Understanding Price Action Bob Volman 2014-10-17 Understanding Price Action is a must read for both the aspiring and professional trader who seek to obtain a deeper understanding of what is commonly referred to as "trading from the naked chart". With hundreds of examples commented on in great detail, Volman convincingly points out that only a handful of price action principles are responsible for the bulk of fluctuations in any market session-and that it takes common sense, much more than mastery, to put these essentials to one's benefit in the trading game. The power of the book lies in the exceptional transparency with which the concepts and trading techniques are put forth. Besides offering the reader a comprehensive study on price action mechanics, included within is a series of six months of consecutive sessions of the eur/usd 5-minute. Containing nearly 400 fully annotated charts, this section alone harbors a massive database of intraday analysis, not found in any other trading guide. Written with a razor-sharp eye for practical detail, yet in a highly absorbable manner, Understanding Price Action breathes quality from every page and is bound to become a classic in the library of any trader who is serious about his education.

The Taylor Trading Technique George Douglas Taylor 2016-05-20 This high-quality reissue of The Taylor Trading Technique contains the same time-honored information it did when it was first published in 1950. Taylor's "Book Method" of trading is based on his insights about the repetition of grain market cycles but applies to the financial futures market and others as well. By identifying moves in the market that might fool less-savvy traders into buying or selling at the wrong time, Taylor's system protects against pitfalls while giving you an edge over other traders. Taylor breaks down market movements into three-day cycles comprising a Buy Day, a Sell Day, and a Sell Short Day. These classifications are used to keep tabs on a market's rhythm and identify the ideal moments at which you should enter and exit. This book will help you understand the ways the market fluctuates and develops, so you can create and apply a plan for how best to trade in it. Combined with a bit of practice and a willingness to learn and experiment, The Taylor Trading Technique will arm you with a strong system for swing trading in financial futures.

Forex Trading 4 Heikin Ashi Trader Forex Trading Teil 4: Trade mehrere Strategien gleichzeitig Dieses Buch ist Teil 4 der Serie "Forex Trading" von Heikin Ashi Trader Trader, die sich auf den Forex-Handel spezialisieren, neigen dazu, nur eine einzelne Strategie zu traden. Sie tun dies, weil sie glauben, dass diese eine Strategie anderen Handelsmethoden überlegen ist. Unglücklicherweise macht sie dieser Ansatz besonders anfällig für die Ups und Downs dieser einen Strategie. Durch die Verteilung von Gewinn und Verlust auf mehrere Strategien erzeugt der Trader jedoch eine Indifferenz gegenüber den Verlustserien in jeder einzelnen Strategie. Betrachtet er sie mehr wie ein Investment in seinem Portfolio, genauso wie eine Aktie oder ein Fonds, erhält er eine objektivere Sicht auf das Geschehen an den Märkten. Inhaltsverzeichnis 1. Warum Sie mehrere Strategien gleichzeitig traden sollten! 2. Weniger Volatilität in der Kapitalkurve 3. Wie viele Strategien sollte ich gleichzeitig traden? 4. Kann man auch mit kleinen Konten diversifizieren? 5. Wann sollte ich anfangen, einen Hebel zu benutzen? 6. Forex-Trading ist ein Business

Dynamic Trading Indicators Mark Helweg 2002-10-15 Using the insights that stem from value charts and price action profiles, Dynamic Trading Indicators shows traders how to develop systems

and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, *Dynamic Trading Indicators* provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research new trading system technology. David C. Stendahl is cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of *Profit Strategies: Unlocking Trading Performance with Money Management*.

Trading Price Action Trading Ranges Al Brooks 2012-01-03 Praise for Trading Price Action Trading Ranges "Al Brooks has written a book every day trader should read. On all levels, he has kept trading simple, straightforward, and approachable. By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success." —Noble DraKoln, founder, SpeculatorAcademy.com, and author of *Trade Like a Pro* and *Winning the Trading Game* "A great trader once told me that success was a function of focused energy. This mantra is proven by Al Brooks, who left a thriving ophthalmology practice to become a day trader. Al's intense focus on daily price action has made him a successful trader. A born educator, Al also is generous with his time, providing detailed explanations on how he views daily price action and how other traders can implement his ideas with similar focus and dedication. Al's book is no quick read, but an in-depth road map on how he trades today's volatile markets, complete with detailed strategies, real-life examples, and hard-knocks advice." —Ginger Szala, Publisher and Editorial Director, *Futures* magazine Over the course of his career, author Al Brooks, a technical analysis contributor to *Futures* magazine and an independent trader for twenty-five years, has found a way to capture consistent profits regardless of market direction or economic climate. And now, with his new three-book series—which focuses on how to use price action to trade the markets—Brooks takes you step by step through the entire process. In order to put his methodology in perspective, Brooks examined an essential array of price action basics and trends in the first book of this series, *Trading Price Action TRENDS*. Now, in this second book, *Trading Price Action TRADING RANGES*, he provides important insights on trading ranges, breakouts, order management, and the mathematics of trading. Page by page, Brooks skillfully addresses how to spot and profit from trading ranges—which most markets are in, most of the time—using the technical analysis of price action. Along the way, he touches on some of the most important aspects of this approach, including trading breakouts, understanding support and resistance, and making the most informed entry and exit decisions possible. Throughout the book, Brooks focuses primarily on 5 minute candle charts—all of which are created with TradeStation—to illustrate basic principles, but also discusses daily and weekly charts. And since he trades more than just E-mini S&P 500 futures, Brooks also details how price action can be used as the basis for trading stocks, forex, Treasury Note futures, and options.

The Basics of The Forex Markets Steven Drummond 2015-04-11 The basics of the Forex markets e-book, video tutorials and website content was put together by myself to teach regular people how to trade the markets. I am not a banker, I am not an x-Wall street guy, and I have never traded in large institutions with thousands to spend on their training programmes! I am just like you, I used to be an employee, working as a chef for 17 years, covering 60 - 70 hours a week, split shifts, weekends and all of the holidays! I stumbled across Forex trading and knew that is my way out, It was not easy! It

took me over a year before I got any real education on Forex, it looked so easy at the start! But once I had blown 2 accounts by this point, it was time to get educated or quit! I didn't want to quit because I saw the opportunity Forex trading can offer, so I persevered and never stopped learning to this day, I make it my mission to always educate myself further, every day I will learn something new and it is not just about Forex, I learn about business, real estate investing and sales marketing. You should make that one of your missions to always educate yourself, it is the only way to get on in life! Anyway, it took me a while to realise that the markets are a little bit harder to read than initially perceived, with all of the news events, manipulation and uncertainty. It took many more months of learning and practice to become consistent in my trading, but persevere and you can get there! So if you are like me, like many others out there trying to learn on their own, I have been there, I have struggled on, dealt with all of the emotions of being a retail trader, no boss to give you a hard time if your trading performance does not meet up with the institutions demands. You have to learn to be your own boss, research your trading performance, kick your butt if you deviate from the plan and push yourself to the next level! I am self taught and you are going to do the same, so why not learn from somebody that has walked down the road you are about to embark on, but I'll help you shorten your learning curve! We all know what opportunities Forex trading can bring, every benefit is unique to you. It is up to you how these rewards will manifest into your life, you must put in some effort to see any rewards. Success is the pay off in exchange for the amount of time and effort devoted to a task, it is said that you will need to devote 10,000 hours of practice before becoming a master of your endeavor! I remember my first Forex training course, it was \$900 and it only covered the basics, it was O.K at the time, but there was so much more I had to learn! I later subscribed with another guy for \$650 one off fee and a recurring \$90 monthly subscription charge to trade with him twice a week, I did this for one and a half years! That is my two main ones, but I have done a trading psychology course and many many more. Looking back, thinking that the amount of money I have actually paid for fragments of information is kind of sickening. I am a firm believer of that you should pay for your education and pay well when you can, because you have to be cautious about the free information out there, but we want information for a reasonable price, have it all in one place and have life time updates on new trading techniques. So this is what I propose; Learn from somebody that came from the bottom and had nobody to help but his eagerness and drive. If you become one of my loyal members, I will teach you about the basics of the Forex markets, with lifetime updates. This is my website, Forex trading and teaching is my life! In exchange for a small one off fee, for the time and effort devoted to building the tactical trader boot camp website, I will devote to giving you everything you need to know getting started in Forex trading, it will give you the insights into Forex trading. I won't teach you every single thing, I do not use every single indicator, I will not explain every single indicator, trading patterns, or trading algorithms. I will simply teach you what you need to know and give you the tools you need to become your own success story! I cut out all of the fluff, no B.S, and as long as you can put up with my Scottish accent, I think we will be just fine! So become a member of the boot camp and start learning today!

Naked Forex Alex Nekritin 2012-03-06 A streamlined and highly effective approach to trading without indicators Most forex traders rely on technical analysis books written for stock, futures, and option traders. However, long before computers and calculators, traders were trading naked. Naked trading is the simplest (and oldest) trading method. It's simply trading without technical indicators, and that is exactly what this book is about. Traders who use standard technical indicators focus on the indicators. Traders using naked trading techniques focus on the price chart. Naked trading is a simple and superior way to trade and is suited to those traders looking to quickly achieve expertise with a trading method. Offers a simpler way for traders to make effective decisions using the price chart Based on coauthor Walter Peters method of trading and managing money almost exclusively without indicators Coauthor Alexander Nekritin is the CEO and President of TradersChoiceFX, one of the largest Forex introducing brokers in the world Naked Forex teaches traders how to profit the simple naked way!

Differential Diagnosis in Orthopaedic Oncology Adam Greenspan 2007 This volume presents both the radiologist's and the pathologist's approach to differential diagnosis of musculoskeletal tumors and tumor-like lesions and details the radiologic and histopathologic features helpful in confirming a diagnosis. The book is illustrated with over 1,200 radiographs, CT and MR images, full-color photomicrographs, and schematic drawings. Tables list important diagnostic features, and schematic drawings summarize both radiologic and pathologic differential diagnoses. This edition

includes state-of-the-art information on PET, thin-section CT, 3-D CT, MRI, enzyme histochemistry, immunohistochemistry, flow cytometry, cytogenetics, and molecular cytogenetics. The new co-author, Gernot Jundt, was instrumental in revising the WHO classification of musculoskeletal lesions. Illustrations have been updated, and improved captions begin with the diagnosis.

Trading on Expectations Brendan Moynihan 1997-04-29 Successful traders know that before stepping into the wilderness of the speculative markets, you need a solid understanding of basic market behavior. But the conventional methods often fall short of providing this basic knowledge. Academics assert one thing, economists and fundamental analysts another, and technicians something altogether different. And, seemingly, none of them agree with each other. *Trading on Expectations* explores the ideas behind the dominant schools of analysis, and shows the validity of each and demonstrates how each, albeit at different times, reflects what the market is doing. Sometimes market prices can be predicted using the economists' models; sometimes prices follow a "random walk" as the academics claim; at other times price is responding to the patterns, trendlines, and breakout levels identified by technicians. In this groundbreaking new book, Brendan Moynihan draws on his experience as a trader, analyst, and researcher to develop a method that focuses on the prime mover of prices and incorporates the strengths of the conventional methods. Drawing on the participant-focused Chicago Board of Trade Market Profile and the psychologically focused Contrary Opinion, he synthesizes and modifies the best in these different methods and skillfully creates a single model of market behavior -- the Sentiment-Activity Model. Moynihan carefully describes how the combination of participants' actions and expectations about the future determines the direction of prices in the markets. This dynamic interaction between actions and expectations explains the emergence of the dominant phases of the markets: price trends, trading ranges, and trend reversals. What's more, Moynihan's unique model enables you to pinpoint the combinations of activity and sentiment that determine the three states of the market as they unfold, in time frames ranging from a single day to several weeks or months. The Sentiment-Activity Model also provides a way to determine how the market is likely to respond to various news items, explaining the apparent anomalies of price behavior in the process. To document his findings, Moynihan provides illuminating applications over a multi-month time period to four markets: Treasury bonds, soybeans, deutsche marks, and crude oil. Offering a new, more powerful way of understanding the dynamics of market behavior, *Trading on Expectations* is a must-read for all traders in stocks, options, and futures. "Brendan Moynihan has studied the 'real' economists and found the truth about how human action and individual motivations determine market prices. *Trading on Expectations* combines the best of the traders' economic and technical tools. I recommend this book to anyone who wants to learn how to trade more successfully." --Brian S. Wesbury Chief Economist Griffin, Kubik, Stephens & Thompson and former chief economist Joint Economic Committee of the United States Congress "In today's fast-forward society, readers of this book can quickly absorb the real essence of *Trading Reality* that takes years to understand. In fact, many traders have come and gone without realizing how successful traders operate. It could take years to gather the perspectives of this book. The Hightower Report plans to use the book for training its analysts!" --David C. Hightower, Editor The Hightower Report "Where most market texts simply reheat and serve the same old approaches, *Trading on Expectations* offers a fresh perspective by combining the best of several market disciplines into a logical theory and workable system for trading all financial markets." --Michael Zentz Director of Fixed Income Research Pegasus Econometric Group

The RDS Forex System Michael Radkay 2012-02-27 Inside a unique system that allows you to identify and trade key turning points in the forex market. The financial markets are in a constant state of affirming, breaking, and developing new support and resistance areas. Traders use a variety of methods to project support and resistance points based on past price action. However, the question of whether those areas will hold or break in real time is a much more difficult calculation. In *The RDS Forex System*, former pit trader Michael Radkay provides forex traders with a unique system for identifying support and resistance zones in the foreign currency market and developing

profitable trading strategies around those zones. The system uses market volatility, momentum, and chart patterns to calculate support and resistance zones. As prices reach a specific zone objective, trading strategies are put in place to profit from the next movement. The book will show how this system gives traders a continuous sense of the market's directional bias, identifies potential turning points, and recommends levels to take profits off the table. Highlights the Rotating Directional System (RDS), a computer-based, longer-term application of the methodology used by many successful pit traders Discusses how to use a variety of indicators to identify support and resistance areas Reveals strategies employed to profit from market swings The RDS Forex System is an ideal guide for retail traders actively involved in the forex market.

Trading Price Action Trends Al Brooks 2011-11-29 A practical guide to profiting from institutional trading trends The key to being a successful trader is finding a system that works and sticking with it. Author Al Brooks has done just that. By simplifying his trading system and trading only 5-minute price charts he's found a way to capture profits regardless of market direction or economic climate. His first book, *Reading Price Charts Bar by Bar*, offered an informative examination of his system, but it didn't allow him to get into the real nuts and bolts of the approach. Now, with this new series of books, Brooks takes you step by step through the entire process. By breaking down his trading system into its simplest pieces: institutional piggybacking or trend trading (the topic of this particular book in the series), trading ranges, and transitions or reversals, this three book series offers access to Brooks' successful methodology. *Price Action Trends Bar by Bar* describes in detail what individual bars and combinations of bars can tell a trader about what institutions are doing. This is critical because the key to making money in trading is to piggyback institutions and you cannot do that unless you understand what the charts are telling you about their behavior. This book will allow you to see what type of trend is unfolding, so can use techniques that are specific to that type of trend to place the right trades. Discusses how to profit from institutional trading trends using technical analysis Outlines a detailed and original trading approach developed over the author's successful career as an independent trader Other books in the series include *Price Action Trading Ranges Bar by Bar* and *Price Action Reversals Bar by Bar* If you're looking to make the most of your time in today's markets the trading insights found in *Price Action Trends Bar by Bar* will help you achieve this goal.

Technical Analysis of the Currency Market Boris Schlossberg 2006-07-28 Proven currency-specific trading strategies from one of today's top currency analysts "If you trade currency, then you need to have this book on your desk. It's the only book you need for technical analysis of the fastest-moving market on the planet." -Rob Booker, Currency Trader, W.R. Booker & Company "In plain English, Schlossberg lays out the basics in using technical analysis to trade foreign currencies, from the fundamentals of how the FX market works to the variety of technical strategies and trade management techniques traders can employ. Along the way, he offers entertaining examples and observations as well as simple, easy-to-read charts and diagrams. Anyone interested in getting started in the hugely popular FX market would do well to begin with this book." -Sarah Rudolph, Executive Editor, SFO Magazine "Boris Schlossberg has done a fabulous job with this book. It's packed with insightful tips and strategies that are sure to save traders a lot of time and money." -Cory Janssen, Co-Founder, Investopedia.com "Schlossberg's book is a great resource for traders just starting out in currency markets. His focus on simplicity is critical for a new trader's education on how to make money." -Andrew B. Busch, Global FX Strategist, BMO Financial Group

A Practical Introduction to Day Trading Don Charles 2018-11-14 Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations. However, many of these new traders lose their money in attempting to do so. The reason for this is often because these new traders lack any fundamental understanding of financial markets, they cannot interpret any data, and they have no strategy for trading. Trading in markets is really about deploying strategies and managing risks. Indeed, successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses. The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets, and assist them in gaining the technical skills required to profit from trading. It represents a beginner's guide to trading, with a core focus on stocks and currencies.

Day Trading Forex with S&R Zones - Forex Trading System Laurentiu Damir 2017-09-02 Note: This material includes the "50 pips a day forex strategy" book also Day Trading Forex with S&R Zones Forex Price Action Day Trading System to make 1000 pips per month with. -Low Risk - High Reward Trading (1:3 Risk-Reward ratio) -Clear entry, stop loss and exit levels -Extremely profitable - Timeframes used: 1 hour and 4 hour Components: -Moving averages -Support and resistance levels - Price patterns -Trendlines Contact: damirlaurentiu@yahoo.com

Day Trading Forex with Price Patterns Laurentiu Damir 2017-09-08 Note: this book also includes the "50 pips a day forex strategy" Day Trading Forex with Price Patterns Forex Price Action Day Trading System Make 1000 pips per month or more Timeframes used - 30 minutes-4 hours Components Price Action Trends Price Patterns Support and Resistance Levels Summary The book contains a powerful price action day trading system that focuses on very strong patterns that price makes. These patterns are illustrated with great detail inside the book, but more importantly, the logic behind every pattern is described in a way that the trader will learn exactly what is happening with the buyers and sellers, which of them are stronger at that time. Knowing this, the trader can then make the best trading decisions. The system looks at the bigger picture to find the direction in which to trade, then it uses the 30 minutes chart to spot price patterns and day trade them with very good success. It doesn't use technical indicator of any kind. It also has very well defined entry, stop loss and exit rules that enables the trader to make the maximum out of every trade

Trading Price Action Reversals Al Brooks 2011-12-27 A detailed guide to profiting from trend reversals using the technical analysis of price action. The key to being a successful trader is finding a system that works and sticking with it. Author Al Brooks has done just that. By simplifying his trading system and trading only 5-minute price charts he's found a way to capture profits regardless of market direction or economic climate. His first book, Reading Price Charts Bar by Bar, offered an informative examination of his system, but it didn't allow him to get into the real nuts and bolts of the

approach. Now, with this new series of books, Brooks takes you step by step through the entire process. By breaking down his trading system into its simplest pieces: institutional piggybacking or trend trading, trading ranges, and transitions or reversals (the focus of this book), this three book series offers access to Brooks' successful methodology. *Trading Price Action Reversals* reveals the various types of reversals found in today's markets and then takes the time to discuss the specific characteristics of these reversals, so that you can use them in your everyday trading endeavors. While price action analysis works on all time frames, there are different techniques that you can use in trading intraday, daily, weekly and monthly charts. This, among many other issues, is also addressed throughout these pages. Offers insights on how to handle volatility and sharp reversals. Covers the concept of using options when trading certain charts. Examines how to deal with the emotions that come along with trading. Other books in the series include *Trading Price Action Trends* and *Trading Price Action Trading Ranges*. If you're looking to make the most of your time in today's markets the trading insights found in *Trading Price Action Reversals* will help you achieve this goal.

[Forex Range Trading with Price Action](#) Laurentiu Damir 2017-09-07 Note: This material includes the "50 pips a day forex trading strategy" Forex Range Trading With Price Action. Lucrative price action range trading system with 95% rate of success. Timeframes - 1 hours and 4 hours. If you trade with the trend like the majority of traders out there, then you probably know by now that following the trend and jumping in the market when a good opportunity shows itself represents the safest and most lucrative approach a trader can have if he wants to be successful. However, most of the times, a problem appears when the trend pauses and the market starts to move sideways, causing so many trend following traders to lose most or all of their previous hard earned profits. This book presents a complete forex trading system for trading a range bound market. It goes from explaining how to spot in time that price is about to develop a trading range, to managing your stop loss levels and exiting the trade. This is all done just by reading the price action, this system does not include any technical indicators. You will learn how to recognize early the shift from trending to sideways movement that will keep you away from losing trades. You will learn how to identify a range early and trade it successfully, with clear entry, stop loss, exit levels and with very good risk reward ratio.

Administrative Art With Bear And Bull In Forex - Advanced Level "Do not take action without reading this series." This book helps individual investors to learn how to trade EXCHANGE and reading graphics well. In this book series that I prepared, the training set that will be a profitable investor for education will guide the investors and you can safely enter the transaction. I realized how difficult it was for new investors to find correct information, but it was more difficult to find any training that could be applied to our own trade. It is impossible to come across a clean and tidy option to Forex and Binary Options right on the Internet. The extent to which the information you can find reflects the truth is uncertain. It only included a few resources on forex - everything was messy. There was no place for forex currency for new provisions. We were left to learn information such as MACD, trade psychology on another website, and risk management on a 10. website. Forex is one of the newest people who have heard about the Forex Exchange trade, but it is meant to be heard more in these trading years but not fully described in the market. For more than 10 years, I have prepared this training series for you with Millions of Knowledge to Learn Skills in your transactions in order to grow Open Market Dynamics by protecting our capital with the knowledge and experience I gained by reading a Lots training article on how to trade in the Forex Exchange Market. Everything is here to ensure the coordination between the trading strategies, market analysis and the psychology triangle in the educational series that is now included in this course content. You can have super trader abilities or market magic. You will not hear mythological claims to earn a quadrillion dollars a day, I explained how you can steadily increase your investment. You will be able to perform it in the future according to the trading plans you make. This book is a reliable and neat source for you traders who are all the money in the forex market from their bad trading decisions or innocents of the retail forex industry. Always considering the first trade rule: The First Rule of Trade: Don't Explode. Live to trade another day .. BOOK SERIES

The Art and Science of Technical Analysis Adam Grimes 2012-05-31 A breakthrough trading book that provides powerful insights on profitable technical patterns and strategies The Art and Science of Technical Analysis is a groundbreaking work that bridges the gaps between the academic view of markets, technical analysis, and profitable trading. The book explores why randomness prevails in markets most, but not all, of the time and how technical analysis can be used to capture statistically

validated patterns in certain types of market conditions. The belief of the book is that buying and selling pressure causes patterns in prices, but that these technical patterns are only effective in the presence of true buying/selling imbalance. The Art and Science of Technical Analysis is supported by extensive statistical analysis of the markets, which will debunk some tools and patterns such as Fibonacci analysis, and endorse other tools and trade setups. In addition, this reliable resource discusses trader psychology and trader learning curves based on the author's extensive experience as a trader and trainer of traders. Offers serious traders a way to think about market problems, understand their own performance, and help find a more productive path forward Includes extensive research to validate specific money-making patterns and strategies Written by an experienced market practitioner who has trained and worked with many top traders Filled with in-depth insights and practical advice, The Art and Science of Technical Analysis will give you a realistic sense of how markets behave, when and how technical analysis works, and what it really takes to trade successfully.

Price Action Breakdown Laurentiu Damir 2017-09-07 Learn to trade with pure price action No technical indicators / No candlestick patterns Price Action Breakdown is a book on pure price action analysis of financial markets. It covers concepts, ideas and price action trading methods that you most likely haven't seen anywhere else. The knowledge contained can be used to trade any financial market such as Forex, Futures, Stocks, Commodities and all major markets. It is based on trading the pure price action using key supply and demand levels. Reading, learning and applying the concepts and trading methods described will greatly improve your trading in all aspects, starting from analyzing the price movements on your charts to trade entry and exit. You will get familiar with concepts like value of price, control price, excess price, moving supply and demand levels. It comes with an exclusive price action trading strategy that will add great value to your trading. The material is best suited for the analytical type of traders, who are willing to do the work in order to become a successful trader. It is not suited for the type of trader looking to automate trading or relying on an indicator to make trading decisions. WHAT WILL YOU LEARN BY READING THIS BOOK ? How to find the bulk of trading volume by analyzing price action movements alone, without the use of additional tools or technical indicators. This will, in turn, reveal the location of the value of price on your charts to provide valuable insights regarding extremely powerful support and resistance areas that you can take advantage of in real trading conditions. Proven price action concepts and techniques to find the market trend, thoroughly analyze its overall strength and make the most informed judgments possible about its termination. You will learn how to use the value of price to find out very early when the trend will end and predict with high accuracy where the market will be heading next. You will be able to develop a clear market structure just by interpreting the price movements on your charts. Regardless of the time frame you use for trading or the market you are trading, the future price movements will start to trade at and around your predicted trading areas. The price action analysis will allow you to see the big picture of the market at all times. You will be trading with an edge and with confidence. How to discover the footprint of the big financial institutions entering the market by doing exclusive price action analysis of the current trend to find supply and demand zones created by the traders with big volumes that move the markets. Working, highly profitable tested trading strategy that you can apply to the Forex market, and all the other major liquid markets where technical analysis can be applied. The power of this type of trading is that it is based on the underlying supply and demand dynamics, behind the price movements. These are just an intermediary that we interpret to find what we are really interested in: where are the buying and selling orders situated in the market. Perhaps the most important, you will learn a complete thought process that will make you a very versatile trader, able to adapt to the constantly changing market conditions. This will change the way you see the market and the way you trade it. If all described above sound like hard work, do not worry. In a short time period, with a little bit of practice you will be able to interpret what price action is telling you without much effort. The methods explained in the book will give you the edge you need in order to become consistently

profitable while trading Forex, Futures, Stocks, Options, Commodities, Indices and all the liquid markets.
