A Different Mirror for Young People Ronald Takaki 2012-10-30 A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

On the Shoulders of Giants Kareem Abdul-Jabbar 2007-02-05 From 1920 to 1940, the Harlem Renaissance produced a bright beacon of light that paved the way for African-Americans all over the country. The unapologetic writings of W. E. B. Du Bois and Marcus Garvey, the fervent fiction and poetry of Zora Neale Hurston and Langston Hughes, the groundbreaking art of Aaron Douglas and William H. Johnson, and the triumphant music of Duke Ellington and Louis Armstrong gave voice and expression to the thoughts and emotions that Jim Crow segregation laws had long sought to stifle. In *On the Shoulders of Giants*, indomitable basketball star and bestselling author and historian Kareem Abdul-Jabbar invites the reader on an extraordinarily personal journey back to his birthplace, through one of the greatest political, cultural, literary, and artistic movements in our history, revealing the tremendous impact the Harlem Renaissance had on both American culture and his own life. Beginning with the rise of the Harlem Renaissance as pioneers of professional basketball, Kareem traces the many streams of historical influence that converged to create the man he is today -- the NBA's all-time leading scorer and a veritable African-American icon. Travel deep into the soul of the Renaissance -- to the night clubs, restaurants, basketball games, and fabulous parties that have made footprints in Harlem's history. Meet the athletes, jazz musicians, comedians, actors, politicians, entrepreneurs, and writers who not only inspired Kareem's rise to greatness but an entire nation's. Kareem Abdul-Jabbar was born in the midst of a cultural reawakening, carried on the shoulders of athletes trying to prove there was a lot more at stake than a ball game, men and women who made music that could break your heart, and writers and intellectuals who gave voice to not just the ideals of a movement but the raw emotions. Kareem tells what it took to get these revolutionaries to Harlem and how they changed the world. A world that is still riding on the shoulders of giants.

[Philanthropy in Toni Morrison's Oeuvre](#) Rico Hollmach 2018-11-07 This book examines Toni Morrison's highly influential works through the lens of

philanthropy. The point of departure of this endeavor is the keen observation that philanthropy has always played a leading role in US discourses about the nation itself. While doing so, time and again philanthropy has also been used as a means of social stratification – especially for so-called social minorities such as the African American community, whose historical experience within the United States is at the very heart of Morrison's novels. This book pursues the goal of a twofold understanding – on the one hand, through offering a rather innovative access to Morrison's works, the project allows for new insights into one of today's most influential authors. On the other hand, this book explores the productivity of the concept of philanthropy for literary and cultural studies – a concept hitherto largely neglected by scholars in both academic fields.

Educating the Disfranchised and Disinherited Robert Francis Engs 1999 Best remembered as the founder of Hampton Institute and mentor of Booker T. Washington, Samuel Chapman Armstrong played a crucial role in white philanthropy and educational strategies toward nonwhite people in late-nineteenth-century America. Until now, however, there has been no scholarly biography of Armstrong--his story has usually been subsumed within that of his famous protégé. In *Educating the Disfranchised and Disinherited*, Robert Francis Engs illuminates both Armstrong's life and an important chapter in the history of American race relations. Armstrong was the son of missionaries to Hawaii, and as Engs makes clear, his early experiences in a multiracial, predominantly non-European society did much to determine his life's work--the uplift of "backward peoples." After attending Williams College, Armstrong commanded black troops in the Civil War and served as a Freedmen's Bureau agent before founding Hampton in 1869. At the institute, he implemented a unique combination of manual labor education and teacher training, creating an educational system that he believed would enable African Americans and other disfranchised peoples to rise gradually toward the level of white civilization. Recent studies have often blamed Armstrong for "miseducating" an entire generation of African Americans and for Washington's failings as a "race leader." Indeed, as Engs notes, Armstrong's educational designs were paternalistic in the extreme, and in addressing certain audiences, he could sometimes sound like a consummate racist. On the other hand, he frequently expressed a deep devotion to the ultimate equality of African Americans and incorporated the best of his black graduates into the Hampton staff. Sorting through the complexities and contradictions of Armstrong's character and vision, Engs's masterful biography provides new insights into the failures of emancipation and into the sometimes flawed responses of one heir to antebellum

abolition and egalitarian Christianity. The Author: Robert Francis Engs is associate professor of history at the University of Pennsylvania and the author of *Freedom's First Generation: Black Hampton, Virginia, 1861-1890*.

The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalised higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will be of global relevance

School Library Journal 2006

James Baldwin A. Scott Henderson 2014-05-05 "The recognition and study of African American (AA) artists and public intellectuals often include Martin Luther King, Jr., and occasionally Booker T. Washington, W.E.B. DuBois, and Malcolm X. The literary canon also adds Ralph Ellison, Richard White, Langston Hughes, and others such as female writers Zora Neale Hurston, Maya Angelou, and Alice Walker. Yet, the acknowledgement of AA artists and public intellectuals tends to skew the voices and works of those included toward normalized portrayals that fit well within foundational aspects of the American myths reflected in and perpetuated by traditional schooling. Further, while many AA artists and public intellectuals are distorted by mainstream media, public and political characterizations, and the curriculum, several powerful AA voices are simply omitted, ignored, including James Baldwin. This edited volume gathers a collection of essays from a wide range of perspectives that confront Baldwin's impressive and challenging canon as well as his role as a public intellectual. Contributors also explore Baldwin as a confrontational voice during his life and as an enduring call for justice."

The New Mercenaries Anthony Mockler 1987 Describes the involvement of mercenary troops in 20th century wars in Africa and other areas
The Shock Doctrine Naomi Klein 2010-04-01 The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.
