Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Before We Were Strangers Renée Carlino 2015-08-18 From the USA TODAY bestselling author of *Sweet Thing* and *Nowhere But Here* comes a love story about a Craigslist "missed connection" post that gives two people a second chance at love fifteen years after they were separated in New York City. To the Green-eyed Lovebird: We met fifteen years ago, almost to the day, when I moved my stuff into the NYU dorm room next to yours at Senior House. You called us fast friends. I like to think it was more. We lived on nothing but the excitement of finding ourselves through music (you were obsessed with Jeff Buckley), photography (I couldn't stop taking pictures of you), hanging out in Washington Square Park, and all the weird things we did to make money. I learned more about myself that year than any other. Yet, somehow, it all fell apart. We lost touch the summer after graduation when I went to South America to work for National Geographic. When I came back, you were gone. A part of me still wonders if I pushed you too hard after the wedding... I didn't see you again until a month ago. It was a Wednesday. You were rocking back on your heels, balancing on that thick yellow line that runs along the subway platform, waiting for the F train. I didn't know it was you until it was too late, and then you were gone. Again. You said my name; I saw it on your lips. I tried to will the train to stop, just so I could say hello. After seeing you, all of the youthful feelings and memories came flooding back to me, and now I've spent the better part of a month wondering what your life is like. I might be totally out of my mind, but would you like to get a drink with me and catch up on the last decade and a half? M

The Reading Promise Alice Ozma 2011-05-03 When Alice Ozma was in 4th grade, she and her father decided to see if he could read aloud to her for 100 consecutive nights. On the hundredth night, they shared pancakes to celebrate, but it soon became evident that neither wanted to let go of their storytelling ritual. So they decided to continue what they called "The Streak." Alice's father read aloud to her every night without fail until the day she left for college. Alice approaches her book as a series of vignettes about her relationship with her father and the life lessons learned from the books he read to her. Books included in the Streak were: *Great Expectations* by Charles Dickens, the Oz books by L. Frank Baum, *Harry Potter* by J. K. Rowling, *Alice's Adventures in Wonderland* by Lewis Carroll, and Shakespeare's plays.

Beloved Toni Morrison 2006-10-17 Winner of the Pulitzer Prize, Toni Morrison's *Beloved* is a spellbinding and dazzlingly innovative portrait of a woman haunted by the past. Sethe was born a slave and escaped to Ohio, but eighteen years later she is still not free. She has borne the unthinkable and not gone mad, yet she is still held captive by memories of Sweet Home, the beautiful farm where so many hideous things happened. Meanwhile Sethe's house has long been troubled by the angry, destructive ghost of her baby, who died nameless and whose tombstone is engraved with a single word: Beloved. Sethe works at beating back the past, but it makes itself heard and felt incessantly in her memory and in the lives of those around her. When a mysterious teenage girl arrives, calling herself Beloved, Sethe's terrible secret explodes into the present. Combining the visionary power of legend with the unassailable truth of history, Morrison's unforgettable novel is one of the great and enduring works of American literature.

The Seven Sins of Memory Daniel L. Schacter 2002-05-07 A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of *How the Mind Works*). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill Clinton's grand jury testimony, and the search for the Oklahoma City bomber—he also delves into striking new scientific research, giving us a glimpse of the fascinating neurology of memory and offering "insight into common malfunctions of the mind" (*USA Today*). "Though memory failure can amount to little more than a mild annoyance, the consequences of misattribution in eyewitness testimony can be devastating, as can the consequences of suggestibility among pre-school children and among adults with 'false memory syndrome' . . . Drawing upon recent neuroimaging research that allows a glimpse of the brain as it learns and remembers, Schacter guides his readers on a fascinating journey of the human mind." —Library Journal "Clear, entertaining and provocative . . . Encourages a new appreciation of the complexity and fragility of memory." —The Seattle Times "Should be required reading for police, lawyers, psychologists, and anyone else who wants to understand how memory can go terribly wrong." —The Atlanta Journal-Constitution "A fascinating journey through paths of memory, its open avenues and blind alleys . . . Lucid, engaging, and enjoyable." —Jerome Groopman, MD "Compelling in its science and its probing examination of everyday life, *The Seven Sins of Memory* is also a delightful book, lively and clear." —Chicago Tribune Winner of the William James Book Award

Looking Back Lois Lowry 1998 Using family photographs and quotes from her books, the author provides glimpses into her life.

Continuing Bonds Dennis Klass 2014-05-12 First published in 1996. This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded. The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased, thereby freeing the survivor to reinvest in new relationships in the present. Pathological grief has been defined in terms of holding on to the deceased. Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do. Presenting data from several populations, 22 authors - among the most respected in their fields - demonstrate that the health resolution of grief enables one to maintain a continuing bond with the deceased. Despite cultural disapproval and lack of validation by professionals, survivors find places for the dead in their on-going lives and even in their communities. Such bonds are not denial: the deceased can provide resources for enriched functioning in the present. Chapters examine widows and widowers, bereaved children, parents and siblings, and a population previously excluded from bereavement research: adoptees and their birth parents. Bereavement in Japanese culture is also discussed, as are meanings and implications of this new model of grief. Opening new areas of research and scholarly dialogue, this work provides the basis for significant developments in clinical practice in the field.

Last Witnesses Svetlana Alexievich 2020-06-16 "A masterpiece" (*The Guardian*) from the Nobel Prize-winning writer, an oral history of children's experiences in World War II across Russia NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST For more than three decades, Svetlana Alexievich has been the memory and conscience of the twentieth century. When the Swedish Academy awarded her the Nobel Prize, it cited her for inventing "a new kind of literary genre," describing her work as "a history of emotions . . . a history of the soul." Bringing together dozens of voices in her distinctive style, *Last Witnesses* is Alexievich's collection of the memories of those who were children during World War II. They had sometimes been soldiers as well as witnesses, and their generation grew up with the trauma of the war deeply embedded—a trauma that would change the course of the Russian nation. Collectively, this symphony of children's stories, filled with the everyday details of life in combat, reveals an altogether unprecedented view of the war. Alexievich gives voice to those whose memories have been lost in the official narratives, uncovering a powerful, hidden history from the personal and private experiences of individuals. Translated by the renowned Richard Pevear and Larissa Volokhonsky, *Last Witnesses* is a powerful and poignant account of the central conflict of the twentieth century, a kaleidoscopic portrait of the human side of war. Praise for *Last Witnesses* "There is a special sort of clear-eyed humility to [Alexievich's] reporting." —*The Guardian* "A bracing reminder of the enduring power of the written word to testify to pain like no other medium. . . . Children survive, they grow up, and they do not forget. They are the first and last witnesses." —*The New Republic* "A profound triumph." —*The Big Issue* "[Alexievich] excavates and briefly gives prominence to demolished lives and eradicated communities. . . . It is impossible not to turn the page, impossible not to wonder whom we next might meet, impossible not to think differently about children caught in conflict." —*The Washington Post*

Memory Wall Anthony Doerr 2010-07-13 In the wise and beautiful second collection from the acclaimed, Pulitzer Prize-winning #1 New York Times bestselling author of *All the Light We Cannot See*, and *Cloud Cuckoo Land*, "Doerr writes about the big questions, the imponderables, the major metaphysical dreads, and he does it fearlessly" (The New York Times Book Review). Set on four continents, Anthony Doerr's new stories are about memory, the source of meaning and coherence in our lives, the fragile thread that connects us to ourselves and to others. Every hour, says Doerr, all over the globe, an infinite number of memories disappear. Yet at the same time children, surveying territory that is entirely new to them, push back the darkness, form fresh memories, and remake the world. In the luminous and beautiful title story, a young boy in South Africa comes to possess an old woman's secret, a piece of the past with the power to redeem a life. In "The River Nemunas," a teenage orphan moves from Kansas to Lithuania to live with her grandfather, and discovers a world in which myth becomes real. "Village 113," winner of an O'Henry Prize, is about the building of the Three Gorges Dam and the seed keeper who guards the history of a village soon to be submerged. And in "Afterworld," the radiant, cathartic final story, a woman who escaped the Holocaust is haunted by visions of her childhood friends in Germany, yet finds solace in the tender ministrations of her grandson. Every story in *Memory Wall* is a reminder of the grandeur of life--of the mysterious beauty of seeds, of fossils, of sturgeon, of clouds, of radios, of leaves, of the breathtaking fortune of living in this universe. Doerr's language, his witness, his imagination, and his humanity are unparalleled in fiction today.

Liberation Day George Saunders 2022-10-18 NEW YORK TIMES BESTSELLER • "One of our most inventive purveyors of the form returns with pitch-perfect, genre-bending stories that stare into the abyss of our national character. . . . An exquisite work from a writer whose reach is galactic."—Oprah Daily Booker Prize winner George Saunders returns with his first collection of short stories since the New York Times bestseller *Tenth of December*. ONE OF THE BEST BOOKS OF THE YEAR: The New Yorker The "best short-story writer in English" (Time) is back with a masterful collection that explores ideas of power, ethics, and justice and cuts to the very heart of what it means to live in community with our fellow humans. With his trademark prose—wickedly funny, unsentimental, and exquisitely tuned—Saunders continues to challenge and surprise: Here is a collection of prismatic, resonant stories that encompass joy and despair, oppression and revolution, bizarre fantasy and brutal reality. "Love Letter" is a tender missive from grandfather to grandson, in the midst of a dystopian political situation in the (not too distant, all too believable) future, that reminds us of our obligations to our ideals, ourselves, and one another. "Ghoul" is set in a Hell-themed section of an underground amusement park in Colorado and follows the exploits of a lonely, morally complex character named Brian, who comes to question everything he takes for granted about his reality. In "Mother's Day," two women who loved the same man come to an existential reckoning in the middle of a hailstorm. In "Elliott Spencer," our eighty-nine-year-old protagonist finds himself brainwashed, his memory "scraped"—a victim of a scheme in which poor, vulnerable people are reprogrammed and deployed as political protesters. And "My House"—in a mere seven pages—comes to terms with the haunting nature of unfulfilled dreams and the inevitability of decay. Together, these nine subversive, profound, and essential stories coalesce into a case for viewing the world with the same generosity and clear-eyed attention Saunders does, even in the most absurd of circumstances.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for

parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Children of the New World Alexander Weinstein 2016-09-13 Includes "After Yang," the basis for the acclaimed A24 film After Yang, starring Colin Farrell, Jodie Turner-Smith, and Haley Lu Richardson, and directed by Kogonada. A New York Times Notable Book "A darkly mesmerizing, fearless, and exquisitely written work. Stunning, harrowing, and brilliantly imagined." —Emily St. John Mandel, author of Station Eleven Children of the New World introduces readers to a near-future world of social media implants, memory manufacturers, dangerously immersive virtual reality games, and alarmingly intuitive robots. Many of these characters live in a utopian future of instant connection and technological gratification that belies an unbridgeable human distance, while others inhabit a post-collapse landscape made primitive by disaster, which they must work to rebuild as we once did millennia ago. In "The Cartographers," the main character works for a company that creates and sells virtual memories, while struggling to maintain a real-world relationship sabotaged by an addiction to his own creations. In "After Yang," the robotic brother of an adopted Chinese child malfunctions, and only in his absence does the family realize how real a son he has become. Children of the New World grapples with our unease in this modern world and how our ever-growing dependence on new technologies has changed the shape of our society. Alexander Weinstein is a visionary and singular voice in speculative fiction for all of us who are fascinated by and terrified of what we might find on the horizon.
