Deploying Configuration Manager Current Branch with Pki

Dave Kawula 2018-01-18 This book covers the entire end-to-end planning, installing, updating, configuring and deploying a complete system with a full PKI infrastructure to boot! That element alone, documented in Chapter 2, cannot be overemphasized and is worth the cost of the book all by itself! When I was looking into the implementation of the then-new and shiny Internet Based Client Management (IBCM) feature many years ago, all I knew of PKI was how to spell it. I would have given anything for this information back then. For you, it's all crystal clear, and found right here in chapter 2. Beyond that element, you will first see listed out all the prerequisites necessary, the various roles and features to be implemented, the black magic that is SQL Server, your domain configurations clearly explained and necessary (which will keep your Domain Admins away from your desk!), and then walk you through how to install it all. You'll then end up with SSL security, the MDT Toolkit fully integrated, updated to Current Branch 1710, initial configuration settings applied, and clients deployed. In other words, you'll create a completely functional system with all of the latest-and-greatest. If you're naturally lazy like me, and you don't particularly want to go through all of this yourself but just want it

purpose of this book is to showcase the amazing expertise of our guest speakers at the North American MVPDays Community Roadshow. They have so much passion, expertise, and expert knowledge that it only seemed fitting to write it down in a book. MVPDays was founded by Cristal and Dave Kawula back in 2013. It started as a simple idea; “There’s got to be a good way for Microsoft MVPs to reach the IT community and share their vast knowledge and experience in a fun and engaging way” I mean, what is the point in recognizing these bright and inspiring individuals, and not leveraging them to inspire the community that they are a part of. We often get asked the question “Who should attend MVPDays”? Anyone that has an interest in technology, is eager to learn, and wants to meet other like-minded individuals. This Roadshow is not just for Microsoft MVP’s it is for anyone in the IT Community. Make sure you check out the MVPDays website at: www.mvpdays.com.
