Charter School Outcomes Mark Berends 2017-09-25 Sponsored by the National Center on School Choice, a research consortium headed by Vanderbilt University, this volume examines the growth and outcomes of the charter school movement. Starting in 1992-93 when the nation's first charter school was opened in Minneapolis, the movement has now spread to 40 states and the District of Columbia and by 2005-06 enrolled 1,040,536 students in 3,613 charter schools. The purpose of this volume is to help monitor this fast-growing movement by compiling, organizing and making available some of the most rigorous and policy-relevant research on K-12 charter schools. Key features of this important new book include: Expertise - The National Center on School Choice includes internationally known scholars from the following institutions: Harvard University, Brown University, Stanford University, Brookings Institution, National Bureau of Economic Research and Northwest Evaluation Association. Cross-Disciplinary - The volume brings together material from related disciplines and methodologies that are associated with the individual and systemic effects of charter schools. Coherent Structure - Each section begins with a lengthy introduction that summarizes the themes and major findings of that section. A summarizing chapter by Mark Schneider, the Commissioner of the National Center on Educational Statistics, concludes the book. This volume is appropriate for researchers, instructors and graduate students in education policy programs and in political science and economics, as well as in-service administrators, policy makers, and providers.

Home Land Sam Lipsyte 2005-01-01 What if somebody finally wrote to his high school alumni bulletin and told...the truth! Here is an update from hell, a brilliant work from novelist Sam Lipsyte, whom Jeffrey Eugenides calls "original, devious, and very funny" and of whose first novel Chuck Palahniuk wrote, "I laughed out loud---and I never laugh out loud." The Eastern Valley High School Alumni newsletter, Catamount Notes, is bursting with tales of success: former students include a bankable politician and a famous baseball star, not to mention a major-label recording artist. Then there is the appalling, yet utterly lovable, Lewis Miner, class of '89---a.k.a Teabag---who did not pan out. Home Land is his confession in all its bitter, lovelorn glory.

Statistics for Management Richard I. Levin 2013-11-01 Appropriate for one or two term courses in introductory Business Statistics. With *Statistics for Management*, Levin and Rubin have provided a non-intimidating business statistics textbook that students can easily read and understand. Like its predecessors, the Seventh Edition includes the absolute minimum of mathematical/statistical notation necessary to teach the material. Concepts are fully explained in simple, easy-to-understand language as they are presented, making the text an excellent source from which to learn and teach. After each discussion, readers are guided through real-world examples to show how textbook principles work in professional practice.

Anthropocene Reading Tobias Menely 2017-10-13 Few terms have garnered more attention recently in the sciences, humanities, and public sphere than the Anthropocene, the proposed epoch in which a human "signature" appears in the lithostratigraphic record. *Anthropocene Reading* considers the implications of this concept for literary history and critical method. Entering into conversation with geologists and geographers, this volume reinterprets the cultural past in relation to the anthropogenic transformation of the Earth system while showcasing how literary analysis may help

us conceptualize this geohistorical event. The contributors examine how a range of literary texts, from *The Tempest* to contemporary dystopian novels to the poetry of Emily Dickinson, mediate the convergence of the social institutions, energy regimes, and planetary systems that support the reproduction of life. They explore the long-standing dialogue between imaginative literature and the earth sciences and show how scientists, novelists, and poets represent intersections of geological and human timescales, the deep past and a posthuman future, political exigency and the carbon cycle. Accessibly written and representing a range of methodological perspectives, the essays in this volume consider what it means to read literary history in the Anthropocene. Contributors include Juliana Chow, Jeffrey Jerome Cohen, Thomas H. Ford, Anne-Lise François, Noah Heringman, Matt Hooley, Stephanie LeMenager, Dana Luciano, Steve Mentz, Benjamin Morgan, Justin Neuman, Jennifer Wenzel, and Derek Woods.

Vintage Murder Ngaio Marsh 1990 Theatrical manager Alfred Meyer wanted to celebrate his wife's birthday in style. The "piece de resistance" would be the jeroboam of champagne which would descend on to the stage after the performance. But something went horribly wrong. Was Meyer's death the product of Maori superstitions?

Information Security Management Metrics W. Krag Brotby, CISM 2009-03-30 Spectacular security failures continue to dominate the headlines despite huge increases in security budgets and ever-more draconian regulations. The 20/20 hindsight of audits is no longer an effective solution to security weaknesses, and the necessity for real-time strategic metrics has never been more critical. *Information Security Management Metrics: A Definitive Guide to Effective Security Monitoring and Measurement* offers a radical new approach for developing and implementing security metrics essential for supporting business activities and managing information risk. This work provides anyone with security and risk management responsibilities insight into these critical security questions: How secure is my organization? How much security is enough? What are the most cost-effective security solutions? How secure is my organization? You can't manage what you can't measure This volume shows readers how to develop metrics that can be used across an organization to assure its information systems are functioning, secure, and supportive of the organization's business objectives. It provides a comprehensive overview of security metrics, discusses the current state of metrics in use today, and looks at promising new developments. Later chapters explore ways to develop effective strategic and management metrics for information security governance, risk management, program implementation and management, and incident management and response. The book ensures that every facet of security required by an organization is linked to business objectives, and provides metrics to measure it. Case studies effectively demonstrate specific ways that metrics can be implemented across an enterprise to maximize business benefit. With three decades of enterprise information security experience, author Krag Brotby presents a workable approach to developing and managing cost-effective enterprise information security.

Prismatic Ecology Jeffrey Jerome Cohen 2013-12-01 Emphasizing sustainability, balance, and the natural, green dominates our thinking about ecology like no other color. What about the catastrophic, the disruptive, the inaccessible, and the excessive? What of the ocean's turbulence, the fecundity of excrement, the solitude of an iceberg, multihued contaminations? Prismatic Ecology moves beyond the accustomed green readings of ectheory and maps a colorful world of ecological possibility. In a series of linked essays that span place, time, and discipline, Jeffrey Jerome Cohen brings together writers who illustrate the vibrant worlds formed by colors. Organized by the structure of a prism, each chapter explores the coming into existence of nonanthropocentric ecologies. "Red" engages sites of animal violence, apocalyptic emergence, and activism; "Maroon" follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition; "Chartreuse" is a meditation on postsustainability and possibility within sublime excess; "Grey" is the color of the undead; "Ultraviolet" is a potentially lethal force that opens vistas beyond humanly known nature. Featuring established and emerging scholars from varying disciplines, this volume presents a collaborative imagining of what a more-than-green ecology offers. While highlighting critical approaches not yet common within ectheory, the contributions remain diverse and cover a range of topics including materiality, the inhuman, and the agency of objects. By way of color, Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality, always in excess of what a human perceives. Death Waits in the Dark Mark Edward Langley 2020-08-04 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil

and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

The Sky of Our Manufacture Jesse Oak Taylor 2016-03-23 The smoke-laden fog of London is one of the most vivid elements in English literature, richly suggestive and blurring boundaries between nature and society in compelling ways. In *The Sky of Our Manufacture*, Jesse Oak Taylor uses the many depictions of the London fog in the late nineteenth- and early twentieth-century novel to explore the emergence of anthropogenic climate change. In the process, Taylor argues for the importance of fiction in understanding climatic shifts, environmental pollution, and ecological collapse. The London fog earned the portmanteau "smog" in 1905, a significant recognition of what was arguably the first instance of a climatic phenomenon manufactured by modern industry. Tracing the path to this awareness opens a critical vantage point on the Anthropocene, a new geologic age in which the transformation of humanity into a climate-changing force has not only altered our physical atmosphere but imbued it with new meanings. The book examines enduringly popular works--from the novels of Charles Dickens and George Eliot to *Dr. Jekyll and Mr. Hyde*, *Dracula*, and the Sherlock Holmes mysteries to works by Joseph Conrad and Virginia Woolf--alongside newspaper cartoons, scientific writings, and meteorological technologies to reveal a fascinating relationship between our cultural climate and the sky overhead. *Under the Sign of Nature: Studies in Ecocriticism*

Mosquito Empires J. R. McNeill 2010-01-11 This book explores the links among ecology, disease, and international politics in the context of the Greater Caribbean - the landscapes lying between Surinam and the Chesapeake - in the seventeenth through early twentieth centuries. Ecological changes made these landscapes especially suitable for the vector mosquitoes of yellow fever and malaria, and these diseases wrought systematic havoc among armies and would-be settlers. Because yellow fever confers immunity on survivors of the disease, and because malaria confers resistance, these diseases played partisan roles in the struggles for empire and revolution, attacking some populations more severely than others. In particular, yellow fever and malaria attacked newcomers to the region, which helped keep the Spanish Empire Spanish in the face of predatory rivals in the seventeenth and early eighteenth centuries. In the late eighteenth and through the nineteenth century, these diseases helped revolutions to succeed by decimating forces sent out from Europe to prevent them.

World History, Culture, and Geography 1995 This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

Ecological Form Nathan K. Hensley 2018-12-04 Ecological Form brings together leading voices in

nineteenth-century ecocriticism to suture the lingering divide between postcolonial and ecocritical approaches. Together, these essays show how Victorian thinkers used aesthetic form to engage problems of system, interconnection, and dispossession that remain our own. The authors reconsider Victorian literary structures in light of environmental catastrophe; coordinate “natural” questions with sociopolitical ones; and underscore the category of form as a means for generating environmental—and therefore political—knowledge. Moving from the elegy and the industrial novel to the utopian romance, the scientific treatise, and beyond, *Ecological Form* demonstrates how nineteenth-century thinkers conceptualized the circuits of extraction and violence linking Britain to its global network. Yet the book’s most pressing argument is that this past thought can be a resource for reimagining the present.

The Use and Abuse of Art Jacques Barzun 2020-07-21 From the celebrated cultural historian and bestselling author, a provocative history of the evolution of our ideas about art since the early nineteenth century In this witty, provocative, and learned book, acclaimed cultural historian and writer Jacques Barzun traces our changing attitudes to the arts over the past 150 years, suggesting that we are living in a period of cultural liquidation, nothing less than the ending of the modern age that began with the Renaissance. He challenges our conceptions and misconceptions about art “in order to reach a conclusion about its value and its drawbacks for life at the present time.”

Victorian Literature, Energy, and the Ecological Imagination Allen MacDuffie 2014-05-29 Reading Victorian literature and science in tandem, *Victorian Literature, Energy, and the Ecological Imagination* investigates how the concept of energy was fictionalized - both mystified and demystified - during the rise of a new resource-intensive industrial and economic order. The first extended study of a burgeoning area of critical interest of increasing importance to twenty-first-century scholarship, it anchors its investigation at the very roots of the energy problem, in a period that first articulated questions about sustainability, the limits to growth, and the implications of energy pollution for the entire global environment. With chapters on Charles Dickens, John Ruskin, Robert Louis Stevenson, Joseph Conrad and H. G. Wells, Allen MacDuffie discusses the representation of urban environments in the literary imaginary, and how those texts helped reveal the gap between cultural fantasies of unbounded energy generation, and the material limits imposed by nature.

Death in a White Tie Ngaio Marsh 2012-12-15 A high-society homicide is the talk of the London season . . . “Marsh’s writing is a pleasure.” —The Seattle Times It’s debutante season in London, and that means giggles and tea-dances, white dresses and inappropriate romances . . .and much too much champagne. And, apparently, a blackmailer, which is where Inspector Roderick Alleyn comes in. The social whirl is decidedly not Alleyn’s environment, so he brings in an assistant in the form of Lord “Bunchy” Gospell, everybody’s favorite uncle. Bunchy is more than lovable; he’s also got some serious sleuthing skills. But before he can unmask the blackmailer, a murder is announced. And everyone suddenly stops giggling . . . “It’s time to start comparing Christie to Marsh instead of the

other way around.” —New York Magazine “[Her] writing style and vivid characters and settings made her a mystery novelist of world renown.” —The New York Times

Postcolonial Ecologies Elizabeth DeLoughrey 2011-04-20 The first edited collection to bring ecocritical studies into a necessary dialogue with postcolonial literature, this volume offers rich and suggestive ways to explore the relationship between humans and nature around the globe, drawing from texts from Africa and the Caribbean, as well as the Pacific Islands and South Asia. Turning to contemporary works by both well- and little-known postcolonial writers, the diverse contributions highlight the literary imagination as crucial to representing what Edouard Glissant calls the "aesthetics of the earth." The essays are organized around a group of thematic concerns that engage culture and cultivation, arboriculture and deforestation, the lives of animals, and the relationship between the military and the tourist industry. With chapters that address works by J. M. Coetzee, Kiran Desai, Derek Walcott, Alejo Carpentier, Zakes Mda, and many others, *Postcolonial Ecologies* makes a remarkable contribution to rethinking the role of the humanities in addressing global environmental issues.

The Evolution of the Gospel John Enoch Powell 1994-01-01 Many biblical scholars believe that the Gospel of Matthew was written after those of Mark and Luke. In this controversial book, an eminent politician who is also a distinguished classical scholar refutes this idea, using textual and literary criticism to assert that the Gospel of Matthew preceded the other gospels. Translating and analysing the original Greek source, Powell proceeds to concentrate upon the text of Matthew, as being the earliest form of the gospel that we possess, and to demonstrate how its peculiar characteristics can best be accounted for as being the result of insertions and manipulations, often theologically motivated. Powell argues that the Gospel of Matthew represents an attempted compromise between a pro-gentile book and a critical revision of that book produced for the judaizing wing of the early Church, and that material intended to appeal to the followers of John the Baptist was also introduced. The Gospel of Matthew, though given the form of consecutive narrative, is, says Powell, essentially a theological debate carried on by means of allegory: was Jesus the Son of God or a Davidic king?

Capitalism in the Web of Life Jason W. Moore 2015-09-15 Finance. Climate. Food. Work. How are the crises of the twenty-first century connected? In *Capitalism in the Web of Life*, Jason W. Moore argues that the sources of today's global turbulence have a common cause: capitalism as a way of organizing nature, including human nature. Drawing on environmentalist, feminist, and Marxist thought, Moore offers a groundbreaking new synthesis: capitalism as a "world-ecology" of wealth, power, and nature. Capitalism's greatest strength—and the source of its problems—is its capacity to create Cheap Natures: labor, food, energy, and raw materials. That capacity is now in question. Rethinking capitalism through the pulsing and renewing dialectic of humanity-in-nature, Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis. *Capitalism in the Web of Life* shows how the critique of capitalism-in-nature—rather than capitalism and nature—is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead.
