Web-Based Education Anil Aggarwal 2003-01-01 "A range of investigative, problem-solving articles pertaining to current developments in educational systems, this collection draws from faculty experiences gained while implementing and utilizing a combination of telecommunications and web-enabled technologies. Addressing trends and issues, and exploring the opportunities and problems confronting colleges and universities related to this relatively new practice, the articles present numerous academic perspectives and provide concepts for effectively utilizing and managing web-based education in a teaching environment. Proving recognizable competition to traditional university education, many public and private colleges and universities are facing the challenges and opportunities offered by this new technology-based concept. Discussing the successes and failures of the early adopters and including issues relating to peer-to-peer networks, e-course management, and MIS needs, this book attempts to move from questions concerning "what" to issues relating to "how.""

Assessing and Improving Your Teaching Phyllis Blumberg 2013-09-11 In order to make appropriate changes to improve your teaching and your students' learning, first you need to know how you're teaching now. Figure it out for yourself and invigorate your teaching on your own terms! This practical evidence-based guide promotes excellence in teaching and improved student learning through self-reflection and self-assessment of one's teaching. Phyllis Blumberg starts by reviewing the current approaches to instructor evaluation and describes their inadequacies. She then presents a new model of assessing teaching that builds upon a broader base of evidence and sources of support. This new model leads to self-assessment rubrics, which are available for download, and the book will

guide you in how to use them. The book includes case studies of completed critical reflection rubrics from a variety of disciplines, including the performing and visual arts and the hard sciences, to show how they can be used in different ways and how to explore the richness of the data you'll uncover.

The Feedback Imperative Anna Carroll 2014-07-08 See faster results through everyday feedback. The Feedback Imperative: How to Give Everyday Feedback to Speed Up Your Team's Success reveals the hidden reasons why giving feedback to employees can be so difficult and yet so urgently needed in today's workplace, and provides the definitive steps for overcoming feedback avoidance and taking great leaps forward with employee engagement, retention, and performance. Anna Carroll applies her extensive research and expertise in business consulting and psychology to illustrate how brain science, generational trends, our information economy, limiting beliefs, and organizational culture collide in the new workplace, creating a huge gap between the supply and demand of helpful professional feedback. In her "Seven Steps to Everyday Feedback" and sixteen tools for self-assessment and planning, Carroll provides detailed instructions for leaders to execute a feedback turnaround that will quench their team members' thirst for helpful feedback and build a culture in which employee-to-leader and peer-to-peer feedback are welcome as well.

Angels and Superheroes Jack M. Jose 2018-02-09 The school accountability movement's focus solely on improving standardized test scores is dehumanizing. There is no standardized child. In the rush to quantify, evaluate, and ostensibly improve the American educational system, we have forgotten that education is complicated. Any attempt to distill it into a simplistic measure will fall short - and will compromise the nobility of the work. How can teachers continue to do the incredibly challenging work of effective education in an environment that can be downright damaging? We can save the soul of education by resisting the dehumanization of students. Teachers can shield children by embracing social-emotional learning, building trust, and displaying compassion. There is no quick-fix to creating a nurturing relationship. There is no single data point that can measure it. Teachers must

commit to being present, paying attention, maintaining consistency, engaging in hard work, practicing humility, and working together. *Angels and Superheroes* provides specific, reproducible practices designed to help teachers cultivate trust and compassion, while managing the pressures of the testing movement. With time-proven theories and cutting-edge research, this book provides engaging examples, concrete strategies, and implementable resources to support teachers in bridging the divide between why they chose this career field – the children, and that which is currently being required of them – the test scores.

Collaborative Peer Coaching That Improves Instruction Dwight W. Allen 2004-10-28 'Collaborative Peer Coaching' introduces the 2+2 performance appraisal method, which has been successful in reducing teachers' levels of anxiety & self-doubt, increasing job satisfaction, increasing meaningful contact between teachers & allowing for appraisals in a less threatening context.

Irresistible Learning: Embedding a culture of research in schools Graham Chisnell 2021-06-25 This book will strengthen your research practice and help build a culture of research across your school. Whether you are a class teacher or school leader, you will be guided to use the power of research to strengthen practice in yourself and others. The author offers a practical guide on how to engage in meaningful research that will have a deep and lasting impact on you and your organisation. You will be taken on a journey through a Research Cycle that will build your confidence and purpose as a researcher; deepening professional relationships and improving outcomes for all. You will then be introduced to a range of systems that construct a culture of research in your school, building a climate where the voice of every member of staff is deeply valued and has the potential to influence the strategic development of the organisation. If you are interested in research in schools, this book is for you.

Thirteen Strategies to Measure College Teaching Ronald A. Berk 2006 This book takes off from the premise that student ratings are a necessary, but not sufficient, source of evidence for measuring teaching effectiveness. It is a fun-filled - but solidly evidence-based - romp through more than a dozen other methods that include measurement by self, peers, outside experts, alumni, administrators, employers, and even extraterrestrials. As the major stakeholders in this process, both faculty and administrators, plus clinicians who teach in schools of medicine, nursing, and the allied health fields, need to be informed about the strengths and weaknesses of the various scales used to measure teaching performance. This is the first basic introduction in the faculty evaluations literature to take you step-by-step through the "Top Secret" process to develop these tools, interpret their scores, and make decisions about teaching improvement, annual contract renewal/dismissal, merit pay, promotion, and tenure. (taken from back cover).

Proceedings of the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022) Ahmed El-Hashash 2023-01-14 This is an open access book. As a leading role in the global megatrend of scientific innovation, China has been creating a more and more open environment for scientific innovation, increasing the depth and breadth of academic cooperation, and building a community of innovation that benefits all. These endeavors have made new contribution to globalization and creating a community of shared future. To adapt to this changing world and China's fast development in this new area, the 2nd International Conference on Internet, Education and Information Technology (IEIT 2022) is to be held in April 15-17, 2022. This conference takes "bringing together global wisdom in scientific innovation to promote high-quality development" as the theme and focuses on research fields including information technology, education, big data, and Internet. This conference aims to expand channels of international academic exchange in science and technology, build a sharing platform of academic resources, promote scientific innovation on the global scale, improve academic cooperation between China and the outside world. It also aims to encourage exchange of information on research frontiers in

different fields, connect the most advanced academic resources in China and abroad, turn research results into industrial solutions, bring together talents, technologies and capital to boost development.

Teaching Assistants Maggie Balshaw 2013-05-13 This practical book is intended to support schools and LEAs in developing effective strategies in working with teaching assistants. It is related to the DfEE's recently published Good Practice Guide (2000). Suggested approaches are supported with real examples from practice, showing the reality of how schools can review and develop practice and so become more effective in their management and support of teaching assistants. The aim is to enable managers in schools and LEAs to work effectively with teaching assistants; teachers to plan classroom approaches for working with teaching assistants; teaching assistants to improve their practice; and children to learn more effectively in inclusive settings. This book will be of use to headteachers, senior staff in schools, SENCOs, LEA support staff, class teachers and teaching assistants.

Knowing What Students Know National Research Council 2001-10-27 Education is a hot topic. From the stage of presidential debates to tonight's dinner table, it is an issue that most Americans are deeply concerned about. While there are many strategies for improving the educational process, we need a way to find out what works and what doesn't work as well. Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education. The nation is pinning greater expectations on educational assessment than ever before. We look to these assessment tools when documenting whether students and institutions are truly meeting education goals. But we must stop and ask a crucial question: What kind of assessment is most effective? At a time when traditional testing is subject to increasing criticism, research

suggests that new, exciting approaches to assessment may be on the horizon. Advances in the sciences of how people learn and how to measure such learning offer the hope of developing new kinds of assessments—assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning. *Knowing What Students Know* essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment—what students know and how well they know it—as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student learning, *Knowing What Students Know* will be important to education administrators, assessment designers, teachers and teacher educators, and education advocates.

Developing Performance-Based Assessments, Grades K-5 Nancy P. Gallavan 2009 "Use PBAs to design learning experiences that increase student engagement and achievement!" This book explains performance-based assessments (PBAs) in easy-to-understand terms and describes how to construct PBAs that measure learner performance effectively while allowing educators to align curriculum and instruction with students' needs. Using PBAs, teachers can engage students in the learning process, connect the learning to students' individual lives, and monitor learning outcomes. The author provides: Detailed and clear examples of performance-based assessments Tools for assessment and guidelines for creating and using rubrics Checklists, frequently asked questions,

graphic organizers, and activities to reinforce the content in each chapter

Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering,

and Mathematics National Research Council 2003-01-19 Economic, academic, and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness.

Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology. Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs, with recommendations to the various stakeholders in higher education about how to achieve change.

What is good undergraduate teaching? This book discusses how to evaluate undergraduate teaching of science, mathematics, engineering, and technology and what characterizes effective teaching in these fields. Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures-and how practices in rewarding researchers could be transferred to the teaching enterprise. How should administrators approach the evaluation of individual faculty members? And how should evaluation results be used? The committee discusses methodologies, offers practical guidelines, and points out pitfalls. Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields.
