John Graves, Writer Mark Busby 2009-12-03 Renowned for *Goodbye to a River*, his now-classic meditation on the natural and human history of Texas, as well as for his masterful ability as a prose stylist, John Graves has become the dean of Texas letters for a legion of admiring readers and fellow writers. Yet apart from his own largely autobiographical works, including *Hard Scrabble*, *From a Limestone Ledge*, and *Myself and Strangers*, surprisingly little has been written about Graves's life or his work. *John Graves, Writer* seeks to fill that gap with interviews, appreciations, and critical essays that offer many new insights into the man himself, as well as the themes and concerns that animate his writing. The volume opens with the transcript of a revealing, often humorous symposium session in which Graves responds to comments and stories from his old friend Sam Hynes, his former student and contemporary art critic Dave Hickey, and co-editor Mark Busby. Following this is a more formal interview of Graves by Dave Hamrick, who draws the author out on issues relating to each of his major works. John Graves's friends Bill Wittliff, Rick Bass, Bill Broyles, John R. Erickson, Bill Harvey, and James Ward Lee speak to the powerful influence that Graves has had on fellow writers. In addition to these personal observations, nine scholars analyze essential aspects of Graves's work. These include the place of *Goodbye to a River* within environmental literature and how its writing was a rite of passage for its author; Graves as a prose stylist and a literary, rather than polemical, writer; the ways in which Graves's major works present different aspects of a single narrative about our relationship to the land; the question of gender in Graves's work; and Graves's sometimes contentious relationship with *Texas Monthly* magazine. Mark Busby introduces the volume with a critical overview of Graves's life and work, and Don Graham concludes it with a discussion of Graves's reception and literary reputation. A bibliography of works by and about Graves rounds out the book. *John Graves, Writer* confirms Graves's stature not only within Texas letters, but also within American environmental writing, where Graves deserves to be more widely known.

Handbook of Computer Game Studies Joost Raessens 2011-08-19 A broad treatment of computer and video games from a wide range of perspectives, including cognitive science and artificial intelligence, psychology, history, film and theater, cultural studies, and philosophy. New media students, teachers, and professionals have long needed a comprehensive scholarly treatment of digital games that deals with the history, design, reception, and aesthetics of games along with their social and cultural context. The *Handbook of Computer Game Studies* fills this need with a definitive look at the subject from a broad range of perspectives. Contributors come from cognitive science and artificial intelligence, developmental, social, and clinical psychology, history, film, theater, and literary studies, cultural studies, and philosophy as well as game design and development. The text includes both scholarly articles and journalism from such well-known voices as Douglas Rushkoff, Sherry Turkle, Henry Jenkins, Katie Salen, Eric Zimmerman, and others. Part I considers the "prehistory" of computer games (including slot machines and pinball machines), the development of computer games themselves, and the future of mobile gaming. The chapters in part II describe game development from the designer's point of view, including the design of play elements, an analysis of screenwriting, and game-based learning. Part III reviews empirical research on the psychological effects of computer games, and includes a discussion of the use of computer games in clinical and educational settings. Part IV considers the aesthetics of games in comparison to film and literature, and part V discusses the effect of computer games on cultural identity, including gender and ethnicity. Finally, part VI looks at the relation of computer games to social behavior, considering, among other matters, the inadequacy of laboratory experiments linking games and aggression and the different modes of participation in computer game culture.

Modernist Physics Rachel Crossland 2018 *Modernist Physics*' studies literary texts and scientific ideas in their historical context to provide an original account of the ways in which Virginia Woolf and D. H. Lawrence engaged with the scientific theories, especially those of Albert Einstein.

William Harnett's Curious Objects Nika Elder 2022-10-04 Admired for his trompe l'oeil style, American painter William Harnett (1848-1892) was as intellectually ambitious as he was technically skilled. The first scholarly monograph on the artist, *William Harnett's Curious Objects* details Harnett's career-long effort to position still life as a serious art. Nika Elder elevates the significance of Harnett's academic training and questions his apparent turn away from it. Reading his still lifes in relation to wartime visual culture, literary realism, museum display, and industrial design, she shows how Harnett experimented with inanimate objects and pictorial techniques to represent the human condition without depicting the human body. His paintings illustrate late nineteenth-century American material culture, but they also represent Reconstruction, interiority, death and life, and the imagination. By engaging such lofty themes, Harnett reimagined history painting for the modern era. His work thus locates Gilded Age art and culture in the long shadow of the Civil War and its politics.

Fragmentation of the Photographic Image in the Digital Age Daniel Rubinstein 2019-10-08 *Fragmentation of the Photographic Image in the Digital Age* challenges orthodoxies of photographic theory and practice. Beyond understanding the image as a static representation of reality, it shows photography as a linchpin of dynamic developments in augmented intelligence, neuroscience, critical theory, and cybernetic cultures. Through essays by leading philosophers, political theorists, software artists, media researchers, curators, and experimental programmers, photography emerges not as a mimetic or a recording device but simultaneously as a new type of critical discipline and a new art form that stands at the crossroads of visual art, contemporary philosophy, and digital technologies.

The Sikh World Pashaura Singh 2023-05-01 *The Sikh World* is an outstanding guide to the Sikh faith and culture in all its geographical and historical diversity. Routes, Interaction and Exchange in the Southern Maya Area Eugenia Robinson 2023-07-31 This book explores routes of interaction and exchange in the Southern Maya Area, a zone that had both short- and long-distance trade and whose natural resources were exploited by merchants and rulers, colonists and entrepreneurs during Olmec, Teotihuacan, Maya, Aztec, colonial and modern times. The book presents the research of both archaeologists and art historians to identify routes of interconnection, to demonstrate the strategic importance of settlements and ritual locations, and to assess the significance of modes and mediums of exchange. The contributors employ innovative approaches, making use of state-of-the-art technologies to reproduce and analyze the archaeological landscape (e.g. LiDAR, GIS, and least-cost path analysis) and to source and characterize archaeological materials (e.g. neutron activation analysis (NAA), X-ray fluorescence analysis [XRF] and strontium analysis). The book combines these innovative approaches with earlier data sources and past analyses to develop a new, synthetic analysis of interaction. *Routes, Interaction and Exchange in the Southern Maya Area* will appeal to professional academics, students, and interested lay readers from a broad range of social science fields including anthropology, archaeology, geography, economics, history, and art history and is appropriate for undergraduate and graduate courses in Mesoamerican archaeology.

Conjunctions of Mind, Soul and Body from Plato to the Enlightenment Danijela Kambaskovic 2014-09-25 This book examines the nexus between the corporeal, emotional, spiritual and intellectual aspects of human life as represented in the writing of the Middle Ages and the Renaissance. Authors from different fields examine not only the question of the body and soul (or body and mind) but also how this question fits into a broader framework in the medieval and early modern period. Concepts such as gender and society, morality, sexuality, theological precepts and medical knowledge are a part of this broader framework. This discussion of ideas draws from over two thousand years of Western thought: from Plato in the fifth century BC and the fourth century Byzantine dialogues on the soul, to the philosophical and medical writings of the early 1700s. There are four sections to this book: each section is based on where the authors have found a conjunction between the body and mind/soul. The work begins with a section on text and self-perception, which focuses on creative output from the period. The second conjunction is human emotions which are described in their social contexts. The third is sex, where the human body and mind are traditionally believed to meet. The fourth section, *Material Souls*, engages with bodies and other material aspects of existence perceived, studied or utilised as material signs of emotional and spiritual activity.

The Markets and the Media Thomas Schuster 2006 In recent years there has been a great influx of sources for business and financial news, yet the hope that this financial media boom would lead to the democratization of the financial markets has not been realized. Thomas Schuster's *The Markets and the Media* explores why the expansion of economic communication has proven to be of only limited benefit, arguing that the financial media boom has had negative repercussions resulting in substantial costs for the individual as well as the system. *The Markets and the Media* stands alone in its class: It is the first comprehensive analysis focusing on the complex, intricate, and often puzzling relationship between the financial markets and the mass media. Featuring a comprehensive business bibliography, this book is a must-read for both finance experts and media scholars.

Mythologizing Norval Morrisseau Carmen L. Robertson 2016-05-03 "Mythologizing Norval Morrisseau" examines the complex identities assigned to Anishinaabe artist Norval Morrisseau. Was he an uneducated artist plagued by alcoholism and homelessness? Was Morrisseau a shaman artist who tapped a deep spiritual force? Or was he simply one of Canada's most significant artists? Carmen L. Robertson charts both the colonial attitudes and the stereotypes directed at Morrisseau and other Indigenous artists in Canada's national press. Robertson also examines Morrisseau's own shaping of his image. An internationally known and award-winning artist from a remote area of northwestern Ontario, Morrisseau founded an art movement known as Woodland Art developed largely from Indigenous and personal creative elements. Still, until his retrospective exhibition at the National Gallery of Canada in 2006, many Canadians knew almost nothing about Morrisseau's work. Using discourse analysis methods, Robertson looks at news stories, magazine articles, and film footage, ranging from Morrisseau's first solo exhibition at Toronto's Pollock Gallery in 1962 until his death in 2007 to examine the cultural assumptions that have framed Morrisseau.

American Studies Jack Salzman 1990-05-25 This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988. Electronic Visualisation in Arts and Culture Jonathan P. Bowen 2013-09-07 Presenting the latest technological developments in arts and culture, this volume demonstrates the advantages of a union between art and science. *Electronic Visualisation in Arts and Culture* is presented in five parts: *Imaging and Culture* *New Art Practice* *Seeing Motion* *Interaction and Interfaces* *Visualising Heritage* *Electronic Visualisation in Arts and Culture* explores a variety of new theory and technologies, including devices and techniques for motion capture for music and performance, advanced photographic techniques, computer generated images derived from different sources, game engine software, airflow to capture the motions of bird flight and low-altitude imagery from airborne devices. The international authors of this book are practising experts from universities, art practices and organisations, research centres and independent research. They describe electronic visualisation used for such diverse aspects of culture as airborne imagery, computer generated art based on the autoimmune system, motion capture for music and for sign language, the visualisation of time and the long term preservation of these materials. Selected from the EVA London conferences from 2009-2012, held in association with the Computer Arts Society of the British Computer Society, the authors have reviewed, extended and fully updated their work for this state-of-the-art volume.

Ledger Narratives Michael Paul Jordan 2017-09-05 The largest known collection of ledger art ever acquired by one individual is Mark Lansburgh's diverse assemblage of more than 140 drawings, now held by the Hood Museum of Art at Dartmouth College and catalogued in this important book.

The Cheyennes, Crows, Kiowas, Lakotas, and other Plains peoples created the genre known as ledger art in the mid-nineteenth century. Before that time, these Indians had chronicled the heroic achievements of their warriors and chiefs on rock, buffalo robes, and tipi covers. As they came into increasing contact with American traders, the artists recorded their experiences in pencil and crayon drawings on paper bound in ledger or account books. The drawings became known as ledger art. This volume presents in full color the Lansburgh collection in its entirety. The drawings are narratives depicting Plains lifeways through Plains eyes. They include landscapes and scenes of battle, hunting, courting, ceremony, incarceration, and travel by foot, horse, train, and boat. Ledger art also served to prompt memories of horse raids and heroic exploits in battle. In addition to showcasing the Lansburgh collection, *Ledger Narratives* augments the growing literature on this art form by providing seven new essays that suggest some of the many stories the drawings contain and that look at them from innovative perspectives. The authors—scholars of art history, anthropology, history, and Native American studies—touch on such themes as gender, social status, sovereignty, tribal and intertribal politics, economic exchange, and confinement and space in a changing world. The Lansburgh collection includes some of the most arresting examples of Plains Indian art, and the essays in this volume help us see and hear the multiple narratives these drawings relate.

Wireless Writing in the Age of Marconi Timothy C. Campbell 2006-01-01 Wireless technology has become deeply embedded in everyday life, but its impact cannot be fully understood without probing the contributions of the Italian inventor Guglielmo Marconi (1874-1937), who ushered in the beginning of wireless communication. Marconi produced and detected sound waves over long distances, using the curvature of the earth for direction, and laid the foundations for what we know as radio—the original mobile, voice-activated, and electronic media community. Timothy C. Campbell demonstrates that Marconi's invention of the wireless telegraph was not simply a technological act but also had an impact on poetry and aesthetics and linked the written word to the rise of mass politics. Reading influential works such as F. T. Marinetti's futurist manifestos, Rudolf Arnheim's 1936 study *Radio*, writings by Gabriele D'Annunzio, and Ezra Pound's *Cantos*, Campbell reveals how the newness of wireless technology was inscribed in the ways modernist authors engaged with typographical experimentation, apocalyptic tones, and newly minted models for registering voices. *Wireless Writing in the Age of Marconi* presents an alternative history of modernism that listens as well as looks and bears in mind the altered media environment brought about by the emergence of the wireless. Timothy C. Campbell is associate professor of Italian at Cornell University.

Late Prehistoric Hunter-Gatherers and Farmers of the Jornada Mogollon Thomas R. Rocek 2019-02-21 Often seen as geographically marginal and of limited research interest to archaeologists, the Jornada Mogollon region of the southwestern United States and northern Mexico deserves broader attention. *Late Prehistoric Hunter-Gatherers and Farmers of the Jornada Mogollon* presents the major issues being addressed in Jornada research and reveals the complex, dynamic nature of Jornada prehistory. The Jornada branch of the Mogollon culture and its inhabitants played a significant economic, political, and social role at multiple scales. This volume draws together results from recent large-scale CRM work that has amassed among the largest data sets in the Southwest with up-to-date chronological, architectural, faunal, ceramic, obsidian sourcing, and other specialized studies. Chapters by some of the most active researchers in the area address topics that reach beyond the American Southwest, such as mobility, forager adaptations, the transition to farming, responses to environmental challenges, and patterns of social interaction. *Late Prehistoric Hunter-Gatherers and Farmers of the Jornada Mogollon* is an up-to-date summary of the major developments in the region and their implications for Southwest archaeology in particular and anthropological archaeological research more generally. The publication of this book is supported in part by the Arizona Archaeological and Historical Society and the Center for Material Culture Studies at the University of Delaware. Contact, Colonialism, and Native Communities in the Southeastern United States Edmond A. Boudreaux III 2020-02-25 The years AD 1500-1700 were a time of dramatic change for the indigenous inhabitants of southeastern North America, yet Native histories during this era have been difficult to reconstruct due to a scarcity of written records before the eighteenth century. Using archaeology to enhance our knowledge of the period, *Contact, Colonialism, and Native Communities in the Southeastern United States* presents new research on the ways Native societies responded to early contact with Europeans. Featuring sites from Kentucky to Mississippi to Florida, these case studies investigate how indigenous groups were affected by the expeditions of explorers such as Hernando de Soto, Pánfilo de Narváez, and Juan Pardo. Contributors re-create the social geography of the Southeast during this time, trace the ways Native institutions changed as a result of colonial encounters, and emphasize the agency of indigenous populations in situations of contact. They demonstrate the importance of understanding the economic, political, and social variability that existed between Native and European groups. Bridging the gap between historical records and material artifacts, this volume answers many questions and opens up further avenues for exploring these transformative centuries, pushing the field of early contact studies in new theoretical and methodological directions. Mass Media and Political Decision-Making Nino Landerer 2016-10-20 To what extent have political decision-making processes become mediatized? Based on this question, the author analyzes media coverage and parliamentary actors' (MPs) strategies and perceptions in three conflicted decision-making processes in Switzerland. Mediatization of politics refers to behavioral changes and adaptations of political actors, institutions, and processes that are related to (mass) media. According to some scholars, mediatization may lead to politics of immediacy, conflict, drama, and personalization, thereby challenging established institutions and processes in liberal democracies. The quantitative and qualitative analyses of MPs' strategies and perceptions provide new insights into how political actors may "self-mediatize" in the advent of globalization and polarization. Overall, the book adopts an actor-centric approach and shows that mediatization of politics is not a fate, but a strategic choice.

Historical Archaeology Martin Hall 2009-02-09 This volume offers lively current debates and case studies in historical archaeology selected from around the world, including North America, Latin America, Africa, the Pacific, and Europe. Authored by 19 experts in the field. Explores how historical archaeologists think about their work, piecing together information from both material culture and documents in an attempt to understand the lives of the people and societies they study. Engages with current theory in an accessible manner. Truly global in its approach but avoids subsuming local experiences of people into global patterns. Summarizes not only the current state of historical archaeology, but also sets the course for the field in decades to come.

The Bloomsbury Handbook to Friedrich Froebel Tina Bruce 2023-11-30 Friedrich Froebel (1782 - 1852), the inventor of kindergarten, was one of the most influential educational thinkers of the 19th century. This book showcases the cutting-edge work being undertaken around the world inspired by this pioneer of early childhood education and shows the many ways in which Froebel's work has been applied and extended. It presents a wealth of Froebelian expertise on topics including pedagogy and curriculum, history, architecture, neuroscience, peace and religious education and links Froebel's theories to other thinkers including John Dewey, Michel Foucault, Paulo Freire, Aili Helenius and Chen Heqin. It highlights what Froebel means today in a variety of settings around the world and includes contributions from academics and practitioners based in North and South America, Europe, Australasia, Africa and Asia.

Different Inside The FT An Insight Into The Art Of Journalism eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted

text.

They are highly compatible but lack advanced formatting features.

Choosing the right Inside The FT An Insight Into The Art Of Journalism eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.
