Elementi di fisica tecnica e controllo ambientale Lamberto Tronchin 2007-12-01 All'inizio di questo lavoro una domanda è sorta con vigore: esiste una necessità di aggiungere una ulteriore opera, necessariamente sintetica e forse anche imprecisa, all'insieme delle ottime pubblicazioni esistenti nel settore della fisica tecnica ambientale? Con l'introduzione della riforma degli studi universitari avvenuta a partire dal 2001, e la conseguente riduzione di numerosi corsi universitari di tipo tecnico ingegneristico da cinque a tre anni, si è resa necessaria una riforma radicale del contenuto delle materie tecniche indirizzate ai corsi di Ingegneria ed Architettura per cui era stato originariamente pensato questo lavoro. Proprio per questa ragione, stante l'evoluzione dei programmi dei corsi di fisica tecnica, ambientale in particolare, l'opera ha avuto una accelerata. L'esigenza degli studenti di dedicarsi nello studio di una materia necessariamente impegnativa e variegata senza dover ricorrere a vari libri di testo certamente molto esaurienti ma ahimé dispersivi, per riversarvi su una opera assai più modesta ma compatta, ha fornito la spinta decisiva. Il testo si struttura nella maniera in cui si svolge il corso di fisica tecnica ambientale per gli allievi ingegneri edili dell'Università di Bologna. Nella prima parte viene presentata la termodinamica dei sistemi semplici, con riguardo alle miscele di aria e vapore, importanti per il condizionamento interno degli ambienti civili. Nella seconda parte si analizza la termocinetica, ponendo sempre attenzione alle implicazioni nello studio dell'involucro edilizio. Nella terza parte vengono citati i concetti tipicamente ambientali, quali il benessere

termico, la qualità dell'aria, l'illuminamento degli interni, ed anche alcuni aspetti della fluidodinamica. Infine, uno spazio maggiore viene lasciato per l'acustica, anche in vista degli approfondimenti tipici del corso di tecnica del controllo ambientale. Alcuni esercizi molto semplici e forse, per i più esperti, banali, vengono presentati e commentati. Chiedo venia agli studiosi della materia per la eccessiva semplificazione, ma la riforma ha indotto la sintesi.

Seminar on Dynamical Systems Lazutkin 2013-06-29 The "Dynamical Systems Semester" took place at the Euler International Mathematical Institute in St. Petersburg, Russia, in the autumn of 1991. There were two workshops, October 14-25 and November 18-29, with more than 60 participants giving 70 talks. The titles of all talks are given at the end of this volume. Here we included 22 papers prepared by the authors especially for this volume, while the material of the other talks are published elsewhere. The semester was sponsored by the Soviet Academy of Sciences and UN ESCO. Since the new building of the Euler Institute was not ready at that moment, the sessions were held in the old building of the Steklov Mathematical Institute in the very center of St. Petersburg. Members of the staff of the Euler Institute were doing their best to organize properly the normal processing of the conference-not a simple task at that time because of the complications in the political and economical life in Russia just between the coup d'etat in August and the dismantling of the Soviet Union in December. We are thankful to all of them.

Middeldorf—provides an extraordinary overview of major personalities and of political, social, cultural, and religious events as depicted in more than 350 medals and plaquettes. Illustrated in full color and accompanied by extensive documentation are commemorations of kings, queens, emperors, poets, composers, physicians, artists, inventors, popes, cardinals, and bishops. Papal annual and jubilee medals and delightful French reliefs from the Belle Époque complement medals from the eras of Louis XIV and XV, Napoleon, and the Risorgimento. Highlights of the collection are Italian medals from the 17th century and later—periods that until recently have received little scholarly attention.

Vent'anni dopo, Alina è morta e Mac è tornata nel luogo da cui era stata esiliata per dare la caccia all'assassino di sua sorella. Ma dopo aver scoperto di appartenere a una stirpe magica e maledetta,

Mac verrà coinvolta nel millenario conflitto tra umani e immortali, in un turbine di eventi in cui nulla sembra esserle risparmiato. Quando la magia nera getta la sua ombra oscura sui destini di chi le sta vicino e una donna misteriosa infesta i suoi sogni, Mac si accorge di non potersi fidare più di nessuno. Non è certa neppure di sé stessa, né del destino che legge nei disegni neri e cremisi di un'antica carta dei tarocchi. Mac sa solo che la paura uccide, ma non sa ancora quanto può fare l'amore, e dovrà prepararsi ad affrontare l'ultima verità sul suo esilio e sul suo passato.

Imagining Terrorism Pierpaolo Antonello 2017-07-05 No other European country experienced the disruption of political and everyday life suffered by Italy in the so-called 'years of lead' (1969-c.1983), when there were more than 12,000 incidents of terrorist violence. This experience affected all aspects of Italian cultural life, shaping political, judicial and everyday language as well as artistic representation of every kind. In this innovative and broad-ranging study, experts from the fields of philosophy, history, media, law, cinema, theatre and literary studies trace how the experience and legacies of terrorism have determined the form and content of Italian cultural production and shaped the country's way of thinking about such events?
