Youth in Superdiverse Societies Peter F. Titzmann 2019-11-12 Youth in Superdiverse Societies brings together theoretical, methodological and international approaches to the study of globalization, diversity, and acculturation in adolescence. It examines vital issues including migration, integration, cultural identities, ethnic minorities, and the interplay of ethnic and cultural diversity with experiences of growing up as an adolescent. This important volume focuses on understanding the experiences and consequences of multicultural societies and offers valuable new insights in the field of intergroup relations and the complexity of growingly heterogeneous societies. The book comprises four sections. The first includes fresh theoretical perspectives for studying youth development in multicultural societies, exploring topics such as superdiversity, globalization, bicultural identity development, polyculturalism, the interplay of acculturation and development, as well as developmental-ecological approaches. The second section highlights innovative methods in studying multicultural societies. It contains innovative dynamic concepts (e.g., experience-based sampling), methods for studying the nested structure of acculturative contexts, and suggestions for cross-comparative research to differentiate universal and context-specific processes. The third section examines social relations and social networks in diverse societies and features developmentally crucial contexts (e.g., family, peers, schools) and contributions on interethnic interactions in real-life contexts. The final section presents applications in natural settings and includes contributions on participatory action research and teachers' dealings with ethnic diversity. Each chapter provides a thorough overview of current research trends and findings, followed by detailed recommendations for future research, suggesting how the approaches can be cited, applied and improved. Youth in Superdiverse Societies is valuable reading for students studying adolescent acculturation and development in psychology, sociology, education, anthropology, linguistics and political science. It will also be of interest to scholars and researchers in social and developmental psychology, and related disciplines, as well as professionals in the field of migration. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The Terrorization of Dissent Jason Del Gandio 2014-06-30 In 2006 the Animal Enterprise Terrorism Act (AETA) was passed with the intention to equip law enforcement agencies with the tools to apprehend, prosecute, and convict individuals who commit "animal enterprise terror." But, as many have come to realize, this act does not concretely define what is meant by that phrase, leading to the interpretation that anyone interfering with a company's ability to make a profit from the exploitation of animals can be considered a terrorist. In this unprecedented and timely collection, some of the most influential voices in the world of law and animal rights examine the legalities of the AETA, highlight its repressive nature and the collusion between private interests and political legislation, and provide theoretical frameworks for understanding a variety of related issues. In a series of interviews, the book also gives animal advocates who have been convicted or directly affected by the AETA, including members of the AETA 4 and SHAC 7, an opportunity to speak for themselves. Ultimately, these writers show that the AETA is less about fighting terrorism and more about safeguarding corporate profit, and that it should be analyzed and resisted by everyone who believes in a better world. Ciao, America! Beppe Severgnini 2003-05-13 In the wry but affectionate tradition of Bill Bryson, *Ciao, America!* is a delightful look at America through the eyes of a fiercely funny guest—one of Italy's favorite authors who spent a year in Washington, D.C. When Beppe Severgnini and his wife rented a creaky house in Georgetown they were determined to see if they could adapt to a full four seasons in a country obsessed with ice cubes, air-conditioning, recliner chairs, and, of all things, after-dinner cappuccinos. From their first encounters with cryptic rental listings to their back-to-Europe yard sale twelve months later, Beppe explores this foreign land with the self-described patience of a mildly inappropriate beachcomber, holding up a mirror to America's signature manners and mores. Succumbing to his surroundings day by day, he and his wife find themselves developing a taste for Klondike bars and Samuel Adams beer, and even that most peculiar of American institutions—the pancake house. The realtor who waves a perfect bye-bye, the overzealous mattress salesman who bounces from bed to bed, and the plumber named Marx who deals in illegally powerful showerheads are just a few of the better-than-fiction characters the Severgninis encounter while foraging for clues to the real America. A trip to the computer store proves just as revealing as D.C.'s Fourth of July celebration, as do boisterous waiters angling for tips and no-parking signs crammed with a dozen lines of fine print. By the end of his visit, Severgnini has come to grips with life in these United States—and written a charming, laugh-out-loud tribute.

John Saturnall's Feast Lawrence Norfolk 2012-09-04 "An enthralling tale of an orphan kitchen boy turned master of culinary arts, with sumptuous recipes and intoxicatingly gorgeous illustrations." —Vanity Fair A beautiful, rich and sensuous historical novel, John Saturnall's Feast tells the story of a young orphan who becomes a kitchen boy at a manor house, and rises through the ranks to become the greatest cook of his generation. It is a story of food, star-crossed lovers, ancient myths, and one boy's rise from outcast to hero. Orphaned when his mother dies of starvation, having been cast out of her village as a witch, John is taken in at the kitchens at Buckland Manor, where he quickly rises from kitchen boy to cook, and is known for his uniquely keen palate and natural cooking ability. However, he quickly gets on the wrong side of Lady Lucretia, the aristocratic daughter of the Lord of the Manor. In order to inherit the estate, Lucretia must wed, but her fiancé is an arrogant buffoon. When Lucretia takes on a vow of hunger until her father calls off her engagement to her insipid husband-to-be, it falls to John to try to cook her delicious foods that might tempt her to break her fast. "Shimmering with wonder, suffused with an intense and infectious appreciation for the gifts of bountiful nature, John Saturnall's Feast is a banquet for the senses and a treat to anyone who relishes masterful storytelling." —The Washington Post

Terra Madre Carlo Petrini 2009 More than twenty years ago, when Italian Carlo Petrini learned that McDonald's wanted to erect its golden arches

next to the Spanish Steps in Rome, he developed an impassioned response: he helped found the Slow Food movement. Since then, Slow Food has become a worldwide phenomenon, inspiring the likes of Alice Waters and Michael Pollan. Now, it's time to take the work of changing the way people grow, distribute, and consume food to a new level. In *Terra Madre*, Petrini shows us a solution in the thousands of newly formed local alliances between food producers and food consumers. And he proposes expanding these alliances-connecting regional food communities around the world to promote good, clean, and fair food. The end goal is a world in which communities are entitled to food sovereignty-allowed to choose not only what they want to grow and eat, but also how they produce and distribute it.

Food and Healing Annemarie Colbin 2013-01-30 Yes, you are what you eat. For everyone who wonders why, in this era of advanced medicine, we still suffer so much serious illness, *Food and Healing* is essential reading. "An eminently practical, authoritative, and supportive guide to making everyday decisions about eating that can transform our lives. *Food and Healing* is a remarkable achievement."—Richard Grossman, Director, The Health in Medicine Project, Montefiore Medical Center Annemarie Colbin, founder of New York's renowned Natural Gourmet Cookery School and author of *The Book of Whole Meals*, argues passionately that we must take responsibility for our own health and rely less on modern medicine, which still seems to focus on trying to cure rather than prevent illness. Eating well, she shows, is the first step toward better health. Drawing on an impressive range of thinking—from Eastern philosophy to current medical journals—Colbin shatters many myths not only about the "Standard American Diet" but also about some of the quirky and unhealthy food fads of recent years. What emerges is one of the first complete works on: • How food affects our moods • The healing qualities of specific foods • The role of diet in preventing illness • How to tailor a diet approach that is right for you "I recommend it to my patients. . . . It's an excellent book to help people understand the relationship between what they eat and how they feel."—Stephen Rechtstaffen, M.D. Director, Omega Institute for Holistic Studies "Have a look at this important, well-thought-out book."—Bon Appetit

The Winemaker Noah Gordon 2012-06-05 New York Times–bestselling author: In 19th-century Spain, the son of a vineyard owner builds a life for himself, but a dangerous plot threatens it all . . . Josep Alvarez is a young man in the tiny grape-growing village of Santa Eulàlia, in northern Spain, where his father grows black grapes that are turned into cheap vinegar. Joseph loves the agricultural life, but he is the second son, and his father's vineyard will be inherited by his brother Donat, the firstborn. Josep needs to keep his hands in the soil. He yearns for a job growing grapes and for an opportunity to marry Teresa Gallego. In Madrid, an assassination plot, conceived against the political leader of Spain by men of wealth and power, creates a storm of intrigue that sucks into its vortex a group of innocent young farm workers in Santa Eulàlia. How Josep's life is changed drastically by these events, and how, ironically, they gradually turn him into an inspired vintner with an evolving vision of life, is the fascinating story of *The Winemaker*.

Echoes from Freire for a Critically Engaged Pedagogy Peter Mayo 2012-12-20 In this concise and accessible text, Peter Mayo outlines some of the major concepts in Freire's praxis. In pursuit of a critically engaging pedagogy, Mayo compares Freire's work with a range of other thinkers and educators, including Lorenzo Milani, Antonia Darder, John Dewey, Margaret Ledwith, Antonio Gramsci, and Henry Giroux. Chapters in the book include discussions of the State's role in education - specifically higher education; a critical analysis of the dominant discourse in education centering on 'competences' and the type of slant this discourse takes; a study of adult education through a Freirean lens; an historical view of Nicaragua's Freire-inspired literacy and popular education campaigns of 1980; a fresh perspective on the role of social movements in the contexts of social transformation; a new analysis of the relevance of Freirean concepts for transformative research, and an exploration of educators as intellectuals and social actors. The result is a compelling study of how Paulo Freire's writings continue to resonate around the world, and of how we must continue to apply and interpret them anew.

The Meat Crisis Joyce D'Silva 2017-08-23 Meat and dairy production and consumption are in crisis. Globally, 70 billion farm animals are used for food production every year. It is well accepted that livestock production is a major contributor to greenhouse gas emissions. The Food and Agriculture Organization of the United Nations (FAO) predicts a rough doubling of meat and milk consumption in the first half of the 21st century, with particularly rapid growth occurring in the developing economies of Asia. What will this mean for the health and wellbeing of those animals, of the people who consume ever larger quantities of animal products, and for the health of the planet itself? The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy, including cultural and health factors, and the implications of the likely intensification of farming for both small-scale producers and for animals. Several chapters explore the related environmental issues, from resource use of water, cereals and soya, to the impact of livestock production on global warming and issues concerning biodiversity, land use and the impacts of different farming systems on the environment. A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption. Since the first edition, published in 2010, all chapters have been updated, three original chapters re-written and six new chapters added, with additional coverage of dietary effects of milk and meat, antibiotics in animal production, and the economic, political and ethical dimensions of meat consumption. The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world.
