history.

[The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

Border Cantos 2016 "[Richard Misrach] saw the border, [Guillermo Galindo] heard it, and by coming together across that line of artistic practice, they've now created these 'border cantos.' Misrach has been using the canto literary structure, borrowed from Dante and Ezra Pound, as a way of organizing his long-term photographic project, Desert cantos (1979 to present). But here the canto also moves off the page and into sound, opening up into Galindo's practice. In Italian, canto means 'song'; in Spanish, 'singing' and 'chant.' In this sense, all cantos are part eye and part ear, able to be seen and heard at once."--Page 10.

Petrochemical America :

In today digital age, eBooks have become a staple for both leisure and learning. The convenience of accessing Petrochemical America and various genres has transformed the way we consume literature. Understanding Petrochemical America

Before you embark on your journey to find Petrochemical America online, it's essential to grasp the concept of Petrochemical America eBook formats. Petrochemical America come in various formats, each with its own unique features and compatibility. Understanding these formats will help you choose the right one for your device and preferences.

Different Petrochemical America eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Petrochemical America eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.
