Managing the Risks of Organizational Accidents James Reason 2016-01-29 Major accidents are rare events due to the many barriers, safeguards and defences developed by modern technologies. But they continue to happen with saddening regularity and their human and financial consequences are all too often unacceptably catastrophic. One of the greatest challenges we face is to develop more effective ways of both understanding and limiting their occurrence. This lucid book presents a set of common principles to further our knowledge of the causes of major accidents in a wide variety of high-technology systems. It also describes tools and techniques for managing the risks of such organizational accidents that go beyond those currently available to system managers and safety professionals. James Reason deals comprehensively with the prevention of major accidents arising from human and organizational causes. He argues that the same general principles and management techniques are appropriate for many different domains. These include banks and insurance companies just as much as nuclear power plants, oil exploration and production companies, chemical process installations and air, sea and rail transport. Its unique combination of principles and practicalities make this seminal book essential reading for all whose daily business is to manage, audit and regulate hazardous technologies of all kinds. It is relevant to those concerned with understanding and controlling human and organizational factors and will also interest academic

readers and those working in industrial and government agencies.

Prontuario. Cause e malattie di origine lavorativa Frigeri Graziano 2015-06-30 Con la presentazione del Magistrato Beniamino Deidda Il volume nasce dal bisogno di avere uno strumento di pronta consultazione che risponda fundamentalmente alle esigenze di: - supportare i medici, siano essi Medici Competenti, Medici di Medicina Generale o, come stabilito dall'art. 139 del Testo Unico "ogni medico che ha l'obbligo di effettuare la denuncia di malattia professionale"; - rendere disponibili informazioni preliminari per le attività dei medici valutatori, delle varie branche afferenti alla medicina del lavoro ed alla medicina legale, che vogliono verificare l'eventuale natura professionale della malattia indagata, effettuando una rapida ricerca delle malattie di presunta origine lavorativa e di tutte le possibili cause ad esse associate, come base per eventuali successivi approfondimenti; - supportare il Medico Competente nella sorveglianza sanitaria e nella collaborazione alla redazione del Documento di Valutazione dei rischi, come prescritto dal D.Lgs. 81/2008, mediante le schede sulle malattie e sugli agenti causali, richiamabili ed esportabili con il software, ricche di riferimenti tecnici e normativi; - rendere disponibili ai tecnici della prevenzione in generale e ai RSPP in particolare (ma anche a RLS e Datori di Lavoro) schede di pronta consultazione sugli agenti causali e sulle malattie professionali, strutturate in modo tale da consentire la verifica immediata delle associazioni tra cause e malattie e viceversa. Con 242 schede su Malattie Professionali e 202 sui loro agenti causali (chimici, biologici, fisici, Movimentazione carichi, Posture incongrue, Movimenti ripetitivi, Alcol, ecc.), costruite in base alle indicazioni normative e agli indirizzi scientifici più avanzati, si ha la disponibilità di uno strumento innovativo, unico nel suo genere, destinato ad essere un punto di riferimento aggiornato che rimarrà valido per molti anni a venire. In questa seconda nuova edizione, oltre che essere migliorata l'integrazione tra schede "agenti" e schede "malattie", è

stato fatto un corposo aggiornamento che ha tenuto conto dell'evoluzione normativa, delle novità del D.M. del 10 Giugno 2014 e degli indirizzi scientifici più avanzati su valori limite, effetti critici, IBE, tutti aggiornati alle pubblicazioni ACGIH 2014 e, per quanto attiene agli agenti cancerogeni, IARC di Ottobre 2014. Sono stati inseriti nuovi capitoli su cause delle malattie, dati epidemiologici, ferite da taglio e da punta nel settore ospedaliero e sanitario, consumo di alcol e stupefacenti e nuove schede; il software allegato al testo, che consente la ricerca rapida, la navigazione, la visualizzazione e la stampa delle schede e delle note tecniche, è stato ugualmente completamente aggiornato.

MhGAP Intervention Guide for Mental, Neurological and Substance-Use Disorders in Non-specialized Health Settings - Version 2.0 World Health Organization 2017-01-27 Mental, neurological and substance use (MNS) disorders are highly prevalent, accounting for a substantial burden of disease and disability globally. In order to bridge the gap between available resources and the significant need for services, the World Health Organization launched the Mental Health Gap Action Programme (mhGAP). The objective of mhGAP is to scale-up care and services using evidence-based interventions for prevention and management of priority MNS conditions. The mhGAP Intervention Guide version 1.0 for MNS disorders for non-specialist health settings was developed in 2010 as a simple technical tool to allow for integrated management of priority MNS conditions using protocols for clinical decision-making. With uptake in over 90 countries, mhGAP-IG 1.0 version has had widespread success. It is our pleasure to present mhGAP version 2.0, with updates incorporating new evidence-based guidance, enhanced usability, and new sections to expand its use by both health care providers as well as programme managers. It is our hope that this guide will continue to provide the road-map to deliver care and services for people with MNS disorders around the world and lead us closer to achieving the goal of universal health coverage.

Occupational and Environmental Lung Diseases Susan Tarlo 2011-06-24 Documents both environmental and work-related causes of lung disease Unlike other books on the subject, this new volume approaches occupational and environmental lung disease from the starting point of the

patient who comes to the physician with respiratory symptoms. The authors recognize that potentially harmful exposures occur not only in the work environment, but also as a result of hobbies or other leisure activities, or from outdoor air pollution, and it is up to the physician to identify whether a particular job or hobby is the cause of the patient's respiratory symptoms. To help you arrive at a differential diagnosis, chapters in the book are arranged by job or exposure, and are divided into 5 sections: Personal environment Home environment Other indoor environments Work environment General environment Each is written by an expert in the specific topic and provides pragmatic information for the practicing physician. This practical book is an invaluable resource that belongs close at hand for all physicians dealing with patients experiencing respiratory symptoms.

Patient Engagement Guendalina Graffigna 2016-01-01 Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain

it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

Emergency Triage Manchester Triage Group 2008-04-15 The Manchester Triage System (MTS) is the most widely used triagesystem in the UK, Europe and Australia, with tens of millions ofpatients being processed through hospital emergencydepartments. Emergency Triage is the core text for the MTS which utilises arisk averse system of prioritisation for patients in allunscheduled care settings, and as such it is an essential text forall emergency department staff using the MTS, in particular triagenurses themselves. The second edition has been revised throughout and takes in thechanges in practice introduced into MTS since the book was firstpublished. These include: Redesigned and expanded flow charts Additional charts for allergy and palpitations New practices - such as the possibility of revascularisation forpatients with stroke New discriminators, for example acute neurological deficit andsignificant respiratory history Redefinition of existing discriminators Also new to this edition is the incorporation of sections on theuse of the risk averse system in telephone triage, in settingswhere 'streaming' takes place and as an early warningscore for patients in all

unscheduled care settings. The tone of this edition reflects the more up to date, modified approach to triage while retaining the principles of clinical prioritisation, which in the authors' words "remains a central plank of clinical risk management in emergency care". Emergency Triage is an essential handbook for all clinicians involved in unscheduled care settings such as emergency care, walk-in centres, minor injury units, primary care out of hours services.
