Gray Herbarium Index; Harvard University Harvard University. Gray Herbarium 1968 A reproduction of a card index, prepared 1894-1903 by Josephine A. Clark at the U.S. Department of Agriculture Library and (since 1903) by the Gray Herbarium. The set reproduces about 265,000 cards published between 1894 and 1966. It is an indispensable tool for the taxonomy of North American plants, covering all vascular plant taxa of the Western Hemisphere beginning with literature of 1886. For earlier names use the original volumes of *Index kewensis*. "Each card bears the scientific name of the plant, an abbreviation of the publishing author, a bibliographical reference to the place of publication and a brief statement of the geographic location of the taxon. New names and new combinations of names are indexed and the synonym involved is provided on each card" (Preface). Cross-references are provided, and when corrections are needed they are supplied on new cards.

Herbarium Barbara M. Thiers 2020-12-08 A treasury like no other Since the 1500s, scientists have documented the plants and fungi that grew around them, organizing the specimens into collections. Known as herbaria, these archives helped give rise to botany as its own scientific endeavor. Herbarium is a fascinating enquiry into this unique field of plant biology, exploring how herbaria emerged and have changed over time, who promoted and contributed to them, and why they remain such an important source of data for their new role: understanding how the world's flora is changing. Barbara Thiers, director of the William and Lynda Steere Herbarium at the New York Botanical Garden, also explains how recent innovations that allow us to see things at both the molecular level and on a global scale can be applied to herbaria specimens, helping us address some of the most critical problems facing the world today. At its heart, Herbarium is a compelling reminder of one of humanity's better impulses: to save things—not just for ourselves, but for generations to come.

Confederate Jasmine and the Fat Tuesday Tree Ann Lewis 1997-04 A book for gardeners, travelers, and anyone who loves the lush landscape of the deep South, *Confederate Jasmine and the Fat Tuesday Tree* is an exquisite combination of delicate images and rich memoiran illustrated volume that is as beautiful as it is unique. Long haunted by the legacy of the South, writer and artist Ann Lewis returns, this time to draw links between the plants and settings she loved while growing up and the individuals and events she encounters as an adult. Collecting "specimens" of the varied plants of the area and weaving them into enchanting miniature collages each of which is accompanied by evocative, humorous, and often touching prose Lewis has created an artistic, lyrical homage to the South that charms and captivates.
