Hindiyya, Mystic and Criminal, 1720-1798 Bernard Heyberger 2013-03-28 In this compelling narrative, Bernard Heyberger relates the fascinating history of Hindiyya 'Ujaymi, a highly charismatic eighteenth-century mystic of sinister repute. Heyberger makes a careful study of Hindiyya's life from earliest childhood, with a detailed picture of her formative years in the eighteenth century Christian community of Aleppo, the domestic reality of which is little known, exploring the influences she would have experienced. He leads us through her spiritual development under the direction of the Jesuits, her determination to found a new religious order, and the tragic history of its collapse in a welter of paranoia and persecution. Heyberger also reveals the tensions and complex rivalries at play around Hindiyya between Rome, the Jesuits, and Eastern tribes, which were also beset by feuds and alliances. He makes extensive use of a wide variety of sources, from Hindiyya's own writings to reports from her confessors and Roman inquisitors, to shed light upon the Hindiyya affair. 'Hindiyya, Mystic and Criminal' relates the history of a woman of inflexible power of will and great charisma, who managed to move beyond the circumscribed world of her girlhood and realise what she believed to be her destiny. It will be of great interest to anyone seeking a deeper understanding of an affair which has been long obscured by contradictory reports, or to those interested in eighteenth-century Maronite Christianity and its complex interactions with the authority of Rome.

Lives of the Most Eminent Painters, Sculptors and Architects (Vol. 1-10) Giorgio Vasari 2023-11-13 "Lives of the Most Excellent Painters, Sculptors and Architects" in 10 volumes is a series of artist biographies written by 16th-century Italian painter and architect Giorgio Vasari, which is considered one of the most influential and most-read work of the older literature of art, as well as the first important book on art history. The title is

often abridged to just the Vite or the Lives. As the first Italian art historian, Vasari initiated the genre of an encyclopedia of artistic biographies that continues today. The book contains the biographies of many important Italian artists, including a sketch of Vasari's autobiography, and is also adopted as a sort of classical reference guide for their names.

One Step Behind Henning Mankell 2002-02-01 Sweden's most tenacious detective races to unlock the twisted logic behind a madman's crimes: "Lyrical, meticulous, and stunningly suspenseful" (St. Petersburg Times). On Midsummer's Eve, three friends gather in a secluded meadow in Sweden. In the beautifully clear twilight, they don eighteenth-century costumes and begin a secret role-play. But an uninvited guest soon brings their performance to a gruesome conclusion. His approach is careful; his aim is perfect. Three bullets, three corpses. And his plans have only just begun to take shape. Meanwhile, Inspector Kurt Wallander is just back from vacation. Constantly fatigued, he soon learns his health is at risk—but there's no time for rest when a fellow officer is murdered. Wallander soon discovers that the two grisly crimes are connected. A serial killer is on the loose, and the only lead is a photograph of a strange woman no one in Sweden seems to know. Forced to dig into the personal life of a trusted colleague, Wallander steps into a nightmare worse than any he could have imagined. Can he find his way out of the darkness before it's too late? A pulse-pounding thriller and an incisive investigation into the mysteries of human nature, One Step Behind is "typical of the dense, intricate intelligence that Mankell brings to detection and crime writing" (The Washington Post Book World).

Migrant Integration Between Homeland and Host Society Volume 1 Agnieszka Weiner 2017-05-23 This book provides a theoretical framing to analyse and examine the interaction between origin and destination in the migrant integration process. Coverage offers a set of concrete conceptual tools, which can be operationalised when measuring integration. This title is the first of two complementary volumes, each of which is designed to stand alone and provide a different approach to the topic. Here, the chapters offer a detailed look at integration across eight key areas: labour, education, language and culture, civic and political participation, housing, social ties, religion, and access to citizenship. Readers are presented with an examination into the globally available knowledge on interactions between emigration/diaspora policies on one hand and integration policies on the other. Migrants actively belong to two places: the land they left behind and the home they are seeking to build. This book gives an insightful argument for the need to include information about countries and communities of origin when examining integration, which is often overlooked. It will appeal to academics, policymakers, integration practitioners, civil society organisations, as well as students. Overall, the chapters establish a cohesive analytical framework to this important topic. A complementary volume: *Migrant Integration between Homeland and Host Society Volume 2: How countries of origin impact migrant integration outcomes: an analysis*, edited by A. Di Bartolomeo, S. Kalantaryan, J. Salamonska and P. Fargues builds upon this foundation and presents an empirical approach to migrant integration.

Macroeconomics from the Bottom-up Domenico Delli Gatti 2011-04-18 This book arose from our conviction that the NNS-DSGE approach to the analysis of aggregate market outcomes is fundamentally flawed. The practice of overcoming the SMD result by recurring to a fictitious RA leads to insurmountable methodological problems and lies at the root of DSGE models' failure to satisfactorily explain real world features, like exchange rate and banking crises, bubbles and herding in financial markets, swings in the sentiment of consumers and entrepreneurs, asymmetries and persistence in aggregate variables, and so on. At odds with this view, our critique rests on the premise that any modern macroeconomy should be modeled instead as a complex system of heterogeneous interacting individuals, acting adaptively and autonomously according to simple and empirically validated rules of thumb. We call our proposed approach Bottom-up Adaptive Macroeconomics (BAM). The reason why we claim that the contents of this book can be inscribed in the realm of macroeconomics is threefold: i) We are looking for a framework that helps us to think coherently about the interrelationships among two or more markets. In what follows, in particular, three markets will be considered: the markets for goods, labor and loanable funds. In this respect, real time matters: what happens in one market depends on what has happened, on what is happening, or on what will happen in other markets. This implies that intertemporal coordination issues cannot be ignored. ii) Eventually, it's all about prices and quantities. However, we are mostly interested in aggregate prices and quantities, that is indexes built from the dispersed outcomes of the decentralized transactions of a large population of heterogeneous individuals. Each individual acts purposefully, but she knows anything about the levels of prices and quantities which clear markets in the aggregate. iii) In the hope of being allowed to purport scientific claims, BAM relies on the assumption that individual purposeful behaviours aggregates into regularities. Macro behaviour, however, can depart radically from what the individual units are trying to accomplish. It is in this sense that aggregate outcomes emerge from individual actions and interactions.

Popes and Jews, 1095-1291 Rebecca Rist 2016-01-07 In *Popes and Jews, 1095-1291*, Rebecca Rist explores the nature and scope of the relationship of the medieval papacy to the Jewish communities of western Europe. Rist analyses papal pronouncements in the context of the substantial and on-going social, political, and economic changes of the eleventh, twelfth, and thirteenth centuries, as well the characters and preoccupations of individual pontiffs and the development of Christian theology. She breaks new ground in exploring the other side of the story - Jewish perceptions of both individual popes and the papacy as an institution - through analysis of a wide range of contemporary Hebrew and Latin documents. The author engages with the works of recent scholars in the field of Christian-Jewish relations to examine the social and legal status of Jewish communities in light of the papacy's authorisation of crusading, prohibitions against money lending, and condemnation of the Talmud, as well as increasing charges of ritual murder and host desecration, the growth of both Christian and Jewish polemical literature, and the advent of the Mendicant Orders. *Popes and Jews, 1095-1291* is an important addition to recent work on medieval Christian-Jewish relations. Furthermore, its subject matter - religious and cultural exchange between Jews and Christians during a period crucial for our understanding of the growth of the Western world, the rise of nation states, and the development of relations between East and West - makes it extremely relevant to today's multi-cultural and multi-faith society.

Handbook of Trace Evidence Analysis Vincent J. Desiderio 2020-08-18 Covers new trace evidence techniques and expanding areas of analysis, along with key theory and applications Developed around the need for updated information in the disciplines of trace evidence the *Handbook of Trace Evidence Analysis* focuses on the increasing awareness and need for validation, modern methods for addressing and controlling contamination, the shift towards incorporating statistical analyses into the interpretation phase and cutting edge research into new forensic science methods and their application. Beginning with an overview of the topic and discussing the important role that information derived from trace materials can provide during investigations, the book then presents chapters on key techniques. The first being the critical nature of microscopy, and the methods employed for the recognition, collection, and preservation of trace evidence. Subsequent chapters review the core disciplines of trace evidence examination: paints and polymers, hairs, fibers and textiles and glass. Each chapter contains in-depth discussions on the origin of the materials involved, including any natural or synthetic processes involved in their production, the nuances involved in their detection, and the methods of analysis that are used to extract valuable information from samples. In addition, suggested workflows in method and testing selections, as well as addressing specific scientific challenges as well as the limitations of knowledge on the transfer, persistence and background abundance of trace materials are discussed. The book ends by examining the interpretation of trace evidence findings from a historical perspective and examining the methods that are currently being developed. Provides an in-depth introduction to the general area of trace evidence and discusses current and new techniques Consolidates trace evidence and materials categories of testing into one reference series Offers a detailed focus on technical approaches and guidelines to trace evidence Includes analytical schemes/workflows and valuable guides for the interpretation of data and results The *Handbook of Trace Evidence* will appeal to forensic science academics, students, and practitioners in the trace evidence and materials science disciplines, as well as DNA analysts, toxicologists, forensic anthropologists, crime laboratory managers, criminal justice students and practitioners, and legal professionals. It would also be a valuable resource for every crime laboratory reference library.

The Battle Against Covid-19 Filipino American Healthcare Workers on the Frontlines of the Pandemic Response Delia Rarela-Barcelona Ph.D.

2022-10-16 *The Battle Against COVID-19 Filipino American Healthcare Workers on the Frontlines of the Pandemic Response* is a tribute to all health and essential workers who provide critical services to save lives. These frontliners have risked their lives during this pandemic and sadly, a

significant number have succumbed to the deadly virus. Many of them were Filipino American nurses who were adversely and disproportionately affected while serving in critical care and hospital intensive care units. This book brings together some of the voices of these modern-day heroes, highlighting their risks and fears particularly in the early days of the pandemic. The book recounts the unprecedented challenges they faced - their sadness, frustrations, and coping mechanisms amid a life-altering global health crisis. As the world continues to strive to get back to a new kind of normal, the book provides perspectives on continuing efforts to contain the virus, including scientific breakthroughs, and government-led ways to at least transition from pandemic to endemic phase. While it may take time to fully understand the longer-term impact of the COVID-19 pandemic, one thing is certain. Dedicated and brave frontline healthcare workers will continue to do what they know best - provide critical attention, supportive care, and lifesaving interventions.

Mass Spectrometry for Chemists and Biochemists Robert A. S. Johnstone 1996-10-17 This book describes the full range of mass spectrometry techniques and applications. This versatile technique is in ubiquitous use in universities and industry laboratories because of its ability to identify and quantify materials quickly and, if necessary, in minute amounts, and solve analytical problems in a huge variety of fields. The authors adopt an instructional approach and make use of recent examples to illustrate important points. This second edition includes new methods and applications that have developed in the last ten years. Powerful methods combining mass spectrometry with newer separation techniques, the increased use of computers, and analysis of once difficult polar and large-mass compounds such as proteins using new ionisation methods are all discussed. Requiring no previous knowledge of mass spectrometry, this is an ideal teaching text at both undergraduate and postgraduate level, and will also be of considerable interest to research workers.

Ordines Coronationis Franciae, Volume 2 Richard A. Jackson 2017-01-30 The ordines coronationis are essentially the scripts for the coronation of Frankish and French sovereigns. Combining detailed religious, ceremonial, and political material, they are an extraordinarily important source for the study of individual rulers or dynasties, as well as for the study of kingship, queenship, and the evolution of political institutions. Complete in two volumes, Richard A. Jackson's is the first full edition of these texts, including all the ordines from the early thirteenth century through the end of the fifteenth century, a period during which the texts shift from Latin to the vernacular, and the institutions of kingship become distinctively French.

Carpentier's Baroque Fiction Steve Wakefield 2004 Carpentier was one of the first novelists to introduce a version of magical realism and the neo-baroque into Latin American fiction. This study focuses on one of the first novelists to introduce a version of magical realism and the neo-baroque into Latin American fiction. Original research colours eyewitness accounts of Alejo Carpentier's travels through Spain before and during the Spanish Civil War and the inspiration that he drew from the Baroque architecture he encountered there. The origins of Carpentier's uniquely 'baroque' style are found in his endeavour to create a period ambience in his historical fictions through descriptions of visual arts and architectural settings, and parodies of the literary style of Spanish Golden Age writers. 'Medusa's gaze' is used as a metaphor for the petrifying power of the Baroque as a weapon of European dominance. By wielding the same weapon in an act of postcolonial defiance, Carpentier enabled a reassertion of Latin American culture, and laid the foundations for the 1960s 'Boom' in the Latin American novel. Women in Early America Thomas A. Foster 2015-03-20 Tells the fascinating stories of the myriad women who shaped the early modern North American world from the colonial era through the first years of the Republic *Women in Early America*, edited by Thomas A. Foster, goes beyond the familiar stories of Pocahontas or Abigail Adams, recovering the lives and experiences of lesser-known women—both ordinary and elite, enslaved and free, Indigenous and immigrant—who lived and worked in not only British mainland America, but also New Spain, New France, New Netherlands, and the West Indies. In these essays we learn about the conditions that women faced during the Salem witchcraft panic and the Spanish Inquisition in New Mexico; as indentured servants in early Virginia and Maryland; caught up between warring British and Native Americans; as traders in New Netherlands and Detroit; as slave owners in Jamaica; as Loyalist women during the American Revolution; enslaved in the President's house; and as students and educators inspired by the air of equality in the young nation. Foster showcases the latest research of junior and senior historians, drawing from recent scholarship informed by women's and gender history—feminist theory, gender theory, new cultural history, social history, and literary criticism. Collectively, these essays address the need for scholarship on women's lives and experiences. *Women in Early America* heeds the call of feminist scholars to not merely reproduce male-centered narratives, "add women, and stir," but to rethink master narratives themselves so that we may better understand how women and men created and developed our historical past.
