The Five Brothers Carlos E Moore 2020-11-30 *The Five Brothers: Our Journeys to Successful Careers in Law & Medicine* chronicles the lives of five African-American men pursuing and conquering their educational and professional goals. "When you're talking, you're preaching, when you're doing, you're teaching," is a saying that simply means it is easier to get the attention of others when you are actually putting your words into action. Phillip Bazemore, J.D., Travis Buchanan, Esq., Dr. Neville Campbell, Judge Carlos E. Moore, and Charles Tucker Jr. Esq., set lasting and practical examples of where hard work, determination and faith can lead. As they go from boys to men, their compelling stories will inspire, encourage and empower readers no matter the age or career path. The Five Brothers, related not by blood but by bond, are fiercely determined to make a difference in the lives of others adhering to their twist to the Golden Rule and doing what they wish others had done for them. Their memoir is a refreshing reminder that no matter what we achieve in life, the most important thing we can do is to remember those who are coming behind us. These five champions demonstrate that sports and entertainment are not the only avenues to success for black males, and as mentors, husbands, advocates, brothers, community leaders, sons and men of faith, they share their experiences with the kind of honesty and transparency that leaves us with doses of joy and hope in a time where not enough of these things exist. Authors include: Phillip Bazemore, J.D., Travis Buchanan, Esq., Dr. Neville Campbell, Judge Carlos E. Moore, and Charles Tucker Jr. Esq., with Mary Flowers Boyce. Identifying the Needs and Challenges of Criminal Justice Agencies in Small, Rural, Tribal, and Border Areas Jessica M. Saunders 2016 Technology is important to improving the effectiveness, efficiency, and safety of the criminal justice system. The development of new technologies and new approaches for applying them has been and will likely continue to be an important catalyst for improvement in law enforcement, corrections, and the courts. However, use of technology in these sectors can be challenging, particularly for agencies located in small, rural, tribal, and border (SRTB) areas. SRTB justice systems account for three-quarters of all criminal justice agencies nationwide. Because these agencies are so geographically dispersed and have relatively few employees, they lack a centralized voice to influence the development of technologies and other solutions. To date, relatively little research has examined the needs of such agencies. The National Institute of Justice created the Justice Innovation Center (JIC) to provide current, rigorous, and actionable information on technology needs and priorities specific to SRTB agencies. JIC's purpose is to gather information on the challenges that SRTB agencies face, identify relevant technology solutions that can address those challenges, and assess these technology solutions as they are implemented in real-world situations. These activities will provide guidance to SRTB agencies for prioritizing, planning, and implementing technology. The JIC research team consists of staff from RAND Justice Policy and the Arizona State University Center for Violence Prevention and Community Safety. This report summarizes JIC's research goals and efforts, which include a literature review, in-depth interviews with nearly 150 practitioners and topical experts, and focused discussions with an advisory panel of experts and practitioners.

Collaboration for Impact John Butcher 2020-09-28 Collaboration is often seen as a palliative for the many wicked problems challenging our communities. These problems affect some of the most vulnerable and unempowered people in our community. They also carry significant implications for policy processes, programs of service and, ultimately, the budgets and resourcing of national and sub-national governments. The road to collaboration is paved with good intentions. But, as John Butcher and David Gilchrist reveal, 'good intentions' are not enough to ensure well-designed, effective and sustainable collaborative action. Contemporary policy-makers and policy practitioners agree that 'wicked' problems in public policy require collaborative approaches, especially when those problems straddle sectoral, institutional, organisational and jurisdictional boundaries. The authors set out to uncover the core ingredients of good collaboration practice by talking directly to the very people that are engaged in collaborative action. This book applies the insights drawn from conversations with those engaged in collaborations for social purpose—including chief executives, senior managers and frontline workers—to the collaboration challenge. Backed up by an extensive review of the collaboration literature, Butcher and Gilchrist translate their observations into concrete guidance for collaborative practice. The unique value in this book is the authors' combination of scholarly work with practical suggestions for current and prospective collaborators.

Great North Road Peter F. Hamilton 2013-01-01 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY New York Times bestselling author Peter F. Hamilton's riveting new thriller combines the nail-biting suspense of a serial-killer investigation with clear-eyed scientific and social extrapolation to create a future that seems not merely plausible but inevitable. A century from now, thanks to a technology allowing instantaneous travel across light-years, humanity has solved its energy shortages, cleaned up the environment, and created far-flung colony worlds. The keys to this empire belong to the powerful North family—composed of successive generations of clones. Yet these clones are not identical. For one thing, genetic errors have crept in with each generation. For another, the original three clone “brothers” have gone their separate ways, and the branches of the family are now friendly rivals more than allies. Or maybe not so friendly. At least that's what the murder of a North clone in the English city of Newcastle suggests to Detective Sidney Hurst. Sid is a solid investigator who'd like nothing better than to hand off this hot potato of a case. The way he figures it, whether he solves the crime or not, he'll make enough enemies to ruin his career. Yet Sid's case is about to take an unexpected turn: because the circumstances of the murder bear an uncanny resemblance to a killing that took place years ago on the planet St. Libra, where a North clone and his entire household were slaughtered in cold blood. The convicted slayer, Angela Tramelon, has always claimed her innocence. And now it seems she may have been right. Because only the St. Libra killer could have committed the Newcastle crime. Problem is, Angela also claims that the murderer was an alien monster. Now Sid must navigate through a Byzantine minefield of competing interests within the police department and the world's political and economic elite . . . all the while hunting down a brutal killer poised to strike again. And on St. Libra, Angela, newly released from prison, joins a mission to hunt down the elusive alien, only to learn that the line between hunter and hunted is a thin one. **BONUS:** This edition includes an excerpt from Peter F. Hamilton's *The Abyss Beyond Dreams*. Praise for *Great North Road* “A mesmerizing page-turner.”—Publishers Weekly (starred review) “A gripping saga that blends wilderness survival, police procedural, political and social intrigue, and dynastic sf into a mammoth tale featuring believable characters and exceptionally skilled storytelling.”—Library Journal (starred review) “A perfect introduction to [Hamilton's] gifts for character design, dialogue, and sheer, big-idea-driven storytelling.”—Booklist (starred review) “Compelling and original . . . an awesome novel [with] plenty of action.”—SFRevu “One very compelling and entertaining science fiction novel.”—SF Site “Simply brilliant . . . an astonishing achievement.”—Tor.com

The Cambridge Handbook of Technology and Employee Behavior Richard N. Landers 2019-02-14 Experts from across all industrial-organizational (IO) psychology describe how increasingly rapid technological change has affected the field. In each chapter, authors describe how this has altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete. This Handbook presents a forward-looking review of IO psychology's understanding of both workplace technology and how technology is used in IO research methods. Using interdisciplinary perspectives to further this understanding and serving as a focal text from which this research will grow, it tackles three main questions facing the field. First, how has technology affected IO psychological theory and practice to date? Second, given the current trends in both research and practice, could IO psychological theories be rendered obsolete? Third, what are the highest priorities for both research and practice to ensure IO psychology remains appropriately engaged with technology moving forward?

The Digital Transformation of Labor Anthony Larsson 2019-11-11 Through a series of studies, the overarching aim of this book is to investigate if and how the digitalization/digital transformation process causes (or may cause) the autonomy of various labor functions, and its impact in creating (or stymieing) various job opportunities on the labor market. This book also seeks to illuminate what actors/groups are mostly benefited by the digitalization/digital transformation and which actors/groups that are put at risk by it. This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous, as on the one hand it is suggested that technological change is labor-saving, but on the other hand, it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs. Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future, although tasks would by and large change significantly. This would affect welfare, as most of its revenue stems from taxation, and particularly so from the taxation on labor (directly or indirectly). For this reason, this book will set out to explore how the future technological and societal advancements impact labor conditions. The book seeks to provide an innovative, enriching and controversial take on how various aspects of the labor market can be (and are) affected the ongoing digitalization trend in a way that is not covered by extant literature. As such, this book intends to cater to a wider readership, from a general audience and students, to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization/digital transformation of society at large.

Lynching and the Law James Harmon Chadborn 2008 This title was issued under the auspices of the Southern Commission on the Study of Lynching. A work of great authority because it was produced by Southern jurists, it was cited frequently in the 1932 Senate hearings on lynching. Its conclusions are based in part on a comprehensive survey of over 3,700 lynchings, mostly of African-Americans, between 1889 and 1932. Chadborn also asked 1,000 prominent Southern lawyers and legislators how they would prevent the practice. Using this data he proposes a model lynching law. "This excellent monograph and the proposed statute have unusual significance in view of the present possibility of further state and national legislation dealing with this urgent problem.": H.C. Brearley, *Social Forces* 12 (1933-34) 610.

After Roe Mary Ziegler 2015-06-15 In the decade after the 1973 Supreme Court decision on abortion, advocates on both sides sought common ground. But as pro-abortion and anti-abortion positions hardened over time into pro-choice and pro-life, the myth was born that *Roe v. Wade* was a ruling on a woman's right to choose. Mary Ziegler's account offers a corrective.

Business Ethics and Leadership from an Eastern European, Transdisciplinary Context Sebastian Vaduva 2016-11-25 This book aims to provide insight into the fields of business and leadership by examining the role of ethics in these areas. The papers in this book derive from the 2014 Annual Griffiths School of Management International Conference, organized by Emanuel University of Oradea, Romania, where academics and practitioners interacted and discussed current insights and research in the different dimensions of business ethics and leadership. This resulting book offers empirical and theological research on ethics, business and leadership from a transdisciplinary and knowledge-based context. Since the financial crisis in 2008, the debate on business ethics and leadership has dominated the public sphere at all levels of interest, from grassroots to the elites in educational institutions, governments, businesses and NGOs. Naturally, constructive and transdisciplinary discussions need to take place, with due consideration for the specific context of each situation, so that propositions upon which to build the future can be formulated. These discussions unfold in an ever more intricate world of business, powered by ever more pervasive and intelligent technology and scientific development, all brought together by globalization. In this world, organizations are faced with new and more complex ethical issues in their pursuit to serve clients, gain profits, motivate employees, collaborate with partners and act responsibly towards society and the environment. A wise approach to changing the future is to understand the mistakes of the past, because one must always learn how to overcome past mistakes in order to develop a better future. But a necessary approach to building a better future is looking at the world through a transdisciplinary mindset. This allows us to see the world as a complex whole; it fosters creative interaction between fields of knowledge; it opens doors for knowledge and innovation flows across disciplines; and it allows the tackling of complex problems and situations. Given the current context of our world, this is an approach that we ought to pursue. Featuring contributions from academics, researchers, scholars and practitioners from across the globe, this book will be of great interest for students and practitioners in the fields of business, leadership and ethics.

The Cambridge Handbook of Social Problems: A. Unlike other works in this area, it also gives great consideration to theoretical and methodological discussions. It is suitable for classes in social problems, current events, and social theory. Featuring the most current research, the Handbook provides an especially useful resource for sociologists and graduate students conducting research.

SLAPPs George William Pring 1996 In a democracy that for over 200 years has prided itself on public participation and citizen involvement in government, thousands have been and will be the targets of multi-million-dollar lawsuits. They will be sued for such "all-American" activities as circulating a petition, writing a letter to the editor, testifying at a public hearing, reporting violations of the law, filing an official complaint, lobbying for legislation, or otherwise communicating their views. Such cases, named "Strategic Lawsuits Against Public Participation," with their apropos acronym, SLAPPs, are a shocking abuse of one of our most basic political rights - the Right to Petition. So extensive and grievous is the phenomenon that Justice Nicholas Colabella remarked, "Short of a gun to the head, a greater threat to First Amendment expression can scarcely be imagined." George W. Pring and Penelope Canan explore the full range of SLAPP stories in this first study of SLAPPs - retaliatory lawsuits by real estate developers; teachers; police; politicians; opponents of civil rights; consumers' rights; women's rights; and many others. This comprehensive book examines what happens to the targets of SLAPPs and what is happening to public participation in American politics. Addressing the ultimate dilemma - what can be done to turn the tables and fight back - Pring and Canan offer concrete, well-supported, balanced solutions for preventing, managing, and curing SLAPPs at all levels of government. Author note: George W. Pring is Professor of Law at the University of Denver.

>P>Penelope Canan is Associate Professor of Sociology at the University of Denver. They are the co-directors of the Political Litigation Project at the University of Denver.
