Language, Counter-Memory, Practice
Michel Foucault
2019-06-30

Because of their range, brilliance, and singularity, the ideas of the philosopher-critic-historian Michel Foucault have gained extraordinary currency throughout the Western intellectual community. This book offers a selection of seven of Foucault's most important published essays, translated from the French, with an introductory essay and notes by Donald F. Bouchard. Also included are a summary of a course given by Foucault at College de France; the transcript of a conversation between Foucault and Gilles Deleuze; and an interview with Foucault that appeared in the journal Actuel. Professor Bouchard has divided the book into three closely related sections. The four essays in Part One examine language as a "perilous limit" of what we know and what we are. The essays in the second part suggest the methodological guidelines to which Foucault subscribes, and they record, in the editor's words, "the penetration of the language of literature into the domain of discursive thought." The material in the last section is more obviously political than the essays. It treats language in use, language attempting to impart knowledge and power. Translated by the editor and Sherry Simon into fluent and lucid English, these essays will appeal primarily to students of literature, especially those interested in contemporary continental structuralist criticism. But because of the breadth of Foucault's interests, they should also prove valuable to anthropologists, linguists, sociologists, and psychologists.

Learning and Expanding with Activity Theory Annalisa Sannino 2009-08-17 This book is a collection about cultural-historical activity theory as it has been developed and applied by Yrjö Engeström. The work of Engeström is both rooted in the legacy of Vygotsky and Leont’ev and focuses on current research concerns that are related to learning and development in work practices. His publications cross various disciplines and develop intermediate theoretical tools to deal with empirical questions. In this volume, Engeström's work is used as a springboard to reflect on the question of the use, appropriation, and further development of the classic heritage within activity theory. The book is structured as a discussion among senior scholars, including Y. Engeström himself. The work of the authors pushes on classical activity theory to address pressing issues and critical contradictions in local practices and larger social systems.

Nothing About Us Without Us James I. Charlton 1998-03-27 James Charlton has produced a ringing indictment of disability oppression, which, he says, is rooted in degradation, dependency, and powerlessness and is experienced in some form by five hundred million persons throughout the world who have physical, sensory, cognitive, or developmental disabilities. Nothing About Us Without Us is the first book in the literature on disability to provide a theoretical overview of disability oppression that shows its similarities to, and differences from, racism, sexism, and colonialism. Charlton's analysis is illuminated by interviews he conducted over a ten-year period with disability rights activists throughout the Third World, Europe, and the United States. Charlton finds an antidote for dependency and powerlessness in the resistance to disability oppression that is emerging worldwide. His interviews contain striking stories of self-reliance and empowerment evoking the new consciousness of disability rights activists. As a latecomer among the world's liberation movements, the disability rights movement will gain visibility and momentum from Charlton's elucidation of its history and its political philosophy of self-determination, which is captured in the title of his book. Nothing About Us Without Us expresses the conviction of people with disabilities that they know what is best for them. Charlton's combination of personal involvement and theoretical awareness assures greater understanding of the disability rights movement.

The SAGE Encyclopedia of Communication Research Methods Mike Allen 2017-04-11
Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing
data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program.

Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader’s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader’s Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

The Handbook of Communication Skills Owen Hargie 2018-07-16 The Handbook of Communication Skills is recognised as one of the core texts in the field of communication, offering a state-of-the-art overview of this rapidly evolving field of study. This comprehensively revised and updated fourth edition arrives at a time when the realm of interpersonal communication has attracted immense attention. Recent research showing the potency of communication skills for success in many walks of life has stimulated considerable interest in this area, both from academic researchers, and from practitioners whose day-to-day work is so dependent on effective social skills. Covering topics such as non-verbal behaviour, listening, negotiation and persuasion, the book situates communication in a range of different contexts, from interacting in groups to the counselling interview. Based on the core tenet that interpersonal communication can be conceptualised as a form of skilled activity, and including new chapters on cognitive behavioural therapy and coaching and mentoring, this new edition also places communication in context with advances in digital technology. The Handbook of Communication Skills represents the most significant single contribution to the literature in this domain. Providing a rich mine of information for the neophyte and practising professional, it is perfect for use in a variety of contexts, from theoretical mainstream communication modules on degree programmes to vocational courses in health, business and education. With contributions from an internationally renowned range of scholars, this is the definitive text for students, researchers and professionals alike.

Discourse and Identity Anna De Fina 2006-06-29 The relationship between language, discourse and identity has always been a major area of sociolinguistic investigation. In more recent times, the field has been revolutionized as previous models - which assumed our identities to be based on stable relationships between linguistic and social variables - have been challenged by pioneering new approaches to the topic. This volume brings together a team of leading experts to explore discourse in a range of social contexts. By applying a variety of analytical tools and concepts, the contributors show how we build images of ourselves through language, how society moulds us into different categories, and how we negotiate our membership of those categories. Drawing on numerous interactional settings (the workplace; medical interviews; education), in a variety of genres (narrative; conversation; interviews), and amongst different communities (immigrants; patients; adolescents; teachers), this revealing volume sheds light on how our social practices can help to shape our identities.

Sociomedical Perspectives on Patient Care Jeffrey M. Clair 1993-08-10 Social change has placed new demands on the practice of medicine, altering almost every aspect of patient care relationships. Just as medicine was encouraged to embrace the biological sciences some 100 years ago, recent directives indicate the importance of the social sciences in understanding biomedical practice. Humanistic challenges call for changes in curative and technological imperatives. In this book, social scientists contribute to such challenges by using social evidence to indicate appropriate new goals.
for health care in a changing environment. This book was designed to stimulate and challenge all
those concerned with the human interactions that constitute medical practice. To encompass a wide
range of topics, the authors include researchers; practicing physicians from the specialties of family,
general, geriatric, pediatric, and oncological medicine; social and behavioral scientists; and public
health representatives. Cutting across disciplinary boundaries, they explore the ethical, economic,
and social aspects of patient care. These essays draw on past studies of the patient-doctor
relationship and generate new and important questions. They address social behavior in patient care
as a way to approach theoretical issues pertinent to the social and medical sciences. The authors
also use social variables to study patient care and suggest new areas of sociomedical inquiry and
new approaches to medical practice, education, and research. Its cross-disciplinary approach and
jargon-free writing make this book an important and accessible tool for physician, scholar, and
student.

Discourse and Technology Philip LeVine 2004-02-16 The overarching theme of Discourse and
Technology is cutting-edge in the field of linguistics: multimodal discourse. This volume opens up a
discussion among discourse analysts and others in linguistics and related fields about the two-fold
impact of new communication technologies: The impact on how discourse data is collected,
transcribed, and analyzed—and the impact that these technologies are having on social interaction
and discourse. As inexpensive tape recorders allowed the field to move beyond text, written or
printed language, to capture talk—discourse as spoken language—the information explosion
(including cell phones, video recorders, Internet chat rooms, online journals, and the like) has moved
those in the field to recognize that all discourse is, in various ways, "multimodal," constructed
through speech and gesture, as well as through typography, layout, and the materials employed in
the making of texts. The contributors have responded to the expanding scope of discourse analysis
by asking five key questions: Why should we study discourse and technology and multimodal
discourse analysis? What is the role of the World Wide Web in discourse analysis? How does one
analyze multimodal discourse in studies of social actions and interactions? How does one analyze
multimodal discourse in educational social interactions? and, How does one use multimodal
discourse analyses in the workplace? The vitality of these explorations opens windows onto even
newer horizons of discourse and discourse analysis.

Friendship Development Among Children in School Thomas A. Rizzo 1989 This book reports the
author’s five-month ethnography of first-grade children’s friendships. It is the first detailed
investigation of the dynamic, psychosocial processes by which young children formulate friendships
in school. The book addresses two major questions: How does the social-ecology of a public school
classroom affect children’s interactions and peer relations, and what are the important psychosocial
processes by which children initiate and cultivate friendships at school. The book aims to generate
hypotheses about friendship development among young children, and specifically, to identify the
chain of events by which children come to consider themselves friends and to analyze these events
from a developmental perspective.

The making of a reader
Marilyn Cochran-Smith 1984 This volume helps parents and early childhood educators understand the nature of early literacy at home and at school. Ways in which nursery school structures support and extend children's literacy are explored. This volume, based on an 18-month ethnographic study of story reading and other literacy events in nursery school, describes parents' attitudes, beliefs, and values about literacy, nursery school organization of time and space, how reading and writing is used by nursery school participants and how story reading events help children learn to make sense of books and use books to learn about the world.

Right Time and Pace
Susan Fiksdal 1990-01-01 This text presents a new model of conversation based on time, in this case referring both to the rhythmic organization of conversation, the tempo, and to the right time or timing. These two notions of time correspond to two major systems governing conversation: the turn taking system and the rapport system. This model interweaves linguists' work on spoken discourse, sociologists' work on conversation analysis, and psychologists' work on non-verbal communication. This volume also explores the evolution of the interview as a genre which creates a particular context for conversation. Gatekeeping interviews in particular are explored because of their dual nature-to guide and monitor individuals in an institution or business. They are routine, but essential factors in determining the future of individuals within these organizations. Finally, the volume shows the importance of the listener in conversation. No previous theory of discourse or conversation incorporates the notion of rapport, yet speakers clearly depend on listeners' response as cues for shaping their utterances.

Genre in a Changing World
Charles Bazerman 2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. GENRE IN A CHANGING WORLD provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and
schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

**Friendship and Peer Culture in the Early Years** William A. Corsaro 1985 Based on a year-long micro-ethnography of a nursery school, this book presents a unique approach to childhood socialization by focusing directly upon the social, interactive, and communicative processes that make up the world of young children. It contains micro-sociolinguistic analyses of videotaped peer interactive episodes which are the basis of explanations of children's development and use of social concepts such as status, role, norms, and friendship. Stable features of peer culture in the nursery school are identified, and the importance of interpreting children's behavior from their own perspective is demonstrated. The author also addresses the implications of the findings for early childhood education.

*The Adult Learner* Malcolm S. Knowles 2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles’ pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.
