**Water Wind Art and Debate** Gavin Birch 2007-10-12 The Australian community has become increasingly concerned about environmental issues, resulting in the Australian government placing a higher priority on global warming and climate change. This unique compilation, Water, Wind, Art and Debate highlights current research across a variety of Humanities and Science disciplines.

**A Dictionary of Nonprofit Terms and Concepts** David Horton Smith 2006-11-08 This reference work defines more than 1,200 terms and concepts that have been found useful in past research and theory on the nonprofit sector. The entries reflect the importance of associations, citizen participation, philanthropy, voluntary action, nonprofit management, volunteer administration, leisure, and political activities of nonprofits. They also reflect a concern for the wider range of useful general concepts in theory and research that bear on the nonprofit sector and its manifestations in the United States and elsewhere. This dictionary supplies some of the necessary foundational work on the road toward a general theory of the nonprofit sector.

**Profiles in Operations Research** Arjang A. Assad 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR.

Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. "I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [stet] the pioneers of O.R. for many years to come." \*For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

**International Handbook of Higher Education** James J.F. Forest 2008-01-18 This book provides a central, authoritative source of reference on the most essential topics of higher education. The International Handbook of Higher Education combines a rich diversity of scholarly perspectives with a wide range of internationally derived descriptions and analyses. Chapters in the first volume cover central themes in the study of higher education, while contributors to the second volume focuses on contemporary higher education issues within specific countries or regions. Together, these volumes provide a centralized, easily accessible, yet scholarly source of information.

**Social Capital** Partha Dasgupta 2000 This book contains a number of papers presented at a workshop organised by the World Bank in 1997 on the theme of 'Social Capital: Integrating the Economist's and the Sociologist's Perspectives'. The concept of 'social capital' is considered through a number of theoretical and empirical studies which discuss its analytical foundations, as well as institutional and statistical analyses of the concept. It includes the classic 1987 article by the late James Coleman, 'Social Capital in the Creation of Human Capital', which formed the basis for the development of social capital as an organising concept in the social sciences.

**Free, Fair, and Alive** David Bollier 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

**Great Lakes Chronicle** Wisconsin Coastal Management 2018-10-02 Lakes Superior and Michigan have long played a vital role in shaping our state's history, culture and economy. For forty years, the Wisconsin Coastal Management Program has collaborated with governments and nonprofit organizations to preserve and protect this crucial resource, and, since 2002, has promoted public awareness of issues affecting the lakes in its annual Wisconsin Great Lakes Chronicle. Great Lakes Chronicle: Essays on Coastal Wisconsin brings together more than one hundred articles by coastal management practitioners, providing a broad perspective on issues affecting Wisconsin's Great Lakes shorelines, and advocating for the wise and balanced use of our coastal environment for the benefit of people now and in the future.

**The Politics of Consumption** Alan Bradshaw 2013-05 This age of austerity comes on the back of a lengthened period of apparently rampant consumer excess: that was a party for which we are all now having to pay. A spectacular period of unsustainably funded over-indulgence, it seems, has now given rise to a sobering period of barely fundable mere-subsistence. Consumption, narrated along such lines, is a sin which has to be paid for. Beyond the deceptive theology of consumption, however, lies actual politics. In May 2012, we hosted a conference at Dublin's Royal Society of the Antiquaries of Ireland in order to analyse and debate the politics of consumption. This special issue is the outcome of the discussions which took place during that event. It features conceptual and empirical investigations into the politics of consumption, a head-to-head debate on the idea of consumer citizenship, a series of notes on the relationship between art, politics, and consumption, and reviews of two recent books. Taken together, these diverse pieces underline the need for a politically-oriented analysis of consumption, not only for the sake of informing academic debates but

also for the sake of informing contemporary consumption practices. Consumption, we argue, is political: to approach it otherwise is to dogmatically seek refuge in a world of fantasy. Issue editors: Alan Bradshaw, Norah Campbell and Stephen Dunne. Contributors: Ben Fine, Kate Soper, Peter Armstrong, Matthias Zick Varul, Eleftheria Lekakis, Isleide Fontenelle, Adam Arvidsson, Detlev Zwick, Olga Kravets, Stevphen Shukaitis, David Mabb, Antigoni Memou, Femke Kaulingfreks, Ruud Kaulingfreks, Andreas Chatzidakis, Georgios Patsiaouras, Gavin Brown and Angus Cameron.

**Sustainable food planning: evolving theory and practice** Andr  Viljoen 2012-03-30 With over half the world's population now deemed to be urbanised, cities are assuming a larger role in political debates about the security and sustainability of the global food system. Hence, planning for sustainable food production and consumption is becoming an increasingly important issue for planners, policymakers, designers, farmers, suppliers, activists, business and scientists alike. The rapid growth of the food planning movement owes much to the fact that food, because of its unique, multi-functional character, helps to bring people together from all walks of life. In the wider contexts of global climate change, resource depletion, a burgeoning world population, competing food production systems and diet-related public health concerns, new paradigms for urban and regional planning capable of supporting sustainable and equitable food systems are urgently needed. This book addresses this urgent need. By working at a range of scales and with a variety of practical and theoretical models, this book reviews and elaborates definitions of sustainable food systems, and begins to define ways of achieving them. To this end 4 different themes have been defined as entry-points into the discussion of 'sustainable food planning'. These are (1) urban agriculture, (2) integrating health, environment and society, (3) food in urban design and planning and (4) urban food governance.

**Local Government in North Carolina** Gordon P. Whitaker 2003

*The Proceedings of the 12th International Congress on Mathematical Education* Sung Je Cho 2015-02-10 This book comprises the Proceedings of the 12th International Congress on Mathematical Education (ICME-12), which was held at COEX in Seoul, Korea, from July 8th to 15th, 2012. ICME-12 brought together 3500 experts from 92 countries, working to understand all of the intellectual and attitudinal challenges in the subject of mathematics education as a multidisciplinary research and practice. This work aims to serve as a platform for deeper, more sensitive and more collaborative involvement of all major contributors towards educational improvement and in research on the nature of teaching and learning in mathematics education. It introduces the major activities of ICME-12 which have successfully contributed to the sustainable development of mathematics education across the world. The program provides food for thought and inspiration for practice for everyone with an interest in mathematics education and makes an essential reference for teacher educators, curriculum developers and researchers in mathematics education. The work includes the texts of the four plenary lectures and three plenary panels and reports of three survey groups, five National presentations, the abstracts of fifty one Regular lectures, reports of thirty seven Topic Study Groups and seventeen Discussion Groups.

*Refiguring the Archive* Carolyn Hamilton 2012-12-06 *Refiguring the Archive* at once expresses cutting-edge debates on 'the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines, mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be separated from forgetting, and argues that the archive is about the future rather than the past. Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a time that has already begun.

**Race and Ethnicity** Stephen Spencer 2014-03-14 Broad-ranging and comprehensive, this completely revised and updated textbook is a critical guide to issues and theories of 'race' and ethnicity. It shows how these concepts came into being during colonial domination and how they became central - and until recently, unquestioned - aspects of social identity and division. This book provides students with a detailed understanding of colonial and post-colonial constructions, changes and challenges to race as a source of social division and inequality. Drawing upon rich international case studies from Australia, Guyana, Canada, Malaysia, the Caribbean, Mexico, Ireland and the UK, the book clearly explains the different strands of theory which have been used to explain the dynamics of race. These are critically scrutinised, from biological-based ideas to those of critical race theory. This key text includes new material on changing multiculturalism, immigration and fears about terrorism, all of which are critically assessed. Incorporating summaries, chapter-by-chapter questions, illustrations, exercises and a glossary of terms, this student-friendly text also puts forward suggestions for further project work. Broad in scope, interactive and accessible, this book is a key resource for undergraduate students of 'race' and ethnicity across the social sciences.

**Research in the Archival Multiverse** Anne J. Gilliland 2017 Within the past 15 years, the field of archival studies around the world has experienced unprecedented growth and archival studies graduate education programs today have among the highest enrollments in any information field. During the same period, there has also been unparalleled expansion and innovation in the diversity of methods and theories being applied in archival scholarship. Global in scope, *Research in the Archival Multiverse* compiles critical and reflective essays across a wide range of emerging research areas and interests in archival studies with the aim of providing current and future archival academics with a text addressing possible methods and theoretical frameworks that have been and might be used in archival scholarship. More than a collation of research methods for handy reference, this volume advocates for reflexive research practice as a means by which to lay bare the fuzziness and messiness of research. Whereas research in the form of published research papers and juried conference presentations provide a view of the study framed in terms of research questions and findings, reflexive research practice reveals the context of the study and chains of situations, choices, and decisions that influence the trajectories of the studies themselves. Such elucidations from the position of the researcher are instructive for others, who may be inspired to apply or adapt the method for their own research. \*\*\* "This book is a landmark publication on research in archival science, tracing the development of ideas in the discipline in part one, then exploring possibilities and pathways in the following chapters. It is essential reading on the evolution and progression of the discipline, particularly for every Masters and PhD student in archival science, whether looking for a deeper understanding of archival theory or inspiration on research design and process. It will be invaluable to all archival educators, but particularly to supervisors of research students." -- Karen Anderson, *Archives and Manuscripts*, 2017 \*\*\* "The compilation reflects an array of directions in which research in the broadly defined area of archives is heading. While an ambitious collection, it in no way limits our understanding of the multiverse; in fact, quite the opposite, it hints at the notion that the multiverse may be limitless." -- *Library and Information Science Research* 39 (2017) 159 (Series: ?Social Informatics) [Subject: Research Studies, Digital Studies, Archival Science, History]

**Good Faith Collaboration** Joseph M. Reagle, Jr. 2012-09-21 How Wikipedia collaboration addresses the challenges of openness, consensus, and leadership in a historical pursuit for a universal encyclopedia. Wikipedia, the online encyclopedia, is built by a community—a community of Wikipedians who are expected to “assume good faith” when interacting with one another. In *Good Faith Collaboration*, Joseph Reagle examines this unique collaborative culture. Wikipedia, says Reagle, is not the first effort to create a freely shared, universal encyclopedia; its early twentieth-century ancestors include Paul Otlet's Universal Repository and H. G. Wells's proposal for a World Brain. Both these projects, like Wikipedia, were fuelled by new technology—which at the time included index cards and microfilm. What distinguishes Wikipedia from these and other more recent ventures is Wikipedia's good-faith collaborative culture, as seen not only in the writing and editing of articles but also in their discussion pages and edit histories. Keeping an open perspective on both knowledge claims and other contributors, Reagle argues, creates an extraordinary collaborative potential. Wikipedia's style of collaborative production has been imitated, analyzed, and satirized. Despite the social unease over its implications for individual autonomy, institutional authority, and the character (and quality) of cultural products, Wikipedia's good-faith collaborative culture has brought us closer than ever to a realization of the century-old pursuit of a universal encyclopedia.

**Animal Death** Jay Johnston 2020-03-01 Animal death is a complex, uncomfortable, depressing, motivating and sensitive topic.

*Understanding Knowledge as a Commons* Charlotte Hess 2011-01-21 Looking at knowledge as a shared resource: experts discuss how to define,

protect, and build the knowledge commons in the digital age. Knowledge in digital form offers unprecedented access to information through the Internet but at the same time is subject to ever-greater restrictions through intellectual property legislation, overpatenting, licensing, overpricing, and lack of preservation. Looking at knowledge as a commons—as a shared resource—allows us to understand both its limitless possibilities and what threatens it. In *Understanding Knowledge as a Commons*, experts from a range of disciplines discuss the knowledge commons in the digital era—how to conceptualize it, protect it, and build it. Contributors consider the concept of the commons historically and offer an analytical framework for understanding knowledge as a shared social-ecological system. They look at ways to guard against enclosure of the knowledge commons, considering, among other topics, the role of research libraries, the advantages of making scholarly material available outside the academy, and the problem of disappearing Web pages. They discuss the role of intellectual property in a new knowledge commons, the open access movement (including possible funding models for scholarly publications), the development of associational commons, the application of a free/open source framework to scientific knowledge, and the effect on scholarly communication of collaborative communities within academia, and offer a case study of EconPort, an open access, open source digital library for students and researchers in microeconomics. The essays clarify critical issues that arise within these new types of commons—and offer guideposts for future theory and practice. Contributors David Bollier, James Boyle, James C. Cox, Shubha Ghosh, Charlotte Hess, Nancy Kranich, Peter Levine, Wendy Pradt Lougee, Elinor Ostrom, Charles Schweik, Peter Suber, J. Todd Swarthout, Donald Waters

**Pandemic Media** Philipp Dominik Keidl 2021-01-23 With its unprecedented scale and consequences the COVID-19 pandemic has generated a variety of new configurations of media. Responding to demands for information, synchronization, regulation, and containment, these "pandemic media" reorder social interactions, spaces, and temporalities, thus contributing to a reconfiguration of media technologies and the cultures and politics with which they are entangled. Highlighting media's adaptability, malleability, and scalability under the conditions of a pandemic, the contributions to this volume track and analyze how media emerge, operate, and change in response to the global crisis and provide elements toward an understanding of the post-pandemic world to come.

**Effective Public Relations** Scott M. Cutlip 1962

*From Empire to Republic* Collectif 2016-09-29 After the dissolution of the Austro-Hungarian Monarchy, Austria transformed itself from an empire to a small Central European country. Formerly an important player in international affairs, the new republic was quickly sidelined by the European concert of powers. The enormous losses of territory and population in Austria's post-Habsburg state of existence, however, did not result in a political, economic, cultural, and intellectual black hole. The essays in the twentieth anniversary volume of *Contemporary Austrian Studies* argue that the small Austrian nation found its place in the global arena of the twentieth century and made a mark both on Europe and the world. Be it Freudian psychoanalysis, the "fin-de-siècle" Vienna culture of modernism, Austro-Marxist thought, or the Austrian School of Economics, Austrian thinkers and ideas were still wielding a notable impact on the world. Alongside these cultural and intellectual dimensions, Vienna remained the Austrian capital and reasserted its strong position in Central European and international business and finance. Innovative Austrian companies are operating all over the globe. This volume also examines how the globalizing world of the twentieth century has impacted Austrian demography, society, and political life. Austria's place in the contemporary world is increasingly determined by the forces of the European integration process. European Union membership brings about convergence and a regional orientation with ramifications for Austria's global role. Austria emerges in the essays of this volume as a highly globalized country with an economy, society, and political culture deeply grounded in Europe. The globalization of Austria, it appears, turns out to be in many instances an "Europeanization".

**Introducing Public Administration** Jay M. Shafritz 2015-07-17 Updated in its 8th edition, *Introducing Public Administration* provides readers with a solid, conceptual foundation in public administration, and contains the latest information on important trends in the discipline. Known for their lively and witty writing style, Shafritz, Russell, and Borick cover the most important issues in public administration using examples from various disciplines and modern culture. This approach captivates readers and encourages them to think critically about the nature of public administration today.

*The Working Life* Joanne B. Ciulla 2011-03-16 A wide-ranging look at the allure and changing significance of work. With seductions, misunderstandings, and misinformation everywhere, this immensely readable book calls for a new contract—with ourselves. Drawing from history, mythology, literature, pop culture, and practical experience, Ciulla probes the many meanings of work or its meaninglessness and asks: Why are so many of us letting work take over our lives and trying to live in what little time is left? What has happened to the old, unspoken contract between worker and employer? Why are young people not being disloyal when they regularly consider job-changing? Employers can't promise as much to workers as before. Is that because they promise so much to stockholders? Why are there mass layoffs and "downsizing" in a time of unequaled corporate prosperity? And why are the most common lies in business about satisfactory employee performance? The traditional contract between employers and employees is over. This thoughtful and provocative study shows how to replace it by the one we make with ourselves.

*Ethics in Real Estate* Stephen E. Roulac 2013-04-17 ethics." Certainly our industry is bound by the formal constraints of law in national, state, and local jurisdictions. What this volume reminds us, however, is that those laws are only as good as the personal "sea of ethics" in which each of us operates. THE ETHICS OF PROPERTY INVOLVEMENTS Stephen E. Roulac The Roulac Group San Rafael, California and Visiting Professor University of Ulster Ethical considerations are a dominant theme in the management literature. As "Ethics and ethical issues surround our liver, ... ethics has become one of the most rapidly growing areas of management research, with over 800 articles and 1,400 books appearing since 1990" (Schminke, Ambrose, and Miles, 1998). Compared to business and business management, however, the research and writing on real estate in an ethics context is in the very early stages of development. The lack of a developed literature on ethics in real estate is reflected in the response by one highly placed executive to my solicitation for funding to support the publication of this volume: "I didn't know there were any ethics in real estate!" Fortunately, the Summa Corporation and the American Real Estate Society believe in the importance of ethics in real estate, for their cosponsorship has made possible this special monograph on the subject of Ethics in Real Estate. The support of the Summa Corporation and the American Real Estate Society of this pioneering volume is warmly and appreciatively acknowledged.

*Critical Point of View* Geert Lovink 2011 For millions of internet users around the globe, the search for new knowledge begins with Wikipedia. The encyclopedia's rapid rise, novel organization, and freely offered content have been marveled at and denounced by a host of commentators. This book moves beyond unflagging praise, well-worn facts, and questions about its reliability and accuracy, to unveil the complex, messy, and controversial realities of a distributed knowledge platform. The essays, interviews and artworks brought together in this reader form part of the overarching 'Critical Point of View' research initiative, which began with a conference in Bangalore (January 2010), followed by events in Amsterdam (March 2010) and Leipzig (September 2010). With an emphasis on theoretical reflection, cultural difference and indeed, critique, contributions to this collection ask: What values are embedded in Wikipedia's software? On what basis are Wikipedia's claims to neutrality made?

**Nine Shift** William August Draves 2004

**Mobile Museums** Felix Driver 2021-04-19 *Mobile Museums* presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history – to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in *Mobile Museums* collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. *Mobile Museums* helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to

matter today. Praise for Mobile Museums 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

**Engaging Contradictions** Charles R. Hale 2008-05-07 Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas

**The North American Arctic** Dwayne Ryan Menezes 2019-11-04 The North American Arctic addresses the emergence of a new security relationship within the North American North. It focuses on current and emerging security issues that confront the North American Arctic and that shape relationships between and with neighbouring states (Alaska in the US; Yukon, Northwest Territories and Nunavut in Canada; Greenland and Russia). Identifying the degree to which 'domain awareness' has redefined the traditional military focus, while a new human rights discourse undercuts traditional ways of managing sovereignty and territory, the volume's contributors question normative security arrangements. Although security itself is not an obsolete concept, our understanding of what constitutes real human-centred security has become outdated. The contributors argue that there are new regionally specific threats originating from a wide range of events and possibilities, and very different subjectivities that can be brought to understand the shape of Arctic security and security relationships in the twenty-first century.

**Successes, Limitations, and Frontiers in Ecosystem Science** Michael L. Pace 2014-09-01

**Family Wars** Grant Gordon 2010-03-03 Many of the world's most successful businesses are family owned. With this comes the threat of family bust-ups, sibling rivalry and petty jealousies. Family Wars takes you behind the scenes on a rollercoaster ride through the ups and downs of some of the biggest family-run companies in the world, showing how family in-fighting has threatened to bring about their downfall. Whether it's the Redstone's courtroom battles or the feud over Henry Ford's reluctance to let go of the reigns, the book reveals the origins, the extent and the final resolution of some of the most famous family feuds in recent history. Names you'll recognise include: the Gallo Family; the Guinness story; the Pathak family; and the Gucci family. An astonishing exposé of the way families do business and how arguments can threaten to blow a business apart, Family Wars also offers valuable advice on how such problems can be contained and solved.

**LOVE The Beat Goes On** Lynda Filler 2020-08-28 When you write a memoir, there's no place to hide. author Lynda Filler "Powerful and unforgettable" JackMagnus, 5 Star Readers' Favorite "This is a book every human alive should read and take away the lessons given. If I could give it ten stars, I would. It's that good." J. Sikes When your cardiologist tells you to "Get your affairs in order, your heart condition is incurable," what do you do? Lynda shares her personal story in the typical fast-paced, edgy, in-your-face style she's known for in her writing. She will walk you through her journey to self-love sharing her belief in journals, love, prayer, soul, spirituality and positive mindset. She's hard-hitting but compassionate. She writes about romantic experiences that may shock you but makes no apologies for her unconventional lifestyle. Nor does she hold back taking responsibility for the things that she believes created her dis-ease. You will definitely question a woman who walks around in denial; then makes a decision to drive, all alone, from Puerto Vallarta, Mexico to Whistler, Canada with undiagnosed Idiopathic Dilated Cardiomyopathy. Men and women are often self-care-challenged and Lynda was no the exception. If you are fighting any kind of illness or dis-ease, you are not alone! Lynda has walked her talk, and after an experience in the summer of 2015 relating to Dr. Wayne Dyer, she is now ready to release her story. Lynda knows how it feels to be told you're not healing or your condition is incurable. At no point will she undermine anything your physicians tell you to do. She is not a medical doctor. She will explain the powerful, yet simple concepts, beliefs, balance and faith that she believes led to her healing. Most of all, she will show you how she used these simple principles to design and live, the fully healed life she now enjoys in 2017. You will shake your head in wonder, laugh, and maybe cry too. If you want less pain, worry, and stress about dis-ease and life in general, you will want to read this simple yet powerful story.

**Bridging Transcultural Divides** Xianlin Song 2012 "The impressive and stimulating essays in Bridging Transcultural Divides deal with the cultural and educational issues in the Australian context. (...) The book's central message is that education for Asian students in Australia, and more broadly in the West, can no longer be seen as a one-way transfer of knowledge, but must be understood as a process of reciprocal learning in which both teachers and students are changed by the experience." - Prof. Tim Wright, University of Sheffield.

**World Order** Henry Kissinger 2015-09 a conviction that has guided its policies ever since. Now international affairs take place on a global basis, and these historical concepts of world order are meeting. Every region participates in questions of high policy in every other, often instantaneously. Yet there is no consensus among the major actors about the rules and limits guiding this process, or its ultimate destination. The result is mounting tension. Grounded in Kissinger's deep study of history and his experience as National Security Advisor and Secretary of State, World Order guides readers through crucial episodes in recent world history. Kissinger offers a unique glimpse into the inner deliberations of the Nixon administration's negotiations with Hanoi over the end of the Vietnam War, as well as Ronald Reagan's tense debates with Soviet Premier Gorbachev in Reykjavík.

**Multiple Dwelling and Tourism** Norman McIntyre 2006-01-01 The movement of people, goods, capital and information is a central aspect of living in the inter-connected, globalised late-modern world. Although this broader view of mobility is recognized, this book focuses mainly on migration or the movement of people and examines multiple dwelling as a societal response to the major influences of increased mobility and amenity tourism (visiting or residing in high quality landscapes such as mountains, beaches and forests for leisure experiences). It considers the modern-day meaning of multiple dwelling, how it affects personal identity and the meaning of 'home' and its impacts on host communities and landscapes. This book is of significant interest to those working in the areas of tourism, leisure, geography, outdoor recreation, sociology and anthropology.

**Anticorruption** Robert I. Rotberg 2020-07-21 Winning the anticorruption battle: a guide for citizens and politicians. The phenomenon of corruption has existed since antiquity; from ancient Mesopotamia to our modern-day high-level ethical morass, people have sought a leg up, a shortcut, or an end run to power and influence. In this volume in the MIT Press Essential Knowledge series, Robert Rotberg, a recognized authority on governance and international relations, offers a definitive guide to corruption and anticorruption, charting the evolution of corruption and offering recommendations on how to reduce its power and spread. The most important component of anticorruption efforts, he argues, is leadership that is committed to changing dominant political cultures. Rotberg explains that corruption is the conversion of a public good into personal gain—either by the exchange of cash for influence or by the granting of special favors even without explicit payments. He describes successful anticorruption efforts in countries ranging from Denmark and Sweden to Canada and Costa Rica, and discusses the roles of judicial systems, investigative journalism, multinational corporations, and technological advances. He shows how the United States has become more corrupt than before, and contrasts recent US and Canadian experiences. Without sufficient political will to eliminate corruption, it persists. Rotberg outlines thirteen practical steps for battling corruption, including removing holdover officials tainted by corruption and the public declaration of financial assets by elected officials and appointees.

**Warlike and Peaceful Societies** Agner Fog 2017-10-13 Are humans violent or peaceful by nature? We are both. In this ambitious and wide-ranging book, Agner Fog presents a ground-breaking new argument that explains the existence of differently organised societies using evolutionary theory. It combines natural sciences and social sciences in a way that is rarely seen. According to a concept called regality theory, people show a preference

for authoritarianism and strong leadership in times of war or collective danger, but desire egalitarian political systems in times of peace and safety. These individual impulses shape the way societies develop and organise themselves, and in this book Agner argues that there is an evolutionary mechanism behind this flexible psychology. Incorporating a wide range of ideas including evolutionary theory, game theory, and ecological theory, Agner analyses the conditions that make us either strident or docile. He tests this theory on data from contemporary and ancient societies, and provides a detailed explanation of the applications of regality theory to issues of war and peace, the rise and fall of empires, the mass media, economic instability, ecological crisis, and much more. *Warlike and Peaceful Societies: The Interaction of Genes and Culture* draws on many different fields of both the social sciences and the natural sciences. It will be of interest to academics and students in these fields, including anthropology, political science, history, conflict and peace research, social psychology, and more, as well as the natural sciences, including human biology, human evolution, and ecology.

**Handbook of Peace and Conflict Studies** Charles Webel 2007-03-12 This major new Handbook provides a cutting-edge and transdisciplinary overview of the main issues, debates, state-of-the-art methods, and key concepts in peace and conflict studies today. The fields of peace and conflict studies have grown exponentially since being initiated by Professor Johan Galtung half a century ago. They have forged a transdisciplinary and professional identity distinct from security studies, political science, and international relations. The volume is divided into four sections: understanding and transforming conflict creating peace supporting peace across the disciplines. Each section features new essays by distinguished international scholars and professionals working in peace studies and conflict resolution and transformation. Drawing from a wide range of theoretical, methodological, and political positions, the editors and contributors offer topical and enduring approaches to peace and conflict studies. The Handbook of Peace and Conflict Studies will be essential reading for students of peace studies, conflict studies and conflict resolution. It will also be of interest and use to practitioners in conflict resolution and NGOs, as well as policy makers and diplomats.
