**Medieval Art, Architecture and Archaeology in Cambridge** Gabriel Byng 2022-03-09 Medieval Art, Architecture and Archaeology in Cambridge explores the archaeology, art, and architecture of Cambridge in the Middle Ages, a city marked not only by its exceptional medieval university buildings but also by remarkable parish churches, monastic architecture, and surviving glass, books, and timber work. The chapters in this volume cover a broad array of medieval, and later, buildings and objects in the city and its immediate surrounds, both from archaeological and thematic approaches. In addition, a number of chapters reflect on the legacy and influence medieval art and architecture had on the later city. Along with medieval colleges, chapels, and churches, buildings in villages outside the city are discussed and analysed. The volume also provides detailed studies of some of the most important master masons, glassmakers, and carpenters in the medieval city, as well as of patrons, building types, and institutional development. Both objects and makers, patrons, and users are represented by its contents. The volume sets the archaeological and art historical analysis in its socio-economic context; medieval Cambridge was a city located on major trade routes and with complex social and institutional differences. In an academic field increasingly shaped by interdisciplinary interest in material culture, Medieval Art, Architecture and Archaeology in Cambridge marks a major new contribution to the field, focussing on the complexity, variety, and specificity of the buildings and objects that define our understanding of Cambridge as a medieval city.

**The Black Death** Philip Ziegler 2009-04-07 A series of natural disasters in the Orient during the fourteenth century brought about the most devastating period of death and destruction in European history. The epidemic killed one-third of Europe's people over a period of three years, and the resulting social and economic upheaval was on a scale unparalleled in all of recorded history. Synthesizing the records of contemporary chroniclers and the work of later historians, Philip Ziegler offers a critically acclaimed overview of this crucial epoch in a single masterly volume. The Black Death vividly and comprehensively brings to light the full horror of this uniquely catastrophic event that hastened the disintegration of an age.

**The Road Not Taken** Frank McLynn 2012-07-05 Britain has not been successfully invaded since 1066; nor, in nearly 1,000 years has it known a true revolution - one that brings radical, systemic and enduring change. The contrast with Britain's European neighbours, France, Germany, Italy, Spain, Greece, Russia, is dramatic - all have been convulsed by external warfare, revolution and civil war and experienced fundamental change to their ruling elites or social and economic structures. Frank McLynn takes seven occasions when Britain came closest to revolution: the Peasants' Revolt of 1381; the Jack Cade rebellion of 1450; the Pilgrimage of Grace in 1536; the English Civil Wars of the 1640s; the Jacobite Rising of 1745-6; the Chartist Movement of 1838-48; and the General Strike of 1926. Why, at these dramatic turning points, did history finally fail to turn? McLynn examines Britain's history and themes of social, religious and political change to explain why social turbulence stopped short of revolution on so many occasions.

*The Dominicans in the British Isles and Beyond* Richard Finn 2023-02-28 Eight centuries have passed since the Dominicans first arrived in England. This book tells their fascinating story. England, Winter, 1348. As the Black Death continues its devastating course across England, the quarantined people of Develish question whether they are the only survivors. But first, to prepare for the wasteland outside, one courageous man must venture out alone. Thaddeus Thurkell, a free-thinking, educated serf, goes in search of supplies and news. A compelling leader, he and his companions quickly throw off the shackles of serfdom and set their minds to ensuring Develish's future—and freedom for its people. But what use is freedom that cannot be gained lawfully? When Lady Anne and Thaddeus conceive an audacious plan to secure her people's independence, neither foresees the life-threatening struggle over power, money and religion that follows . . .

**Integrative Problem-Solving in a Time of Decadence** George Christakos 2010-12-10 Presents a unique study of Integrative Problem-Solving (IPS). The consideration of 'Decadence' is essential in the scientific study of environmental and other problems and their rigorous solution, because the broad context within which the problems emerge can affect their solution. Stochastic reasoning underlines the conceptual and methodological framework of IPS, and its formulation has a mathematical life of its own that accounts for the multidisciplinary of real world problems, the multisourced uncertainties characterizing their solution, and the different thinking modes of the people involved. Only by interpolating between the full range of disciplines (including stochastic mathematics, physical science, neuropsychology, philosophy, and sociology) and the associated thinking modes can scientists arrive at a satisfactory account of problem-solving, and be able to distinguish between a technically complete problem-solution, and a solution that has social impact.

**Encyclopedia of the Black Death** Joseph P. Byrne 2012-01-16 This encyclopedia provides 300 interdisciplinary, cross-referenced entries that document the effect of the plague on Western society across the four centuries of the second plague pandemic, balancing medical history and technical matters with historical, cultural, social, and political factors. Encyclopedia of the Black Death is the first A-Z encyclopedia to cover the second plague pandemic, balancing medical history and technical matters with historical, cultural, social, and political factors and effects in Europe and the Islamic world from 1347-1770. It also bookends the period

with entries on Biblical plagues and the Plague of Justinian, as well as modern-era material regarding related topics, such as the work of Robert Koch and Louis Pasteur, the Third Plague Pandemic of the mid-1800s, and plague in the United States. Unlike previous encyclopedic works about this subject that deal broadly with infectious disease and its social or historical contexts, including the author's own, this interdisciplinary work synthesizes much of the research on the plague and related medical history published in the last decade in accessible, compellingly written entries. Controversial subject areas such as whether "plague" was bubonic plague and the geographic source of plague are treated in a balanced and unbiased manner.

**The Social Life of Coffee** Brian Cowan 2008-10-01 What induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

**The Epidemics of the Middle Ages** Justus Friedrich Carl Hecker 1838

**Citizen of London** Michael McCarthy 2022-09-29 The extraordinary story of Richard Whittington, from his arrival in London as a young boy to his death in 1423, against a backdrop of plague, politics and war; turbulence between Crown, City and Commons; and the unrelenting financial demands of Richard II, Henry IV and Henry V, to whom Whittington was mercer, lender and fixer. A man determined to follow his own path, Whittington was a significant figure in London's ceaseless development. As a banker, Collector of the Wool Custom, King's Council member and four-time mayor, Whittington featured prominently in the rise of the capital's merchant class and powerful livery companies. Civic reformer, enemy of corruption and author of an extraordinary social legacy, he contributed to Henry V's victory at Agincourt and oversaw building works at Westminster Abbey. In London, Whittington found his 'second' family: a mentor, Sir Ivo Fitzwarin, and an inspirational wife in Fitzwarin's daughter Alice. Today's Dick Whittington pantomimes, enjoyed by millions, have a grain of truth in them, but the real story is far more compelling--minus that sadly mythical cat.

**What Disease was Plague?** Ole Jørgen Benedictow 2010 In this monograph, the alternative theories to the established bubonic-plague theory as to the microbiological identity of historical plague epidemics are intensively discussed in the light of the historical sources and the medical primary research and standard works.

*A View of Epping Forest* Nicholas Hagger 2012-05 Epping Forest was given to the public in 1878. It has many historical and literary associations involving, for example, Harold II, Henry VIII, Elizabeth I, Shakespeare, Tennyson, Clare and Churchill. Nicholas Hagger came to Epping Forest during the war. As a boy he knew Sir William Addison, long recognised as an authority on the Forest, and saw Churchill speak in his village in 1945. He grew up against the background of the Forest and visited it regularly when he was living elsewhere. He returned and became the proprietor of three private schools in the area, founding his own school in 1989. The Forest has come into many of his poems and other works. In Part One of this book he conveys the history of Epping Forest in the times of the Celts and Romans, Anglo-Saxons and Normans, Medievals and Tudors, and enclosers and loppers. In Part Two he shows how history has shaped the Forest places he grew up with: Loughton, Chigwell, Woodford, Buckhurst Hill, Waltham Abbey, High Beach, Upshire, Epping, the Theydons and Chingford Plain. An Appendix contains some of his poems about these places. His blending of history, recollection and poetic reflection presents a rounded view of the Forest. Using a technique of objective narrative he developed in other works and drawing on personal experience to give the flavour of a personal memoir, he evokes the spirit of the Forest through its best-loved places and wildlife, and brings the Forest alive through his historical perspective, evocation of Nature and vivid writing. Nicholas Hagger's Collected Poems, Classical Odes and his two poetic epics, Overlord and Armageddon, are also published by O Books.

*An Urban History of The Plague* Karen Jillings 2018-04-17 As a medical, economic, spiritual and demographic crisis, plague affected practically every aspect of an early modern community whether on a local, regional or national scale. Its study therefore affords opportunities for the reassessment of many aspects of the pre-modern world. This book examines the incidence and effects of plague in an early modern Scottish community by analysing civic, medical and social responses to epidemics in the north-east port of Aberdeen, focusing on the period 1500-1650. While Aberdeen's experience of plague was in many ways similar to that of other towns throughout Europe, certain idiosyncrasies in the city make it a particularly interesting case study, which challenges several assumptions about early modern mentalities.

*A Message of Hope from the Angels* Lorna Byrne 2013-10-08 Describes how guardian angels are present, supporting and protecting everyone, and how they can be called upon for their help in making life happier and more fulfilling.

The Black Prince Michael Jones 2018-05-01 As a child he was given his own suit of armor; at the age of sixteen, he helped defeat the French at Crécy. At Poitiers, in 1356, his victory over King John II of France forced the French into a humiliating surrender that marked the zenith of England's dominance in the Hundred Years War. As lord of Aquitaine, he ruled a vast swathe of territory across the west and southwest of France, holding a magnificent court at Bordeaux that mesmerized the brave but unruly Gascon nobility and drew them like moths to the flame of his cause. He was Edward of Woodstock, eldest son of Edward III, and better known to posterity as "the Black Prince." His military achievements captured the imagination of Europe: heralds and chroniclers called him "the flower of all chivalry" and "the embodiment of all valor." But what was the true nature of the man behind the chivalric myth, and of the violent but pious world in which he lived?

*The Decline of Serfdom in Late Medieval England* Mark Bailey 2014 An exciting, fresh look at one of the most important questions of medieval scholarship - the decline of serfdom and its implications.

**The Well of Loneliness** Radclyffe Hall 2015-04-23 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

**Shadowlands: A Journey Through Britain's Lost Cities and Vanished Villages** Matthew Green 2022-07-19 One of Literary Hub's Most Anticipated Books of 2022 A "brilliant London historian" (BBC Radio) tells the story of Britain as never before—through its abandoned villages and towns. Drowned. Buried by sand. Decimated by plague. Plunged off a cliff. This is the extraordinary tale of Britain's eerie and remarkable ghost towns and villages; shadowlands that once hummed with life. Peering through the cracks of history, we find Dunwich, a medieval city plunged off a cliff by sea storms; the abandoned village of Wharram Percy, wiped out by

the Black Death; the lost city of Trellech unearthed by moles in 2002; and a Norfolk village zombified by the military and turned into a Nazi, Soviet, and Afghan village for training. Matthew Green, a British historian and broadcaster, tells the astonishing tales of the rise and demise of these places, animating the people who lived, worked, dreamed, and died there. Traveling across Britain to explore their haunting and often-beautiful remains, Green transports the reader to these lost towns and cities as they teeter on the brink of oblivion, vividly capturing the sounds of the sea clawing away row upon row of houses, the taste of medieval wine, or the sights of puffin hunting on the tallest cliffs in the country. We experience them in their prime, look on at their destruction, and revisit their lingering remains as they are mourned by evictees and reimagined by artists, writers, and mavericks. A stunning and original excavation of Britain's untold history, *Shadowlands* gives us a truer sense of the progress and ravages of time, in a moment when many of our own settlements are threatened as never before.

**Brought Up Of Nought** Lynda J. Pidgeon 2019-12-08 Described as 'greedy and grasping, and raised from nothing', the Woodvilles have had a bad press. 'Brought Up of Nought' investigates the family origins, explains the rise and fall of the senior branch, and how the junior branch rose to the highest levels of court society after struggling to establish itself in Northamptonshire. The family originally rose to the status of 'baron', but lost land over time as it descended to the gentry; however, the medieval wheel of fortune was to turn dramatically in favour of the junior branch in Northamptonshire. Early in the 15th century, Richard, the son of Richard Woodville Esq., was placed in the service of John Duke of Bedford at his court in Rouen, which resulted in his secret marriage to the duke's young widow Jacquetta. In 1464, their daughter Elizabeth made an extraordinary marriage to Edward IV, which attracted great criticism, resulting in a period of slander that continues to this day. This book argues that the Woodville's blackened reputation was the result of a campaign by Richard, Earl of Warwick who was jealous and eager to retrieve his position as 'kingmaker'.

**The Great Mortality** John Kelly 2006-01-31 *La moria grandissima* began its terrible journey across the European and Asian continents in 1347, leaving unimaginable devastation in its wake. Five years later, twenty-five million people were dead, felled by the scourge that would come to be called the Black Death. The Great Mortality is the extraordinary epic account of the worst natural disaster in European history -- a drama of courage, cowardice, misery, madness, and sacrifice that brilliantly illuminates humankind's darkest days when an old world ended and a new world was born.

*The Black Death* 2013-01-01 This series provides texts central to medieval studies courses and focuses upon the diverse cultural, social and political conditions that affected the functioning of all levels of medieval society. Translations are accompanied by introductory and explanatory material and each volume includes a comprehensive guide to the sources' interpretation, including discussion of critical linguistic problems and an assessment of recent research on the topics covered. From 1348 to 1350 Europe was devastated by an epidemic that left between a third and one half of the population dead. This source book traces, through contemporary writings, the calamitous impact of the Black Death in Europe, with a particular emphasis on its spread across England from 1348 to 1349. Rosemary Horrox surveys contemporary attempts to explain the plague, which was universally regarded as an expression of divine vengeance for the sins of humankind. Moralists all had their particular targets for criticism. However, this emphasis on divine chastisement did not preclude attempts to explain the plague in medical or scientific terms. Also, there was a widespread belief that human agencies had been involved, and such scapegoats as foreigners, the poor and Jews were all accused of poisoning wells. The final section of the book charts the social and psychological impact of the plague, and its effect on the late-medieval economy.

**Stochastic Medical Reasoning and Environmental Health Exposure** George Christakos 2014-03-19 The validity of certain critical reasoning steps carried out during or on the sidelines of the environmental science, public health survey, medical experiment, population risk assessment, or disease space-time mapping under conditions of in situ uncertainty and space-time heterogeneity, is often not given sufficient attention and may even be out of the investigator's line of thought. For example, the technical complexity of an environmental exposure experiment may overshadow the logical assumptions made when moving from one phase of the experiment to the next, or the study of population risk assessment may focus on analytical and computational matters, whereas methodological and cultural factors are neglected. This book helps health investigators structure their thinking so that they avoid logical mistakes and argument pitfalls, and also gain new insights about reality, improve their awareness of the environment and context within which one's thinking takes place. Contents: Medical Sciences in the Age of Synthesis Reasoning Amidst Uncertainty The Role of Probability Space-Time Medical Mapping and Causation Modeling Looking Ahead Readership: Practitioners and researchers in environmental and health sciences. Keywords: Space-Time; Environment; Health; Medicine; Stochastic Reasoning; Decision-Making Key Features: This is the first book on space-time stochastic reasoning for environmental and health scientists This book helps practitioners to structure and organise their thinking and planning skills

**The Last Hours** Minette Walters 2018-04-17 For most, the Black Death is the end. For a brave few, it heralds a new beginning. Widowed by her husband's death from the pestilence, Lady Anne assumes control of his people's future—200 bonded serfs without rights of ownership to land. Strong, compassionate and resourceful—qualities she kept hidden from the husband she loathed and despised—Lady Anne chooses a bastard slave, Thaddeus Thurkell, to act as her steward. Together, they decide to quarantine Develish by bringing the serfs inside a defensible moat and sharing the available food amongst all. With this sudden overturning of the accepted social order, where serfs exist only to serve their lords, conflict arises when they're given a voice. Ignorant of what is happening in the world outside, they wrestle with themselves, with God and the terrible uncertainty of their futures. They fear starvation when their food runs out but they fear the pestilence more. Who amongst them has the courage to leave the safety of the demesne in search of supplies and news? And how safe is anyone in Develish when an unexplained murder threatens the uneasy status quo? In *The Last Hours* Minette Walters brings all her trademark intelligence to a totally new timeframe—creating a vivid and powerful drama through compelling characters whose journey readers will be drawn to. *The Last Hours* is an exciting new direction from an established best-selling author and Minette is currently writing the sequel.

**Church Building and Society in the Later Middle Ages** Gabriel Byng 2017-12-14 The first systematic study of the financing and management of parish church construction in England in the Middle Ages.

**The Cambridge History of Ireland: Volume 1, 600-1550** Brendan Smith 2018-03-31 The thousand years explored in this book witnessed developments in the history of Ireland that resonate to this day. Interspersing narrative with detailed analysis of key themes, the first volume in *The Cambridge History of Ireland* presents the latest thinking on key aspects of the medieval Irish experience. The contributors are leading experts in their fields, and present their original interpretations in a fresh and accessible manner. New perspectives are offered on the politics, artistic culture, religious beliefs and practices, social organisation and economic activity that prevailed on the island in these centuries. At each turn the question is asked: to what extent were these developments unique to Ireland? The openness of Ireland to outside influences, and its capacity to influence the world beyond its shores, are recurring themes. Underpinning the book is a comparative, outward-looking approach that sees Ireland as an integral but exceptional component of medieval Christian Europe.

[The Scourging Angel](#) Benedict Gummer 2009 "Nothing experienced in human history, before or since, eclipses the terror, tragedy and scale of the Black Death, the disease which killed millions of people in Medieval Europe. *The Scourging Angel* tells the story of Britain immediately before, during and after this catastrophe. It charts the progress of the plague from its inception in the Near East, through Europe, to the moment it strikes the south coast of England, and its subsequent devastating march northwards through the British Isles. It provides a full and original account of the aftermath of the pandemic." --Book Jacket.
