*Medieval Persia 1040-1797* David Morgan 2015-06-26 *Medieval Persia 1040-1797* charts the remarkable history of Persia from its conquest by the Muslim Arabs in the seventh century AD to the modern period at the end of the eighteenth century, when the impact of the west became pervasive. David Morgan argues that understanding this complex period of Persia's history is integral to understanding modern Iran and its significant role on the international scene. The book begins with a geographical introduction and briefly summarises Persian history during the early Islamic centuries to place the country's Middle Ages in their historical context. It then charts the arrival of the Saljūq Turks in the eleventh century and discusses in turn the major political powers of the period: Mongols, Timurids, Türkmen and Safawids. The chronological narrative enables students to identify change and consistencies under each ruling dynasty, while Persia's rich social, cultural, religious and economic history is also woven throughout to present a complete picture of life in Medieval Persia. Despite the turbulent backdrop, which saw Persia ruled by a succession of groups who had seized power by military force, arts, painting, poetry, literature and architecture all flourished in the period. This new edition contains a new epilogue which discusses the significant literature of the last 28 years to provide students with a comprehensive overview of the latest

historiographical trends in Persian history. Concise and clear, this book is the perfect introduction for students of medieval Persia and the medieval Middle East.

**Women and Gender Issues in British Paganism, 1945-1990** Shai Feraro 2020-06-11 This book explores the ways in which changing views on gender and the place of women in society during the latter half of the twentieth century affected women's participation and standing within British Paganism. More specifically, it examines how British Wiccans and Wiccan-derived Pagans reacted to the rise of 'second-wave' feminism and the Women's Liberation Movement in the UK - with a special emphasis on the reception of feminist theory hailing from the USA - and to the emergence of feminist branches of Witchcraft and Goddess Spirituality during the 1970s and 1980s. The book draws on primary sources never before analyzed in an academic context and makes a valuable contribution to the growing body of knowledge on gender and religion during the twentieth century, as very little research has been conducted on the relations between the history of modern Paganism and that of second-wave feminism in the UK.

**A History of British Labour Law** Douglas Brodie 2003-09-17 In the UK the received wisdom has tended to be that, historically, British labour law was abstentionist or non-interventionist, best epitomised by the words of Lord Wedderburn who has written that '...collective bargaining has developed in a system which depends very little on the law, which is covered by very few decisions of the judges, and which is controlled by statute very little, if at all.'. It is not until we reach the

Industrial Relations Act 1971 that we discover the first attempt in peacetime to move to a legally regulated system. However, the accuracy of this non-interventionist depiction appears to very much depend on the period which is examined, which is why an historical perspective is needed in order to understand the significance of the current shape and scope of British labour law. The aim of this work is to re-examine the received interpretation by looking at both the role given to law, and that anticipated and argued for it, during the most formative period of its development, the period between 1867 and 1945. The book also revisits the debate about war-time legislation which has tended to be viewed as standing apart from mainstream labour law but which the author demonstrates to have important linkages to the past and present.

*Shopkeepers and Master Artisans in Nineteenth-Century Europe* Geoffrey Crossick 2016-07-01 First published in 1984. Shopkeepers and master artisans had a striking presence in the history of nineteenth-century Europe, not only in the development of industrial and urban economies, but also the fabric of social life and the politics of protest. The experience of 1848, the differing pace of various forms of nationalism and liberalism and, at the end of the century, the shift towards right-wing nationalist or Catholic political movements reflected a developing 'crisis' in the petite bourgeoisie. The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes. This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth-century Europe.

Escape from the Market Michael Huberman 1996-09-12 At the outset of the industrial revolution the Lancashire labour market was a model of thoroughgoing competition. Wages adjusted quickly and smoothly to changes in the demand for and supply of labour. Within two generations, however, workers and firms had retreated from the market. Instead of busting wages, firms paid fixed rates; instead of breaking ties on short notice, workers sought longer-term associations. Social norms - doing the right thing - protected and preserved the fresh labour market arrangements. This book explains the causes and effects of changes in the labour market in the context of developments in labour economics and fresh research in social and economic history.

The Sassoons Joseph Sassoon 2022-10-25 A spectacular generational saga of the making (and undoing) of a family dynasty: the riveting untold story of the gilded Jewish Bagdadi Sassoons, who built a vast empire through global finance and trade—cotton, opium, shipping, banking—that reached across three continents and ultimately changed the destinies of nations. With full access to rare family photographs and archives. “Engaging...compelling...well-paced and supremely satisfying.”—The New York Times They were one of the richest families in the world for two hundred years, from the 19th century to the 20th, and were known as ‘the Rothschilds of the East.’ Mesopotamian in origin, and for more than forty years the chief treasurers to the pashas of Baghdad and Basra, they were forced to flee to Bushir on the Persian Gulf; David Sassoon and sons starting over with nothing, and beginning to trade in India in cotton and opium. The Sassoons soon were building textile mills and factories, and setting up branches in shipping in China, and expanding beyond, to Japan, and further west, to Paris and London. They became members of British parliament; were knighted; and owned and edited Britain’s leading newspapers, including The Sunday Times and The Observer. And in 1887, the exalted dynasty of Sassoon joined forces with the banking empire of Rothschild and were soon joined by marriage, fusing together two of the biggest Jewish commerce and banking families in the world. Against the monumental canvas of two centuries of the Ottoman Empire and the changing face of the Far East, across Europe and Great Britain during the time of its farthest reach, Joseph Sassoon gives us a riveting generational saga of the making of this magnificent family dynasty.
