The Stuart Courts Eveline Cruickshanks 2012-05-30 The regal courts of the English Stuart Kings, from James I (1603-1625) to the ill-fated James II (1685-1689), were magnificent affairs. In a country otherwise given to increasingly austere Puritan ways of living, the royal court shone with a brilliance usually associated with the courts of the Catholic kings of mainland Europe. They were centres of great culture, patronage, ceremony and politics. The real importance of the courts, though down-played for many years, is now beginning to be fully recognised and this first major study of the Stuart courts in England, Scotland and Ireland examines them in their full cultural and historical context. Scholars of international reputation and up and coming, younger scholars have been brought together to give us an insight into many aspects of the Stuart courts. This book includes essays on culture and patronage of the arts and social history. What was it really like at the court? What rules applied? How did the courtiers behave? Finally, the crucial interplay between court life and political life, and politics, is examined in detail. This book is a major contribution to a flourishing area of scholarship and will be required reading for anyone interested in seventeenth-century history, court studies or the arts in the early modern period.

Montessori Madness Trevor Eissler 2009 "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book asks parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what education should look like will never be the same"--Back cover.

Newspaper Use and Community Ties Keith R. Stamm 1985-01-01 Why do people read newspapers? How is community possible in an urban setting? Answers to both these questions have been attempted in the theorizing of urban sociologists and in journalist accounts of the role of local newspapers. Newspapers are said to foster a sense of community. The existence of local community ties, on the other hand, is said to foster newspaper circulation and readership. By focusing on the community/communication relationship, this book raises questions and analyzes the nature of these relationships and how they work.

Free Spirit, Revised Edition Reinhold Messner 2014-07-17 * A mountaineering classic re-released in the Legends and Lore series * Two new chapters In *Free Spirit* Reinhold Messner describes the forces and events that have shaped him as a climber as famous for his discipline as for his innovative spirit. Messner evolved his philosophy of the single free-climbing line with its uncompromising purity of style in the Dolomites and, as equipment and technique developed, he was in the forefront of the transference of fast lightweight alpine methods to the great ranges. Here, he takes us from the days of his first climb (at the age of five) with his father to his brother's tragic death on Nanga Parbat in 1970 to his later move away from the overcrowded Alps and 8000-meter peaks. He sought fulfillment, instead, in new challenges in lesser known parts of the world, such as crossing the expanse of Antarctica. *Free Spirit* is an exciting account of the career of a mountain pioneer.

Cycling and Society Dave Horton 2016-05-13 How can the social sciences help us to understand the past, present and potential futures of cycling? This timely international and interdisciplinary collection addresses this question, discussing shifts in cycling practices and attitudes, and opening up important critical spaces for thinking about the prospects for cycling. The book brings together, for the first time, analyses of cycling from a wide range of disciplinary backgrounds, including history, sociology, geography, planning, engineering and technology. The book redresses the past neglect of cycling as a topic for sustained analysis by treating it as a varied and complex practice which matters greatly to contemporary social, cultural and political theory and action. *Cycling and Society* demonstrates the incredible diversity of contemporary cycling, both within and across cultures. With cycling increasingly promoted as a solution to numerous social problems across a wide range of policy areas in car-dominated societies, this book helps to open up a new field of cycling studies.

In Praise of the Bicycle Marc Augé 2019-11-15 Witness the French anthropologist as we have never seen him before. Marc Augé coined the term "non-place" to describe the ubiquitous airports, hotels, and motorways filled with anonymous individuals. In this new book, he casts his anthropologist's eye on a subject close to his heart: cycling. With *In Praise of the Bicycle*, Augé takes us on a two-wheeled ride around our cities and on a personal journey into ourselves. We all remember the thrill of riding a bike for the first time and the joys of cycling. Here he reminds us that these memories are not just personal, but rooted in a time and a place, in a history that is shared with millions of others. Part memoir, part manifesto, Augé's book celebrates cycling as a way of reconnecting with the places in which we live, and, ultimately, as a necessary alternative to our disconnected world.

Bike Battles James Longhurst 2015-04-15 Americans have been riding bikes for more than a century now. So why are most American cities still so ill-prepared to handle cyclists? James Longhurst, a historian and avid cyclist, tackles that question by tracing the contentious debates between American bike riders, motorists, and pedestrians over the shared road. *Bike Battles* explores the different ways that Americans have thought about the bicycle through popular songs, merit badge pamphlets, advertising, films, newspapers and sitcoms. Those associations shaped the actions of government and the courts when they intervened in bike policy through lawsuits, traffic control, road building, taxation, rationing, import tariffs, safety education and bike lanes from the 1870s to the 1970s. Today, cycling in American urban centers remains a challenge as city planners, political pundits, and residents continue to argue over bike lanes, bike-share programs, law enforcement, sustainability, and public safety. Combining fascinating new research from a wide range of sources with a true passion for the topic, Longhurst shows us that these battles are nothing new; in fact they're simply a continuation of the original battle over who is - and isn't - welcome on our roads. The English Teacher's Companion Jim Burke 2008 Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very

different needs of AP students by understanding their goals and providing them with appropriate challenges.

Managing Population Decline in Europe's Urban and Rural Areas Gert-Jan Hospers 2014-11-18 This book explores the challenges population decline presents for Europe's urban and rural areas. It features recent demographic data and trends not only for Europe as a whole, but also for selected countries, and compares growth and shrinkage from a historical as well as a theoretical perspective. In addition, the book critically reviews relevant notions from geography, sociology, and public administration. It also identifies good practices across Europe. Throughout, theories are complemented with concrete examples and proposals are made on how to tackle demographic shrinkage in European cities and villages, from attempts to attract new residents to the countryside to innovative ways to guarantee public services. In the end, the authors conclude that solving the challenges caused by population decline require novel ways of thinking and provide answers to such future-oriented questions as: how to ensure the quality of life in an environment that is inhabited by fewer and older people, what investments are needed, and which actors should be involved. *Managing Population Decline in Europe's Urban and Rural Areas* offers detailed coverage of an underestimated and complex governance issue that asks for solutions in which citizens have to play an important role. It concludes that shrinkage requires a rethink of the specific tasks and roles of government and presents a way forward based on initiatives currently underway throughout Europe. The book will be a valuable resource for population policy makers as well as students and researchers interested in human geography, urban planning, rural development, European studies, public administration, and other social sciences.

Reinhold Messner My Life at the - ebook Reinhold Messner 2014-09-19 •*Reveals the long view from an icon who, with age, has added wisdom to his list of accomplishments •*Messner climbing firsts: the world's fourteen peaks taller than 8000 meters; Everest solo; Everest without supplemental oxygen •*Author of more than 60 books Reinhold Messner: *My Life at the Limit*, the newest book by the famed mountaineer, is a conversation between Messner and interviewer Thomas Hüetlin, an award-winning German journalist. It reveals a more thoughtful and conversational Messner than one finds in his previous books, with the "talk" between Messner and Hüetlin covering not only the highlights of Messner's climbing career, but also his treks across Tibet, the Gobi, and Antarctica; his five-year-stint as a member of the European Parliament; his encounter with and study of the yeti; his thoughts on traditional male/female roles; and much more. Readers learn about Messner's childhood, his thoughts about eating ice cream with girls (against), politics (mostly liberal), and his technique for killing chickens (sharp scissors). Messner is known as one of history's greatest Himalayan mountaineers, a man who pushed back the frontiers of the possible for a whole generation of climbers. While the interest in *My Life at the Limit* is that it exposes much more of the man than his climbing career, that career is still utterly remarkable—and Mountaineers Books is proud to present this book, which is core to our mission, to audiences across North America. ***For a limited time, donors to our Legends and Lore series will receive a signed copy of *My Life at the Limit*. Consumer Health Information Technology in the Home Division of Behavioral and Social Sciences and Education 2011-07-18 Every day, in households across the country, people engage in behavior to improve their current health, recover from disease and injury, or cope with chronic, debilitating conditions. Innovative computer and information systems may help these people manage health concerns, monitor important indicators of their health, and communicate with their formal and informal caregivers. Human factors is an engineering science dedicated to understanding and improving the way people use technology and other things in the environment. *Consumer Health Information Technology in the Home* introduces designers and developers to the practical realities and complexities of managing health at home. It provides guidance and human factors design considerations that will help designers and developers create consumer health IT applications that are useful resources to achieve better health.

Marketing Places Europe Philip Kotler 1999 Aimed at tourism agencies, students of tourism and local government agencies, this book explains how to adopt a strategic marketing plan that will enable places to adapt and conquer the ever-evolving world marketplace.

Cycling and Recycling Ruth Oldenziel 2015-12-01 Technology has long been an essential consideration in public discussions of the environment, with the focus overwhelmingly on creating new tools and techniques. In more recent years, however, activists, researchers, and policymakers have increasingly turned to mobilizing older technologies in their pursuit of sustainability. In fascinating case studies ranging from the Early Modern secondhand trade to utopian visions of human-powered vehicles, the contributions gathered here explore the historical fortunes of two such technologies—bicycling and waste recycling—tracing their development over time and providing valuable context for the policy successes and failures of today.

Sociocultural Anthropology Barbara Miller 2019-12-12 This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an essential resource for scholars and students of the subject.

Pininfarina 90 anni. Ediz. italiana e inglese Giorgio Nada Editore Srl 2020 On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

Wittgenstein and Derrida Henry Staten 1984-01-01 "By linking Wittgenstein with Derrida, Staten suggests that the intellectual relevance of deconstruction is wider than the English-speaking public has recognized."?Studies in the Humanities "This work is altogether first rate. It is informative, faithful, rigorous and completely original in its problematization. It is an original theoretical advance which I believe will mark an essential step forward in the field."?Jacques Derrida "Staten has plenty of philosophical acuity and critical sensitivity as well as wide philosophical scholarship, and he writes in a clear, muscular style which illuminates the issues sometimes profoundly without in any way concealing their difficulty and complexity. . . . Wittgenstein and Derrida should be essential reading not only for anyone interested in the current critical debate but also for philosophers."?Bernard Harrison, University of Sussex, England This book examines Aristotle, Kant, and especially Husserl to bring to light Derrida's development of the classical philosophical concepts of form (eidos), verbal formula (logos), the object-in-general, and time. The later work of Wittgenstein is then examined in detail and Wittgenstein's "zigzag" writing in the *Philosophical Investigations* is interpreted as deconstructive syntax, directed, like Derrida's work, against the dominance of the philosophical concern with the form of an entity. Henry Staten is a professor of English and philosophy at the University of Utah.

The Hanoverian Dimension in British History, 1714-1837 Brendan Simms 2007-02-08 For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Bicycle Design Tony Hadland 2016-10-07 An authoritative and comprehensive account of the bicycle's two-hundred-year evolution. The bicycle ranks as one of the most enduring, most widely used vehicles in the world, with more than a billion produced during almost two hundred years of cycling history. This book offers an authoritative and comprehensive account of the bicycle's technical and historical evolution, from the earliest velocipedes (invented to fill the need for horseless transport during a shortage of oats) to modern racing bikes, mountain bikes, and recumbents. It traces the bicycle's development in terms of materials, ergonomics, and vehicle physics, as carried out by inventors, entrepreneurs, and manufacturers. Written by two leading bicycle historians and generously illustrated with historic drawings, designs, and photographs, *Bicycle Design* describes the key stages in the evolution of the bicycle, beginning with the counterintuitive idea of balancing on two wheels in line, through the development of tension-spoked wheels, indirect drives (employing levers, pulleys, chains, and chainwheels), and pneumatic tires. The authors examine the further development of the bicycle for such specific purposes as racing, portability, and all-terrain use; and they describe the evolution of bicycle components including seats, transmission, brakes, lights (at first candle-based), and carriers (racks, panniers, saddlebags, child seats, and sidecars). They consider not only commercially successful designs but also commercial failures that pointed the way to future technological developments. And they debunk some myths about bicycles—for example, the mistaken but often-cited idea that Leonardo sketched a chain-drive bike in his notebooks. Despite the bicycle's long history and mass appeal, its technological history has been neglected. This volume, with its engaging and wide-ranging coverage, fills that gap. It will be the starting point for all future histories of the bicycle.

New Metropolitan Perspectives Francesco Calabrò 2018-05-19 This book explores the role of cities and the urban-rural linkages in spurring innovation embedded in spatial planning, strategic and economic planning, and decision support systems. In particular, the contributions examine the complexity of the current transitional phase towards achieving smart, inclusive and sustainable growth, and investigate the post-2020 UE cohesion policy. The main topics include: Innovation dynamics and smart cities; Urban regeneration - community-led and PPP; Inland and urban area development; Mobility, accessibility, infrastructures; Heritage, landscape and Identity; and Risk management, Environment and Energy. The book includes a selection of articles accepted for presentation and discussion at the 3rd International Symposium New Metropolitan Perspectives (ISTH2020), held at the University of Reggio Calabria, Italy on 22-25 May 2018. The symposium, which addressed the challenge of local knowledge and innovation dynamics towards territory attractiveness, hosted the final event of the MAPS-LED project under Horizon2020 - MSCA RISE.

Territories in Crisis Cristina Bianchetti 2015 "Europe's current crisis is also a crisis of the European city. Economic, social, and political insecurities have changed our perception of territories, institutions, and forms of living, and have dramatically weakened the complex interactions within Europe. They have also compromised the reshaping of our physical landscape. Yet, the crisis is also creating new opportunities-for urban transformation, urban practices, and forms of participation. Based on case studies from Italy, France, Spain, Belgium, and Switzerland, *Territories in Crisis* describes the countless challenges faced by European Cities from historical, sociological, and economic perspectives and sets them in relation to existing and potential forms of urbanity. *Territories in Crisis* aims to develop a new European framework for architecture and urban planning in the era of crisis" -- OCLC.

The Role of Human Factors in Home Health Care National Research Council 2010-11-14 The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research-the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and

other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.

Marxism and the Reality of Power, 1919-1980 Olga A. Narkiewicz 1981

Inquiry and Change Charles E. Lindblom 1990-01-01 Winner of the American Political Science Association's 1991 Woodrow Wilson Foundation Book Award for the best book published in the United States during 1990 on government, politics, or international affairs How do ordinary citizens, government officials, opinion leaders, or social scientists attempt to solve social problems? How competent are we at defining the problems, seeking information, and finding answers? In this important and controversial book, a distinguished social scientist meticulously analyzes our attempt to understand society so that we can reshape it. In so doing, he largely bypasses both epistemology and contemporary highly abstract theory on knowledge and society in order to achieve a far more concrete analysis of discourse and inquiry in social problem solving. There is a tragic discrepancy, argues Charles E. Lindblom, between our abilities to solve problems and the difficulty of the problems to be solved. We must make do with inadequate information and inconclusive analyses, for the task is less one of learning the truth than of proceeding in inquiry and decisions when the truth cannot be known. Lindblom discusses the many obstacles that prevent us from solving social problems, focusing in particular on learned incompetence. According to Lindblom, parents teach children not to think certain thoughts, and schools often engage more in indoctrination than education. Political rhetoric and commercial sales promotion feed a steady diet of misrepresentation. Social science does help. But because it is dependent on popular thought, it shares the impairments of thought found in both political figures and ordinary citizens. It also develops its own distinctive impairments and is to a degree crippled by its narrow view of scientific method--often more interested in proving than probing. Although social science can be improved in ways that Lindblom outlines in his book, social inquiry calls for such significant contributions from lay thought that it renders many conventional ideals of scientific problem solving inappropriate. Lindblom contends that the route to better social problem solving is not through either scientific or popular consensus or agreement, however much they are valued in the world of science and social science, but through a competition of ideas. The index of a society's competence, he states, is in its discord over ends, values, or purposes. "As usual, Lindblom cuts through to the core of the issue: How is society to understand its central problems and challenges? With originality and courage, he takes on the social scientists and the policy analysts, and presents an inspiring picture of a self-guiding democracy that continuously deliberates over means and ends. A signal contribution."--Robert B. Reich, Harvard University
