*Educated* Tara Westover 2018-02-20 #1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of

Trust Domenico Starnone 2021-10-14 A FINANCIAL TIMES 'BEST BOOK OF THE WEEK' CHOICE A sharp, breath-taking exploration of love and relationships. Pietro and Teresa's love affair is tempestuous and passionate. After yet another terrible argument, she gets an idea: they should tell each other something they've never told another person, something they're too ashamed to tell anyone. In this way, Teresa thinks, they will remain intimately connected forever. A few days after sharing their shameful secrets, they break up. Not long after, Pietro meets Nadia, falls in love, and proposes. But the shadow of the secret he confessed to Teresa haunts him, and Teresa herself periodically reappears, standing at the crossroads of every major moment in his life. Or is it he who seeks her out? Trust asks how much we are willing to bend to show the world our best side, knowing full well that when we are at our most vulnerable we are also at our most dangerous.

*A Primer on Mathematical Modelling* Alfio Quarteroni 2020-10-09 In this book we describe the magic world of mathematical models: starting from real-life problems, we formulate them in terms of equations, transform equations into algorithms and algorithms into programs to be executed on computers. A broad variety of examples and exercises illustrate that properly designed models can, e.g.: predict the way the number of dolphins in the Aeolian Sea will change as food availability and fishing activity vary; describe the blood flow in a capillary network; calculate the PageRank of websites. This book also includes a chapter with an elementary introduction to Octave, an open-source programming language widely used in the scientific community. Octave functions and scripts for dealing with the problems presented in the text can be downloaded from

This open access book offers a comprehensive overview of the role and potential of microorganisms in the degradation and preservation of cultural materials (e.g. stone, metals, graphic documents, textiles, paintings, glass, etc.). Microorganisms are a major cause of deterioration in cultural artefacts, both in the case of outdoor monuments and archaeological finds. This book covers the microorganisms involved in biodeterioration and control methods used to reduce their impact on cultural artefacts. Additionally, the reader will learn more about how microorganisms can be used for the preservation and protection of cultural artefacts through bio-based and eco-friendly materials. New avenues for developing methods and materials for the conservation of cultural artefacts are discussed, together with concrete advances in terms of sustainability, effectiveness and toxicity, making the book essential reading for anyone interested in microbiology and the preservation of cultural heritage.

City of Children Francesco Tonucci 2020-06-30 The city, born to be a place of meeting and exchange, has for several decades taken as a default model the strong citizen, man, adult and worker, thereby transforming it into a hostile space for the weakest: the elderly, the disabled, the poor and the children. The automobile, the toy of choice for the privileged citizen, is also taken to be the principal 'citizen' of the city, thus endangering the health, aesthetics and mobility of the rest of us. This book proposes a new philosophy of city governance that takes children as the default citizens, with the confidence that a city sensitive to the needs of childhood will be healthier for everybody. This work recovers elements of the 1989 Convention of the Rights of the Child that recognize the full citizenship of children to suggest two principle axioms for optimal city design: the participation of children in city governance and the restitution of their autonomy, which allows them to stay with their friends and play freely. Boys and girls, in this way, represent all those excluded from decisions and power. This book is primarily written for politicians and city managers so that they can take on board the ideas within. Yet it is also important for teachers and parents so that they can respect the rights provided in the convention. City of Children should be made available to students on teacher-training courses, and also to the children who are the book's true protagonists. At present, more than two hundred cities in Spain, Italy, Argentina, Uruguay, Colombia, Peru, Chile, Mexico, Dominican Republic, Brazil and Costa Rica have joined this project. This book is a translation of "La città dei bambini" and was translated as part of the Bridging Language and Scholarship initiative. The English edition by Vernon Press follows previous editions of this important work in Italian and the four languages of the Spanish nation (Galego, Basque, Catalan and Castilian), French and Portuguese to make available for the first time this important work to a broader international audience.

Bridging Educational Leadership, Curriculum Theory and Didaktik Michael Uljens 2020-10-08 This volume argues for the need of a common ground that bridges leadership studies, curriculum theory, and Didaktik. It proposes a non-affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields. It concludes with implications of its coherent theoretical framing for future empirical research. Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education. These challenges affect governance, leadership and curriculum, involving changes in aims and values that demand coherence. Yet, the traditionally disparate fields of educational leadership, curriculum theory and Didaktik have developed separately, both in terms of approaches to theory and theorizing

in USA, Europe and Asia, and in the ways in which these theoretical traditions have informed empirical studies over time. An additional aspect is that modern education theory was developed in relation to nation state education, which, in the meantime, has become more complicated due to issues of 'globopolitanism'. This volume examines the current state of affairs and addresses the issues involved. In doing so, it opens up a space for a renewed and thoughtful dialogue to rethink and re-theorize these traditions with non-affirmative education theory moving beyond social reproduction and social transformation perspectives. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. **Absolutely on Music** Haruki Murakami 2016-11-15 A deeply personal, intimate conversation about music and writing between the internationally acclaimed, best-selling author and the former conductor of the Boston Symphony Orchestra. In *Absolutely on Music*, internationally Haruki Murakami sits down with his friend Seiji Ozawa, the revered former conductor of the Boston Symphony Orchestra, for a series of conversations on their shared passion: music. Over the course of two years, Murakami and Ozawa discuss everything from Brahms to Beethoven, from Leonard Bernstein to Glenn Gould, from Bartók to Mahler, and from pop-up orchestras to opera. They listen to and dissect recordings of some of their favorite performances, and Murakami questions Ozawa about his career conducting orchestras around the world. Culminating in Murakami's ten-day visit to the banks of Lake Geneva to observe Ozawa's retreat for young musicians, the book is interspersed with ruminations on record collecting, jazz clubs, orchestra halls, film scores, and much more. A

deep reflection on the essential nature of both music and writing, *Absolutely on Music* is an unprecedented glimpse into the minds of two maestros.

**Leibniz** Maria Rosa Antognazza 2008-10-06 Of all the thinkers of the century of genius that inaugurated modern philosophy, none lived an intellectual life more rich and varied than Gottfried Wilhelm Leibniz (1646-1716). Maria Rosa Antognazza's pioneering biography provides a unified portrait of this unique thinker and the world from which he came. At the centre of the huge range of Leibniz's apparently miscellaneous endeavours, Antognazza reveals a single master project lending unity to his extraordinarily multifaceted life's work. Throughout the vicissitudes of his long life, Leibniz tenaciously pursued the dream of a systematic reform and advancement of all the sciences. As well as tracing the threads of continuity that bound these theoretical and practical activities to this all-embracing plan, this illuminating study also traces these threads back into the intellectual traditions of the Holy Roman Empire in which Leibniz lived and throughout the broader intellectual networks that linked him to patrons in countries as distant as Russia and to correspondents as far afield as China.
