Railways' Strangest Tales Tom Quinn 2018-02-15 A fascinating collection of bizarre but true stories from nearly 200 years of railway history. Right from the very start, when George Stephenson's famous Rocket knocked over and killed a government minister at the opening of the Liverpool to Manchester line in 1830, the world's railways have given rise to plenty of intriguing stories. In this fascinating book, revised and updated with a new selection of tales, railway buff Tom Quinn explores the more bizarre side of train travel, featuring weird weather conditions, audacious robberies, hair-raising accidents, vanishing passengers, an infestation of maggots and a mysterious missing mummy. From the dawn of rail travel, when speeds of 15mph were considered dangerous to health and people mistook

engines for fire-breathing demons, through the Victorian heyday of royal trains and seaside specials to today's more prosaic leaves on the line, this whistlestop tour through railways' long and storied history is the perfect gift for armchair travellers, history fans and trainspotters. The Encyclopedia of the Industrial Revolution in World

History Kenneth E. Hendrickson III 2014-11-25
As editor Kenneth E. Hendrickson, III, notes in his introduction: "Since the end of the nineteenth-century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan." In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a

development largely restricted to Western society. The Encyclopedia of the Industrial Revolution in World History is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the “aerospace industry” to “zaibatsu.” Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross-references and a brief list of suggested readings to alert readers to more detailed information. The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations, as well as artfully selected, extended quotations from key primary sources, from Thomas Malthus’ “Essay on the Principal of Population” to Arthur Young’s look at Birmingham, England in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale.

Sevener Neal Stephenson 2015-05-19 From the #1 New York Times bestselling author of Anathem, Reamde, and Cryptonomicon comes an exciting and thought-provoking science fiction epic—a grand story of annihilation and survival spanning five thousand years. What would happen if the world were ending? A catastrophic event renders the earth a ticking time bomb. In a feverish race against the inevitable, nations around the globe band together to devise an ambitious plan to ensure the survival of humanity far beyond our atmosphere, in outer space. But the complexities and unpredictability of human nature coupled with unforeseen challenges and dangers threaten the

intrepid pioneers, until only a handful of survivors remain . . . Five thousand years later, their progeny—seven distinct races now three billion strong—embark on yet another audacious journey into the unknown . . . to an alien world utterly transformed by cataclysm and time: Earth. A writer of dazzling genius and imaginative vision, Neal Stephenson combines science, philosophy, technology, psychology, and literature in a magnificent work of speculative fiction that offers a portrait of a future that is both extraordinary and eerily recognizable. As he did in *Anathem*, *Cryptonomicon*, the *Baroque Cycle*, and *Reamde*, Stephenson explores some of our biggest ideas and perplexing challenges in a breathtaking saga that is daring, engrossing, and altogether brilliant.

Victorian Nonfiction Prose Kathy Rees 2023-01-10 The Victorian Era saw a revolution in communication technology. Millions of texts emerged from a complex network of writers, editors, publishers and reviewers, to shape and be shaped by the dynamics of a rapidly industrializing society. Many of these works offer fundamental, often surprising insights into Victorian society. Why, for example, did the innocuously titled *Essays and Reviews* (1860) trigger public outrage? How did Eliza Lynn Linton become the first salaried woman journalist in England? What is "table-talk"? Critical approaches to Victorian prose have long focused on a few canonical writers. Recent scholarship has recognized a wide diversity of practitioners, forms and modes of dissemination. Presented in accessible A-Z format, this literary companion reinstates nonfiction as a principal vehicle of knowledge and debate in Victorian Britain.

Railway Adventures and Anecdotes: Extending Over More Than Fifty Years Richard Pike 1884

George Stephenson Adrian Jarvis 2008-03-04 George Stephenson is among the most famous engineers of all time. His rise from 'rags to riches' is a stirring story of its kind, but many of the works attributed to him should in fact be credited to young

subordinates, not least his son, Robert. But much of the work of innovative engineers for his period lay not in the work itself but in persuading people that such work was desirable and necessary. It was in this field that George Stephenson excelled, providing openings in which his young proteges could change the world. They did not let him down, and we should give him full credit for being 'The Father of the Railways'. Adrian Jarvis specialises in the engineering and finance of dock and harbour construction, on which he has published extensively, but he also has a strong interest in early railways and in the general history of technology. Another book for Shire by this author is: *The Victorian Engineer* Snow Crash Neal Stephenson 2003-08-26 Now featuring never-before-seen material, the "brilliantly realized" (The New York Times Book Review) breakthrough novel from visionary author Neal Stephenson, a modern classic that predicted the metaverse and inspired generations of Silicon Valley innovators Hiro lives in a Los Angeles where franchises line the freeway as far as the eye can see. The only relief from the sea of logos is within the autonomous city-states, where law-abiding citizens don't dare leave their mansions. Hiro delivers pizza to the mansions for a living, defending his pies from marauders when necessary with a matched set of samurai swords. His home is a shared 20 X 30 U-Stor-It. He spends most of his time goggled in to the Metaverse, where his avatar is legendary. But in the club known as The Black Sun, his fellow hackers are being felled by a weird new drug called Snow Crash that reduces them to nothing more than a jittering cloud of bad digital karma (and IRL, a vegetative state). Investigating the Infocalypse leads Hiro all the way back to the beginning of language itself, with roots in an ancient Sumerian priesthood. He'll be joined by Y.T., a fearless teenaged skateboard courier. Together, they must race to stop a shadowy virtual villain hell-bent on world domination.

Stephenson's Rocket Manual Gibbon Richard 2016-06-15

Stephenson's Rocket is one of the most famous steam locomotives of all time. Designed by Robert Stephenson, with input from his father, George, Rocket set the fundamental design template for almost all the locomotives that followed it. The original locomotive is owned by the National Railway Museum, and is currently on display at the Science Museum in London. Two working replicas of the locomotive have been built. The most advanced steam engine of its time, Rocket was built in 1829 for the Rainhill Trials held by the Liverpool & Manchester Railway (LMR) in order to evaluate locomotive designs and choose the best one for use on this new railway. Five locomotives took part in the trials and Rocket was chosen as the winning design.

Published in association with the Science Museum, this manual, illustrated with a wealth of photographs and technical drawings, provides a fascinating insight into the design, construction and operation of Rocket.

Upton Sinclair Lauren Coodley 2020-04-01 Had Upton Sinclair not written a single book after *The Jungle*, he would still be famous. But Sinclair was a mere twenty-five years old when he wrote *The Jungle*, and over the next sixty-five years he wrote nearly eighty more books and won a Pulitzer Prize for fiction. He was also a filmmaker, labor activist, women's rights advocate, and health pioneer on a grand scale. This new biography of Sinclair underscores his place in the American story as a social, political, and cultural force, a man who more than any other disrupted and documented his era in the name of social justice. *Upton Sinclair: California Socialist, Celebrity Intellectual* shows us Sinclair engaged in one cause after another, some surprisingly relevant

today--the Sacco-Vanzetti trial, the depredations of the oil industry, the wrongful imprisonment of the Wobblies, and the perils of unchecked capitalism and concentrated media. Throughout, Lauren Coodley provides a new perspective for looking at Sinclair's prodigiously productive life. Coodley's book reveals a consistent streak of feminism, both in Sinclair's relationships with women--wives, friends, and activists--and in his interest in issues of housework and childcare, temperance and diet. This biography will forever alter our picture of this complicated, unconventional, often controversial man whose whole life was dedicated to helping people understand how society was run, by whom, and for whom.
