The Alphabet War Diane Burton Robb 2004-01-01 Best Children's Books of the Year, Bank Street College Why was reading so hard? When Adam started kindergarten, the teacher wanted him to learn about letters. But "p" looked like "q," and "b" looked like "d." Adam would rather color or mold clay. In first grade, his teacher wanted him to put the letters into words so he could read. That was the beginning of the Alphabet War. "Was" looked like "saw," and "there" looked like "then." Almost everyone else in his class was learning to read, but Adam was fighting a war against letters. In second grade, he had to learn to spell, which was also impossible. Now he was so frustrated he got into trouble and had to go to the principal's office. At last, in third grade, he got the right kind of help. Slowly he began to do better. During fourth grade, he learned that he could excel in other things. That gave him the confidence to take chances with reading. One day he found himself reading a book all by himself!

A Family for Sammy Kate Gaynor 2008 This book has been designed for parents, teachers, carers and social workers to read with children who are about to begin the process of Foster Care. The story is told through the eyes of the main character, Sammy, who is himself going through the Foster Care process. He refers to feelings of fear and doubt about his holiday to another family, but he is delighted to find that his new family are kind, caring and have time to have fun with him! By the time Sally the social worker comes to collect him he is feeling happy and safe in his new home. He returns to his family to find them happier than they had been when he left, and positive that he will have no fear of returning to a similar holiday family. By reading this story with your child, and discussing the experience of a child in a similar situation, the parent/social worker can enforce the fact that a holiday to a short-term foster family is a positive thing. It is something that children shouldn't fear, but in fact, look forward to! It also reassures them that when the holiday is over they will be returning to their families, and that it is not a permanent move

Biobased Nanotechnology for Green Applications Hemen Sarma 2021-05-02 Investigation on biobased nanomaterials has provided new insights into the rapidly advancing fields of the biomedical and environmental sciences by showing how these nanomaterials are effective in biomedicine and environmental remediation. These particles hold tremendous prospective applications, and are likely to become the next generation of particles in these areas. As such, research is ongoing and the data generated should have the potential for a sustainable future in both the environmental and biomedical fields. This book presents important findings on the role of and identification of novel applications of biobased nanomaterials. Unlike other books in this field, this book focuses entirely on sustainable application and remediation in biomedicine and environmental science. The chapters are

written in such a way as to make them accessible to the reader, and furthermore, the volume can be readily adopted as a reference, or used as a guide for further research. This project was based on recent research (the last 5 years) and developed through an extensive literature search. The editors have also compiled some advanced, outstanding texts that should be of benefit to graduate students in their research.
