Alain Verbeke, *Journal of International Business Studies* The second edition of *Multinational Enterprises and the Global Economy* provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

Free Trade In The World Economy Herbert Giersch 2019-03-04 International trade policy is facing a cross-roads. This is creating uncertainty, impairing world economic growth. Unless a policy of more open markets is pursued, protectionism may well turn into a self-perpetuating and cumulative process. This is why the 1986 Kiel Conference was devoted to *Free Trade in the World Economy: Towards an Opening of Markets*. We felt that such a conference would help to stimulate policy discussion preceding the Uruguay Round under the auspices of the GATT and the moves within the European Community towards completing a common internal market by 1992.

Environmental Process and Production Methods (PPMs) in WTO Law David Sifonios 2018-01-30 This book examines the conditions under which PPM measures may be adopted under WTO law de lege lata and de lege ferenda. It analyses in detail the complex case law in this field and its evolution in the last 25 years, as well as the many doctrinal debates around PPM measures and their relevance in the light of the evolution of case law, both under the GATT and the TBT Agreement. Further, it also suggests an original approach to the interpretation of the relevant provisions of the GATT and the TBT Agreement in the context of PPM measures. The PPM issue has been one of the most debated topics in the trade and environment debate. Even though the US-Shrimp case showed that PPM measures are not prohibited per se under the GATT, many questions remain unanswered when it comes to the precise conditions under which environmental PPM measures are justifiable under WTO law, for example in the field of trade measures relating to climate change mitigation efforts, natural resources management policies and biodiversity conservation measures.

A Demon of Our Own Design Richard Bookstaber 2008-12-10 Inside markets, innovation, and risk Why do markets keep crashing and why are financial crises greater than ever before? As the risk manager to some of the leading firms on Wall Street—from Morgan Stanley to Salomon and Citigroup—and a member of some of the world's largest hedge funds, from Moore Capital to Ziff Brothers and FrontPoint Partners, Rick Bookstaber has seen the ghost inside the machine and vividly shows us a world that is even riskier than we think. The very things done to make markets safer, have, in fact, created a world that is far more dangerous. From the 1987 crash to Citigroup closing the Salomon Arb unit, from staggering losses at UBS to the demise of Long-Term Capital Management, Bookstaber gives readers a front row seat to the management decisions made by some of the most powerful financial figures in the world that led to catastrophe, and describes the impact of his own activities on markets and market crashes. Much of the innovation of the last 30 years has wreaked havoc on the markets and cost trillions of dollars. *A Demon of Our Own Design* tells the story of man's attempt to manage market risk and what it has wrought. In the process of showing what we have done, Bookstaber shines a light on what the future holds for a world where capital and power have moved from Wall Street institutions to elite and highly leveraged hedge funds.

The Future of the ASEAN Economic Integration Kiki Verico 2016-11-23 Verico discusses the ASEAN economic integration from dual perspectives of time span (trade, investment and finance) and framework (bilateral, sub-regional, regional and regional plus). The work is a comprehensive study of the integration in the wake of the ASEAN Economic Community (AEC)'s inauguration in late 2015. Examining various economic agreement levels from the ASEAN Free Trade Area (AFTA), Bilateral Free Trade Agreement (BFTA) and the AEC to financial integration in ASEAN, Verico attempts to envisage the future of ASEAN in completing its regional economic integration from trade to investment and finance. Verico argues that, in the absence of a customs union, ASEAN must utilize the open-regionalism frameworks of the ASEAN Plus One, ASEAN Plus Three, Regional Comprehensive Economic Partnership and others in order to shift its economic integration level in this way.

Trade Policies for Development and Transition David G Tarr 2016-12-29 The author has virtually incomparable experience in both providing trade policy advice to more than 25 countries on behalf of the World Bank and also publishing quality journal articles in most of those cases. In this volume, he focuses on his work on: (i) trade policies for countries making the transition from planned to market economies; (ii) his trade policy guideline papers for the World Bank on trade policies for poverty alleviation, uniform tariff policy, adjustment costs of trade liberalization, exchange rate overvaluation, globalization and technology transfer and rules of thumb on regional trade policies; (iii) multilateral, dynamic and environmental issues in trade policy using computable general equilibrium models; (iv) trade policy of the United States in the auto and steel industries; and (v) mathematical methods for modeling. The papers show an unusual combination of policy relevance, advice and impact, with rigor and international trade theory insights. The papers in this volume have appeared in many of the economics profession's more prestigious journals, including *Econometrica*, *Review of Economic Studies*, *Quarterly Journal of Economics*, *Economic Journal*, the *Journal of International Economics*, *International Economic Review*, *European Economic Review*, *Canadian Journal of Economics*, *Economic Inquiry*, the *Journal of Comparative Economic*, *Review of International Economics*, *World Economy*, the *Southern Economic Journal*, the *World Bank Economic Review*, the *Japanese Economic Review* and the *Latin American Journal of Economics*. In this book, the author elaborates on the articles by discussing some of the policy contexts for the requests for the work from developing and transition countries to the World Bank, the key trade theory or policy insights, policy recommendations and conclusions and the policy impacts.

The Structure and Evolution of Recent U.S. Trade Policy Robert E. Baldwin 2008-04-15 The trade policies addressed in this book have far-reaching effects on the world's increasingly interdependent economies, but until now little research has been devoted to them. This volume represents the first systematic effort to analyze specific U.S. trade policies, particularly nontariff measures. It provides a better understanding of how trade policies operate, how effective they are, and what their costs and benefits are to trading nations. The contributors chart the history of U.S. trade policy since World War II, analyze industry-specific trade barriers, and discuss the effects of tariff preferences and export-promoting policies such as export credits and domestic international sales corporations (DISCs). The final section of essays examines the worldwide impact of import policies, pointing out subtleties in industry-specific policies and providing insight into the levels of protection in developing countries. The contributors blend state-of-the-art economics with language that is accessible to the business community, economists, and policymakers. Commentaries accompany each paper.

Trade in Services in the Asia-Pacific Region Takatoshi Ito 2007-11-01 In recent years the tremendous growth of the service sector—including international trade in services—has outstripped that of manufacturing in many industrialized nations. As the importance of services has grown, economists have begun to focus on policy issues raised by them and have tried to understand what, if any, differences there are between production and delivery of goods and services. This volume is the first book-length attempt to analyze trade in services in the Asia-Pacific region. Contributors provide overviews of basic issues involved in studying the service sector; investigate the impact of increasing trade in services on the economies of Taiwan, Korea, and Hong Kong; present detailed analyses of specific service sectors (telecommunications, financial services, international tourism, and accounting); and extend our understanding of trade in services beyond the usual concept (measured in balance of payment statistics) to include indirect services and services undertaken abroad by subsidiaries and affiliates.
