The Settlement of Disputes in Early Medieval Europe Wendy Davies 1992-04-23 This is a collection of original essays on the settlement of disputes in the early middle ages, a subject of central importance for social and political history. Case material, from the evidence of charters, is used to reveal the realities of the settlement process in the behaviour and interactions of people - instead of the prescriptive and idealised models of law-codes and edicts. The book is not therefore a technical study of charters evidence. The geographical range across Europe is unusually wide, which allows comparison across differing societies. Frankish material is inevitably prominent, but the contributors have sought to integrate Celtic, Greek, Italian and Spanish material into the mainstream of the subject. Above all, the book aims to 'demystify' the study of early medieval law, and to present a radical reappraisal of established assumptions about law and society.

Theodoret's People Adam M. Schor 2011-05-17 "Adam Schor explores the social and doctrinal role of Theodoret in a novel and lively way, making use of social theory, and seeing Theodoret's activities and contacts against the rich documentation provided by the great ecclesiastical controversies of his time." —Fergus Millar, author of *A Greek Roman Empire: Power and Belief under Theodosius II, 408-450* "Schor's proposal that modern social network theory is the key to understanding Theodoret of Cyrus's social positioning and mode of controversy makes for compelling reading. His nuanced yet powerful analysis shows the continued relevance of socio-scientific methods for understanding the history of late antique Christianity." —Richard Lim, author of *Public Disputation, Power and Social Order in Late Antiquity* "Adam Schor has written a lively and incisive study of a notoriously difficult era. Mining the substantial (but greatly understudied) letter collections of the times, applying the insights of network theory, and boldly taking on the entire corpus of Theodoret's writings—an ambitious project in itself—Schor has produced strikingly fresh material throughout. With rich insight and rigorous attention to detail, Schor opens new vistas on the late antique landscape. Thought-provoking at every turn!" Susan Ashbrook Harvey, author of *Scenting Salvation: Ancient Christianity and the Olfactory Imagination*

Late Antique Letter Collections Cristiana Sogno 2019-11-19 Bringing together an international team of historians, classicists, and scholars of religion, this volume provides the first comprehensive overview of the extant Greek and Latin letter collections of late antiquity (ca. 300-600 c.e.). Each chapter addresses a major collection of Greek or Latin literary letters, introducing the social and textual histories of each collection and examining its assembly, publication, and transmission. Contributions also reveal how collections operated as discrete literary genres, with their own conventions and self-presentational agendas. This book will fundamentally change how people both read these texts and use letters to reconstruct the social

history of the fourth, fifth, and sixth centuries.

The Jews of France Esther Benbassa 2001-07-02 In the first English-language edition of a general, synthetic history of French Jewry from antiquity to the present, Esther Benbassa tells the intriguing tale of the social, economic, and cultural vicissitudes of a people in diaspora. With verve and insight, she reveals the diversity of Jewish life throughout France's regions, while showing how Jewish identity has constantly redefined itself in a country known for both the Rights of Man and the Dreyfus affair. Beginning with late antiquity, she charts the migrations of Jews into France and traces their fortunes through the making of the French kingdom, the Revolution, the rise of modern anti-Semitism, and the current renewal of interest in Judaism. As early as the fourth century, Jews inhabited Roman Gaul, and by the reign of Charlemagne, some figured prominently at court. The perception of Jewish influence on France's rulers contributed to a clash between church and monarchy that would culminate in the mass expulsion of Jews in the fourteenth century. The book examines the re-entry of small numbers of Jews as New Christians in the Southwest and the emergence of a new French Jewish population with the country's acquisition of Alsace and Lorraine. The saga of modernity comes next, beginning with the French Revolution and the granting of citizenship to French Jews. Detailed yet quick-paced discussions of key episodes follow: progress made toward social and political integration, the shifting social and demographic profiles of Jews in the 1800s, Jewish participation in the economy and the arts, the mass migrations from Eastern Europe at the turn of the twentieth century, the Dreyfus affair, persecution under Vichy, the Holocaust, and the postwar arrival of North African Jews. Reinterpreting such themes as assimilation, acculturation, and pluralism, Benbassa finds that French Jews have integrated successfully without always risking loss of identity. Published to great acclaim in France, this book brings important current issues to bear on the study of Judaism in general, while making for dramatic reading.

Reasoning, Argumentation, and Deliberative Democracy David Moshman 2020-10-01 In light of the latest research from cognitive and developmental psychology, this key text explores reasoning, rationality, and democracy, considering the unique nature of each and their relationship to each other. Broadening our understanding from the development of reasoning and rationality in individuals to encompass social considerations of argumentation

and democracy, the book connects psychological literature to philosophy, law, political science, and educational policy. Based on psychological research, Moshman sets out a system of deliberative democracy that promotes collaborative reasoning, rational institutions such as science and law, education aimed at the promotion of rationality, and intellectual freedom for all. Also including the biological bases of logic, metacognition, and collaborative reasoning, Moshman argues that, despite systematic flaws in human reasoning, there are reasons for a cautiously optimistic assessment of the potential for human rationality and the prospects for democracy. Reasoning, Argumentation, and Deliberative Democracy will be essential reading for all researchers of thinking and reasoning from psychology, philosophy, and education.

Roman Cities Pierre Grimal 1983 Roman Cities combines G. Michael Woloch's translation of *Les villes romaines*, Pierre Grimal's noted French work on Roman city planning, archeology, and urban history, with Woloch's additional notes and descriptions of the cities mentioned by Grimal, as well as other important Roman cities. The book provides a brief history and description of more than a hundred Roman cities, an extensive master bibliography, and a comprehensive glossary. Roman Cities will interest both scholars and students of Roman history and archeology, city planning, urban geography, and the social sciences. The glossary and bibliography make the book of value to specialists pursuing a particular topic and to students, history buffs, and amateur archaeologists seeking to broaden their understanding of the Roman city planning methods that are such an integral part of our modern urban heritage. Roman Cities provides the first comprehensive study in English of major Roman cities, including an excellent coverage of the Roman legacy which was transmitted to medieval and modern trends in architecture and urban planning..

Holy Bishops in Late Antiquity Claudia Rapp 2013-08-21 Between 300 and 600, Christianity experienced a momentous change from persecuted cult to state religion. One of the consequences of this shift was the evolution of the role of the bishop—as the highest Church official in his city—from model Christian to model citizen. Claudia Rapp's exceptionally learned, innovative, and groundbreaking work traces this transition with a twofold aim: to deemphasize the reign of the emperor Constantine, which has traditionally been regarded as a watershed in the development of the Church as an institution, and to bring to the fore the continued importance of the religious underpinnings of the bishop's role as civic leader. Rapp rejects Max Weber's categories of "charismatic" versus "institutional" authority that have traditionally been used to distinguish the nature of episcopal authority from that of the ascetic and holy man. Instead she proposes a model of spiritual authority, ascetic authority and pragmatic authority, in which a bishop's visible asceticism is taken as evidence of his spiritual powers and at the same time provides the justification for his public role. In clear and graceful prose, Rapp provides a wholly fresh analysis of the changing dynamics of social mobility as played out in episcopal appointments.
