Unpaid Work and the Economy Antonella Picchio 2005-08-02 In economics, the voluntary sector is surprisingly understudied. In order to fully understand economics, unpaid and voluntary work needs to be taken into account and afforded the same status as paid activities. This book constitutes a rigorous economic analysis with special emphasis on gender issues and covers every conceivable angle of unpaid work and all its ramifications for the modern economy. The unified vision offered by this group of leading contributors ensures this book is a work of excellent quality. There is every chance it will become a seminal study on unpaid work and as such will provide a useful reference for students and academics involved in gender studies, econometrics, and consumption studies.

Child Migration and Human Rights in a Global Age Jacqueline Bhabha 2016-05-17 The first comprehensive look at the global dilemma of child migration Why, despite massive public concern, is child trafficking on the rise? Why are unaccompanied migrant children living on the streets and routinely threatened with deportation to their countries of origin? Why do so many young refugees of war-ravaged and failed states end up warehoused in camps, victimized by the sex trade, or enlisted as child soldiers? This book provides the first comprehensive account of the widespread but neglected global phenomenon of child migration, exploring the complex challenges facing children and adolescents who move to join their families, those who are moved to be exploited, and those who move simply to survive. Spanning several continents and drawing on the stories of young migrants, Child Migration and Human Rights in a Global Age provides a comprehensive account of the widespread and growing but neglected global phenomenon of child migration and child trafficking. It looks at the often-insurmountable obstacles we place in the paths of adolescents fleeing war, exploitation, or destitution; the contradictory elements in our approach to international adoption; and the limited support we give to young people brutalized as child soldiers. Part history, part in-depth legal and political analysis, this powerful book challenges the prevailing wisdom that widespread protection failures are caused by our lack of awareness of the problems these children face, arguing instead that our societies have a deep-seated ambivalence to migrant children—one we need to address head-on. Child Migration and Human Rights in a Global Age offers a road map for doing just that, and makes a compelling and courageous case for an international ethics of children's human rights.

I centri minori italiani nel tardo Medioevo Centro di studi sulla civiltà del tardo medioevo (San Miniato, Italy). Convegno 2018-01-01 In the late Middle Ages, Italy was one of the most urbanized areas in Europe. Its coasts, the Apennines, the perialpine area and the plains were all home to a large number of smaller towns, lands, villages, castra, and 'quasi cites'. These settlements were all very diverse in terms of demographic consistency, social articulation and economic dynamism, but together they constituted a characteristic and constitutive element of the Italian historical identity: an 'original personality'. This volume, thanks to some framing essays and a mapping of individual cases involving most of the northern, central and southern regions, aims at investigating the active research on this topic over the last thirty to forty years.

Comparative Constitutional History Francesco Biagi 2020-07-27 While comparative constitutional law is a well-established field, less attention has been paid so far to the comparative dimension of constitutional history. The present volume aims to address this shortcoming by bringing focus to comparative constitutional history.

The Politics of Immigration in Multi-Level States E. Hepburn 2014-07-08 This book develops an exploratory theory of immigration in multilevel states addressing two themes: governance and political parties. It examines not only how, and by whom, immigration policy is decided and implemented at different levels, but also how it has become a key-issue of party competition across multilevel states.

The Euro Marco Buti 2010-04-01 On 1 January 1999 eleven EU Member States adopted a new currency - the euro. The introduction of the euro was a remarkable feat in the history of European monetary, financial, economic and political integration. It was an event of worldwide significance. Despite much criticism and predictions that it would quickly collapse, the first decade of the euro has been a remarkable success. The euro area has now expanded to 16 members with a combined population of 326 million and contributes 16 per cent of global output. This 2010 book was the first to provide a wide-ranging strategic review of the first decade of the euro. Written by an impressive line-up of academic and professional economists, *The Euro: The First Decade* is an invaluable reference for scholars and policy makers who wish to know more about the successes and failures of the euro and the challenges that lie ahead.

Migration in the Mediterranean Francesca Ippolito 2015 Critically analyses how institutional actors interact on the international scene in the control and management of migration in the Mediterranean.

The Welfare of Syrian Refugees Paolo Verme 2016 The book focuses on the largest refugee crisis of our time: the Syrian refugee crisis. It exploits a wealth of survey and registry data on Syrian refugees living in Jordan and Lebanon to assess their poverty and vulnerability status, understand

the predictors of these statuses, evaluate the performance of existing policies toward refugees, and determine the potential for alternative policies. Findings point to a complex situation. In the absence of humanitarian assistance, poverty is extremely high among refugees. Current policies including cash transfers and food vouchers are effective in reducing poverty but they remain short of providing economic inclusion and self-reliance of refugees. A shift toward economic inclusion and self-reliance would require a different humanitarian and development paradigm, one that focuses on growth policies for areas affected by refugees where the target population is constituted by refugees and hosting populations alike. This joint study by the World Bank Group and the United Nations High Commissioner for Refugees helps bridge the historical divide between humanitarian and development work by providing practical solutions for assisting refugees in the short, medium and long-term and to prevent the irreversible loss of social and human capital typically associated with prolonged refugee crises.

Comparative Demography of the Syrian Diaspora: European and Middle Eastern Destinations

Elwood D. Carlson 2021-08-26 This book provides a demographic profile of the Syrian diaspora into Europe and identifies the issue of forced migration as a separate and increasingly salient topic within the more general field of migration research. It describes the progressive increase in numbers of Syrian refugees in different European countries during recent years and gives a demographic profile of the Syrian refugee population. The book also compares and synthesizes the demographic profiles presented, to show how the population of Syrian refugees differs from country to county in terms of age structure, sex ratio, family status, educational attainment and other social and economic characteristics. By providing a solid empirical portrait based on national and international statistics, this book will be a great resource to students, academics in migration and

refugee studies as well as social scientists and policy-makers in European countries.

Migration and the Search for Home Paolo Boccagni 2016-10-31 This book explores the impact of transnational migration on the views, feelings, and practices of home among migrants. Home is usually perceived as what placidly lies in the background of everyday life, yet migrants' experience tells a different story: what happens to the notion of home, once migrants move far away from their "natural" bases and search for new ones, often under marginalized living conditions? The author analyzes in how far migrants' sense of home relies on a dwelling place, intimate relationships, memories of the past, and aspirations for the future—and what difference these factors make in practice. Analyzing their claims, conflicts, and dilemmas, this book showcases how in the migrants' case, the sense of home turns from an apparently intimate and domestic concern into a major public

question.

Migration and Health in the European Union Bernd Rechel 2011-12-16 "This book can be read by anyone with an interest in migration and health, whether as an advocate for migrants' health, as a student in a health profession, researcher or policy maker. It provides an ample orientation to the field in the European context. Among other important raised issues, it underlines an all too often neglected fact; health is a human right. By involving broad issues and problem areas from a variety of perspectives, the volume illustrates that migration and health is a field that can not be allocated to a single discipline." Carin Björngren Cuadra, Senior Lecturer, Malmö University, Sweden

Migrants make up a growing share of European populations. However, all too often their situation is compounded by problems with accessing health and other basic services. There is a need for tailored health policies, but robust data on the health needs of migrants and how best these needs can be met are scarce. Written by a collaboration of authors from three key international organisations (the European Observatory on Health Systems and Policies, the EUPHA Section on Migrant and Ethnic Minority Health, and the International Organization for Migration), as well as leading researchers from across Europe, the book thoroughly explores the different aspects of migration and health in the EU and how they can be addressed by health systems. Structured into five easy-to-follow sections, the volume includes: Contributions from experts from across Europe Key topics such as: access to human rights and health care; health issues faced by migrants; and the national and European policy response so far Conclusions drawn from the latest available evidence Comprehensive information on different aspects of health and migration and how they can best be addressed by health systems is still not easy to find. This book addresses this shortfall and will be of major value to researchers, students, policy-makers and practitioners concerned with migration and

health in an increasingly diverse Europe.

Palestinian Refugees in International Law Francesca P. Albanese 2020-05-21 The Palestinian refugee question, resulting from the events surrounding the birth of the state of Israel seventy years ago, remains one of the largest and most protracted refugee crises of the post-WWII era. Numbering over six million in the Middle East alone, Palestinian refugees' status varies considerably according to the state or territory 'hosting' them, the UN agency assisting them and political circumstances surrounding the Israeli-Palestinian conflict these refugees are naturally associated with. Despite being foundational to both the experience of the Palestinian refugees and the resolution of their plight, international law is often side-lined in political discussions concerning their fate. This compelling new book, building on the seminal contribution of the first edition (1998), offers a clear and comprehensive analysis of various areas of international law (including refugee law, human rights law, humanitarian law, the law relating to stateless persons, principles related to internally displaced persons, as well as notions of international criminal law), and probes their relevance to the provision of international protection for Palestinian refugees and their quest for durable solutions.

Migrants at Work Cathryn Costello 2014 This collection has its origins in the recognition that there is a highly significant and under-considered intersection and interaction between migration law and labour law. It is the culmination of a collaborative project on 'Migrants at Work' funded by the John Fell Fund, the Society of Legal Scholars and the Research Centre at St John's College, Oxford. The collection aims to shed light on the interactions between immigration, migration law and labour law, in particular how migration status has a bearing on labour relations and the world of work.

After Heritage Hamzah Muzaini 2018-07-27 Focusing on the practices and politics of heritage-making at the individual and the local level, this book uses a wide array of international case studies to argue for their potential not only to disrupt but also to complement formal heritage-making in public spaces. Providing a much-needed clarion call to reinsert the individual as well as the transient into more collective heritage processes and practices, this strong contribution to the field of Critical Heritage Studies offers insight into benefits of the 'heritage from below approach' for researchers, policy makers and practitioners.

The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to

achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

European Immigration Anna Triandafyllidou 2016-07-22 Fully updated and containing chapters on the new EU member states and the attempt to form a common EU migration policy, this new edition of *European Immigration: A Sourcebook* provides a comprehensive overview of the trends and developments in migration in all EU countries. With chapters following a common structure to facilitate direct international comparisons, it not only examines the internal affairs of each member state, but also explores both migratory trends within the EU itself and the implications for European immigration of wider global events, including the Arab Spring and the world financial crisis.

Taxation and the Financial Crisis Julian S. Alworth 2012-02-23 This book examines how tax policies contributed to the financial crisis; whether taxation can play a role in the reform efforts to establish a sounder and safer financial system; and the pros and cons of various tax initiatives.

Migrant Labour and the Reshaping of Employment Law Bernard Ryan 2023-04-20 The presence of migrant workers has become a central feature of labour markets in highly developed countries. The International Labour Organisation estimates that in 2013 there were 112 million resident migrant workers in the 58 highest-income countries, who made up 16% of the workforce. Non-resident workers have also increasingly become part of the labour available for employment in

other states, often on a temporary basis. This work takes a thematic and comparative approach to examine the profound implications of contemporary labour migration for employment law regimes in highly developed countries. In so doing, it aims to promote greater recognition of labour migration-related questions, and of the interests of migrant workers, within employment law scholarship. The work comprises original analyses by leading scholars of migration and employment law at the European Union level, and in Australia, Canada, Germany, Italy, the Netherlands, Spain, the United Kingdom and the United States. The specific position of migrant workers is addressed, for example as regards equality of treatment, or the position in employment law of migrant workers without a right to work. The work also explores the effects of migration levels and patterns upon general employment law - including the law relating to collective bargaining, and remedies against exploitation.

Extraterritorial Immigration Control Bernhard Ryan 2010 This work analyses the legal challenges posed by contemporary practices of extraterritorial immigration control: visas, pre-embarkation checks and the interception of irregular migrants. It examines the international law framework, and provides case-studies from Europe, Australia and the United States.

International Migration Outlook 2019 OECD 2019-10-15 The 2019 edition of the International Migration Outlook analyses recent developments in migration movements and policies in OECD countries and some non-OECD economies. It also examines the evolution of labour market outcomes of immigrants in OECD countries.

The New Geography of Jobs Enrico Moretti 2012 A rising young economist at Berkeley makes correlations between success and geography, explaining how such rising centers of innovation as San Francisco, Boston and Austin are likely to offer influential opportunities and shape the national

and global economies in positive or detrimental ways.

The Uncontrollability of the World Hartmut Rosa 2020-10-06 The driving cultural force of that form of life we call 'modern' is the desire to make the world controllable. Yet it is only in encountering the uncontrollable that we really experience the world - only then do we feel touched, moved and alive. A world that is fully known, in which everything has been planned and mastered, would be a dead world. Our lives are played out on the border between what we can control and that which lies outside our control. But because we late-modern human beings seek to make the world controllable, we tend to encounter the world as a series of objects that we have to conquer, master or exploit. And precisely because of this, 'life,' the experience of feeling alive and truly encountering the world, always seems to elude us. This in turn leads to frustration, anger and even despair, which then manifest themselves in, among other things, acts of impotent political aggression. For Rosa, to encounter the world and achieve resonance with it requires us to be open to that which extends beyond our control. The outcome of this process cannot be predicted, and this is why moments of resonance are always concomitant with moments of uncontrollability. This short book - the sequel to Rosa's path-breaking work on social acceleration and resonance - will be of great interest students and scholars in sociology and the social sciences and to anyone concerned with the nature of modern social life.

Poverty in Italy Saraceno, Chiara 2020-09-02 Three experienced Italian sociologists explore the structural and cultural dimensions of poverty in their country. Comparing Italy's regime with other European countries, they consider the interplay of conditions in the labour market, the family and welfare arrangements as causes of poverty. This in-depth analysis explores how forced familialism, unbalanced gender arrangements, territorial cleavages and sluggish growth have rendered Italy

vulnerable to financial crisis. As old risks of poverty have worsened, new risks have emerged and children, the working poor and migrants have become the 'new poor'. Combining theoretical and empirical tools, this is a topical fresh take on the understanding of poverty in Italy that is even more crucial considering the impact of the COVID-19 pandemic.

Resident Foreigners Donatella Di Cesare 2020-04-13 From the shores of Europe to the Mexican-US border, mass migration is one of the most pressing issues we face today. Yet at the same time, calls to defend national sovereignty are becoming ever more vitriolic, with those fleeing war, persecution, and famine vilified as a threat to our security as well as our social and economic order. In this book, written amidst the dark resurgence of appeals to defend 'blood and soil', Donatella Di Cesare challenges the idea of the exclusionary state, arguing that migration is a fundamental human right. She develops an original philosophy of migration that places the migrants themselves, rather than states and their borders, at the centre. Through an analysis of three historic cities, Athens, Rome and Jerusalem, Di Cesare shows how we should conceive of migrants not as an other but rather as resident foreigners. This means recognising that citizenship cannot be based on any supposed connection to the land or an exclusive claim to ownership that would deny the rights of those who arrive as migrants. Instead, citizenship must be disconnected from the possession of territory altogether and founded on the principle of cohabitation - and on the ultimate reality that we are all temporary guests and tenants of the earth. Di Cesare's argument for a new ethics of hospitality will be of great interest to all those concerned with the challenges posed by migration and with the increasingly hostile attitudes towards migrants, as well as students and scholars of philosophy and political theory.

The Refugee Surge in Europe Mr. Shekhar Aiyar 2016-01-19 Against the background of political turmoil in the Middle-East, Europe faces an unprecedented surge in asylum applications. In analyzing the economic impact of this inflow, this paper draws from the experience of previous economic migrants and refugees, mindful of the fact that the characteristics of economic migrants can be different from refugees. In the short-run, additional public expenditure will provide a small positive impact on GDP, concentrated in the main destination countries of Germany, Sweden and Austria. Over the longer-term, depending on the speed and success of the integration of refugees in the labor market, the increase in the labor force can have a more lasting impact on growth and the public finances. Here good policies will make an important difference. These include lowering

barriers to labor markets for refugees, for example through wage subsidies to employers, and, in particular, reducing legal barriers to labor market participation during asylum process, removing obstacles to entrepreneurship/self-employment, providing job training and job search assistance, as well as language skills. While native workers often have legitimate concerns about the impact of immigrants on wages and employment, past experience indicates that any adverse effects are limited and temporary.

The Future of International Migration to OECD Countries OECD 2009-08-11 Looking to the year 2030, this volume explores the social, economic and environmental forces which, in OECD countries, may combine to attract migrants of various types and backgrounds, and which, primarily in the developing world, may persuade people to leave or stay at home.
