Death, before whose majestic tranquillity so many shudder with fear, has no terrors Helena Petrovna Blavatsky 2020-09-21 The book of Futurity, which has been wisely closed to every mortal eye, now opens its pages to many sons of the earth. Among the workings of the inner life within us, which we may experience but cannot explain, are there any more remarkable than those mysterious moral influences constantly exercised either for attraction or repulsion, by one human being over another? Modern astronomy profits by the works of ancient astrology, and kicks it out of sight. During the dissolution of the Etheric Double the darkness of our ignorance beginning to be dispelled, there are many things we can see. It is through the throbs of dissolution that horizons of vaster and profounder knowledge are drawn on, bursting upon our mental vision and becoming with every hour plainer to our inner eye. The nearer some people approach death, the brighter becomes their long lost memory, and the more correct the previsions because the unfoldment of inner faculties increases as life-blood becomes more stagnant. Modern science and spiritualism are two opposite poles. Life and death are as much of a mystery to the man of science, as they are to the spiritualist and the profane unbeliever. Materialistic scientists keep unweaving the rainbow. Unconscious necromancers reject every other philosophy save their own. Death, before whose majestic tranquillity so many shudder with fear, has no terrors. And yet people make too much fuss over death, and too little over the birth of every new candidate for it.

Curious Species Whitney Barlow Robles 2023-11-21 A compelling and innovative exploration of how animals shaped the field of natural history and its ecological afterlives Can corals build worlds? Do rattlesnakes enchant? What is a raccoon, and what might it know? Animals and the questions they raised thwarted human efforts to master nature during the so-called Enlightenment—a historical moment when rigid classification pervaded the study of natural history, people traded in people, and imperial avarice wrapped its tentacles around the globe. Whitney Barlow Robles makes animals the unruly protagonists of eighteenth-century science through journeys to four spaces and ecological zones: the ocean, the underground, the curiosity cabinet, and the field. Her forays reveal a forgotten lineage of empirical inquiry, one that forced researchers to embrace uncertainty. This tumultuous era in the history of human-animal encounters still haunts modern biologists and ecologists as they struggle to fathom animals today. In an eclectic fusion of history and nature writing, Robles alternates between careful historical investigations and probing personal narratives. These excavations of the past and present of distinct nonhuman creatures reveal the animal foundations of human knowledge and show why tackling our current environmental crisis first requires looking back in time.

Chaos, Cosmos, and Saint-Exupéry's Pilot Hero John R. Harris 1999 John Harris attempts to address Saint-Exupéry's unique qualities with full regard for his evasion of categories. Harris contends that Saint-Exupéry is, in fact, naively and perhaps sublimely simple. The apparent complexity in his works results from our own underestimation of his determination to fuse the aesthetic and the moral.

The Memorialization of Genocide Simone Gigliotti 2017-10-02 Divided societies, tormented pasts, and unrepentant perpetrators. Why are some countries more intent on vanquishing uncomfortable pasts than others? How do public and often unsightly attempts at memorialisation both fail the victims and valorize their oppressors? This book offers fresh and original perspectives on dictatorship, fascism and victimization from the bloodiest decades in Europe's, Australia's and Central America's colonial and modern history. Chapters include analyses of Francoist memorials in Spain, assessments of the El Mozote massacre in El Salvador, the forgetting of frontier colonial violence in Tasmania, Romania's treatment of its Roma populations in the midst of Holocaust memorialisation in Bucharest's urban development, and whether or not the Holocaust continues to serve as an instructional model or impossible aspiration for cross-cultural genocide memorialisation strategies. In an era of ongoing political, ethnic and religious conflict, and unrepentant insurgent activity around the world, this collection reminds readers that genocidal actions, wherever and whenever they occurred, must be held to account by more than rhetoric and concrete memory. This book was originally published as a special issue of the Journal of Genocide Research.

The Breaking Wave Nevil Shute 2010-08-24 The Breaking Wave is one of Nevil Shute's most poignant and psychologically suspenseful novels, set in the years just after World War II. Sidelined by a wartime injury, fighter pilot Alan Duncan reluctantly returns to his parents' remote sheep station in Australia to take the place of his brother Bill, who died a hero in the war. But his homecoming is marred by the suicide of his parents' parlormaid, of whom they were very fond. Alan soon realizes that the dead young woman is not the person she pretended to be. Upon discovering that she had served in the Royal Navy and participated along with his brother in the secret build-up to the Normandy invasion, Alan sets out to piece together the tragic events and the lonely burden of guilt that unravelled one woman's life. In the process of finding the answer to the mystery, he realizes how much he had in common with this woman he never knew and how "a war can go on killing people long after it's all over."

Looking for the Good War Elizabeth D. Samet 2021-11-30 "A remarkable book, from its title and subtitle to its last words . . . A stirring indictment of American sentimentality about war." —Robert G. Kaiser, The Washington Post In Looking for the Good War, Elizabeth D. Samet reexamines the literature, art, and culture that emerged after World War II, bringing her expertise as a professor of English at West Point to bear on the complexity of the postwar period in national life. She exposes the confusion about American identity that was expressed during and immediately after the war, and the deep national ambivalence toward war, violence, and veterans—all of which were suppressed in subsequent decades by a dangerously sentimental attitude toward the United States' "exceptional" history and destiny. Samet finds the war's ambivalent legacy in some of its most heavily mythologized figures: the war correspondent epitomized by Ernie Pyle, the character of the erstwhile G.I. turned either cop or criminal in the pulp fiction and feature films of the late 1940s, the disaffected Civil War veteran who looms so large on the screen in the Cold War Western, and the resurgent military hero of the post-Vietnam period. Taken together, these figures reveal key elements of postwar attitudes toward violence, liberty, and nation—attitudes that have shaped domestic and foreign policy and that respond in various ways to various assumptions about national identity and purpose established or affirmed by World War II. As the United States reassesses its roles in Afghanistan and the Middle East, the time has come to rethink our national mythology: the way that World War II shaped our sense of national destiny, our beliefs about the use of American military force throughout the world, and our inability to accept the realities of the twenty-first century's decades of devastating conflict.

One Square Mile of Hell John Wukovits 2007-08-07 The riveting true account of the Battle of Tarawa, an epic World War II clash in which the U.S. Marines fought the Japanese nearly to the last man. In November 1943, the men of the 2d Marine Division were instructed to clear out Japanese resistance on the Pacific island of Betio, a speck at the end of the Tarawa Atoll. When the Marines landed, the Japanese poured out of their underground bunkers—and launched one of the most brutal and bloody battles of World War II. For three straight days, attackers and defenders fought over every square inch of sand in a battle with no defined frontlines, and where there was no possibility of retreat—because there was nowhere to retreat to. It was a struggle that would leave both sides stunned and exhausted, and prove both the fighting mettle of the Americans and the fanatical devotion of the Japanese. Drawn from new sources, including participants' letters and diaries and exclusive firsthand interviews with survivors, One Square Mile of Hell is the true story of a battle between two determined foes, neither of whom would ever look at the other in the same way again.

Holy Legionary Youth Roland Clark 2015-06-05 Founded in 1927, Romania's Legion of the Archangel Michael was one of Europe's largest and longest-lived fascist social movements. In Holy Legionary Youth, Roland Clark draws on oral histories, memoirs, and substantial research in the archives of the Romanian secret police to provide the most comprehensive account of the Legion in English to date. Clark approaches Romanian fascism by asking what membership in the Legion meant to young Romanian men and women. Viewing fascism "from below," as a social category that had practical consequences for those who embraced it, he shows

how the personal significance of fascism emerged out of Legionaries' interactions with each other, the state, other political parties, families and friends, and fascist groups abroad. Official repression, fascist spectacle, and the frequency and nature of legionary activities changed a person's everyday activities and relationships in profound ways. Clark's sweeping history traces fascist organizing in interwar Romania to nineteenth-century grassroots nationalist movements that demanded political independence from the Austro-Hungarian Empire. It also shows how closely the movement was associated with the Romanian Orthodox Church and how the uniforms, marches, and rituals were inspired by the muscular, martial aesthetic of fascism elsewhere in Europe. Although antisemitism was a key feature of official fascist ideology, state violence against Legionaries rather than the extensive fascist violence against Jews had a far greater impact on how Romanians viewed the movement and their role in it. Approaching fascism in interwar Romania as an everyday practice, Holy Legionary Youth offers a new perspective on European fascism, highlighting how ordinary people "performed" fascism by working together to promote a unique and totalizing social identity.

Newspaper Clippings from the Colbert County, Alabama Leighton News 1894 - 1903 Robin Sterling 2017-03-22 "The Leighton News was first established by Fred W. McCormack in 1890 as a small 5x8 sheet. It soon expanded to a traditional size but later suspended publication because the profit margin was too slim. No issues from that time were available for review. After a while, McCormack kept a promise to the people of Leighton and renewed publication of the News in 1894. Each issue was examined column by column with a view for capturing items of a genealogical interest such as reports of births, marriages, deaths, and obituaries. In addition, other clippings were transcribed having to do with the history of Colbert and Lawrence County, as well as the rest of the surrounding Tennessee Valley area."--Publisher's description

Beethoven after Napoleon Stephen Rumph 2004-08-15 In this provocative analysis of Beethoven's late style, Stephen Rumph demonstrates how deeply political events shaped the composer's music, from his early enthusiasm for the French Revolution to his later entrenchment during the Napoleonic era. Impressive in its breadth of research as well as for its devotion to interdisciplinary work in music history, Beethoven after Napoleon challenges accepted views by illustrating the influence of German Romantic political thought in the formation of the artist's mature style. Beethoven's political views, Rumph argues, were not quite as liberal as many have assumed. While scholars agree that the works of the Napoleonic era such as the Eroica Symphony or Fidelio embody enlightened, revolutionary ideals of progress, freedom, and humanism, Beethoven's later works have attracted less political commentary. Rumph contends that the later works show clear affinities with a native German ideology that exalted history, religion, and the organic totality of state and society. He claims that as the Napoleonic Wars plunged Europe into political and economic turmoil, Beethoven's growing antipathy to the French mirrored the experience of his Romantic contemporaries. Rumph maintains that Beethoven's turn inward is no pessimistic retreat but a positive affirmation of new conservative ideals.

Revolution Matthew Wilkens 2016-11-16 A sophisticated theoretical treatment of postwar fiction as a model of literary and cultural change. Socially, politically, and artistically, the 1950s make up an odd interlude

between the first half of the twentieth century—still tied to the problems and orders of the Victorian era and Gilded Age—and the pervasive transformations of the later sixties. In *Revolution*, Matthew Wilkens argues that postwar fiction functions as a fascinating model of revolutionary change. Uniting literary criticism, cultural analysis, political theory, and science studies, *Revolution* reimagines the years after World War II as at once distinct from the decades surrounding them and part of a larger-scale series of rare, revolutionary moments stretching across centuries. Focusing on the odd mix of allegory, encyclopedism, and failure that characterizes fifties fiction, Wilkens examines a range of literature written during similar times of crisis, in the process engaging theoretical perspectives from Walter Benjamin and Fredric Jameson to Bruno Latour and Alain Badiou alongside readings of major novels by Ralph Ellison, William Gaddis, Doris Lessing, Jack Kerouac, Thomas Pynchon, and others. *Revolution* links the forces that shaped postwar fiction to the dynamics of revolutionary events in other eras and social domains. Like physicists at the turn of the twentieth century or the French peasantry of 1789, midcentury writers confronted a world that did not fit their existing models. Pressed to adapt but lacking any obvious alternative, their work became sprawling and figurative, accumulating unrelated details and reusing older forms to ambiguous new ends. While the imperatives of the postmodern eventually gave order to this chaos, Wilkens explains that the same forces are again at work in today's fracturing literary market.

Rod Serling Nicholas Parisi 2018-10-24 Long before anyone had heard of alien cookbooks, gremlins on the wings of airplanes, or places where pig-faced people are considered beautiful, Rod Serling was the most prestigious writer in American television. As creator, host, and primary writer for *The Twilight Zone*, Serling became something more: an American icon. When Serling died in 1975, at the age of fifty, he was the most honored, most outspoken, most recognizable, and likely the most prolific writer in television history. Though best known for *The Twilight Zone*, Serling wrote over 250 scripts for film and television and won an unmatched six Emmy Awards for dramatic writing for four different series. His filmography includes the acclaimed political thriller *Seven Days in May* and cowriting the original *Planet of the Apes*. In great detail and including never-published insights drawn directly from Serling's personal correspondence, unpublished writings, speeches, and unproduced scripts, Nicholas Parisi explores Serling's entire, massive body of work. With a foreword by Serling's daughter, Anne Serling, *Rod Serling: His Life, Work, and Imagination* is part biography, part videography, and part critical analysis. It is a painstakingly researched look at all of Serling's work—in and out of *The Twilight Zone*.
