Handbook of the Life Course Michael J. Shanahan 2015-10-26 Building on the success of the 2003 Handbook of the Life Course, this second volume identifies future directions for life course research and policy. The introductory essay and the chapters that make up the five sections of this book, show consensus on strategic “next steps” in life course studies. These next steps are explored in detail in each section: Section I, on life course theory, provides fresh perspectives on well-established topics, including cohorts, life stages, and legal and regulatory contexts. It challenges life course scholars to move beyond common individualistic paradigms. Section II highlights changes in major institutional and organizational contexts of the life course. It draws on conceptual advances and recent empirical findings to identify promising avenues for research that illuminate the interplay between structure and agency. It examines trends in family, school, and workplace, as well as contexts that deserve heightened attention, including the military, the criminal justice system, and natural and man-made disaster. The remaining three sections consider advances and suggest strategic opportunities in the study of health and development throughout the life course. They explore methodological innovations, including qualitative and three-generational longitudinal research designs, causal analysis, growth curves, and the study of place. Finally, they show ways to build bridges between life course research and public policy.

New Life Courses, Social Risks and Social Policy in East Asia Raymond K. H. Chan 2015-10-30 Social policy in modern industrialised societies is increasingly challenged by new social risks. These include insecure employment resulting from ever more volatile labour markets, new family and gender relationships resulting from the growing participation of women in the labour market, and the many problems resulting from very much longer human life expectancy. Whereas once social policy had to be in step with a standardised, relatively stable and predictable life course, it now has to cope with non-standardised individual preferences, life courses and families, and the consequent increased risks and uncertainties. This book examines these new life courses and their impact on social policy across a range of East Asian societies. It shows how governments and social welfare institutions have been slow to respond to the new challenges. In response, we propose a life-course sensitised policy as an approach to manage these risks. Overall, the book provides many new insights which will assist advance social policy in East Asia.

A Roadmap to Reducing Child Poverty National Academies of Sciences, Engineering, and Medicine 2019-09-16 The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

Social Stratification Roxanne Connelly 2016-04-01 Research into social stratification and social divisions has always been a central component of sociological study. This volume brings together a range of thematically organised case-studies comprising empirical and methodological analyses addressing the challenges of studying trends and processes in social stratification. This collection has four themes. The first concerns the measurement of social stratification, since the problem of relating concepts, measurements and operationalizations continues to cause difficulties for sociological analysis. This book clarifies the appropriate deployment of existing measurement options, and presents new empirical strategies of measurement and interpretation. The conception of the life course and individual social biography is very popular in modern sociology. The second theme of this volume exploits the contemporary expansion of micro-level longitudinal data and the analytical approaches available to researchers to exploit such records. It comprises chapters which exemplify innovative empirical analysis of life-course processes in a longitudinal context, thus offering an advance on previous sociological accounts concerned with longitudinal trends and processes. The third theme of the book concerns the interrelationship between contemporary demographic, institutional and socioeconomic transformations and structures of social inequality. Although the role of wider social changes is rarely neglected in sociological reviews, such changes continue to raise analytical challenges for any assessment of empirical differences and trends. The fourth theme of the book discusses selected features of policy and political responses to social stratification. This volume will be of interest to students, academics and policy experts working in the field of social stratification.

The Child's Journey Through Care Dorota Iwaniec 2006-08-04 This book focuses on children's journeys through the care system, from voluntary admission into care, through complicated and often long court proceedings, in pursuit of Care or Freeing Orders. Problems that arise from taking cases through the courts are examined, together with tensions that may arise between judicial and social work decision-making. The Child's Journey Through Care discusses in full: the emotional and behavioural problems of looked-after children and elaborates on care-planning and helping strategies; children's rights whilst in State care and their participation in decision-making about their future, including preparation for appearances in court; the importance and ways of building new attachments and relationships with substitute carers, with emphases on resilience and children's strengths; pitfalls and successes when seeking permanency of care and emotional stability. The book also includes considerations of the European Convention of Human Rights (1998) and describes many of the dilemmas arising in meeting the rights of children and parents, without jeopardising the welfare of either. The importance of openness, consideration, and straightforward dealings with parents is given due emphasis, especially where preparations for taking cases to court are involved. The Child's Journey Through Care will be a valuable source of information for field and residential workers, social work supervisors, resource managers, policy makers, and those working in the legal profession.

Networks and Geographies of Global Social Policy Diffusion Michael Windzio 2021-11-24 This open access book analyses the global diffusion of social policy as a process driven by multiplex ties between countries in global social networks. The contributions analyze links between countries via global trade, colonial history, similarity in culture, and spatial proximity. Networks are viewed as the structural backbone of the diffusion process, and diffusion is analysed via several subfields of social policy, in order to interrogate which network dimensions drive this process. The focus is on a global perspective of social policy diffusion via networks, and it is the first book to explicitly follow this macro-quantitative perspective on diffusion at a global scale whilst also comparing different networks. The collection tests the network structures in terms of their relevance to the diffusion process in different subfields of social policy such as old age and survivor pensions, labor and labor markets, health and long-term care, education and training, and family and gender policy. The book will therefore be invaluable to students and researchers of global social policy, sociology, political science, international relations, organization theory and economics.

Social Policy and Public Policy Lee Rainwater 1974 This classic volume was originally designed as an introduction to social science perspectives on a broad range of social issues in American society, specifically the complex social problems of the 1960s. Because the volume is structured as a survey, it is neither exhaustive or definitive. It does provide a wide range of information about these problems, as well as the many different policy initiatives that were developed to cope with them. Readers can learn a great deal about the common themes, predilections and quandaries that characterized United States responses to the complex problems of the 1960s and the patterns of inequality and injustice prevalent at that time. The essays were selected to cover the range of substantive problematic issues of the period, the social science perspectives that were brought to bear on them, and the range of social science methodologies used. Finally, the selections emphasize the contributions that can be made to understanding social problems by intensive and rigorous social science research. Journalists and popular writers use a common sense approach to their study of social problems, and the results are often imaginative and incisive. The tools of social scientists produce information and analyses that contribute far more to our understanding than even the most insightful journalist can achieve. The selections in this volume highlight the deeper and more fundamental understanding of social issues that can come from rigorous analysis of government statistics, and from special sample surveys, from in-depth ethnographic studies. "Lee Rainwater" is professor emeritus of sociology at Harvard University. He was one of the original founders of Transaction Publishers. He has written books and articles in many professional journals.

The Oxford Handbook of Family Policy Neil Gilbert 2023-02-10 The Handbook examines contemporary trends and issues in the formation of families over the different stages of the life cycle and how they interact with family-oriented social policies of modern welfare states, mainly in the OECD countries of Western Europe, East Asia and the U.S. Focusing largely on family needs in the early stages of the life course, the conventional package of policies tends to emphasize programs and benefits clustered around measures to support marriage, childbearing, care, the reconciliation of employment and childcare during the preschool years. Drawing on a multidisciplinary group of experts from many countries, this book extends the conventional perspective on family policy by also looking at later phases of the family life course. In taking a life course perspective, this Handbook extends the purview to encompass the three main stages of family life. These are (1) cohabitation, marriage and starting a family; (2) the early years of parenting, care and employment, and (3) the period of transitions and later life: family breakdown and intergenerational supports across the life course.

Contemporary fathering Featherstone, Brigid 2009-04-15 Since 1997, child welfare services have been faced with new demands to engage fathers or develop father-inclusive services. This book emerges from work by the author as a researcher and educator over many years on the issues posed by this agenda for child welfare practitioners in a variety of contexts. In locating fathers, fathering and fatherhood within a historical and social landscape, the book addresses issues seldom taken up in practice settings. It explores diversity and complexity in fathering in different disciplines such as psychoanalysis, sociology and psychology and analyses contemporary developments in social policies and welfare practices. The author employs a feminist perspective to highlight the opportunities and dangers in contemporary developments for those wishing to advance gender equity. A key strength of the book is its inter-disciplinary focus. It will be required reading for students, graduate and postgraduate, of social work, social policy, sociology and child and family studies. Academic researchers will also find the book invaluable because of its breadth of scholarship.

It follows initiatives of networks of researchers from several countries, sharing insights from current studies carried out in their different cultures. Introduced by a state of art review-like chapter on birth to 3 literature, the book, which can be pictured as a composition, begins with a journey inside the creativity of these young persons and a picture of a companionable learning. It deals with the role of the spatial and physical dimensions of the setting and pictures how the educator can create meaningful participation and launch early exercises in democracy, with respect for diversities. It provides a deeper understanding of a pedagogical accompaniment based on 'participatory alliance' and of the development of communication and language. The text will be a useful addition to researchers, practitioners, and other stakeholders. New Perspectives on Mutual Dependency in Care-Giving Adéla Souralová 2016-03-09 Many scholars see caregiving relationships as being based on mutual dependency or interdependency. Extensively cited notions of the 'global care chain' or 'international division of reproductive labour' have prepared the ground for analysis of global interdependencies in several domains. This book goes further by taking mutual dependency as a starting point for analysing all relationships. Using the example of Vietnamese families in the Czech Republic and the Czech native nannies, it shows how paid caregiving is contextualized in terms of various relationships between three types of actors: employer-employee, caring for the child, and mother-child. All of these ties are based on ontologically different principles and each of them operates as a piece of a puzzle, which is meaningful only in relation to each other. Souralová considers caregiving to be a formative activity that establishes ties between the concerned actors, whose subjectivities are mutually shaped in the daily practice of caregiving. With its stress on mutuality in care work, this ground-breaking book illuminates the new forms of interpersonal, interethnic, and intergenerational relationships and highlights the mechanisms and processes in which kinship ties are negotiated and reproduced.
