The Middle Voice Suzanne Kemmer 1993-01-01 This book approaches the middle voice from the perspective of typology and language universals research. The principal aim is to provide a typologically valid characterization of the category of middle voice in terms of which it can be incorporated in a cognitively-based theory of human language. The term "middle voice" has had a wide range of applications in the linguistic literature of this century. The main thesis in this volume is that there is a coherent, though complex, semantic category of middle voice in human language, which receives grammatical instantiation in many languages. The author claims there is a semantic property crucial to the nature of the middle, which she terms "relative elaboration of events", that serves as a parameter along which the reflexive and the middle can be situated as semantic categories intermediate in transitivity between one-participant and two-participant events, and which differentiates reflexive and middle from one another. In this area, most analyses deal with one language and/or are limited to Indo-European languages. This work deals with a subset of middle-marking languages that was chosen so as to observe the highest possible number of different middle systems showing significant independent diachronic development.

The Crisis of Reason J. W. Burrow 2002-11-01 This elegantly written book explores the history of ideas in Europe from the revolutions of 1848 to the beginning of the First World War. Broader than a straight survey, deeper and richer than a textbook, this work seeks to place the reader in the position of an informed eavesdropper on the intellectual conversations of the past. J. W. Burrow first outlines the intellectual context of the mid-nineteenth century, using ideas taken from physics, social evolution, and social Darwinism, and anxieties about modernity and personal identity, to explore the impact of science and social thought on European intellectual life. The discussion encompasses powerful and fashionable concepts in evolution, art, myth, the occult, and the unconscious mind; the rise of the great cities of Berlin, Paris, and London; and the work of literary writers, philosophers, and composers. Most of the great intellectual figures of the age—and many of the lesser known—populate the book, among them Mill, Bakunin, Nietzsche, Bergson, Renan, Pater, Proust, Clough, Flaubert, Wagner, and Wilde. The author wears his erudition lightly, and this distinguished book will be both entertaining and accessible to scholars, students, and general readers alike.

The Dawn of Slavic Alexander Scenker 2014-08-31 This unique book weaves linguistic, cultural, and historical themes together to form a concise and accessible account of the development of the Slavic languages. Alexander Schenker demonstrates that inquiry into early Slavic culture requires

an understanding of history, language, and texts and that an understanding of early Slavic writing is incomplete outside the context of medieval culture. Drawing on contemporary manuscripts and other primary sources, Schenker presents a historical sketch of Slavic settlement in Europe, tracing the migrations, the political maneuvers, and the integration of the Slavs into the medieval European cultural commonwealth. He next outlines the development of Slavic from its Indo-European origins to the breakup of Slavic linguistic unity and the formation of individual Slavic dialects. In a chapter devoted to the beginnings of Slavic writing, he includes a thematic classification of the oldest Slavic texts, a section on Slavic paleography, and a discussion of the formation of Old Church Slavonic and its role as the first Slavic literary language. An overview of the development of Slavic philology, samples of early Slavic writing with facsimile illustrations, maps, and a chronological table contribute further valuable material to this volume.

Polish Scientific Philosophy Francesco Coniglione 1993 One can often encounter an opinion that Polish scientific (or analytic) philosophy (or the Lvov-Warsaw School) deserves to be much better known than actually is. This book is thought as a response to such a claim. The papers collected in this volume are divided into two parts: Background and Influence and History and Systematics. However, there is no sharp borderline between themes which are touched in both parts. Generally speaking, all papers of the first part relate the Lvov-Warsaw School to some philosophical movements (Brentanism, phenomenology and Marxism) external to it whereas the papers collected in the second one focus on internal issues connected with the school (only Roberto Poli takes into account Brentano's views in his discussion of reism). Since the Polish school of mathematical logic is much better known than the Polish analytic philosophy we decided to omit here any treatment of the former. Thus, this collection centers on purely philosophical matters. We projected this volume not

as an exhaustive panorama of Polish analytic philosophy but rather as a series of essays on particular persons or topic. As a result one can find here papers on Twardowski, Ajdukiewicz, Kotarbinski, Tarski and Lukasiewicz as well as on ethics on science, nominalism, and the methodology of psychology. We hope that this book will contribute to a better knowledge and evaluation of Polish achievements in analytic philosophy. We would like to express our gratitude to Professor Leszek Nowak, the editor-in-chief of Poznan Studies in the Philosophy of the Sciences and the Humanities, who initiated the idea of the collection and helped in its preparation.

The Bars of Atlantis Durs Grünbein 2010-04-13 This landmark collection of essays by one of the world's greatest living authors makes Durs Grünbein's wide-ranging and multifaceted prose available in English for the first time, and is a welcome complement to *Ashes for Breakfast*, his first book-length collection of poetry in English. Covering two decades, *The Bars of Atlantis* unfurls the entire breadth and depth of Grünbein's essayistic genius. Memoiristic and autobiographical pieces that introduce Grünbein, the man and the author, and tell the story of the making of a poet and thinker toward the end of a century marked by global political strife, unprecedented human suffering, long decades of totalitarian rule, and, in its final quarter, the dawn of a new, post-Cold War world order; essays that focus on Grünbein's major philosophical and aesthetic concerns, such as the intersection of art and science, literature and biology; extended reflections on the existential, cultural, political, and ethical import of the poet's craft in the contemporary world; and, finally, explorations of the meaning of classical antiquity for the present—all contribute to making.

Modern Approaches to Terminological Theories and Applications Heribert Picht 2006 This volume comprises contributions originally presented at the 15th European Symposium on Languages for Special Purposes held at the University of Bergamo on 29 August - 2 September 2005. The

volume is divided into four parts: Approaches to Terminological Theories; Terms in Discourse; Knowledge Elicitation, Ordering and Management; Term extraction and terminographical work. The research presented in the various contributions to this volume clearly indicates that terminology as an inter- and transdisciplinary field of knowledge is firmly developing its theoretical foundations and practical applications in accordance with and within the framework of its overall goal: to ensure and to augment the quality of communication with professional content.

The Typology of Reflexives Emma Geniesiené 2011-11-21 Research on language universals and research on linguistic typology are not antagonistic, but rather complementary approaches to the same fundamental problem: the relationship between the amazing diversity of languages and the profound unity of language. Only if the true extent of typological divergence is recognized can universal laws be formulated. In recent years it has become more and more evident that a broad range of languages of radically different types must be carefully analyzed before general theories are possible. Typological comparison of this kind is now at the centre of linguistic research. The series empirical approaches to language typology presents a platform for contributions of all kinds to this rapidly developing field. The distinctive feature of the series is its markedly empirical orientation. All conclusions to be reached are the result of a deepened study of empirical data. General problems are focused on from the perspective of individual languages, language families, language groups, or language samples. Special emphasis is given to the analysis of phenomena from little known languages, which shed new light on long-standing problems in general linguistics. The series is open to contributions from different theoretical persuasions. It thus reflects the methodological pluralism that characterizes the present situation. Care is taken that all volumes be accessible to every linguist and, moreover, to every reader specializing in some domain related to human language. A deeper understanding of human language in general, based on a detailed analysis of typological diversity among individual languages, is fundamental for many sciences, not only for linguists. Therefore, this series has proven to be indispensable in every research library, be it public or private, which has a specialization in language and the language sciences. Greek Tragedy Laura Swift 2016-10-06 The latest volume in the Classical World series, this book offers a much-needed up-to-date introduction to Greek tragedy, and covers the most important thematic topics studied at school or university level. After a brief analysis of the genre and main figures, it focuses on the broader questions of what defines tragedy, what its particular preoccupations are, and what makes these texts so widely studied and performed more than 2,000 years after they were written. As such, the book will be of interest to students taking broad courses

on Greek tragedy, while also being suitable for the general reader who wants an overview of the subject. All passages of tragedy discussed are translated by the author and supplementary information includes a chronology of all the surviving tragedies, a glossary, and guidance on further reading.

Becoming a Revolutionary Timothy Tackett 2014-07-14 Here Timothy Tackett tests some of the diverse explanations of the origins of the French Revolution by examining the psychological itineraries of the individuals who launched it--the deputies of the Estates General and the National Assembly. Based on a wide variety of sources, notably the letters and diaries of over a hundred deputies, the book assesses their collective biographies and their cultural and political experience before and after 1789. In the face of the current "revisionist" orthodoxy, it argues that members of the Third Estate differed dramatically from the Nobility in wealth, status, and culture. Virtually all deputies were familiar with some elements of the Enlightenment, yet little evidence can be found before the Revolution of a coherent oppositional "ideology" or "discourse." Far from the inexperienced ideologues depicted by the revisionists, the Third Estate deputies emerge as practical men, more attracted to law, history, and science than to abstract philosophy. Insofar as they received advance instruction in the possibility of extensive reform, it came less from reading books than from involvement in municipal and regional politics and from the actions and decrees of the monarchy itself. Before their arrival in Versailles, few deputies envisioned changes that could be construed as "Revolutionary." Such new ideas emerged primarily in the process of the Assembly itself and continued to develop, in many cases, throughout the first year of the Revolution. Originally published in 1996. The Medieval Salento Linda Safran 2014-03-10 Located in the heel of the Italian boot, the Salento region was home to a diverse population between the ninth and fifteenth centuries. Inhabitants spoke Latin, Greek, and various vernaculars, and their houses of worship served sizable congregations of Jews as well as Roman-rite and Orthodox Christians. Yet the Salentines of this period laid claim to a definable local identity that transcended linguistic and religious boundaries. The evidence of their collective culture is embedded in the traces they left behind: wall paintings and inscriptions, graffiti, carved tombstone decorations, belt fittings from graves, and other artifacts reveal a wide range of religious, civic, and domestic practices that helped inhabitants construct and maintain personal, group, and regional identities. The Medieval Salento allows the reader to explore the visual and material culture of a people using a database of over three hundred texts and images, indexed by site. Linda Safran draws from art history, archaeology, anthropology, and ethnohistory to

reconstruct medieval Salentine customs of naming, language, appearance, and status. She pays particular attention to Jewish and nonelite residents, whose lives in southern Italy have historically received little scholarly attention. This extraordinarily detailed visual analysis reveals how ethnic and religious identities can remain distinct even as they mingle to become a regional culture.

Spotlight on First Jon Naunton 2014 Spotlight on First is a fully comprehensive course that has been revised to be in line with the new Cambridge English exam specifications for January 2015. It prepares adults and younger learners to excel in the revised exam. An exciting new feature of this revised edition is the Ideas Generator. Test takers need to generate ideas to pass the Speaking and Writing papers of the exam. The Ideas Generator uses National Geographic videos to stimulate students' interest in common exam topics, help them build ideas about these topics and gather the language they need to effectively write or speak about them. After each video lesson students will have a bank of ideas, functional language and vocabulary tied to eight topics that commonly appear in the exam. One of the most difficult parts of the exam for students is the Speaking Test. The Speaking Test videos and worksheets prepare students to deal with this challenge by getting them to engage with simulations of all four parts of the Speaking test.

The Brill Dictionary of Ancient Greek Franco Montanari 2015-05 "The Brill Dictionary of Ancient Greek" is also available online and as a two-volume boxed set. "The Brill Dictionary of Ancient Greek" is the English translation of Franco Montanari's "Vocabolario della Lingua Greca." With an established reputation as the most important modern dictionary for Ancient Greek, it brings together 140,000 headwords taken from the literature, papyri, inscriptions and other sources of the archaic period up to the 6th Century CE, and occasionally beyond. "The Brill Dictionary of Ancient Greek" is an invaluable companion for the study of Classics and Ancient Greek, for beginning students and

advanced scholars alike. Features The principal parts of some 15,000 verbs are listed directly following the entry and its etymology. For each of these forms, the occurrence in the ancient texts has been certified. When found only once, the location is cited. Nearly all entries include citations from the texts with careful mention of the source. The dictionary is especially rich in personal names re-checked against the sources for the 3rd Italian edition, and in scientific terms, which have been categorized according to discipline. Each entry has a clear structure and typography making it easy to navigate. "For a number of years now, scholars at ease in Italian have benefitted enormously from the riches, layout, concision, and accuracy of Professor Montanari's "Vocabolario della Lingua Greca," with its added advantage of the inclusion of names. Hence classicists in general will welcome the English version of this very valuable resource." A Practice Grammar of German Hueber Verlag 2010

The Materialities of Greek Tragedy Mario Telò 2018-06-14 Situated within contemporary posthumanism, this volume offers theoretical and practical approaches to materiality in Greek tragedy. Established and emerging scholars explore how works of the three major Greek tragedians problematize objects and affect, providing fresh readings of some of the masterpieces of Aeschylus,

Sophocles, and Euripides. The so-called new materialisms have complemented the study of objects as signifiers or symbols with an interest in their agency and vitality, their sensuous force and psychosomatic impact-and conversely their resistance and irreducible aloofness. At the same time, emotion has been recast as material "affect,†? an intense flow of energies between bodies, animate and inanimate. Powerfully contributing to the current critical debate on materiality, the essays collected here destabilize established interpretations, suggesting alternative approaches and pointing toward a newly robust sense of the physicality of Greek tragedy.
