What Feelings Do When No One's Looking Tina Oziewicz 2022-07-05 An unruly cast of emotions come alive in this romping dreamworld, a place Maurice Sendak's Wild Things could call home Curiosity, a lithe and floppy-eared creature, perches above the open world and gazes out with a zippy blend of hope, wonder, and longing. From the tip of a chimney, we bound into the quiet and mischievous world of feelings, meeting a troupe of tufted creatures as we go. Sympathy helps snails cross a sidewalk to safety, fear pirouettes in an attempt to camouflage with wallflowers, and pleasure reclines across a doily-donned reading chair, sipping a cup of tea. Elsewhere, our insecurities - pesky, cavorting beings - build intricate cages and stride about with clattering sets of keys. Tina Oziewicz's words hum with truth, and Aleksandra Zajac's illustrations bloom and burst with charming details like a sail constructed out of a pair of billowing long johns or a red slipper falling from a contented paw. Taking in the perfect harmony of this book is like taking a long gulp from a trusty thermos and filling up with warmth. What Feelings Do When No One's Looking surprises and soothes, inspires us to feel.

Just your typical teddy bear stuff. So when he is whisked away to the annual teddy bears' picnic, he feels insignificant compared to the other bears who do daring and daunting things: sleepovers, hospital stays--even a night in the lost and found! After small talk with a regional stuffing manager, a department of cuddling official and a stitchery inspector; a stop at the snack table; and even some team building activities, it's time for the teddy bear service awards . . . and Ollie feels even more small and unimportant. But he soon learns that it's not just the big things that matter, it's the little things too. While parents will love the tongue-in-cheek office-party details, kids and parents alike will fall in love with Ollie: a sweet bear who discovers that his love for his girl makes him very special indeed.

The Feeling of what Happens Antonio R. Damasio 1999 The publication of this book is an event in the making. All over the world scientists, psychologists, and philosophers are waiting to read Antonio Damasio's new theory of the nature of consciousness and the construction of the self. A renowned and revered scientist and clinician, Damasio has spent decades following amnesiacs down hospital corridors, waiting for comatose patients to awaken, and devising ingenious research using PET scans to piece together the great puzzle of consciousness. In his bestselling Descartes' Error, Damasio revealed the critical importance of emotion in the making of reason. Building on this foundation, he now shows how consciousness is created. Consciousness is the feeling of what happens--our mind noticing the body's reaction to the world and responding to that experience. Without our bodies there can be no consciousness, which is at heart a mechanism for survival that engages body, emotion, and mind in the glorious spiral of human life. A hymn to the possibilities of human existence, a magnificent work of ingenious science, a gorgeously written book, The Feeling of What Happens is already being hailed as a classic.
