Antifascisms David Ward 1996 This book is an in-depth analysis of three of the most crucial years in

twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic. Drawing on texts from the literature, film, journalism, and political debate of the period, *Antifascisms* offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.

**Agent Provocateur: Exhibitionist** Enzo Peccinotti 2005-11-24 Timed to coincide with Agent Provocateur's 10th Anniversary, this book celebrates their famous kinky window displays. Are they real or are they mannequins? They are arousing and stimulating - cocking two fingers at British prudery and celebrating the female body, and sexual attraction. From themes such as 'weapons of mass distraction' to subliminal messages of attraction and desire, Agent Provocateur's shop windows are dramatic and daring. This very intimate shopping experience has achieved notoriety through stunning and stimulating window displays, which have become famous worldwide. This book is a stimulating look at these erotic exhibitions, which matches Enzo Peccinotti's photography with quotes from Vivienne Westwood to the Editrice of *Erotic Review*.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

**Zero World** Jason M. Hough 2015-08-18 Published in rapid succession, Jason M. Hough's first three novels, *The Darwin Elevator*, *The Exodus Towers*, and *The Plague Forge*, earned mountains of praise and comparisons to such authors as James S. A. Corey and John Scalzi. Now Hough returns with a riveting near-future spy thriller that combines the adrenaline of a high-octane James Bond adventure with mind-blowing sci-fi speculations worthy of Christopher Nolan's *Inception*. Technologically enhanced superspy Peter Caswell has been dispatched on a top-secret assignment unlike any he's ever faced. A spaceship that vanished years ago has been found, along with the bodies of its murdered crew—save one. Peter's mission is to find the missing crew member, who fled through what appears to be a tear in the fabric of space. Beyond this mysterious doorway lies an even more confounding reality: a world that seems to be Earth's twin. Peter discovers that this mirrored world

is indeed different from his home, and far more dangerous. Cut off from all support, and with only days to complete his operation, Peter must track his quarry alone on an alien world. But he's unprepared for what awaits on the planet's surface, where his skills will be put to the ultimate test—and everything he knows about the universe will be challenged in ways he never could have imagined. Includes the complete bonus novella *The Dire Earth*, a prequel to the bestselling sci-fi adventure *The Darwin Elevator*. Praise for *Zero World* "This is sci-fi writing at its best. The Labyrinth Index Charles Stross 2018-10-30 "A bizarre yet effective yoking of the spy and horror genres." —The Washington Post Book World The Lovecraftian Singularity has descended upon the world in *The Labyrinth Index*, beginning an exciting new story arc in Charles Stross' Hugo Award-winning *Laundry Files* series! Since she was promoted to the head of the Lords Select Committee on Sanguinary Affairs, every workday for Mhari Murphy has been a nightmare. It doesn't help that her boss, the new Prime Minister of Britain, is a manipulative and deceptive pain in the butt. But what else can she expect when working under the thumb of none other than the elder god N'yar Lat-Hotep a.k.a the Creeping Chaos? Mhari's most recent assignment takes her and a ragtag team of former Laundry agents across the pond into the depths of North America. The United States president has gone missing. Not that Americans are alarmed. For some mysterious reason, most of the country has forgotten the executive branch even exists. Perhaps it has to do with the Nazgûl currently occupying the government and attempting to summon Cthulhu. It's now up to Mhari and her team to race against the Nazgûl's vampire-manned dragnet to find and, for his own protection, kidnap the president. Who knew an egomaniacal, malevolent deity would have a soft spot for international relations?
