Understanding Chefchaouen Letizia Dipasquale 2020-12-14 The medina of Chefchaouen represents an architectural heritage of great value and its building culture constitutes a repertoire of knowledge to be safeguarded as an expression of cultural diversity in the relationship between society and nature. The volume presents the results of an in-depth research on the knowledge system that constitutes the local building culture of the medina, highlighting the characteristics of the construction systems, the risks to which the traditional heritage is subject, and its contribution to the development of a sustainable habitat. The book addresses the theme of the built heritage of the medina with an interdisciplinary approach, which includes architecture as part of a system that has to be studied along with the natural, social and cultural contexts.

Upland Communities Pier Paolo Viazzo 1989-02-16 This book follows the social, economic and demographic transformations of the Alpine area from the late Middle Ages. Its aim is to reassess the image of the upland community which emerges from the work of historians, geographers and social anthropologists. The book therefore deals at length with such problems as the causes and consequences of emigration and patterns of marriage and inheritance in favouring or hampering the adjustments of local populations to changing economic or ecological circumstances, and tackles the vexed question of the relative importance of cultural and environmental factors in shaping family forms and community structures. Although its foundation lies in a long period of anthropological fieldwork conducted in an Alpine community, *Upland Communities* relies on the methods and

conceptual tools of historical demography. Combined with a long-term historical perspective, its broad comparative approach unveils an unexpected diversity in regional and spatial demographic patterns and questions a number of deep-rooted but ultimately misleading notions concerning mountain society and its alleged backwardness in the past.

Obsolete Objects in the Literary Imagination Francesco Orlando 2008-10-01 Translated here into English for the first time is a monumental work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have lost and what we are losing as we rush toward the future.

Suppose Design Office Ai Yoshida 2017 A book showcasing the projects of Japanese architecture firm Suppose Design Office, founded by Makoto Tanijiri and Ai Yoshida. This is the first collection of works from the viewpoint of multiplicity and the design thinking of the creative team at Suppose Design Office, who are always seeking for something new. Based on an architectural perspective, the firm defines its work as discovering fresh ideas, new styles of buildings and new relationships between all interactive elements. They have designed workspaces, landscapes, products, art installations and more than 100 houses. Their interest in the problem-solving and creative challenges of architecture extends through all scales and budgets from 'doghouses to skyscrapers'. Both the new and the familiar inform their search for fresh solutions to the issues of everyday life, which is explained in this book. This monograph offers an exclusive peek into the working life of a world-renowned design firm. By explaining the design processes for creating interior architecture, it is a vital book for anyone in the design industry, from interior designer to manufacturer, and from architect to space designer, as well as students, agencies and professionals in the whole design sector. About the Author Makoto Tanijiri is one of the founding architects of Suppose Design Office. He is also a professor at Musashino Art University, Osaka University of Arts and Anabuki Design College. Ai Yoshida is one of the founding architects of Suppose Design Office. Features - Readers gain complete insight in the working methods of the architectural firm Suppose Design Office. - In-depth features of the different design projects realised by the firm's founders Makoto Tanijiri and Ai Yoshida their team. - This is the first ever book about the work of Suppose Design Office and gives an in-depth look at the design processes. - Tanijiri and Yoshida define their work as a chance to realise fresh ideas about buildings and the relationships of all interactive elements.

Vernacular Architecture: Towards a Sustainable Future C. Mileto 2014-08-28 Sustainability is a concept that has monopolised a large number of the scientific debates in a wide range of spheres connected not only with architecture, urban planning and construction, but also with the product market, tourism, culture, etc. However, sustainability is indissolubly linked to vernacular architecture and the lessons this architectu

Built by Hand Athena Swentzell Steen 2003 Built by Hand is a celebration of what is so uniquely diverse and yet similar in the buildings of different cultures around the world. Beginning with the most basic ways that human beings have sought shelter-beneath the trees and stars, under the protection of a rock cliff or cave-this book traces the transformation of materials such as earth, stone, wood or bamboo into shelters that are both stationary and moveable.

No Picnic on Mount Kenya Felice Benuzzi 2015-11-12 A rediscovered mountaineering classic and the extraordinary true story of a daring escape up Mount Kenya by three prisoners of war. When the clouds covering Mount Kenya part one morning to reveal its towering peaks for the first time, prisoner of war Felice Benuzzi is transfixed. The tedium of camp life is broken by the beginnings of a sudden idea - an outrageous, dangerous, brilliant idea. There are not many people who would break out of a P.O.W. camp, trek for days across perilous terrain before climbing the north face of Mount Kenya with improvised equipment, meagre rations, and with a picture of the mountain on a tin of beef among their more accurate guides. There are probably fewer still who would break back in to the camp on their return. But this is the remarkable story of three such men. No Picnic on Mount Kenya is a powerful testament to the human spirit of revolt and adventure in even the darkest of places. "The history of mountaineering can hardly present a parallel to this mad but thrilling escapade" - Saturday Review "A most extraordinary prisoner-of-war and escape story" - New Yorker "A mad venture and a gallant tribute to man's deep yearning for freedom" - Kirkus Reviews "The book crackles with the same dry humour as its title. It contains the prison-yard bartering and candlelight stitching that mark a classic jailbreak yarn; the encounters with wild beasts in Mount Kenya's forest belt are as gripping, and the descriptions of sparkling glaciers as awe-inspiring, as any passage in the great exploration diaries of the early 20th century" - The Economist

Building with Straw Bales Barbara Jones 2009 Straw bale building is a radically different approach to the process of building. Like all innovative ideas, it has been pioneered by the passionate, and used experimentally by those with the vision to see its potential. It is firmly based in that sustainable, 'green building' culture that has brought to the construction industry many new and useful ideas about energy efficiency and responsibility towards the environment. As a building material, straw excels in the areas of cost-effectiveness and energy efficiency. This practical guide has been written by the most experienced straw bale builder in the UK. It gives details of all the main construction methods, and includes: * bale specifications * plans * walls and foundations * doors and windows * plastering * building regulations and planning permission * frequently asked questions * construction drawings. This fully revised and updated edition includes new construction drawings, standard details for best practice design, examples of off-the-peg drawings for small buildings such as summer-houses and studios, and designs for affordable houses. These designs meet Building Regulations Code 6 for sustainable homes, and have a carbon rating of less than zero.

VERSUS: Heritage for Tomorrow Correia, Mariana 2014 Vernacular architecture represents a

great resource that has considerable potential to define principles for sustainable design and contemporary architecture. This publication is the result of an overall aim to produce a valuable tool for analysis regarding vernacular heritage through different assessments, in order to define principles to consider for sustainable development. This was possible through a comprehensive reflection on the principles established and the strategies to recognise in different world contexts. The present publication was the result of an in-depth approach by 46 authors from 12 countries, concerned with the analysis and critical assessment of vernacular heritage and its sustainable perspective. The book presents 8 chapters addressing operational definitions and synopses advances, regarding the main areas of vernacular heritage contribution to sustainable architecture. It also presents 15 chapters and 53 case studies of vernacular and contemporary approaches in all the 5 continents, regarding urban, architectural, technical and constructive strategies and solutions. **VERSUS, HERITAGE FOR TOMORROW: Vernacular Knowledge for Sustainable Architecture** is the result of a common effort undertaken by the partners ESG | Escola Superior Gallaecia, Portugal, as Project leader; CRATerre | École Nationale Supérieure d'Architecture de Grenoble, France; DIDA | Università degli Studi di Firenze, Italy; DICAAR | Università degli Studi di Cagliari, Italy; and UPV | Universitat Politècnica de València, Spain. This is the final outcome of VerSus, an European project developed from 2012 to 2014, in the framework of the Culture 2007-2013 programme.

Le case in paglia David Eisenberg 2016-04-19 Una casa fatta di paglia? Perché no! Sia che si costruisca una casa intera, o qualcosa di più piccolo - un ufficio o studio, una capanna o un cottage per gli ospiti - gli edifici in balle di paglia intonacate rappresentano un'eccezionale alternativa sia per la durata che per i prezzi molto abbordabili rispetto ai tradizionali e meno naturali metodi. E non basta: costruire in balle di paglia è anche divertente e facile da imparare e da fare. I locali e gli spazi abitabili costruiti con questo materiale ispirano tranquillità e sono comodi da abitare. In questa straordinaria opera dei coniugi Steen (con traduzione e note a cura di Giuseppe Chia) vengono descritti i molti benefici delle case in paglia: Valori tra i più alti per l'isolamento termico Buoni risultati per quanto concerne qualità dell'aria all'interno dell'edificio e riduzione del rumore Rapidi tempi di costruzione (i muri si possono erigere anche in un solo weekend) Costi di costruzione ridotti al minimo (questo dipende dal coinvolgimento attivo del proprietario) Utilizzo di una risorsa naturale rinnovabile e abbondante che viene prodotta in forma sostenibile nel corso di una singola stagione di coltura La migliore soluzione per un materiale che spesso viene classificato come rifiuto e bruciato producendo un inquinamento atmosferico non trascurabile. Scopri in queste pagine tantissime e preziose informazioni per costruire facilmente la tua casa in paglia. La dettagliata descrizione di ogni singola fase di costruzione rende realizzabile il sogno di una casa a costi veramente bassi, sicura ed efficiente dal punto di vista energetico.

The Officers Camp Giampiero Carocci 1997 The Officers Camp tells the story of Caro, a young officer from Florence, and his companions from the time of their capture by the advancing Germany army in the summer of 1943 until their release from a work camp almost two years later. These men seem to have stumbled into their fate: captured and transported to Germany, their lives seem almost dreamlike, and nothing stands out, except when someone is killed or disappears, or starves to death. As the months of imprisonment mount and the officers are moved farther away from their homeland - and into smaller and increasingly poorly run camps - they are reduced to mere shells of humanity, their hope preserved only by intense discussions of food and the swapping of elaborate "recipes".

Martin Dressler Steven Millhauser 2010-09-01 PULITZER PRIZE WINNER • NATIONAL BOOK AWARD FINALIST • The author of *Voices in the Night* reveals the mesmerizing journey of an American dreamer as he walks a haunted line between fantasy and reality, madness and ambition, art and industry. "This wonderful, wonder-full book is a fable and phantasmagoria of the sources of our century." —The New York Times Book Review Young Martin Dressler begins his career as an industrious helper in his father's cigar store. In the course of his restless young manhood, he makes a swift and eventful rise to the top, accompanied by two sisters—one a dreamlike shadow, the other a worldly business partner. As the eponymous Martin's vision becomes bolder and bolder, a sense of doom builds piece-by-hypnotic piece until this mesmerizing journey reaches its bitter-sweet

Italy: the New Domestic Landscape Museum of Modern Art (New York, N.Y.) 1972 "During the last decade, the emergence of Italy as the dominant force in design has had a profound influence in Europe and the Americas. The phenomenon is important not only because of the high quality and diversity of the forms produced, but also because it has generated a lively debate on the sociocultural implications of product design, raising questions of vital concern to designers throughout the world. For many designers, the aesthetic quality of individual objects intended for private consumption have become irrelevant in the face of such pressing problems as poverty, urban decay, and the pollution of the environment now encountered in all industrialized countries. Consequently, they are increasingly shifting the focus of their attention from the well-designed object to man's total environment, seeing the designer's function as one that can mold patterns of behavior by creating new settings for freer, more adaptable lifestyles. Some, however, despairing of effecting social change through design, regard their task as essentially a political one. They therefore abstain from the physical designing of either objects or environments and channel their energies into the staging of events and the issuing of polemical statements. Their approach thus parallels that of many artists in other mediums who view their art in primarily conceptual terms. This publication, issued in conjunction with a major exhibition at The Museum of Modern Art, is the first to deal comprehensively with these challenging developments. Over 150 objects of Italian design of the past ten years have been selected for the show and are all reproduced in color and black-and-white, as are the dozen environments by well-known Italian designers specially commissioned for the occasion, and the two awarded prizes in a concurrent competition for young designers under thirty-five sponsored by the Museum. Each environment is accompanied by a statement in which the individual or group responsible for the project clarifies his position regarding the present and future role of design. In addition to essays by Emilio Ambasz, Curator of Design at the Museum of Modern Art and director of the exhibition, the book contains contributions by a number of outstanding Italian critics and art historians. Together, these comprise the first historical survey of contemporary Italian design and a critical analysis of its intellectual and formal positions within the context of international design today." -- Publisher's description

The Transformation of Central Asia Pauline Jones Luong 2018-08-06 With the fall of the Soviet Union in 1991, former Communist Party leaders in Central Asia were faced with the daunting task of building states where they previously had not existed: Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Their task was complicated by the institutional and ideological legacy of the Soviet system as well as by a more actively engaged international community. These nascent states inherited a set of institutions that included bloated bureaucracies, centralized economic planning, and patronage networks. Some of these institutions survived, others have mutated, and new institutions have been created. Experts on Central Asia here examine the emerging relationship between state actors and social forces in the region. Through the prism of local institutions, the authors reassess both our understanding of Central Asia and of the state-building process more broadly. They scrutinize a wide array of institutional actors, ranging from

regional governments and neighborhood committees to transnational and non-governmental organizations. With original empirical research and theoretical insight, the volume's contributors illuminate an obscure but resource-rich and strategically significant region.

Design for Environmental Sustainability Carlo Arnaldo Vezzoli 2008-06-17 This volume is a technical and operative contribution to the United Nations "Decade on Education for Sustainable Development" (2005-2014), aiding the development of a new generation of designers, responsible and able in the task of designing environmentally sustainable products. The book provides a comprehensive framework and a practical tool to support the design process. This is an important text for those interested in the product development processes.
