The Heart of Pinocchio Collodi Nipote 2016-07-18 The Heart of Pinocchio by Collodi Nipote. New adventures of the celebrated little puppet. Dear Boys and Girls, -Let us hope that none of you has been so unfortunate as to have missed the pleasure of watching sometime or other a puppet show. Probably Punch and Judy is the one you know best, but there are many others with jolly little fellows who dance in and out of all sorts of adventures. So you can imagine Pinocchio, the hero of this book, as one of those lively puppets. And, in case you have never read the earlier book about him, you will want to know something of what happened to him before you meet him in these pages. One day a poor carpenter, called Master Cherry, began to cut up a piece of wood to make a table-leg of it when, to his utmost amazement, the piece of wood cried out, "Do not strike me so hard!" The frightened carpenter stopped for a moment, and when he began again and struck the wood a blow with his ax the voice cried out once more, "Oh, oh! you have hurt me so!" The carpenter was now so terrified that he was only too glad to turn the piece of wood over to a neighbor, Papa Geppetto, who cut it up into the shape of a boy puppet, painted it, and named it Pinocchio-which means "a piece of pinewood." As soon as he had finished making him, Pinocchio grabbed the old man's wig off his head and started in to play tricks. Papa Geppetto then taught the puppet to walk, and when naughty Pinocchio discovered he could use his legs, he ran away. Then began all kinds of adventures, and Pinocchio was sometimes naughty and selfish, and sometimes kind and considerate, but always funny and jolly. In this new book Pinocchio's heart has grown through love and consideration for others, so that he becomes a real boy and takes part in the war to help his beautiful country, Italy.

The Silent Revolution in Cancer and AIDS Medicine Heinrich Kremer 2012-09-10 Examining all the major research data since the 1940s, this book challenges two orthodox medical models: HIV as the cause of AIDS, and random genetic mutations as the cause of cancer. Based on the recent findings from Evolutionary Biology and Nitric Oxide research, it presents a fundamentally new understanding of the human cell, its double genome split between the cell nucleus and the mitochondria, and the role of energy production and signal modulation for immune reactions and carcinogenesis. Finally, it explains the concept of a new Cell Symbiosis Therapy® for the treatment of all chronic diseases, including cancer. Now available in English for the first time, this book is a must-read for doctors, patients and anyone following the cutting edge of biology and immunology. With the blasting open of such doors of knowledge, the medical world will never again be the same. Heinrich Kremer, MD, Medical Director Emeritus was, from 1968-1975, head of social therapy for addicts, sexual offenders and people with personality disorders at the Berlin Tegel prison which was the pilot project for the reform of the German penal system. In 1988 he resigned as medical director of a model clinic specializing in youth drug addiction due to differences on medical ethics regarding the HIV test and AIDS therapy. From 1993-1999 as collaborating member of the Study Group for Nutrition and Immunity (Bern) he investigated together with Prof. Alfred Hässig the mechanisms occurring in AIDS defining illnesses and in cancer. Since the publication of this book in German in 2001 he has been in demand as a lecturer on the treatment of chronic diseases, working today as senior consultant in a growing medical network for Cell Symbiosis Therapy®.

The Song of the Sirens Pietro Pucci 1998 In this collection of his essays on Homer, some new and some appearing for the first time in English, the distinguished scholar Pietro Pucci examines the linguistic and rhetorical features of the poet's works. Arguing that there can be no purely historical interpretation, given that the parameters of interpretation are themselves historically determined, Pucci focuses instead on two features of Homer's rhetoric: repetition of expression (formulae) and its effects on meaning, and the issue of intertextuality.

Performance and Media Sarah Bay-Cheng 2015-11-05 This timely collaboration by three prominent scholars of media-based performance presents a new model for understanding and analyzing theater and performance created and experienced where time-based, live events, and mediated technologies converge—particularly those works conceived and performed explicitly within the context of contemporary digital culture. Performance and Media introduces readers to the complexity of new media-based performances and how best to understand and contextualize the work. Each author presents a different model for how best to approach this work, while inviting readers to develop their own critical frameworks, i.e., taxonomies, to analyze both past and emerging performances. Performance and Media capitalizes on the advantages of digital media and online collaborations, while simultaneously creating a responsive and integrated resource for research, scholarship, and teaching. Unlike other monographs or edited collections, this book presents the concept of multiple taxonomies as a model for criticism in a dynamic and rapidly changing field.

Urban Ecological Design Danilo Palazzo 2012-06-22 This trailblazing book outlines an interdisciplinary "process model" for urban design that has been developed and tested over time. Its goal is not to explain how to design a specific city precinct or public space, but to describe useful steps to approach the transformation of urban spaces. Urban Ecological Design illustrates the different stages in which the process is organized, using theories, techniques, images, and case studies. In essence, it presents a "how-to" method to transform the urban landscape that is thoroughly informed by theory and practice. The authors note that urban design is viewed as an interface between different disciplines. They describe the field as "peacefully overrun, invaded, and occupied" by city planners, architects, engineers, and landscape architects (with developers and politicians frequently joining in). They suggest that environmental concerns demand the consideration of ecology and sustainability issues in urban design. It is, after all, the urban designer who helps to orchestrate human relationships with other living organisms in the built environment. The overall objective of the book is to reinforce the role of the urban designer as an honest broker and promoter of design processes and as an active agent of social creativity in the production of the public realm.

QED Coherence in Matter Giuliano Preparata 1995 Up until now the dominant view of condensed matter physics has been that of an "electrostatic MECCANO" (erector set, for Americans). This book is the first systematic attempt to consider the full quantum-electrodynamical interaction (QED), thus greatly enriching the possible dynamical mechanisms that operate in the construction of the wonderful variety of condensed matter systems, including life itself. A new paradigm is emerging, replacing the "electrostatic MECCANO" with an "electrodynamical NETWORK," which builds condensed matter through the long range (as opposed to the "short range" nature of the usual electrostatic forces) electrodynamical interaction; this interaction creates "coherent configurations" of the elementary systems (atoms and molecules), which oscillate in phase with a coherent macroscopic (and classical) electromagnetic field that, through the strong interaction with matter, remains trapped inside it.

The Participatory Condition in the Digital Age Darin Barney 2016-11-01 Just what is the "participatory condition"? It is the situation in which taking part in something with others has become both environmental and normative. The fact that we have always participated does not mean we have always lived under the participatory condition. What is distinctive about the present is the extent to which the everyday social, economic, cultural, and political activities that comprise simply being in the world have been thematized and organized around the priority of participation. Structured along four axes investigating the relations between participation and politics, surveillance, openness, and aesthetics, The Participatory Condition in the Digital Age comprises fifteen essays that explore the promises, possibilities, and failures of contemporary participatory media practices as related to power, Occupy Wall Street, the Arab Spring uprisings, worker-owned cooperatives for the post-Internet age; paradoxes of participation, media activism, open source projects; participatory civic life; commercial surveillance; contemporary art and design; and

education. This book represents the most comprehensive and transdisciplinary endeavor to date to examine the nature, place, and value of participation in the digital age. Just as in 1979, when Jean-François Lyotard proposed that "the postmodern condition" was characterized by the questioning of historical grand narratives, *The Participatory Condition in the Digital Age* investigates how participation has become a central preoccupation of our time. The Distaff Side Beth Cohen 1995 Female Characters play various roles in the Odyssey: patron goddess (Athena), seductress (Kirke, the Sirens, Nausikaa), carnivorous monster (Skylia), maid servant (Eurykleia), and faithful wife (Penelope). Adopting an interdisciplinary approach, this study examines these different female representations and their significance within the context of the poem and Greek culture. A central theme of the book is the visualization of the Odyssey's female characters by ancient artists, and several essays discuss the visual and iconographic implications of Odysseus' female encounters as depicted in Greek, Etruscan, and Roman art. The distinguished contributors--from the fields of classical studies, comparative literature, art history, and archaeology--are A.J. Graham, Seth L. Schein, Diana Buitron-Oliver, Beth Cohen, Sheila Murnaghan, Lillian Eileen Doherty, Helene P. Foley, Froma I. Zeitlin, H.A. Shapiro, Richard Brilliant, Jenifer Neils, and Christine Mitchell Havelock. Feminine in orientation, but not narrowly feminist in approach, this first interdisciplinary work on the Odyssey's female characters will have a broad audience amongst scholars and students working in classical studies, iconography and art history, women's studies, mythology, and ancient history.

The Watergate Joseph Rodota 2018-02-20 Since its opening in 1965, the Watergate complex has been one of Washington's chicest addresses, a home to power brokers from both political parties and the epicenter of a scandal that brought down a president. In *The Watergate*, writer and political consultant Joseph Rodota paints a vivid portrait of this landmark and the movers and shakers who have lived there. Watergate residents—an intriguing cast of politicians, journalists, socialites and spies—have been at the center of America's political storms for half a century. The irrepressible Martha Mitchell, wife of President Nixon's attorney general and campaign manager John Mitchell, captivated the nation with a stream of outrageous interviews and phone calls from her Watergate duplex. Supreme Court justices Ruth Bader Ginsburg and Antonin Scalia put aside their differences many a New Year's Eve to celebrate together at the Watergate, dining on wild game hunted by Scalia and cooked by Ginsburg's husband. Monica Lewinsky hunkered down in her mother's Watergate apartment while President Clinton fought impeachment; her neighbor U.S. Senator Bob Dole brought donuts to the hordes of reporters camped out front. Years after Secretary of State Condoleezza Rice hosted chamber music concerts in her Watergate living room, guests remembered the soaring music—and the cheap snacks. Rodota unlocks the mysteries of the Watergate, including why Elizabeth Taylor refused to move into a Watergate apartment with her sixth husband; reveals a surprising connection between the Watergate and Ronald Reagan; and unravels how the Nixon break-in transformed the Watergate's reputation and spawned generations of "-gate" scandals, from Koreagate to Deflategate. The Washington Post once called the Watergate a "glittering Potomac Titanic." Like the famous ocean liner, the Watergate was ahead of its time, filled with boldface names—and ultimately doomed. The Watergate is a captivating inside look at the passengers and crew of this legendary building.

City Branding Véronique Patteeuw 2002 In this era of 'experience economy' and the leisure industry, cities face increasing pressure to distinguish themselves. Ever since Frank Gehry put the city of Bilbao into the international spotlight with his design for the Guggenheim museum, architecture played a more and more important role within this competition between cities. City branding, the planned image or brand of a city, now forms a challenge for architects and urban planners. How do you position a city in a culture dominated by globalization? What are the priorities for inhabitants, companies and investors? Group portraits of young architects 2002 brought together four occasional groups of architects, which each developed a project for two cities in the Netherlands based on city branding. Critical essays on the subject by Berci Florian, Hans Mommaas and Michael Speaks. Koen van Synghel puts the projects in perspective.

Michael O'Leary Alan Ruddock 2008-03-27 Michael O'Leary is a business giant. He transformed Ryanair from a loss-making joke of an Irish carrier into one of the most valuable airlines in the world, and in the process he has revolutionized the very nature of commercial aviation. In this, the first biography of O'Leary, Alan Ruddock portrays the man in three dimensions and examines the business miracle - often talked about but poorly understood - that O'Leary has wrought. 'Ruddock's fast-paced retelling of Ryanair's rise and rise confirms O'Leary's insistence that his success has little to do with the management maxims of business gurus and everything to do with graft and ruthless attention to detail' Observer 'Probably the definitive Ryanair story ... a good read' Sunday Independent 'The fullest and most accurate picture of O'Leary to date' Irish Daily Mail 'Unlike

previous books which simply chart the growth of the airline, this one is bound to get under O'Leary's skin because it reveals a great deal about his hugely driven character' Irish Independent 'Ruddock is good on the flavour of the man, a bundle of energy whose two favourite words start with an F and an S (they aren't flower and sugar)' Irish Examiner

The Builders Association Shannon Jackson 2015-10-09 A lavishly illustrated history and critical appraisal of The Builders Association, an award-winning intermedia performance company, with detailed accounts of its major productions. This book begins with the building of a house, and the building of a company while building the house. It expands to look at the ideas found in various rooms, some of which expanded into virtual space while they still were grounded in the lives of the artists in the house. —from the preface by Marianne Weems The Builders Association, an award-winning intermedia performance company founded in 1994, develops its work in extended collaborations with artists and designers, working through performance, video, architecture, sound, and text to integrate live performance with other media. Its work is not only cross-media but cross-genre—fiction and nonfiction, unorthodox retellings of classic tales and multimedia stagings of contemporary events. This book offers a generously illustrated history and critical appraisal of The Builders Association, written by Shannon Jackson, a leading theater scholar, and Marianne Weems, the founder and artistic director of the company. It also includes critical meditations from such artists and scholars as Elizabeth Diller, Pico Iyer, Saskia Sassen, Kate Valk, and many others. Technological wizardry in the theater has a long history, going back to the deus ex machina of ancient Greek drama. The Builders Association makes its technological dependence visible, putting backstage technologies center stage and presenting architectural assemblies of screens and bodies. Jackson and Weems explore a series of major productions—from MASTER BUILDER (Ibsen by way of Gordon Matta-Clark) to SUPERVISION (an exploration of dataveillance) to HOUSE/DIVIDED (the foreclosure crisis juxtaposed with the Joads of Steinbeck's *The Grapes of Wrath*). Each work is described through a series of steps, including "R&D," "Operating Systems," "Storyboard," and "Rehearsal/Assembly." The Builders Association not only traces the evolution of an intermedial aesthetic practice but also tells a story about how a group makes the risky decision to make art in the first place.

Ethics of Information and Communication Technologies Adriano Fabris 2018-03-05 This book discusses key ethical and deontological problems concerning the use of the most common information and communication devices. It focuses on the challenges of the new environments we now find ourselves in thanks to these technologies, and the issues arising from the newly established relationship between the virtual sphere and the real world. Each aspect is analysed by starting from a very specific example or a case study presenting a dilemma that can only be resolved by making a reasoned ethical choice. Rather than thematically addressing only one of the many aspects mentioned above (for example, computer ethics or social network ethics), the book presents a comprehensive introduction to, and a co-ordinated overview of, the various deontological and ethical issues regarding the spread of the most common information and communication technologies.

The Case Against Adolescence Robert Epstein 2007 This groundbreaking book argues that adolescence is an unnecessary period of life that people are better off without. Robert Epstein, former editor-in-chief of "Psychology Today," shows that teen turmoil is caused by outmoded systems put into place a century ago which destroyed the continuum between childhood and adulthood. Where this continuum still exists in other countries, there is no adolescence. Isolated from adults, American teens learn everything they know from their media-dominated peers--"the last people on earth they should be learning from," says Epstein. Epstein explains that our teens are highly capable--in some ways more capable than adults--and argues strongly against "infantilizing" young people. We must rediscover "the adult in every teen," he says, by giving young people adult authority and responsibility as soon as they can demonstrate readiness. This landmark book will change the thinking about teens for decades to come.

Capital Spaces Matthew Carmona 2013-05-02 In recent years it has become common-place to hear claims that public space in cities across the globe has become the exclusive preserve of the wealthy and privileged, at the expense of the needs of wider society. Whether it is the privatization of public space through commercial developments like shopping malls and business parks, the gentrification of existing spaces by campaigns against perceived anti-social behaviour or the increasing domination of public areas by private transport in the form of the car, the urban public space is seen as under threat. But are things really that bad? Has the market really become the sole factor that influences the treatment of public space? Have the financial and personal interests of the few really come to dominate those of the many? To answer these questions Matthew Carmona and Filipa Wunderlich have carried out a detailed investigation of the modern public spaces of London, that most global of cities. They have developed a new typology of public spaces applicable to all cities, a typology that demonstrates that to properly assess contemporary urban places means challenging the over-simplification of current critiques. Global cities are made up of many overlapping public spaces, good and bad; this book shows how to analyze this complexity, and to understand it.

Aztec and Maya Myths Karl Taube 1993 The myths of the Aztec and Maya derive from a shared Mesoamerican cultural tradition. This is very much a living tradition, and many of the motifs and gods mentioned in early sources are still evoked in the lore of contemporary Mexico and Guatemala. Professor Taube discusses the different sources for Aztec and Maya myths. The Aztec empire began less than 200 years before the Spanish conquest, and our knowledge of their mythology derives primarily from native colonial documents and manuscripts commissioned by the Spanish. The Maya mythology is far older, and our knowledge of it comes mainly from native manuscripts of the Classic period, over 600 years before the Spanish conquest. Drawing on these sources as well as nineteenth- and twentieth-century excavations and research, including the interpretation of the codices and the decipherment of Maya hieroglyphic writing, the author discusses, among other things, the Popol Vuh myths of the Maya, the flood myth of Northern Yucatan, and the Aztec creation myths.
