(dalla Prefazione di Giulio Sapelli) Nello sforzo di superare modelli sociali storicamente fallimentari (comunismo) o ancora imperanti pur tra insanabili contraddizioni (capitalismo), gli autori propongono una società delle persone e dei beni comuni imperniata su "cinque rivoluzioni" che prevedono il passaggio: 1.dall'autorità posta fuori di sé all'autorità fondata sulla coscienza personale; 2.dalla cultura come possesso del sapere e monopolio dell'informazione alla cultura come ricerca continua della verità attraverso il dialogo; 3.dalla politica come pura gestione dei rapporti di forza alla politica come comunicazione e interrelazione dei progetti personali e comuni; 4.dall'economia come accumulazione di capitali e sfruttamento indiscriminato di risorse all'economia come realizzazione dei progetti umani; 5.dallo Stato etico all'eticità dello Stato attraverso la sovranità personale e comune."

**History and the Written Word** Henry Bainton 2020-01-24 A thought-provoking look at the Angevin aristocracy's literary practices and historical record Coming upon the text of a document such as a charter or a letter inserted into the fabric of a medieval chronicle and quoted in full or at length, modern readers might well assume that the chronicler is simply doing what good historians have always done—that is, citing his source as evidence. Such documentary insertions are not ubiquitous in medieval historiography, however, and are in fact particularly characteristic of the history-writing produced by the Angevins in England and Northern France in the later twelfth century. In History and the Written Word, Henry Bainton puts these documentary gestures center stage in an attempt to understand what the chroniclers were doing historiographically, socially, and culturally when they transcribed a document into a work of history. Where earlier scholars who have looked at the phenomenon have explained this increased use of documents by considering the growing bureaucratic state and an increasing historiographical concern for documentary evidence, Bainton seeks to resituate these histories, together with their authors and users, within literate but sub-state networks of political power. Proposing a new category he designates "literate lordship" to describe the form of power with which documentary history-writing was especially concerned, he shows how important the vernacular was in recording the social lives of these literate lords and how they found it a particularly appropriate medium through which to record their roles in history. Drawing on the perspectives of modern and medieval narratology, medieval multilingualism, and cultural memory, History and the Written Word argues that members of an administrative elite demonstrated their mastery of the rules of literate political behavior by producing and consuming history-writing and its documents.

Right Thinking and Sacred Oratory in Counter-Reformation Rome Frederick J. McGinness 2014-07-14 At the end of the sixteenth century, when painters, writers, and scientists from all over Europe flocked to Rome for creative inspiration, the city was also becoming the center of a vibrant and assertive Roman Catholic culture. Closely identified with Rome, the Counter-Reformation church sought to strengthen itself by building on Rome's symbolic value and broadcasting its cultural message loudly and skillfully to the European world. In a book that captures the texture and flavor of this rhetorical strategy, Frederick McGinness explores the new emphasis placed on preaching by Roman church leaders. Looking at the development of a sacred oratory designed to move the heart, he traces the formation of a long-lasting Catholic worldview and reveals the ingenuity of the Counter-Reformation in the transformation of Renaissance humanism. McGinness not only describes the theory of sermon-writing, but also reconstructs the circumstances, social and physical, in which sermons were delivered. The author considers how sermons blended spirituality with pious legends--for example, stories of the early martyrs--and evocative metaphors to fashion a respublica christiana of loyal Catholics. Preachers projected a "right" view of history, social relationships, and ecclesiastical organization, while depicting a spiritual topography upon which Catholics could chart a path to salvation. At the center of this topography was Rome, a vast stage set for religious pageantry, which McGinness brings to life as he follows the homiletic representations of the city from a bastion of Christian militancy to a haven of harmony, light, and tranquility.
