[A Chronology of Art](#) Iain Zaczek 2018-02-06 A fresh take on the history of art, using cultural timelines to reveal little-known connections and influences between artworks and artistic movements Most surveys of the history of art are divided into historic periods, artistic schools, and movements. In reality, movements and artists' careers overlap and intertwine, reacting to events in the world around them. By prioritizing a purely chronological approach, *A Chronology of Art* illuminates these relationships from a fresh perspective and places the developments of the art world into context with one another. Structured around a central timeline covering Ancient & Medieval, Renaissance & Baroque, Rococo & Neoclassicism, Romanticism & Beyond, and The Modern Era, the book features lavish illustrations of artworks, together with commentaries, and lively "In Focus" features with information about the social, stylistic, technical, political, and cultural events of each period. This approach reveals little-known connections: the most illustrious Neoclassical painting (David's Oath of the Horatii) was executed just a couple of years after one of the best-known Romantic scenes (Fuseli's The Nightmare); and American artist James Whistler, who had attended West Point Military Academy, was creating his finest work in Europe at the very time when his homeland was being torn apart by civil war.

The Dawn of Everything David Graeber 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations
