Law and Happiness Eric A. Posner 2010-04-15 Since the earliest days of philosophy, thinkers have debated the meaning of the term happiness and the nature of the good life. But it is only in recent years that the study of happiness—or “hedonics”—has developed into a formal field of inquiry, cutting across a broad range of disciplines and offering insights into a variety of crucial questions of law and public policy. *Law and Happiness* brings together the best and most influential thinkers in the field to explore the question of what makes up happiness—and what factors can be demonstrated to increase or decrease it. Martha Nussbaum offers an account of the way that hedonics can productively be applied to psychology, Cass R. Sunstein considers the unexpected relationship between happiness and health problems, Matthew Adler and Eric A. Posner view hedonics through the lens of cost-benefit analysis, David A. Weisbach considers the relationship between happiness and taxation, and Mark A. Cohen examines the role crime—and fear of crime—can play in people’s assessment of their happiness, and much more. The result is a kaleidoscopic overview of this increasingly prominent field, offering surprising new perspectives and incisive analyses that will have profound implications on public policy.

A Companion to Applied Philosophy Kasper Lippert-Rasmussen 2016-09-19 Applied philosophy has been a growing area of research for the last 40 years. Until now, however, almost all of this research has been centered around the field of ethics. *A Companion to Applied Philosophy* breaks new ground, demonstrating that all areas of philosophy, including epistemology, metaphysics, philosophy of science, and philosophy of mind, can be applied, and are relevant to questions of everyday life. This perennial topic in philosophy provides an overview of these various applied philosophy developments, highlighting similarities and differences between various areas of applied philosophy, and examining the very nature of this topic. It is an area to which many of the towering figures in the history of philosophy have contributed, and this timely Companion demonstrates how various historical contributions are actually contributions within applied philosophy, even if they are

not traditionally seen as such. The Companion contains 42 essays covering major areas of philosophy; the articles themselves are all original contributions to the literature and represent the state of the art on this topic, as well as offering a map to the current debates.

Understanding Research in Personal Relationships William Dragon 2005-05-01 Understanding Research in Personal Relationships is a comprehensive introduction to the key readings on human and close relationships. Organized into twelve thematic chapters with editorial commentary throughout, the editors offer a critical reading of the major research articles in the field of relationship studies published in the last few years. Scholarly papers, two per chapter, are presented in an abridged form and critiqued in a carefully structured way that instructs students on the way to read research, and to critically evaluate research in this field. The book, therefore, has a thoroughly didactic focus as the student is given historical, theoretical and methodological contexts to each article as well as an explanation of key terms and ideas.

The Absorbent Mind Maria Montessori 2013-03-25 The Absorbent Mind was Maria Montessori's most in-depth work on her educational theory, based on decades of scientific observation of children. Her view on children and their absorbent minds was a landmark departure from the educational model at the time. This book helped start a revolution in education. Since this book first appeared there have been both cognitive and neurological studies that have confirmed what Maria Montessori knew decades ago.

Nudge and the Law Alberto Alemanno 2015-09-24 Behavioural sciences help refine our understanding of human decision-making. Their insights are immensely relevant for policy-making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly, governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy-making meets behavioural sciences, effective and low-cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally-informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. *Nudge and the Law* takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy-making and beyond.

Handbook of Relationship Initiation Susan Sprecher 2018-09-05 The Handbook of Relationship Initiation is the first volume to focus specifically on the very beginning stage of relationships - their origin. In this Handbook, leading scholars on relationships review the literature on various processes related to the initiation of relationships: how people meet, communicate for the first time, and begin to define themselves as being in a relationship. Topics include attraction, mate selection, influence of social networks on relationship initiation, initiation over the internet, hook-ups among young adults, and flirting and opening gambits. In addition, the dark side of relationship initiation is considered, including unwanted relationship pursuit and barriers to relationship initiation including social anxiety. This volume provides an overdue synthesis of the literature on this topic. It is especially timely in view of the growing prevalence on relationship initiation online, through matchmaking and other social networking sites, which has increased awareness that science can be used to understand, create, and facilitate compatible matching. This Handbook provides an essential resource for an interdisciplinary range of researchers and students who study relationships, including social psychologists, communication scientists and scholars of marriage and the family.

The Oxford Handbook of Behavioral Economics and the Law Eyal Zamir 2014 'The Oxford Handbook of Behavioral Economics and Law' brings together leading scholars of law, psychology, and economics to provide an up-to-date and comprehensive analysis of this field of research, including its strengths and limitations as well as a forecast of its future development. Il dono del padre. L'importanza dell'incontro tra padre e figlio/a, dalla nascita alla vita adulta Pier Paolo Gobbi 2021-03-31 Padre dove sei? Chi sei nella vita di un figlio? C'è ancora bisogno di te? Anche oggi tanti figli soffrono per la debolezza e assenza del padre, accomunati dall'attesa di una presenza che sia custode di un'appartenenza e una tradizione, punto di partenza per il viaggio della loro vita, allo stesso tempo capace di accogliere la novità presente in loro, di sostenere i loro passi e indicare loro un orizzonte di senso. I figli hanno continuato a nascere con questo desiderio insopprimibile. Si può crescere senza padre, accade purtroppo, ma non si può diventare adulti senza incontrare l'esperienza della paternità e ricevere il suo dono. Ho provato in queste pagine ad ascoltare e narrare soprattutto il bene di questo incontro, dal tempo dell'attesa del figlio fino alla soglia dell'età adulta, quando sarà anche lui chiamato ad essere "padre", cioè a generare nuova vita nel dono di sé. Nel nostro cammino incontreremo spesso la "madre", perché un padre nasce solo se una donna dice "sì" alla nuova vita, può esserci se nel tempo della crescita fa spazio al loro incontro.

Love, Self-Deceit and Money Koen Stapelbroek 2008-04-05 "Love drives and gives life to the commerce of mankind." Thus, the sixteen year old Ferdinando Galiani (1728-1787) presented his project to understand the sociable nature of man. This observation, a reflection of his own position on the relation between trade and virtue, hinted at what the mature works of Galiani, one of the most noteworthy economists and wits in eighteenth-century Italy, would eventually yield. In Love, Self-Deceit, and Money, Koen Stapelbroek reconstructs the Early Neapolitan Enlightenment debate on the morality of market societies, a debate that hinged on the preservation of Naples' independent statehood in a global arena of commercial and military competition. Galiani rejected the moralizing and mercantile ideas of his contemporaries regarding the dangers threatening Naples, and, in his Della moneta (1751), he justified the systems set in place by the Neapolitan government. With reference to early, previously unstudied lectures on self-deceptive 'Platonic love,' Koen Stapelbroek examines Galiani's role in the wider debate, arguing that his early moral philosophical and historical work suggests a great deal about his political-economic stance, including his assertion that money is the ultimate ordering principle in the universe. As a study of one of the most idiosyncratic minds of the Enlightenment period, Love, Self-Deceit, and Money shows how diverse ideas of the development of individual passions into social dispositions, commerce, and reform politics dovetailed seamlessly in the intellectual climate of eighteenth-century Europe.

iRules Janell Burley Hofmann 2014-05-06 As Janell Burley Hofmann, mother of five, wrapped her 13-year-old's iPhone on Christmas Eve, she was overwhelmed by questions: "Will my children learn to sit and wonder without Googling? Should I know their passwords for online accounts? Will they experience the value of personal connection without technology?" To address her concerns, she outlined boundaries and expectations in a contract for her son to sign upon receiving his first cell phone. When Hofmann's editor at The Huffington Post posted the contract, now known as *iRules*, it resonated on a massive scale and went viral, resulting in a tsunami of media coverage and requests. It quickly became apparent that people across the country were hungry for more. In *iRules*, Hofmann provides families with the tools they need to find a balance between technology and human interaction through a philosophy she calls Slow Tech Parenting. In the book, she educates parents about the online culture tweens and teens enter the minute they go online, exploring issues like cyberbullying, friend fail, and sexting, as well as helping parents create their own *iRules* contracts to fit their families' needs. As funny and readable as it is prescriptive, *iRules* will help parents figure out when to unplug and how to stay in sync with the changing world of technology, while teaching their children self-respect, integrity, and responsibility.

Locke's Two Treatises of Government Richard Ashcraft 2013-10-17 This volume guides the reader through a detailed examination of the text to an understanding of Locke's political ideas in relation to his writings on philosophy, education, religion and economics and the influence these ideas had upon eighteenth-century political theorists. The author shows how Locke carefully constructed his political perspective as a defence of the principles of natural rights, constitutional government and popular resistance. He offers an original interpretation of the Two Treatises..., emphasizing the specific ways in which Locke's political purposes in writing the work influence his discussion of such concepts as the state of nature, property, consent and tyranny. The author discusses the historical and biographical context of the work and demonstrates how eighteenth century political thinkers developed or rejected aspects of Locke's political theory and summarizes important recent studies of Locke's work.

Ethical Principles Underlying Education John Dewey 1903

The Tyranny of Utility Gilles Saint-Paul 2011-07-05 The general assumption that social policy should be utilitarian--that society should be organized to yield the greatest level of welfare--leads inexorably to increased government interventions. Historically, however, the science of economics has advocated limits to these interventions for utilitarian reasons and because of the assumption that people know what is best for themselves. But more recently, behavioral economics has focused on biases and inconsistencies in individual behavior. Based on these developments, governments now prescribe the foods we eat, the apartments we rent, and the composition of our financial portfolios. The Tyranny of Utility takes on this rise of paternalism and its dangers for individual freedoms, and examines how developments in economics and the social sciences are leading to greater government intrusion in our private lives. Gilles Saint-Paul posits that the utilitarian foundations of individual freedom promoted by traditional economics are fundamentally flawed. When combined with developments in social science that view the individual as incapable of making rational and responsible choices, utilitarianism seems to logically call for greater governmental intervention in our lives. Arguing that this cannot be defended on purely instrumental grounds, Saint-Paul calls for

individual liberty to be restored as a central value in our society. Exploring how behavioral economics is contributing to the excessive rise of paternalistic interventions, *The Tyranny of Utility* presents a controversial challenge to the prevailing currents in economic and political discourse.

Emotional and Ethical Challenges for Field Research in Africa S. Thomson 2013-01-01 Academic literature rarely gives an account of the ethical challenges and emotional pitfalls the researcher is confronted with before, during and after being in the field. Giving personal accounts, the authors explore some of the challenges one can face when engaging in local-level research in difficult situations.

A Social History of Western Political Thought Ellen Meiksins Wood 2022-08-30 In this groundbreaking work, Ellen Meiksins Wood rewrites the history of political theory, from Plato to Rousseau. Treating canonical thinkers as passionately engaged human beings, Wood examines their ideas not simply in the context of political languages but as creative responses to the social relations and conflicts of their time and place. She identifies a distinctive relation between property and state in Western history and shows how the canon, while largely the work of members or clients of dominant classes, was shaped by complex interactions among proprietors, labourers and states. Western political theory, Wood argues, owes much of its vigour, and also many ambiguities, to these complex and often contradictory relations. In the first volume, she traces the development of the Western tradition from classical antiquity through to the Middle Ages in the perspective of social history - a significant departure not only from the standard abstract history of ideas but also from other contextual methods. From the Ancient Greek polis of Plato, Aristotle, Aeschylus and Sophocles, through the Roman Republic of Cicero and the Empire of St Paul and St Augustine, to the medieval world of Averroes, Thomas Aquinas and William of Ockham, Wood offers a rich, dynamic exploration of thinkers and ideas that have indelibly stamped our modern world. In the second volume, Wood addresses the formation of the modern state, the rise of capitalism, the Renaissance and Reformation, the scientific revolution and the Age of Enlightenment, which have all been attributed to the "early modern" period. Nearly everything about its history remains controversial, but one thing is certain: it left a rich and provocative legacy of political ideas unmatched in Western history. The concepts of liberty, equality, property, human rights and revolution born in those turbulent centuries continue to shape, and to limit, political discourse today. Assessing the work and background of figures such as Machiavelli, Luther, Calvin, Spinoza, the Levellers, Hobbes, Locke and Rousseau, Ellen Wood vividly explores the ideas of the canonical thinkers, not as philosophical abstractions but as passionately engaged responses to the social conflicts of their day.

The Origins of the English Gentry Peter Coss 2005-10-13 Although the gentry played a central role in medieval England, this study is the first sustained exploration of its origins and development between the mid-thirteenth and the mid-fourteenth century. Arguing against views which see the gentry as formed or created earlier, the text investigates as well the relationship between lesser

landowners and the Angevin state; the transformation of knighthood; and the role of lesser landowners in society and politics.

Born Liquid Zygmunt Bauman 2018-11-26 Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body - tattoos, cosmetic surgery, hipsters - aggression, bullying, the Internet, online dating, gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

The Great Lakes of Africa Jean-Pierre Chrétien 2006 The first English-language publication of a major history of the Great Lakes region of Africa. Though the genocide of 1994 catapulted Rwanda onto the international stage, English-language historical accounts of the Great Lakes region of Eastern Africa--which encompasses Burundi, eastern Congo, Rwanda, western Tanzania, and Uganda--are scarce. Drawing on colonial archives, oral tradition, archeological discoveries, anthropologic and linguistic studies, and his thirty years of scholarship, Jean-Pierre Chrétien offers a major synthesis of the history of the region, one still plagued by extremely violent wars. This translation brings the work of a leading French historian to an English-speaking audience for the first time. Chrétien retraces the human settlement and the formation of kingdoms around the sources of the Nile, which were "discovered" by European explorers around 1860. He describes these kingdoms' complex social and political organization and analyzes how German, British, and Belgian colonizers not only transformed and exploited the existing power structures, but also projected their own racial categories onto them. Finally, he shows how the independent states of the postcolonial era, in particular Burundi, Rwanda, and Uganda, have been trapped by their colonial and precolonial legacies, especially by the racial rewriting of the latter by the former. Today, argues Chrétien, the Great Lakes of Africa is a crucial region for historical research--not only because its history is fascinating but also because the tragedies of its present are very much a function of the political manipulations of its past.

Invisible Cities Italo Calvino 2013-08-12 Italo Calvino's beloved, intricately crafted novel about an Emperor's travels—a brilliant journey across far-off places and distant memory. "Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else." In a garden sit the aged Kublai Khan and the young Marco Polo—Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear.
