The Sayings of Muhammad Sir Abdullah al-Mamun Suhrawardy 1990 This collection of the sayings of the Prophet was highly praised in its earlier edition, and it has now been carefully revised and classified. It is published in the earnest hope that it will serve in some degree to remove misconceptions as to the meaning and message of the religion of Islam, particularly with regard to tolerance in Islam and the status of women. It is also hoped that it will promote still further the goodwill and understanding between the East and West.

Inevitable Illusions Massimo Piattelli-Palmarini 1996-11-18 "Fascinating and insightful. . . . I cannot recall a book that has made me think more about the nature of thinking." -- Richard C. Lewontin Harvard University Everyone knows that optical illusions trick us because of the way we see. Now scientists have discovered that cognitive illusions, a set of biases deeply embedded in the human mind, can actually distort the way we think. In *Inevitable Illusions*, distinguished cognitive researcher Massimo Piattelli-Palmarini takes us on a provocative, challenging, and thoroughly entertaining exploration of the games our minds play. He opens the doors onto the newly charted realm of the cognitive unconscious to reveal the full range of illusions, showing how they inhibit our ability to reason--no matter what our educational background or IQ. *Inevitable Illusions* is stimulating, eye-opening food for thought.

Atheism Alexandre Kojève 2018-11-06 One of the twentieth century's most brilliant and unconventional thinkers, Alexandre Kojève was a Russian émigré to France whose lectures on Hegel in the 1930s galvanized a generation of French intellectuals. Although Kojève wrote a great deal, he published very little in his lifetime, and so the ongoing rediscovery of his work continues to present new challenges to philosophy and political theory. Written in 1931 but left unfinished, *Atheism* is an erudite and open-ended exploration of profound questions of estrangement, death, suicide, and the infinite that demonstrates the range and the provocative power of Kojève's thought. Ranging across Heidegger, Buddhism, Christianity, German idealism, Russian literature, and mathematics, Kojève advances a novel argument about freedom and authority. He investigates the possibility that there is not any vantage point or source of authority—including philosophy, science, or God—that is outside or beyond politics and the world as we experience it. The question becomes whether atheism—or theism—is even a meaningful position since both affirmation and denial of God's existence imply a knowledge that seems clearly outside our capacities. Masterfully translated by Jeff Love, this book offers a striking new perspective on Kojève's work and its implications for theism, atheism, politics, and freedom.

Conditions Handsome and Unhandsome Stanley Cavell 2018-01-11 In these three lectures, Cavell situates Emerson at an intersection of three crossroads: a place where both philosophy and literature pass; where the two traditions of English and German philosophy shun one another; where the cultures of America and Europe unsettle one another. "Cavell's 'readings' of Wittgenstein and Heidegger and Emerson and other thinkers surely deepen our understanding of them, but they do much more: they offer a vision of what life can be and what culture can mean. . . . These profound lectures are a wonderful place to make [Cavell's] acquaintance."—Hilary Putnam

The Nun Simonetta Agnello Hornby 2011-12-27 Winner of the Italian PEN Prize: A tale of illicit love and a girl forced into a convent in the early nineteenth century. 1839, Messina, Italy: Agata is the daughter of an aristocrat, albeit an impoverished one, and she has fallen in love with wealthy Giacomo Lepre. Their families, however, view their romance as unacceptable and tawdry—and when Agata's father dies, her mother decides to ferry her daughter far away, to Naples, where she hopes to garner a stipend from the king. The only boat leaving Messina that day is captained by young Englishman James Garson. Following a tempestuous passage to Naples, during which Agata confesses her troubles to James, Agata and her mother find themselves rebuffed by the king, and Agata is forced to join a convent. The Benedictine monastery of San Giorgio Stilita is rife with rancor and jealousy, illicit passions and ancient feuds. But Agata remains aloof, devoting herself to the cultivation of medicinal herbs, calmed by the steady rhythms of monastic life. She reads all the books James sends her and follows the news of the various factions struggling to bring unity to Italy. She has accepted her life as a nun, but she is divided between her yearnings for purity and religiosity and her desire to be part of the world. And she is increasingly torn when she realizes that her feelings for James, though he is only a distant presence in her life, have eclipsed those for Lepre. . . . "Hornby enriches her story with sensuous details of food, fashion, furnishings, and the rules of an extravagant society, savoring local color and personality quirks." —Publishers Weekly "An historical novel, a coming-of-age novel, a perfect portrait of family dynamics, *The Nun* also gives us, in Agata, an unforgettable heroine." —Gazzetta di Mantova

Buddha Leonardo Vittorio Arena 2012-12-12 Gli eventi più salienti della vita di BuddhaOggi di buddhismo si parla molto, a proposito e a sproposito. Ma chi era realmente il Buddha storico, Gotama Siddhattha, che alcuni secoli prima di Cristo aveva diffuso questa grande dottrina, destinata a divenire il credo di milioni di fedeli? In questo libro viene ripercorsa la sua vicenda biografica. Figlio del rāja di un modesto Stato, Buddha raggiunge la «liberazione» dopo aver rifiutato sia una vita di piaceri, sia le teorie dei suoi direttori spirituali, nella scelta d'un percorso tutto suo. Darà vita alla Comunità (Sangha), per diffondere e predicare la Dottrina (Dhamma). Arena descrive gli eventi più salienti della sua vita e la sua entrata nel mito, con i primi Concili e la compilazione del Canone buddhista.Leonardo Vittorio Arenainsegna Teoria e storia della storiografia presso la Facoltà di lettere dell'Università di Urbino. Cuore di tenebra e altri racconti d'avventura Joseph Conrad 2011-08-31 Introduzione di Bruno Traversetti Traduzione di Flaminio Di Biagi Edizioni integrali I temi salienti dell'opera narrativa di Joseph Conrad

vengono riproposti in questo volume attraverso una scelta di alcuni tra i più rappresentativi romanzi dello scrittore: in *Karain: un ricordo* e ne *La laguna* si svolge l'incontro di due culture sullo sfondo di un Oriente magico e misterioso, mentre *Il ritorno*, *Domani*, *Amy Foster* e *Gli idioti* sono ambientati in Occidente, e sembrano alludere al disagio esistenziale dell'uomo occidentale vittima di un progresso impietoso; *Il compagno segreto* è il più letterario dei romanzi conradiani e sviluppa in chiave di avventura marinaresca il tema affascinante e inquietante del doppio, così come *Un avamposto del progresso* e *Cuore di tenebra* (forse il capolavoro di Conrad) riflettono sensazioni e turbamenti vissuti dall'autore durante il suo soggiorno in Africa. «Marlow terminò di raccontare, e si sedette in disparte, indistinto e silenzioso, nella posa di un Buddha in meditazione. Per un poco nessuno si mosse. «Abbiamo perso l'inizio della marea», disse a un tratto il direttore. Sollevai la testa. Il mare aperto era sbarrato da un nero banco di nubi, e la tranquilla via navigabile che conduceva agli estremi confini della terra scorreva cupa sotto un cielo coperto - sembrava portare verso il cuore di una tenebra immensa.» Joseph Conrad (Józef Konrad Korzeniowski) nacque nel 1857 a Berdyczew, nella Polonia meridionale. Nel 1874 cominciò a viaggiare per mare. Dieci anni più tardi, ottenuta la cittadinanza inglese, trasformò il suo vero nome in quello con il quale è universalmente conosciuto e si affermò come uno dei più grandi scrittori di lingua inglese, pur essendo il polacco la sua lingua madre. Morì nel 1924. Sue celebri opere sono *Cuore di tenebra*, *Il reietto delle isole* (1896), *Lord Jim* (1900), *Nostromo* (1904), *La linea d'ombra* (1917). Di Conrad la Newton Compton ha pubblicato anche *Romanzi del mare*.

Francis Bacon on Motion and Power Guido Giglioni 2016-04-25 This book offers a comprehensive and unitary study of the philosophy of Francis Bacon, with special emphasis on the medical, ethical and political aspects of his thought. It presents an original interpretation focused on the material conditions of nature and human life. In particular, coverage in the book is organized around the unifying theme of Bacon's notion of appetite, which is considered in its natural, ethical, medical and political meanings. The book redefines the notions of experience and experiment in Bacon's philosophy of nature, shows the important presence of Stoic themes in his work as well as provides an original discussion of the relationships between natural magic, prudence and political realism in his philosophy. Bringing together scholarly expertise from the history of philosophy, the history of science and the history of literature, this book presents readers with a rich and diverse contextualization of Bacon's philosophy.

Medicine, Magic and Religion W.H.R. Rivers 2013-01-11 One of the most fascinating men of his generation, W.H.R. Rivers was a British doctor and psychiatrist as well as a leading ethnologist. Immortalized as the hero of Pat Barker's award-winning *Regeneration* trilogy, Rivers was the clinician who, in the First World War, cared for the poet Siegfried Sassoon and other infantry officers injured on the western front. His researches into the borders of psychiatry, medicine and religion made him a prominent member of the British intelligentsia of the time, a friend of H.G. Wells, George Bernard Shaw and Bertrand Russell. Part of his appeal lay in an extraordinary intellect, mixed with a very real interest in his fellow man. *Medicine, Magic and Religion* is a prime example of this. A social institution, it is one of Rivers' finest works. In it, Rivers introduced the then revolutionary idea that indigenous practices are indeed rational, when viewed in terms of religious beliefs.

The Mind-Brain Relationship Regina Pally 2020-11-24 The recent explosion of knowledge in neuroscience has enormous implications for the practice of psychoanalysis, and *The Mind-Brain Relationship* offers an indispensable introduction to the seemingly unfamiliar, intimidating, and yet exciting and essential field of neuropsychology.

International Dictionary of Psychotherapy Giorgio Nardone 2019-03-13 The *International Dictionary of Psychotherapy* is a systematized compendium of the numerous psychotherapies that have evolved over the past 30 years. With contributions from over 350 experts in the field, it highlights the diverse schools of psychotherapy, tracing their histories and traditions, while underlining their specific strengths in dealing with human behaviours, feelings and perceptions in the contemporary world. The book traces eight principal paradigms: psychodynamic, behavioural, existential-humanistic, body-expression, systemic-relational, cognitive, interactional-strategic and eclectic. It presents to the expert and non-expert reader an array of models that grew from a specific paradigm, sharing the same fundamental epistemology and therapeutic strategies. This is accomplished through a reader-friendly approach that presents clear definitions of the key constructs of each paradigm, and transversal concepts that are common to the diverse practices of psychotherapy. The *International Dictionary of Psychotherapy* provides a clear picture of the numerous types of psychotherapeutic treatments and their applications, while offering a close examination of the efficacy and evaluative methods developed as a result of numerous debates and research carried out within the psychotherapeutic community. It represents an essential resource for psychotherapeutic and psychoanalytic practitioners and students, regardless of background or creed.

The Forgotten Revolution Lucio Russo 2013-12-01 The period from the late fourth to the late second century B. C. witnessed, in Greek-speaking countries, an explosion of objective knowledge about the external world. While Greek culture had reached great heights in art, literature and philosophy already in the earlier classical era, it is in the so-called Hellenistic period that we see for the first time — anywhere in the world — the appearance of science as we understand it now: not an accumulation of facts or philosophically based speculations, but an organized effort to model nature and apply such models, or scientific theories in a sense we will make precise, to the solution of practical problems and to a growing understanding of nature. We owe this new approach to scientists such as Archimedes, Euclid, Eratosthenes and many others less familiar today but no less remarkable. Yet, not long after this golden period, much of this extraordinary development had been reversed. Rome borrowed what it was capable of from the Greeks and kept it for a little while yet, but created very little science of its own. Europe was soon smothered in the obscurantism and stasis that blocked most avenues of intellectual development for a thousand years — until, as is well known, the rediscovery of ancient culture in its fullness paved the way to the modern age.

Storia del pensiero cinese Paolo Santangelo 2012-12-12 Dalle tecniche meditative più complesse alle pratiche sciamaniche popolari il pensiero cinese, dai sistemi filosofici e morali dell'antichità alle elaborazioni religiose del Medioevo, dalle tecniche meditative più sofisticate alle pratiche sciamaniche popolari, costituisce un patrimonio estremamente ricco e originale nel complesso della storia del pensiero mondiale. Con il declino dell'ideologia marxista nella forma quasi religiosa maoista e in quella pragmatica di Deng Xiaoping stanno emergendo oggi in Cina molte correnti di pensiero represses negli ultimi decenni, alcune relative all'arte di governare, altre allo sviluppo della libertà interiore. Santangelo ci introduce con chiarezza e semplicità alla storia di questo pensiero e di questi sistemi interessanti per il lettore occidentale in quanto differiscono notevolmente dai presupposti della nostra tradizione. Paolo Santangelo professore ordinario di Storia della Cina presso l'Istituto universitario orientale di Napoli è autore, tra l'altro, di Confucio e le scuole confuciane. La via della saggezza, Newton Compton, 1986.

Christianity, Truth, and Weakening Faith Gianni Vattimo 2010-02-16 The debate over the place of religion in secular, democratic societies dominates philosophical and intellectual discourse. These arguments often polarize around simplistic reductions, making efforts at reconciliation impossible. Yet more rational stances do exist, positions that broker a peace between relativism and religion in people's public, private, and ethical lives. *Christianity, Truth, and Weakening Faith* advances just such a dialogue, featuring the collaboration of two major philosophers known for their progressive approach to this issue. Seeking unity over difference, Gianni Vattimo and René Girard turn to Max Weber, Eric Auerbach, and Marcel Gauchet, among others, in their exploration of truth and liberty, relativism and faith, and the tensions of a world filled with new forms of religiously inspired violence. Vattimo and Girard ultimately conclude that secularism and the involvement (or lack thereof) of religion in governance are, in essence, produced by Christianity. In other words, Christianity is "the religion of the exit from religion," and democracy, civil rights, the free market, and individual freedoms are all facilitated by Christian culture. Through an exchange that is both intimate and enlightening, Vattimo and Girard share their unparalleled insight into the relationships among religion, modernity, and the role of Christianity, especially as it exists in our multicultural world.

The Order of Time Carlo Rovelli 2018-05-08 One of TIME's Ten Best Nonfiction Books of the Decade "Meet the new Stephen Hawking . . . The Order of Time is a dazzling book." --The Sunday Times From the bestselling author of *Seven Brief Lessons on Physics*, *Reality Is Not What It Seems*, and *Helgoland*, comes a concise, elegant exploration of time. Why do we remember the past and not the future? What does it mean for time to "flow"? Do we exist in time or does time exist in us? In lyric, accessible prose, Carlo Rovelli invites us to consider questions about the nature of time that continue to puzzle physicists and philosophers alike. For most readers this is unfamiliar terrain. We all experience time, but the more scientists learn about it, the more mysterious it remains. We think of it as uniform and universal, moving steadily from past to future, measured by clocks. Rovelli tears down these assumptions one by one, revealing a strange universe where at the most fundamental level time disappears. He explains how the theory of quantum gravity attempts to understand and give meaning to the resulting extreme landscape of this timeless world. Weaving together ideas from philosophy, science and literature, he suggests that our perception of the flow of time depends on our perspective, better understood starting from the structure of our brain and emotions than from the physical universe. Already a bestseller in Italy, and written with the poetic vitality that made *Seven Brief Lessons on Physics* so appealing, *The Order of Time* offers a profoundly intelligent, culturally rich, novel appreciation of the mysteries of time.

Law and Intersystemic Communication Assoc Prof Gorm Harste 2013-04-28 With contributions from experts in the field of sociology of law, this book provides an overview of current perspectives on socio-legal studies. It focuses particularly on the relationship between law and society described in recent social systems theory as 'structural coupling'. The first part of the book presents a reconstruction of theoretical tendencies in the field of socio-legal studies, characterised by the emergence of a transnational model of legal systems no longer connected to territorial borders and culturally specific aspects of single legal orders. In the following parts of the book, the contributions analyse some concrete cases of interrelation between law and society from an empirical and theoretical perspective.

Men and Bears AA.VV. 2020-01-23 The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

Following Marsilio Ficino who was the first to place the soul in the center of his vision, Hillman argues for a psychology that reflects the world it works in.

La vera storia di Ah Q Lu Xun 2016-09-01 Edizione integrale Può la giustizia essere cieca come la fortuna e come la fortuna abbattersi a caso sugli esseri umani? Ah Q non è altro che un semplice operaio, perseguitato da sfortune e disgrazie e tuttavia sempre pronto ad accettare la propria sorte e a cercare il lato positivo in ogni cosa. Persino quando inspiegabilmente (ed erroneamente) si ritrova condannato a morte. Certo della superiore giustizia anche in questa circostanza, Ah Q rifiuta di protestare. Il romanzo di Lu Xun, scritto nel 1921, vuol essere una metafora della transizione che portò la Cina da Impero a Repubblica: la Storia appare come una potente macchina che tutto e tutti travolge. Lu Xun (1881-1936) è stato considerato padre della lingua cinese moderna. Appartenente a una famiglia feudale in decadenza, conobbe le difficoltà della Cina rurale, quindi visse in Giappone e studiò medicina a Sendai per quasi due anni, preferendo tuttavia seguire la vocazione letteraria piuttosto che l'attività medica. Pubblicò raccolte di racconti e altri componimenti in prosa e rivisitazioni di antiche leggende cinesi. Famoso il suo Diario di un pazzo.

The Notion of Authority Alexandre Kojève 2020-10-20 In *The Notion of Authority*, written in the 1940s in Nazi-occupied France, Alexandre Kojève uncovers the conceptual premises of four primary models of authority, examining the practical application of their derivative variations from the Enlightenment to Vichy France. This foundational text, translated here into English for the first time, is the missing piece in any discussion of sovereignty and political authority, worthy of a place alongside the work of Weber, Arendt, Schmitt, Agamben or Dumézil. *The Notion of Authority* is a short and sophisticated introduction to Kojève's philosophy of right. It captures its author's intellectual interests at a time when he was retiring from the career of a professional philosopher and was about to become one of the pioneers of the Common Market and the idea of the European Union.

La filosofia indiana Leonardo Vittorio Arena 2012-12-12 L'antica storia del pensiero indiano Lo scopo unico dei pensatori indiani è la realizzazione di sé: la logica può costituire una via alla liberazione, al pari dello studio della natura o di qualsiasi altra scienza. Il medesimo principio viene scandito in molte varianti, a partire dagli antichi documenti religioso-speculativi, i Veda e le Upanishad, sino alle produzioni più evolute delle

scuole bràhmaniche, e riecheggia persino nelle correnti culturali «eterodosse»: Il buddhismo e il giainismo. A differenza del pensiero occidentale, una preoccupazione pratica è sempre riscontrabile nelle dottrine indiane. Si ha un grande rispetto per il dubbio, lo spirit critico e la disposizione individuale alla ricerca. La conoscenza è frutto dell'intuizione. L'uomo ricerca il vero dentro di sé, non in una dottrina altrui. Solo così potrà risvegliarsi e troncarsi il vincolo che lo lega al ciclo della reincarnazione, recuperando la sua autenticità in una dimensione senza tempo. Leonardo Vittorio Arenainsegna Teoria e storia della storiografia presso la Facoltà di lettere dell'Università di Urbino. I suoi interessi si rivolgono alle logiche extraeuropee, nell'auspicata sintesi della filosofia occidentale e orientale. Tra le sue numerose pubblicazioni: Storia del Buddhismo Ch'an, Il canto del derviscio, Antologia del Buddhismo Ch'an, I maestri, Il Nyàya Sùtra, Haiku, Diario Zen, Nietzsche e il nonsense, Realtà e linguaggio dell'inconscio.

Cooking, Eating, Thinking Deane W. Curtin 1992-08-22 Philosophy has often been criticized for privileging the abstract; this volume attempts to remedy that situation. Focusing on one of the most concrete of human concerns, food, the editors argue for the existence of a philosophy of food. The collection provides various approaches to the subject matter, offering new readings of a number of texts—religious, philosophical, anthropological, culinary, poetic, and economic. Included are readings ranging from Plato's *Phaedo* and *Verses of Sen-No-Rikyu* to Peter Singer's "Becoming a Vegetarian" and Jean-François Revel's *Culture and Cuisine*. This reader will have particular appeal for philosophers working in social theory, feminist theory, and environmental ethics, and for those working on alternative approaches to such traditional subject areas as epistemology, aesthetics, and metaphysics.

Philosophy: The Classics Nigel Warburton 2014-02-03 Now in its fourth edition, *Philosophy: The Classics* is a brisk and invigorating tour through the great books of western philosophy. In his exemplary clear style, Nigel Warburton introduces and assesses thirty-two philosophical classics from Plato's *Republic* to Rawls' *A Theory of Justice*. The fourth edition includes new material on: *Montaigne Essays* *Thomas Paine Rights of Man* *R.G. Collingwood The Principles of Art* *Karl Popper The Open Society and Its Enemies* *Thomas Kuhn The Structure of Scientific Revolutions* With a glossary and suggestions for further reading at the end of each chapter, this is an ideal starting point for anyone interested in philosophy.
