[The Big Book of Serial Killers](#) Jack Rosewood 2023-03-14 There is little more terrifying than those who hunt, stalk and snatch their prey under the cloak of darkness. These hunters search not for animals, but for the touch, taste, and empowerment of human flesh. They are cannibals, vampires and monsters, and they walk among us. These serial killers are not mythical beasts with horns and shaggy hair. They are people living in society, going about their day-to-day activities until nightfall. They are the Dennis Rader's, the fathers, husbands, church-going members of the community. This A-Z encyclopedia of 150 serial killers is the ideal reference book. Included are the most famous true crime serial killers, like Jeffrey Dahmer, John Wayne Gacy, and Richard Ramirez, and not to mention the women who kill, such as Aileen Wuornos and Martha Rendell. There are also lesser-known serial

killers, covering many countries around the world, so the range is broad. Each of the serial killer files includes information on when and how they killed the victims, the background of each killer, or the suspects in some cases such as the Zodiac killer, their trials and punishments. For some, there are chilling quotes by the killers themselves. The Big Book of Serial Killers is an easy-to-follow collection of information on the world's most heinous murderers.

Tender Is the Flesh Agustina Bazterrica 2020-08-04 Working at the local processing plant, Marcos is in the business of slaughtering humans—though no one calls them that anymore. His wife has left him, his father is sinking into dementia, and Marcos tries not to think too hard about how he makes a living. After all, it happened so quickly. First, it was reported that an infectious virus has made all animal meat poisonous to humans. Then governments initiated the “Transition.” Now, eating human meat—“special meat”—is legal. Marcos tries to stick to numbers, consignments, processing. Then one day he’s given a gift: a live specimen of the finest quality. Though he’s aware that any form of

personal contact is forbidden on pain of death, little by little he starts to treat her like a human being. And soon, he becomes tortured by what has been lost—and what might still be saved.

Award-winning writer Gordon Grice takes readers on a tour of the animal kingdom—from grizzly bears to great white sharks, big cats to crocodiles. The Flesh Hunters Jocelyn Suarez 2021-08-04 Hunters are a new breed of criminal. An aberration. Not human, not animal, but a terrifying combination. After a long absence, forensic psychologist Walter Kirino is back with the Hunter Intelligence Division, on the trail of a new Hunter. Following

the bodies that the Highway Snatcher leaves behind, Walter is forced to interrogate the question: where is the line between Hunter and human? To find out, he will revisit his traumatic past and throw open the rooms in his mind where his nightmares lay slumbering.

Deadly Animals Gordon Grice 2012-04-05 Consider, if you can, the case of Jacob Fowler, who heard what he thought was the sound of his own skull cracking between the jaws of a grizzly bear - only to discover that it was. Or the Arizonan jogger who ran a mile back to her car with a rabid fox clamped to her arm before driving to hospital for live-saving inoculations. Or the woman who was attacked by a hyena, dragged from her tent by her face and survived to tell of her ordeal. The dangers of the animal kingdom are the stuff of legend but the reality of man's vulnerability and of nature's savage power is far more various, improbable and chilling than even the most active imagination would fear. In this unique work of nature writing, you will encounter the most formidable predators on land and sea - as well as the most overlooked, bizarre and inventive hazards that mother nature has to offer. Meet the cougar that can leap 40 feet and clear 8-foot fences with a fully-grown deer in its jaws, the tapeworm that's been known to grow as long as 82 feet in the human gut and the elephant that single-handedly destroyed an oil tanker. Drawing on an enormous host of true encounters between man and beast, this is the world's most authoritative compendium of animal attacks on human beings. With mordant wit and expert timing, Gordon Grice provides a gripping journey to the dark side of the animal kingdom and a celebration of its humbling, savage glory. (Originally published in hardback as *The Book of Deadly Animals*.)

Monsters of the Gévaudan Jay M. Smith 2011-03-15 In a brilliant, original rendition, *Monsters of the Gévaudan* revisits a spellbinding French tale that has captivated imaginations for over two hundred years, and offers the definitive explanation of the strange events that underlie this timeless story. In 1764 a peasant girl was killed and partially eaten while tending a flock of sheep. Eventually, over a hundred victims fell prey to a mysterious creature, or creatures, whose cunning and deadly efficiency terrorized the region and mesmerized Europe. The fearsome aggressor quickly took on mythic status, and the beast of the Gévaudan passed into French folklore. What species was this killer, why did it decapitate so many of its victims, and why did it prefer the flesh of women and children? Why did contemporaries assume that the beast was anything but a wolf, or a pack of wolves, as authorities eventually claimed, and why is the tale so often ignored in histories of the ancien régime? Smith finds the answer to these last two questions in an accident of timing. The beast was bound to be perceived as strange and anomalous because its ravages coincided with the emergence of modernity itself. Expertly situated within the social, intellectual, cultural, and political currents of French life in the 1760s, *Monsters of the Gévaudan* will engage a wide range of readers with both its recasting of the beast narrative and its compelling insights into the allure of the monstrous in historical memory.

100 Things You Should Know about Deadly Creatures Camilla De la Bédoyère 2007

Deadly Animals 2012-11-05 *Deadly Animals* explores the ultimate question: which animal wins the title of the most deadly of all time? It is not such an easy question as you might think. Does it belong to the fast and powerful big cats; or is it one of the ancient dinosaurs like Tyrannosaurus Rex or even a large marine predator, like the GreatWhite Shark or the KillerWhale, as recent movies and various legends seem to suggest? Maybe. Yet, sometimes small is powerful, especially if armed with stingers or fangs. Some of the tiniest creatures of all can claim the largest number of victims, like the Anopheles Mosquito, which can spread the deadly disease malaria. So, it is really difficult to judge, isn't it? To help you make up your own mind, *Deadly Animals* presents the most dangerous creatures on Earth, each accompanied by a unique deadly score. Could the toxic slime that oozes from the skin of the Poison Dart Frog put it into the top ten? Or will it be the jaw power and killer instinct of the 'King of the Jungle' - the African lion? Turn the pages (carefully!) to meet the most lethal animals from ancient times to the modern day.
