Atlas of Oculoplastic and Orbital Surgery Thomas C. Spoor 2009-12-04 Since its inception two generations ago, oculoplastic surgery has constantly evolved. What was once dogma may now be passé. Procedures that were once passé may be resurrected and utilized again. Providing simplified solutions to complex problems, Atlas of Oculoplastic and Orbital Surgery is a practical, problem-orientated guide to the management of common oculoplastic and orbital disorders. Based on Dr. Spoor's thirty years of practice, the book emphasizes the more common oculoplastic conditions likely to present to a busy ophthalmologist. The text covers upper and lower eyelid surgery and repair, orbital surgery, and the prevention and treatment of potential complications. The procedures are described with surgical photos and illustrations in a casual, didactic fashion, as a senior doctor would use instructing a resident or fellow. The book is essential reading for ophthalmologists, oculoplastic surgeons, neuro-ophthalmologists and plastic surgeons.

Fighting Corruption in Public Procurement Sope Williams-Elegbe 2012-11-06 Anti-corruption measures have firmly taken centre stage in the development agenda of international organisations as well as in developed and developing countries. One area in which corruption manifests itself is

in public procurement and, as a result, States have adopted various measures to prevent and curb corruption in public procurement. One such mechanism for dealing with procurement corruption is to debar or disqualify corrupt suppliers from bidding for or otherwise obtaining government contracts. This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts. Implementing a disqualification mechanism in public procurement raises serious practical and conceptual difficulties, which are not always considered by legislative provisions on disqualification. Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre-requisite to disqualification, bearing in mind that corruption thrives in secret, resulting in a dearth of convictions. Another issue is determining how to balance the tension between granting adequate procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process. A further issue is determining the scope of the disqualification in the sense of determining whether it applies to firms, natural persons, subcontractors, subsidiaries or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts. The book compares and contrasts the legal, practical and institutional approaches to the implementation of the disqualification mechanism in the European Union, the United Kingdom, the United States, the Republic of South Africa and the World Bank.

Mentoring and Coaching in Education Lizana Oberholzer 2023-11-02 Drawing on a wide range of experiences, Lizana Oberholzer and Derek Boyle clearly define the terms 'coaching' and 'mentoring' before looking at how coaching and mentoring are used in schools to develop teachers. They offer theoretical frameworks, key strategies and principles at each stage to support phase specific development, and explore how these strategies can be used to help teachers to continue to develop to become confident classroom practitioners, as well as future leaders. Lizana and Derek also consider the key challenges and issues mentors and coaches might face. Each chapter explores how coaches and mentors can offer support and provide a safe supportive environment to allow teachers to continue to grow and develop, whatever phase they are in on their learning journey.

Redesigning Continuing Education in the Health Professions Institute of Medicine 2010-03-12 Today in the United States, the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety, even as the nation spends more per capita on health care than any other country. The absence of a comprehensive and well-integrated system of continuing education (CE) in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels. To be most effective, health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields (and related fields) in order to obtain and maintain up-to-date knowledge and skills in caring for their patients. Many health professionals regularly undertake a variety of efforts to stay up to date, but on a larger scale, the nation's approach to CE for health professionals fails to support the professions in their efforts to achieve and maintain proficiency. Redesigning Continuing Education in the Health Professions illustrates a vision for a better system through a comprehensive approach of continuing professional development, and posits a framework upon which to develop a new, more effective system. The book also offers principles to guide the creation of a national continuing education institute.

Leading & Managing Continuing Professional Development Sara Bubb 2007-09-25 Praise for the first edition: 'Peter Earley and Sara Bubb bring together, in a very accessible way, theoretical and practical aspects of CPD and suggest how leadership and management can be applied in this vital area of staff development. This book will help co-ordinators and school leaders to develop their most important resource - the people who work with the children' - Richard Stainton, Education Journal 'The most obvious target user for the book is the (not rare) person suddenly hoist with the staff development responsibility petard: but, thoughtfully used, most staffrooms will include several people who could benefit from thinking about its contents and putting some of the ideas into practice' - British Journal Educational Technology 'This book is a welcome and practical guide to the wealth of publications on Continuing Professional Development... [M]akes an excellent contribution to the current and widening debate on the nature of Continuing Professional Development. For School Leadership Teams it is an essential resource and reference for the managing of professional development and learning. It also serves as an excellent practical guide, and CPD coordinators reading this book will find themselves questioning and as a result developing their own practice. The book is written in accessible language using believable case studies to illustrate the wealth of research that has been carried out. The deeply embedded notion among some teachers that professional development consists of the one day course is challenged, and the reader is left in no doubt as to the range of opportunities that exist and need for them to be harnessed in order to ensure school improvement. The book is will surely act as a catalyst for the review and development of CPD in schools' - Stephen Merrill, Edge Hill College of Higher Education, British Journal In-Service Education 'A practical guide to all aspects of professional development which ought to be in the

possession of every professional development coordinator in every primary and secondary school in the land - and their colleagues in leadership teams' - Tim Brighouse, TES Friday Magazine This new edition of a best-selling book provides an up to date overview of Continuing Professional Development (CPD), combined with a guide to best practice. Changes include: - expanded sections on the professional development of support staff and the wider school workforce (particularly important in the light of workforce remodelling) and the evaluation of CPD - more on making sure that professional development has an impact, and provides good value for money - the common core of skills and knowledge for the children's workforce, the new standards for qualified teacher status, induction, threshold, excellent teachers and advanced skills teachers as well as those for higher level teaching assistants. Drawing on the latest research, the contents include: - a clear explanation of CPD and latest developments; - practical tips on how to lead and manage CPD for a range of staff in schools - identifying training needs, designing and implementing programmes and evaluating their impact; - detailed guidance on CPD for staff at different stages of their careers. Written in a clear readable style it covers the latest standards and offers examples of current good practice. It is an essential professional reference for all those responsible for leading and managing professional learning in schools (headteachers, deputies, CPD and staff development coordinators) and Local Authorities (LAs). It will also prove invaluable to training providers and universities.
