Force XXI Training Program-digital Project 1999 "This report discusses the Army's initial research into converting Force 21 Training Program (FXXITP) products to meet the increasingly pressing training needs of digital battle staffs. The report describes the activities and outcomes of the U.S. Research Institute for Behavioral and Social Sciences (ARI) Force 21 Training Program Digital (FXXITP-D) project. The project developed an approach that supports the conversion of existing training products in order to meet new training needs. During the project, the conversion approach was employed to research and enact conventional to digital conversions of selected FXXITP

products, including tile Battle Staff Training System (BSTS) and Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation (COBRAS) vignettes, Brigade Staff Exercise (BSE), and Brigade and Battalion Staff Exercise (BBSE). In addition to tile conversion approach and prototype digital training products, tile project identified a number of lessons for tile continuing development of digital training and the digital force."--Stinet.

SQL Server Backup and Restore Shawn McGehee 2012 A database administrator's duties include ensuring that a database can be restored and recovered in the event of error or disaster. This book discusses how to perform backup and restore operations using SQL Server Management Studio (SSMS), basic T-SQL scripts and Red Gate's SQL Backup tool. Capturing backups using SSMS or simple scripts is fine for one-off backup operations, but any backups that form part of the recovery strategy for any given database must be automated with some built-in checks that, for example, alert the responsible database administrator immediately if a problem arises. The tool of choice in this book for backup automation is Red Gate SQL Backup. Building an automated solution will take a lot of work, but this book offers some advice on possible options, such as PowerShell scripting, T-SQL scripts and SQL Server Agent jobs. --
