

Houses And Society In Pompeii And Herculaneum

Pompeii Paul Zanker 1999-01-15 Pompeii's tragedy is our windfall: an ancient city fully preserved, its urban design and domestic styles speaking across the ages. This richly illustrated book conducts us through the captured wonders of Pompeii, evoking at every turn the life of the city as it was 2,000 years ago. When Vesuvius erupted in 79 A.D. its lava preserved not only the Pompeii of that time but a palimpsest of the city's history, visible traces of the different societies of Pompeii's past. Paul Zanker, a noted authority on Roman art and architecture, disentangles these tantalizing traces to show us the urban images that marked Pompeii's development from country town to Roman imperial city. Exploring Pompeii's public buildings, its streets and gathering places, we witness the impact of religious changes, the renovation of theaters and expansion of athletic facilities, and the influence of elite families on the city's appearance. Through these stages, Zanker adeptly conjures a sense of the political and social meanings in urban planning and public architecture. The private houses of Pompeii prove equally eloquent, their layout, decor, and architectural detail speaking volumes about the life, taste, and desires of their owners. At home or in public, at work or at ease, these Pompeians and their world come alive in Zanker's masterly rendering. A provocative and original reading of material culture, his work is an incomparable introduction to urban life in antiquity.

Cities of Roman Italy Guy de la Bedoyere 2010-01-25 The ruins of Pompeii, Herculaneum, and Ostia have excited the imagination of scholars and tourists alike since early modern times. The removal of volcanic debris at Pompeii and Herculaneum, and the clearance of centuries of accumulated soil and vegetation from the ancient port city of Rome at Ostia, have provided us with the most important evidence for Roman urban life. Work goes on at all three sites to this day, and they continue to produce new surprises. Pompeii is the subject of numerous books, but the other two cities are nothing like as well-served. This book, written by an archaeologist, historian and teacher with a lifelong interest in the Roman world, is designed for students of A-level and university courses on Classical Civilization who need a one-stop introduction to all three sites. Its principal focus is status and identity in Roman cities, and how they were expressed through institutions, public buildings and facilities, private houses and funerary monuments, against a backdrop of the history of the cities, their rise, their destruction, preservation and excavation. The reader is also guided towards other reading material and Internet sites that now offer unprecedented access to the cities.

The Cross Before Constantine Bruce W. Longenecker 2015 Upending a longstanding consensus, Bruce W. Longenecker presents a wide variety of material artifacts to illustrate that Christians made use of the cross as a visual symbol of their faith long before Constantine appropriated it to consolidate his power in the fourth century. Constantine did not invent the cross as a symbol of Christian faith; for an impressive number of Christians before Constantine's reign, the cross served as a visual symbol of commitment to a living deity in a dangerous world.

Herculaneum and the House of the Bicentenary Sarah Court 2020-02-11 This volume provides a striking account of the life, destruction, rediscovery, and cultural significance of the ancient Roman town of Herculaneum and one of its grandest residences—the House of the Bicentenary. This volume vividly recounts, for general readers, the Roman town of Herculaneum, destroyed by the eruption of Mount Vesuvius in 79 CE and uniquely preserved for nearly two thousand years. Initial chapters offer an engaging historical overview of the town during antiquity, including the riveting story of its rediscovery in the eighteenth century, excavation in the nineteenth and twentieth centuries, and broad cultural significance in modern times. Subsequent chapters offer an interpretive tour of the ancient town, then focus on one of Herculaneum's grandest and most beautifully decorated private residences, known as the House of the Bicentenary. Located on the town's main street, it has a range of features—original rooms, magnificent wall paintings and mosaics, and remarkable documents—that illuminate daily life in the ancient world. Final chapters bring the story up to date, including recent discoveries about the site and its famous papyrus manuscripts, as well as ongoing conservation initiatives.

The Socio-Economics of Roman Storage Astrid Van Oyen 2020-05-14 In a pre-industrial world, storage could make or break farmers and empires alike. How did it shape the Roman empire? The Socio-Economics of Roman Storage cuts across the scales of farmer and state to trace the practical and moral reverberations of storage from villas in Italy to silos in Gaul, and from houses in Pompeii to warehouses in Ostia. Following on from the material turn, an abstract notion of 'surplus' makes way for an emphasis on storage's material transformations (e.g. wine fermenting; grain degrading; assemblages forming), which actively shuffle social relations and economic possibilities, and are a sensitive indicator of changing mentalities. This archaeological study tackles key topics, including the moral resonance of agricultural storage; storage as both a shared and a contested concern during and after conquest; the geography of knowledge in domestic settings; the supply of the metropolis of Rome; and the question of how empires scale up. It will be of interest to scholars and students of Roman archaeology and history, as well as anthropologists who study the links between the scales of farmer and state.

In Search of the Romans (Second Edition) James Renshaw 2019-12-12 In Search of the Romans is a lively and informative introduction to ancient Rome. Making extensive use of ancient sources and copiously illustrated with photographs, drawings, maps and plans, now for the first time in colour, its opening two chapters guide the reader through the events of Roman history, from the foundation of the city to the fall of the empire. Subsequent chapters introduce the most important aspects of the Roman world: the army and the provinces, religion, society, and entertainment; the final two chapters focus on Pompeii and Herculaneum, the two cities destroyed by Vesuvius. New to this edition are sections on the Augustan principate, on the Roman army, on life in the provinces and on engineering innovations, while the existing text is revised throughout. The narrative includes descriptions of many individuals from the Roman world, drawn from a variety of social settings. Activity boxes and further reading lists throughout each chapter aid students' understanding of the subject. Review questions challenge students to read further and reflect on some of the most important social, political and cultural issues of ancient Rome, as well as to compare them with those of their own society. The new edition is supported by a website that includes images, maps and timelines, further reading and related links.

Conversations About History, Volume 1 Howard Burton 2021-05-24 Conversations About History, Volume 1, includes the following 5 carefully-edited Ideas Roadshow Conversations featuring leading historians. This collection includes a detailed preface highlighting the connections between the different books. Each book is broken into chapters with a detailed introduction and questions for discussion at the end of each chapter: 1. Embracing Complexity - A Conversation with historian David Cannadine, Princeton University. This wide-ranging conversation includes an examination of different aspects of the societal role of both history and historians while rejecting the simplifying distortions of the historical record that we are regularly presented with. David also provides behind-the-scenes insights into several of his bestselling books, including *The Undivided Past: Humanity Beyond Our Differences*. 2. Science and Pseudoscience - A Conversation with Michael Gordin, Rosengarten Professor of Modern and Contemporary History at Princeton University. This thought-provoking conversation examines the strange case of Immanuel Velikovsky, author of the bestselling book "Worlds in Collision" that managed to provocatively combine unbridled scientific speculation with ancient myth, as a way of probing the often-problematic boundary between science and pseudoscience. 3. Enlightened Entrepreneurialism - A Conversation with Margaret Jacob, Distinguished Professor of History at UCLA. Topics examined during this comprehensive conversation include Margaret Jacob's motivations to become a historian and her comprehensive analysis of the history of the Industrial Revolution and interpretation of the major economic motivations on the ground, comparing daily life experiences in England, France, Belgium and the Netherlands. 4. The Consolations of History - A Conversation with Teofilo Ruiz, Professor Emeritus of History at UCLA. Teo Ruiz is a scholar of the social and popular cultures of late medieval and early modern Spain and the Western Mediterranean. He received the University's Distinguished Teaching Award and was awarded the National Humanities Medal by President Barack Obama for his "inspired teaching and writing". This wide-ranging conversation provides captivating insights into his Cuban origins, how he became a professional historian, the challenges and excitement of teaching, and what the future might hold. 5. Herculaneum Uncovered - A Conversation with Andrew Wallace-Hadrill, Director of Research and Honorary Professor of Roman Studies in the Faculty of Classics at the University of Cambridge. This in-depth conversation covers Andrew Wallace-Hadrill's groundbreaking archeological work done in

Herculaneum and Pompeii, the politics of excavation, and life in the ancient Roman world. Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding Executive Director of Perimeter Institute for Theoretical Physics. He holds a PhD in theoretical physics and an MA in philosophy.

Urban Society In Roman Italy Tim J. Cornell 2005-07-19 This collection of original essays focuses upon Roman Italy where, with over 400 cities, urbanization was at the very centre of Italian civilization. Informed by an awareness of the social and anthropological issues of recent research, these contributions explore not only questions of urban origins, interaction with the countryside and economic function, but also the social use of space within the city and the nature of the development process.; These studies are aimed not only at ancient historians and classical archaeologists, but are directed towards those working in the related fields of urban studies in the Mediterranean world and elsewhere and upon the general theory of towns and complex societies.

Privata Luxuria Anna Anguissola 2012 Privacy is a widely debated concept today, and a paramount concern for modern societies: the ideas and prerogatives that it encapsulates are considered, nowadays, to be essential human rights and key issues when defining the mutual relationship between the individual and society at large. In order to investigate the boundaries and nuances of privacy in the Roman society, the city of Pompeii provides a rare case in point, due to the extraordinary concentration and readability of contextual archaeological data. The aim of this volume which originated from an International Workshop held at the Center for Advanced Studies of the Ludwig Maximilian University in Munich, is to contribute to a better knowledge of the domestic space in Pompeii and other cities of the Roman world as mirrored by the interplay between individual and social spaces. To this purpose, a small group of researchers from a variety of backgrounds and traditions have been invited to contribute papers on different aspects of privacy, emphasizing diversity in methodologies and approaches.

The World of Pompeii Pedar Foss 2009-06-02 This all embracing survey of Pompeii provides the most comprehensive survey of the region available. With contributions by well-known experts in the field, this book studies not only Pompeii, but also - for the first time - the buried surrounding cities of Campania. The World of Pompeii includes the latest understanding of the region, based on the up-to-date findings of recent archaeological work. Accompanied by a CD with the most detailed map of Pompeii so far, this book is instrumental in studying the city in the ancient world and is an excellent source book for students of this fascinating and tragic geographic region.

Multisensory Living in Ancient Rome Hannah Platts 2019-11-28 Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience - auditory, olfactory, tactile, gustatory and visual - in domestic environments in Rome, Pompeii and Herculaneum for the first time, from the first century BCE to the second century CE. Moving between social registers and locations, from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions and cultural factors behind perception, recording and control of bodily senses in the home, as well as their sociological implications. *Multisensory Living in Ancient Rome* will appeal to all students and researchers interested in Roman daily life and domestic architecture.

Statues in Roman Society Peter Stewart 2004-02-06 Statues are among the most familiar remnants of classical art. Yet their prominence in ancient society is often ignored. In the Roman world statues were ubiquitous. Whether they were displayed as public honours or memorials, collected as works of art, dedicated to deities, venerated as gods, or violated as symbols of a defeated political regime, they were recognized individually and collectively as objects of enormous significance. By analysing ancient texts and images, *Statues in Roman Society* unravels the web of associations which surrounded Roman statues. Addressing all categories of statuary together for the first time, it illuminates them in ancient terms, explaining expectations of what statues were or ought to be and describing the Romans' uneasy relationship with 'the other population' in their midst.

Herculaneum Uncovered Howard Burton 2021-01-12 This book is based on an in-depth filmed conversation between Howard Burton and Andrew Wallace-Hadrill, Director of Research and Honorary Professor of Roman Studies in the Faculty of Classics at the University of Cambridge. This wide-ranging conversation covers his fascinating archeological work done in Herculaneum and Pompeii, the politics of excavation, and life in the ancient Roman world. This carefully-edited book includes an introduction, Historical Value, and questions for discussion at the end of each chapter: I. What We Know - History and geology II. Letting Sleeping Dogs Lie - Exploring historical motivations III. Exploring Roman Society - Housing, slavery, citizenship and status IV. Herculaneum vs. Pompeii - Different eyes on the past V. The Future of the Past - Excavation, preservation and spending effectively About Ideas Roadshow Conversations Series: This book is part of a series of 100 Ideas Roadshow conversations, each one presenting a wealth of candid insights from a leading expert through a focused yet informal setting to give non-specialists a uniquely accessible window into frontline research and scholarship that wouldn't otherwise be encountered through standard lectures and textbooks.

Pompeii and the Roman Villa Carol C. Mattusch 2008 An assessment of the Bay of Naples as a popular vacation spot in ancient Rome evaluates the picturesque area as a villa site for numerous emperors and a retreat of choice for the artistic community, in a lavishly illustrated volume that features reproductions of period artwork.

Pompeii Mary Beard 2010-07-09 WINNER OF THE WOLFSON HISTORY PRIZE 2008 'The world's most controversial classicist debunks our movie-style myths about the Roman town with meticulous scholarship and propulsive energy' Laura Silverman, Daily Mail The ruins of Pompeii, buried by an explosion of Vesuvius in 79 CE, offer the best evidence we have of everyday life in the Roman empire. This remarkable book rises to the challenge of making sense of those remains, as well as exploding many myths: the very date of the eruption, probably a few months later than usually thought; or the hygiene of the baths which must have been hotbeds of germs; or the legendary number of brothels, most likely only one; or the massive death count, maybe less than ten per cent of the population. An extraordinary and involving portrait of an ancient town, its life and its continuing re-discovery, by Britain's favourite classicist.

An End to Enmity L. L. Welborn 2011-10-27 This book casts light upon the shadowy figure of the "wrongdoer" in Second Corinthians, disclosing the type of offence that was committed and the relationship of the "wrongdoer" to Paul and to the Corinthians. Drawing upon the social and rhetorical conventions that governed friendship, enmity and reconciliation in the Greco-Roman world, the book offers an hypothesis regarding the identity of the "wrongdoer" and reconstructs the history of Paul's relationship with an influential convert to Christianity at Corinth.

Pompeian Peristyle Gardens Samuli Simelius 2022-08-01 This book examines how Pompeian peristyle gardens were utilized to represent the socioeconomic status of Roman homeowners, introducing fresh perspectives on how these spaces were designed, used, and perceived. Pompeian Peristyle Gardens provides a novel understanding of how the domus was planned, utilized, and experienced through a critical examination of all Pompeian peristyles - not just by selecting a few well-known examples. This study critiques common scholarly assumptions of ancient domestic

space, such as the top-down movement of ideas and the relationship between wealth and socio-political power, though these possibilities are not excluded. In addition, this book provides a welcome contribution to exploring the largely unexamined middle class, an integral part of ancient Roman society. Pompeian Peristyle Gardens is of interest to students and scholars in art history, classics, archaeology, social history, and other related fields.

Houses and Society in Pompeii and Herculaneum Andrew Wallace-Hadrill 2022-05-10 Few sources reveal the life of the ancient Romans as vividly as do the houses preserved by the eruption of Vesuvius. Wealthy Romans lavished resources on shaping their surroundings to impress their crowds of visitors. The fashions they set were taken up and imitated by ordinary citizens. In this illustrated book, Andrew Wallace-Hadrill explores the rich potential of the houses of Pompeii and Herculaneum to offer new insights into Roman social life. Exposing misconceptions derived from contemporary culture, he shows the close interconnection of spheres we take as discrete: public and private, family and outsiders, work and leisure. Combining archaeological evidence with Roman texts and comparative material from other cultures, Wallace-Hadrill raises a range of new questions. How did the organization of space and the use of decoration help to structure social encounters between owner and visitor, man and woman, master and slave? What sort of "households" did the inhabitants of the Roman house form? How did the world of work relate to that of entertainment and leisure? How widely did the luxuries of the rich spread among the houses of craftsmen and shopkeepers? Through analysis of the remains of over two hundred houses, Wallace-Hadrill reveals the remarkably dynamic social environment of early imperial Italy, and the vital part that houses came to play in defining what it meant "to live as a Roman."

Pompeii and Herculaneum Alison E. Cooley 2013-10-01 The original edition of *Pompeii: A Sourcebook* was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, *Pompeii and Herculaneum: A Sourcebook* allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, *Pompeii and Herculaneum: A Sourcebook* offers an invaluable resource for anyone studying or visiting the sites.

Roman Architecture Frank Sear 2020-07-28 In this fully updated new edition, Frank Sear offers a thorough overview of the history of architecture in the Roman Empire. Arranged logically in six historical sections interspersed with material on Roman architects and their techniques, the building types found in Roman cities and the different buildings found in the Roman provinces, this volume now contains the latest insights into Roman architecture and takes account of the past 20 years of scholarship. This seminal work covers the architecture of the Republic, the Age of Augustus, the imperial period, Pompeii and Ostia, the eastern and western empire, and the Late Antique period, exploring subjects such as patronage, building techniques and materials, Roman engineering, town planning and imperial propaganda in a concise and readable way. Illustrated with nearly 300 photographs, maps and drawings, *Roman Architecture* continues to be the clearest introductory account of the development of architecture in the Roman Empire.

Families in the New Testament World Carolyn Osiek 1997-01-01 What was the family like for the first Christians? Informed by archaeological work and illustrated by figures, this work is a remarkable window into the past, one that both informs and illuminates our current condition. The *Family, Culture, and Religion* series offers informed and responsible analyses of the state of the American family from a religious perspective and provides practical assistance for the family's revitalization.

The Fires of Vesuvius Mary Beard 2010-04-30 From its political and religious systems to slavery and attitudes toward sex, the ruins of this ancient Roman city are explored in a study that brings to light new facts about the way the people of Pompeii lived prior to meeting their devastating end in 79 CE.

The Economy of Pompeii Miko Flohr 2017 This work addresses, from a variety of perspectives, the economy of the Roman city of Pompeii. It uses archaeological and textual evidence to discuss topics as diverse as agriculture in the fertile plains at the foot of mount Vesuvius, diet and health, manufacturing, urban investment, consumption, trade and money.

Augustan Rome Andrew Wallace-Hadrill 2018-02-08 Written by Andrew Wallace-Hadrill, one of the world's foremost scholars on Roman social and cultural history, this well-established introduction to Rome in the Age of Augustus provides a fascinating insight into the social and physical contexts of Augustan politics and poetry, exploring in detail the impact of the new regime of government on society. Taking an interpretative approach, the ideas and environment manipulated by Augustus are explored, along with reactions to that manipulation. Emphasising the role and impact of art and architecture of the time, and on Roman attitudes and values, *Augustan Rome* explains how the victory of Octavian at Actium transformed Rome and Roman life. This thought-provoking yet concise volume sets political changes in the context of their impact on Roman values, on the imaginative world of poetry, on the visual world of art, and on the fabric of the city of Rome.

The Roman Villa in the Mediterranean Basin Annalisa Marzano 2018-04-30 This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.

Natural Disasters and Cultural Change John Grattan 2003-08-27 Human cultures have been interacting with natural hazards since the dawn of time. This book explores these interactions in detail and revisits some famous catastrophes including the eruptions of Thera and Vesuvius. These studies demonstrate that diverse human cultures had well-developed strategies which facilitated their response to extreme natural events.

The Roman Street Jeremy Hartnett 2017-05-09 In this book, Jeremy Hartnett explores the role of the ancient Roman street as the primary venue for social performance and political negotiations.

The Structure of the Ordinary N. J. Habraken 2000-08-25 The influential Dutch architect's long-awaited manifesto on the everyday environment as the first and best ground for establishing the significance and coherence of architecture. According to N. J. Habraken, intimate and unceasing interaction between people and the forms they inhabit uniquely defines built environment. *The Structure of the Ordinary*, the culmination of decades of environmental observation and design research, is a recognition and analysis of everyday environment as the wellspring of urban design and formal architecture. The author's central argument is that built environment is universally organized by the Orders of Form, Place, and Understanding. These three fundamental, interwoven principles correspond roughly to physical, biological, and social domains. Historically,

"ordinary" environment was the background against which architects built the "extraordinary." Drawing upon extensive examples from archaeological and contemporary sites worldwide, the author illustrates profound recent shifts in the structure of everyday environment. One effect of these transformations, Habraken argues, has been the loss of implicit common understanding that previously enabled architects to formally enhance and innovate while still maintaining environmental coherence. Consequently, architects must now undertake a study of the ordinary as the fertile common ground in which form- and place-making are rooted. In focusing on built environment as an autonomous entity distinct from the societies and natural environments that jointly create it, this book lays the foundation for a new dialogue on methodology and pedagogy, in support of a more informed approach to professional intervention.

Life and Death in Pompeii and Herculaneum Paul Roberts 2013 "This book is published to accompany the exhibition at the British Museum from 28 March to 29 September 2013"--T.p. verso.

Rome's Cultural Revolution Andrew Wallace-Hadrill 2008-11-06 The period of Rome's imperial expansion, the late Republic and early Empire, saw transformations of its society, culture and identity. Drawing equally on archaeological and literary evidence, this book offers an original and provocative interpretation of these changes. Moving from recent debates about colonialism and cultural identity, both in the Roman world and more broadly, and challenging the traditional picture of 'Romanization' and 'Hellenization', it offers instead a model of overlapping cultural identities in dialogue with one another. It attributes a central role to cultural change in the process of redefinition of Roman identity, represented politically by the crisis of the Republican system and the establishment of the new Augustan order. Whether or not it is right to see these changes as 'revolutionary', they involve a profound transformation of Roman life and identity, one that lies at the heart of understanding the nature of the Roman Empire.

Architecture and Mathematics from Antiquity to the Future Kim Williams 2015-02-11 Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order. Mathematics is also central to the production of architecture, to its methods of measurement, fabrication and analysis. This two-volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected. Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics. Contributors of these chapters come from a wide range of disciplines and backgrounds: architects, mathematicians, historians, theoreticians, scientists and educators. Through this work, architecture may be seen and understood in a new light, by professionals as well as non-professionals. Volume II covers architecture from the Late Renaissance era, through Baroque, Ottoman, Enlightenment, Modern and contemporary styles and approaches. Key figures covered in this volume include Palladio, Michelangelo, Borromini, Sinan, Wren, Wright, Le Corbusier, Breuer, Niemeyer and Kahn. Mathematical themes which are considered include linear algebra, tiling and fractals and the geographic span of the volume's content includes works in the United States of America and Australia, in addition to those in Europe and Asia.

Space, Movement, and Visibility in Pompeian Houses Michael A. Anderson 2022-12-31 This volume examines the pivotal role of movement, visibility, and experience within Pompeian houses as a major factor determining house form; the use of space; and the manner, meaning, and modalities of domestic daily life, through the application of GIS-based analysis. Through close consideration of ancient literature, detailed explanations of methodology, and exploration of results, Michael Anderson provides new perspectives on Pompeian domestic space including room types and household activities that rarely feature in the discussion of ancient housing. Readers gain a better understanding of priorities in the design of Pompeian houses, the degree to which daily life was interrupted by earthquake damage in the site's final years, and evolving motivations behind wall painting decoration. The volume not only explores how Pompeian houses reflected the needs of everyday life as imagined by their architects, but also how these spaces served to influence and control daily activities and ultimately how they were transformed by the spatial and visual requirements of domestic life. *Space, Movement, and Visibility in Pompeian Houses* is suitable for students and scholars of Pompeian houses and domestic life, Roman architecture and urbanism, and spatial analysis and space syntax.

Principles of Decoration in the Roman World Annette Haug 2021-04-19 This book explores the manner in which architectural settings and action contexts influenced the perception of decoration in the Roman world. Crucial to the relationship between ancient viewers and media was the concept of decor, a term employed by Vitruvius and other Roman authors to describe the appropriateness of particular decorative elements to the environment in which they were located. The papers in this volume examine a diverse range of decorated spaces, from press rooms to synagogues, through the lens of decor. In doing so, they shed new light on the decorative principles employed across Roman Italy and beyond.

Fores et Fenestras: A Computational Study of Doors and Windows in Roman Domestic Space Lucia Michielin 2021-06-10 The role doors and windows play in shaping the life and structure of Roman private dwellings has been underestimated; they are structures that connect not only rooms but houses to the outside world, and they relate to privacy, security, and light in domestic spaces. This volume analyses these structures as an essential part of daily life.

Daily Life in the Roman City Gregory S. Aldrete 2004-12-30 Despite the fact that the majority of the inhabitants of the Roman Empire lived an agricultural existence and thus resided outside of urban centers, there is no denying the fact that the core of Roman civilization—its essential culture and politics—was based in cities. Even at the furthest boundaries of the Empire, Roman cities shared a remarkable and consistent similarity in terms of architecture, art, infrastructure, and organization which was modeled after the greatest city of all, Rome itself. In Gregory Aldrete's exhaustive account, readers will have the opportunity to peer into the inner workings of daily life in ancient Rome, to witness the full range of glory, cruelty, sophistication, and deprivation that characterized Roman cities, and will perhaps even gain new insight into the nature and history of urban existence in America today. Included are accounts of Rome's history, infrastructure, government, and inhabitants, as well as chapters on life and death, the dangers and pleasures of urban living, entertainment, religion, the emperors, and the economy. Additional sections explore two other important Roman cities: Ostia, an industrial port town, and Pompeii, the doomed playground of the rich. This volume is ideal for high school and college students, as well as for anyone interested in examining the realities of life in ancient Rome. A chronology of the time period, maps, illustrations, a bibliography, and an index are also included.

Understanding Houses And Society In Pompeii And Herculaneum

Before you embark on your journey to find Houses And Society In Pompeii And Herculaneum online, it's essential to grasp the concept of Houses And Society In Pompeii And Herculaneum eBook formats. Houses And Society In Pompeii And Herculaneum come in various formats, each with its own unique features and compatibility. Understanding these formats will help you choose the right one for your device and preferences.

Different Houses And Society In Pompeii And Herculaneum eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Houses And Society In Pompeii And Herculaneum eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.
