The Kitchen Counter Cooking School Kathleen Flinn 2011-09-29 The author of the New York Times bestseller *The Sharper Your Knife, The Less You Cry* tells the inspiring story of how she helped nine others find their inner cook. After graduating from Le Cordon Bleu in Paris, writer Kathleen Flinn returned with no idea what to do next, until one day at a supermarket she watched a woman loading her cart with ultraprocessed foods. Flinn's "chefternal" instinct kicked in: she persuaded the stranger to reload with fresh foods, offering her simple recipes for healthy, easy meals. *The Kitchen Counter Cooking School* includes practical, healthy tips that boost readers' culinary self-confidence, and strategies to get the most from their grocery dollar, and simple recipes that get readers cooking.

Resilience Engineering Perspectives, Volume 2 Erik Hollnagel 2016-12-05 Preparation and Restoration is the second volume of Resilience Engineering Perspectives within the Ashgate Studies in Resilience Engineering series. In four sections, it broadens participation of the field to include policy and organization studies, and articulates aspects of resilience beyond initial definitions: - Policy and Organization explores public policy and organizational aspects of resilience and how they aid or inhibit preparation and restoration - Models and Measures addresses thoughts on ways to measure resilience and model systems to detect desirable, and undesirable, results - Elements and Traits examines features of systems and how they affect the ability to prepare for and recover from significant challenges - Applications and Implications examines how resilience plays out in the living laboratory of real-world operations. Preparation and Restoration addresses issues such as the nature of resilience; the similarities and differences between resilience and traditional ideas of system performance; how systems cope with varying demands and sometimes succeed and sometimes fail; how an organization's ways of preparing before critical events can enable or impede restoration; the trade-offs that are needed for systems to operate and survive; instances of brittle or resilient systems; how work practices affect resilience; the relationship between resilience and safety; and what improves or erodes resilience. This volume is valuable reading for those who create and operate systems that must not only survive, but thrive, in the face of challenge.

The Meritocracy Myth Stephen J. McNamee 2013-07-18 This book challenges the widely held American belief in meritocracy—that people get out of the system what they put into it based on individual merit. Examining talent, attitude, work ethic, and character as elements of merit, the book also evaluates the effect of non-merit factors such as social status, race, heritage, and wealth on meritocracy. The third edition features a new section on “The Great Recession.”

Personnel Preparation Thomas E. Review of the Literature on the Links Between Biodiversity and Climate Change 2009 The Intergovernmental Panel on Climate Change 4th Assessment Report (AR4) concluded that climate change will have significant impacts on many aspects of biological diversity: On ecosystems, species, genetic diversity within species, and on ecological interactions. The implications of these impacts are significant For The long-term stability of the natural world and For The many benefits and services that humans derive from it. This report reviews the literature since the AR4. it draws on recent research to summarise advances in our understanding of the impacts of climate change on biodiversity. The evidence For The impacts on biodiversity comes from three principal sources. First, from direct observation of changes in components of biodiversity in nature that can be clearly related to changes in climatic variables. Second, experimental studies using manipulations to elucidate responses to climate change. Finally, and most widely, from modelling studies where our current understanding of the requirements and constraints on the distribution of species and ecosystems are combined with modelled changes in climatic variables to project the impacts of climate change and predict future distributions and changes in populations.

Renewable Energy Sources Lise Bosman 2013-01-06 In recent years African countries have taken great strides in their response to the demand for reliable contractual and institutional forms of doing business and for high-quality dispute resolution mechanisms. Modern international arbitration has taken root, with certain countries actively embracing modern harmonized arbitral practice, and others in the process of change and development. This unprecedented volume assembles for the first time a country-by-country analysis – both practical and insightful – of how arbitration is conducted in 46 African countries, providing essential information about legislative provisions, treaty adherence, and arbitral procedure. Contributors include current and former judges, distinguished practitioners, academics, and institution-builders, all of whom are active in promoting the use of arbitration as a viable means of dispute resolution in Africa. Five sections representing the main regions of the continent, each with a substantive introductory chapter covering the major trends within that region, offer country overviews addressing issues such as the following: ; adherence to the key arbitration conventions; the modernity of a State’s arbitration legislation and its compatibility with the UNCITRAL Model Law; particular features of arbitral practice in that jurisdiction; access to and (where available) statistics from local and regional arbitral institutions; significant arbitration-related national case law; and enforcement of foreign arbitral awards. A sixth section focuses on Africa-based investor-State arbitration, providing an empirical analysis of the experience and record of African States with investment treaties and investor-State arbitration. Useful tables of intra-African bilateral investment treaties, a list of ICSID proceedings involving African States, and other tabular features round out the volume. The book will be welcomed by arbitration practitioners and legal academics everywhere as the essential guiding light in what is rapidly becoming a crucially important area of international arbitration practice.

Weaving Social Safety Nets Asian Development Bank 2010-12-01 The recent economic slowdown, the preceding period episode of high food and oil prices, and the ever-present risk of natural disasters have highlighted that Pacific island countries and their people are very vulnerable to economic and natural forces beyond their control. Informal support provided by extended families and communities to those in need have been coming under increasing strain and no longer offer sufficient protection to those facing temporary hardship. This policy brief provides an overview of the role of social safety nets in protecting vulnerable groups during times of stress, and outlines key factors that should be considered in the design of such programs. The key response should be to plan ahead and have appropriate policies and programs in place to protect the vulnerable before a crisis hits.
