Own the Future Richard Lesser 2013-04-16 The world faces social, political, and economic turmoil on an unprecedented scale—along with unsettling levels of turbulence and volatility. Market leadership today is less of a predictor of leadership tomorrow. Therefore, senior executives today must strive to own the future. In *Own the Future*, The Boston Consulting Group, one of the world's most prestigious and innovative management consulting firms, offers a roadmap. Drawing on the firm's experience advising organizations on how to achieve and sustain competitive advantage, this book offers 50 ideas to help readers chart their organization's path to future leadership. The articles are organized along ten attributes critical to success in the current environment—adaptive, global, connected, sustainable, customer-first, fit to win, value-driven, trusted, bold, and inspiring. The future may be unknowable, but The Boston Consulting Group offers insights from its 50 years of practice on how readers can position their organization to win—to change the game and to own the future.

**Isaac Broid + Productora: Teopanzolco Cultural Center**  
2019-03-19 "The winning competition entry to design and build the Teopanzolco Cultural Center was submitted by Issac Broid + PRODUCTORA, a team consisting of Carlos Bedoya, Abel Perles, Victor Jaime and Wonne Ickx. The project complies with the building codes established by the National Institute of

Anthropology and History (INAH); it was also awarded with the CICA Latin American Architecture Prize at the Buenos Aires Architecture Biennial as well as the 2017 American Architecture Prize."--Page 17. The Teopanzolco Cultural Center is part of a series of cultural facilities that are being developed in Cuernavaca, Morelos. Its greatest potential and challenge was to integrate the new auditorium with the Archaeological Zone of Teopanzolco, a fragment immersed in the city that preserves the vestiges of the Pre-Hispanic cultures that inhabited the area. This book narrates the project, not only as a building, but as a process: it explains the intentions of the contest in which the proposal of the team of Isaac Broid and PRODUCTORA was selected. Illustrates the architectural project and the construction process through sketches, plans and photos. Finally it shows the finished building, which today works through five forums of different uses and articulates the archaeological zone with the city through a large forum-public viewpoint.

**Peace Maintenance in Africa** Giovanni Cellamare 2018-01-25 This book discusses the many legal aspects arising in relation to the maintenance of peace in Africa. Over the past twenty years, the majority of peace operations have been deployed on this continent, most of them established by the UN Security Council, sometimes in cooperation with the African Union and other African regional organizations, with contributions from the European Union and NATO. In some cases, the African Union has invoked its 'primary responsibility for promoting peace, security and stability in Africa', thus questioning the legal partnership between UN and regional organizations provided for in Chapter VIII of the UN Charter. The peace operations deployed in Africa

have sometimes received a very robust mandate, which also includes the use of force and the protection of civilians' human rights. The implementation of this broad mandate, which goes well beyond the traditional 'peacekeeping approach', requires considerable human and economic resources. Moreover, it raises several issues of concern with regard to the impact on the economic and political systems of the states in which the operations are deployed and, more generally, on the exercise of sovereignty over their territorial communities by these states. Offering an update for lawyers in practice and in academia interested in the field of international law, the book also contributes to the theoretical studies concerning the activities of international organizations, focusing on one of the most challenging issues to emerge in recent times.

**Cinema and Social Change in Latin America** Julianne Burton 2010-06-28 Since the late 1960s, films from Latin America have won widening audiences in North America and Europe. Until now, no single book has offered an introduction to the diverse personalities and practices that make up this important regional film movement. In *Cinema and Social Change in Latin America*, Julianne Burton presents twenty interviews with key figures of Latin American cinema, covering three decades and ranging from Argentina to Mexico. Interviews with pioneers Fernando Birri, Nelson Pereira dos Santos, and Glauber Rocha, renowned feature filmmakers Tomás Gutiérrez Alea and Carlos Diegues, prize-winning documentarists Patricio Guzmán and Helena Solberg-Ladd, among others, endeavor to balance personal achievement against the backdrop of historical, political, social, and economic circumstances that have influenced each director's career. Presented also are conversations that cast light on the related activities of acting, distribution, theory, criticism, and film-based community organizing. More than their counterparts in other regions of the world, Latin American artists and intellectuals acknowledge the degree to which culture is shaped by history and politics. Since the mid-1950s, a period of rising nationalism and regional consciousness, talented young artists and activists have sought to redefine the uses of the film medium in the Latin American context. Questioning the studio and star systems of the Hollywood industrial model, these innovators have developed new forms, content, and processes of production, distribution, and reception. The specific approaches and priorities of the New Latin American Cinema are far from monolithic. They vary from realism to expressionism, from observational documentary to elaborate fictional constructs, from "imperfect cinema" to a cinema that

emulates the high production values of the developed sectors, from self-reflexive to "transparent" cinematic styles, from highly industrialized modes of production to purely artisanal ones. What does not vary is the commitment to film as a vehicle for social transformation and the expression of national and regional cultural autonomy. From early alternative cinema efforts in Argentina, Brazil, and Cuba to a contemporary perspective from within the Mexican commercial industry to the emerging cinema and video production from Central America, *Cinema and Social Change in Latin America* offers the most comprehensive look at Latin American film available today.

*Managing Strategic Change* Noel M. Tichy 1983-05-03 Shows how managers can use the conceptual framework of TPC theory (technical, political, and cultural dynamics) to cope with major strategic reorientation. Raises such fundamental questions about the nature of organizations. What business(es) should we be in? Who should reap what benefits from the organization? What are the values and norms of organizational members? Provides concepts and workable technologies for dealing with these questions and preparing for future change. Includes extensive examples.

*Organizational Effectiveness* Kim S. Cameron 2013-09-11

*Organizational Effectiveness: A Comparison of Multiple Models* directly addresses the issues of non-integration and non-comparability. This book not only provides well thought out approaches to effectiveness as a construct, but also practical suggestions for improving effectiveness in organizations. A set of integrating questions that raise theoretical, conceptual, empirical, research, practical, and managerial issues are also included. This text likewise compares and contrasts theoretical and philosophical roots of a particular perspective with other perspectives. This publication is intended for scholars and researchers seeking to understand and measure organizational

effectiveness, as well as practitioners who are faced with the problem of managing and improving their own organization's effectiveness.

Compiled by the Centre for Law in Rural Areas, based in Aberystwyth, Wales, nine essays explore legal and political issues involved in promoting conservation in the countryside in a manner consistent with modern farming techniques. The impetus is concern over rural mid- Wales, but the perspective of the essays is British and European. Among the topics are agricultural diversification, pollution, the organization of conservation authorities, common land, and sites needing special protection.

*Contemporary Art in Asia* Melissa Chiu 2011 This foundational anthology maps the emergence of a dynamic new global

phenomenon: contemporary Asian art. In 2008, Asia stormed the citadel of the New York art world when two major museums presented retrospectives of Asian contemporary artists: Cai Guo-Qiang at the Guggenheim Museum and Takashi Murakami at the Brooklyn Museum. Meanwhile, in Hong Kong, a painting by Zeng Fanzhi sold for \$9.5 million, setting a new world auction record for Chinese contemporary art. The Western art world is still coming to grips with the challenge: it is all about Asia now. This book is the first anthology of critical writings to map the shift in both the nature and the reception of Asian art over the past twenty years. Offering texts by leading figures in the field (mostly Asian), and including more than fifty illustrations in color and black and white, it covers developments in East Asia (including China, Korea, and Japan), South Asia (including India and Pakistan), and Southeast Asia (including Vietnam, Indonesia, and Thailand). Together, the twenty-three texts posit an historical and pan-Asian response to the question, "What is Asian contemporary art?" Considering such topics as Asian modernism ("productive mistranslation" of the European original), Asian cubism, and the curating, collecting, and criticism of Asian contemporary art, this book promises to be a foundational reference for many years to come.

Terror in France Gilles Kepel 2017-05-09 The virulent new brand of Islamic extremism threatening the West In November 2015,

ISIS terrorists massacred scores of people in Paris with coordinated attacks on the Bataclan concert hall, cafés and restaurants, and the national sports stadium. On Bastille Day in 2016, an ISIS sympathizer drove a truck into crowds of vacationers at the beaches of Nice, and two weeks later an elderly French priest was murdered during morning Mass by two ISIS militants. Here is Gilles Kepel's explosive account of the radicalization of a segment of Muslim youth that led to those attacks—and of the failure of governments in France and across Europe to address it. It is a book everyone in the West must read. *Terror in France* shows how these atrocities represent a paroxysm of violence that has long been building. The turning point was in 2005, when the worst riots in modern French history erupted in the poor, largely Muslim suburbs of Paris after the accidental deaths of two boys who had been running from the police. The unrest—or "French intifada"—crystallized a new consciousness among young French Muslims. Some have fallen prey to the allure of "war of civilizations" rhetoric in ways never imagined by their parents and grandparents. This is the highly anticipated English edition of Kepel's sensational French bestseller, first published shortly after the Paris attacks. Now fully updated to reflect the latest developments and featuring a new introduction by the author, *Terror in France* reveals the truth about a virulent new wave of jihadism that has Europe as its main target. Its aim is to divide European societies from within by instilling fear, provoking backlash, and achieving the ISIS dream—shared by Europe's Far Right—of separating Europe's growing Muslim minority community from the rest of its citizens.

*Transfer Pricing in Action* Althea Azeff 2013-07-01 Business tax strategy is at its most challenging when success ushers in the promise of major growth. At this 'moment of truth' the thorny special issues associated with international expansion loom over the fate of the company. These issues can be summarized in two words: transfer pricing. In this extended hypothetical case history, presented in narrative style with an abundance of graphic material, the authors lay bare the minutest details of transfer pricing planning and how the process engages and affects the ambitions, insights, and interactions of the group of business people and advisors involved. Because of this exposure to decision making and consulting dynamics, the reader gets a taste of the trade-off between 'correctness' and practicality. In fact, a more practical approach to the subject is hard to imagine. The book's format, innovative in every way, finds plenty of room to define every term, cite every source, and describe every opportunity or pitfall affecting the tax aspects of such processes as moving into new jurisdictions, restructuring operations to create regional or global centres of excellence, or changing supply chains. Scores of information-packed tables, graphs, flowcharts, and other illustrations - often in the form of slide presentation screens or 'real-world boxes' - enhance the in-depth discussion of such aspects of international tax planning as the following (among much else): choice of tax status; investors and control; licensing and intellectual property issues; accounting methods; recruiting foreign personnel; and tax audits by revenue authorities. In a business environment where transfer pricing has emerged as the most dynamic area of international taxation, following extensive legislative activity and rulemaking, this remarkable book bridges the abstract theory of transfer pricing and its everyday practice in a very accessible way. No other book on the subject is so practical or so down to earth. Lawyers and other professionals in international taxation and tax law will find it enormously appealing, informative, and useful.

### *Labour Law and Industrial Relations in Recessionary Times*

Anthony Forsyth 2014-01-14 This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference - in both conceptual and legal terms - that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which - in accordance with the programmatic approach of Marco Biagi - will also feed the debate at the national level.

*Taxing Wages 2019* 2019-04-11 This annual publication provides details of taxes paid on wages in OECD countries. It covers personal income taxes and social security contributions paid by employees, social security contributions and payroll taxes paid by employers, and cash benefits received by in-work families. It illustrates how these taxes and benefits are calculated in each member country and examines how they impact household incomes. The results also enable quantitative cross-country comparisons of labour cost levels and the overall tax and benefit position of single persons and families on different levels of earnings. The publication shows average and marginal effective tax rates on labour costs for eight different household types, which vary by income level and household composition (single

persons, single parents, one or two earner couples with or without children). The average tax rates measure the part of gross wage earnings or labour costs taken in tax and social security contributions, both before and after cash benefits, and the marginal tax rates the part of a small increase of gross earnings or labour costs that is paid in these levies. Taxing Wages 2019 includes a special feature entitled: "The Taxation of Median Wage Earners".

**Toward a New Social Contract** Maurizio Bussolo 2018-10-24

The growing economic fissures in the societies of Europe and Central Asia between generations, between insiders and outsiders in the labor market, between rural and urban communities, and between the super-rich and everyone else, are threatening the sustainability of the social contract. The institutions that helped achieving a remarkable degree of equity and prosperity over the course of several decades now face considerable difficulties in coping with the challenges presented by these emerging forms of inequality. Public surveys reveal rising concerns over inequality of opportunity, while electoral results show a marked shift to populist parties that offer radical solutions to voters dissatisfied with the status quo. There is no single solution to relieve these tensions, and attempts to address them will vary considerably across the region. However, this publication proposes three broad policy principles: (1) promote labor market flexibility while maintaining protection for all types of labor contracts; (2) seek universality in the provision of social assistance, social insurance, and basic quality services; and (3) expand the tax base by complementing progressive labor-income taxation with taxation of capital. These principles could guide the rethinking of the social

contract and fulfil European citizens' aspirations for growth and equity.

Know Yourself, Forget Yourself Marc Lesser 2013-01-04 Our brains seek order and resist the unexpected, inconsistent, and counterintuitive. But life is more often paradoxical than predictable — which is why formulas for fulfillment and success often fail. Instead of fighting the tide of contradiction and confusion, Marc Lesser asserts, we can learn to understand and even embrace them using the simple tools he presents in these pages. Readers learn to master five core competencies: Know Yourself, Forget Yourself; Be Confident, Question Everything; Fight for Change, Accept What Is; Embrace Emotion, Embody Equanimity; and Benefit Others, Benefit Yourself. The result is balance, a version of Buddhism's "middle way," which prompts understanding of what is required in any given moment and actions through which we skillfully "dance" with paradox in enriching and joyful ways. Bolstered by the latest in neuroscience, this guide is nuanced and direct, profound and practical.

**Cities Ten Lines** Joan Busquets 2006 "Cities: 10 Lines - A New Lens for the Urbanistic Projects documents three years of faculty research seminars at the Harvard Graduate School of Design that focused on the development of a pedagogic taxonomy to frame the methods and tools with which designers currently shape cities

and open territories." "The work documented in the catalogue presents the shifts designers have made in their projection of the city. Over the past three decades, new techniques in working the built environment have been deployed in multiple settings, interacting with a wide array of cultures, scales and intensities. Furthermore, the notion that urban grounds can be successfully refurbished is gaining clout rapidly, while the innovative nature of these interventions is creating spaces of an unprecedented urban quality."--BOOK JACKET.

**Risk and Uncertainty in the Art World** Anna M. Dempster  
2014-04-10 This edited book offers the first complete overview of risk in the art market by bringing together contributions from a wide range of international thought-leaders on the topic - both practitioners and leading scholars who investigate the specific types of uncertainty that exist in the art market as well as the dominant models used to manage the risks. An essential read for both art world practitioners, as well as scholars and students, *Risk and Uncertainty in the Art Market* elucidates the dynamics and unique qualities of the art market as well as developing insights relevant to other sectors, including sociology, business and management, economics and finance.
