It should be on the shelf of every reader of detective stories."—Erle Stanley Gardner Author Howard Haycraft, an expert in detective fiction, traces the genre's development from the 1840s through the 1940s. Everything You Need to Know about E Collar Training Larry Krohn 2017-04-21 Whether you like it or not, if you have a dog you are training it. The question is are you training it for good or are you training it for bad. Training starts before training starts. How you live with your dog dictates how your dog lives with you. They learn from everything we do, good and bad. They miss nothing. They know us better than we know ourselves. They learn from everything we don't do. Obedience commands don't create a well behaved dog. Raising a dog and teaching along the way does. No parent says they are going outside to train their kids. We just raise them and teach them 24 hours a day and try to provide guidance so eventually our children can make the right decisions on their own. Dogs are no different. Live right with them. They are not children. They are animals and must be respected as such. And they are a precious gift that are not here long enough so enjoy every minute and never take them for granted.

Jack the Ripper & the London Press L. Perry Curtis 2001-11-01 "Breaks new ground in its examination of the role of newspaper reporting during the police hunt for the first notorious serial killer."—Reviews in History Press coverage of the 1888 mutilation murders attributed to Jack the Ripper was of necessity filled with gaps and silences, for the killer remained unknown and Victorian journalists had little experience reporting serial murders and sex crimes. This engrossing book examines how fourteen London newspapers—dailies and weeklies, highbrow and lowbrow—presented the Ripper news, in the process revealing much about the social, political, and sexual anxieties of late Victorian Britain and the role of journalists in reinforcing social norms. L. Perry Curtis surveys the mass newspaper culture of the era, delving into the nature of sensationalism and the conventions of domestic murder news. Analyzing the fourteen newspapers—two of which emanated from the East End, where the murders took place—he shows how journalists played on the fears of readers about law and order by dwelling on lethal violence rather than sex, offering gruesome details about knife injuries but often withholding some of the more intimate details of the pelvic mutilations. He also considers how the Ripper news affected public perceptions of social conditions in Whitechapel. "The apparently motiveless violence of the Whitechapel killings denied journalists a structure, and it is the resulting creativity in news reporting that L Perry Curtis Jr describes. His impressive book makes a genuine contribution to 19th-century history in a way that books addressing the banal question of the identity of the Ripper do not."—The Guardian

Homophones and Homographs 2014-11-01 This expanded fourth edition defines and cross-references 9,040 homophones and 2,133 homographs (up from 7,870 and 1,554 in the 3rd ed.). As the most comprehensive compilation of American homophones (words that sound alike) and homographs (look-alikes), this latest edition serves well where even the most modern spell-checkers and word processors fail—although rain, reign, and rein may be spelled correctly, the context in which these words may appropriately be used is not obvious to a computer.

Praise for *Youth in Revolt* "The funniest book you'll read this year." —Los Angeles Times "This hilariously cynical sex farce about bright teenagers combines creaky Shakespearean plot twists with real insights about growing up in the present chaos." —The Oregonian

K-9 Trailing Jeff Schettler 2012-01-15 The "straightest path" is a simple and honest approach to good trailing dog training. Schettler outlines his method for working trailing dogs, step by step with one goal in mind: finding people. The simple truth of the matter is that trailing and tracking dogs do not find what they are looking for on most cases throughout this country. The problems boil down to training-- for the dog, the handler, and search managers. This program is designed for anyone handling a trailing dog, and Jeff has been teaching it now for over a decade. Whether you are training for search & rescue, are a K-9 cop, or a tactical team manager, Schettler's advice could save your life, the life of your dog, or that of another person one day.

The Koehler Method of Dog Training William R. Koehler 2016-04-09 When the complexities of modern living demanded that, for his own protection as well as his master's convenience, the dog be made controllable, the average owner sought advice from the most available source, which was, too often, some local dog-show exhibitor. Not realizing that, excepting a few praiseworthy individuals, these exhibitors were only superficially concerned with the qualities of use and companionship, an unfortunate dog owner would accept the sight of trophies or ribbons as the credits of an expert. Growing numbers of people and dogs continued to emphasize the advantages of proper dog-behavior and when, in 1935, The American Kennel Club instituted its obedience trials, the competition necessary to focus attention on results and improvement of methods was provided. And something else was observed. It was evident that thorough obedience training does more than assure a dog's response to his master's command; capacities for learning and emotional stability could be increased and integrated as permanent qualities of character. Recently, leading magazines of both general and specialized nature have made the public aware of the trained dog's potential, and of the recreational possibilities of dog training as a hobby. Interest in dog-training classes and other activities where dogs are dignified by usefulness, rather than merely looked at, is evidence that the dog-training public has outgrown the "make a game" and "tid-bit tossing" techniques that, by not being founded on positive and proper motivations, demonstrate the inadequacy of the master, thus promoting failure of response at those times when control is most needed, as well as contributing to the dog's feeling of insecurity. Dog owners of perspective have come to want the type of obedience upon which a blind person might stake his life, and the emotional stability that is vital to dogs in the presence of small, unpredictable children. This classic includes the following chapters: Introduction Lesson I. Fables and Foibles Lesson II. Correct Equipment Lesson III. The Foundation Lesson IV. Heeling Lesson V. Sitting Lesson VI. An American Brat Bapsi Sidhwa 2012-11-01 A sheltered Pakistani girl is sent to America by her parents, with unexpected results: "Entertaining, often hilarious . . . Not just another immigrant's tale." —Publishers Weekly Feroza Ginwalla, a pampered, protected sixteen-year-old Pakistani girl, is sent to America by her parents, who are alarmed by the fundamentalism overtaking Pakistan—and influencing their daughter. Hoping that a few months with her uncle, an MIT grad student, will soften the girl's rigid thinking, they get more than they bargained for: Feroza, enthralled by American culture and her new freedom, insists on staying. A bargain is struck, allowing Feroza to attend college with the understanding that she will return home and marry well. As a student in a small western town, Feroza finds her perceptions of America, her homeland, and herself beginning to alter. When she falls in love with a Jewish American, her family is aghast. Feroza realizes just how far she has come—and wonders how much further she can go—in a delightful, remarkably funny coming-of-age novel that offers an acute portrayal of America as seen through the eyes of a perceptive young immigrant. "Humorous and affecting." —Library Journal "Exceptional." —Los Angeles Times "Her characters [are] painted so vividly you can almost hear them bickering." —The New York Times

Ethnography after Humanism Lindsay Hamilton 2017-06-19 This book argues that qualitative methods, ethnography included, have tended to focus on the human at the cost of understanding humans and animals in relation, and that ethnography should evolve to account for the relationships between humans and other species. Intellectual recognition of this has arrived within the field of human-animal studies and in the philosophical development of posthumanism but there are few practical guidelines for research. Taking this problem as a starting point, the authors draw on a wide array of examples from visual methods, ethnodrama, poetry and movement studies to consider the political, philosophical and practical consequences of posthuman methods. They outline the possibilities for creative new forms of ethnography that eschew simplistic binaries between humans and animals. Ethnography after Humanism suggests how researchers could conduct different forms of fieldwork and writing to include animals more fruitfully and will be of interest to students and scholars across a range of disciplines, including human-animal studies, sociology, criminology, animal geography, anthropology, social theory and natural resources.

Canis Africanis Lance Van Sittert 2008 The role of the dog in human society is the connecting thread that binds the essays in "Canis Africanis," each revealing a different part of the complex social history of southern Africa. The essays range widely from concerns over disease, bestiality, and social degradation through gambling on dogs to anxieties over social status reflected through breed classifications, and social rebellion through resisting the dog tax imposed by colonial authorities. With its focus on dogs in human history, this project is part of what has been termed the 'animal turn' in the social sciences, which investigates the spaces which animals inhabit in human society and the way in which animal and human lives interconnect, demonstrating how different human groups construct a range of identities for themselves (and for others) in terms of animals. So instead of conceiving of animals as merely constituents of ecological or agricultural systems, they can be comprehended through their role in human cultures.

Dogwatching Desmond Morris 2016-08-04 What is it about the canine personality which has singled this animal out from all the 4,236 species of non-human mammals to be man's closest companion? Strangely enough, all dogs, from scruffy mongrels to haughty show champs, are members of the same species - that of the wolf. In Dogwatching, zoologist Desmond Morris gives answers to fascinating fundamental questions about our canine companions - questions so often overlooked by standard dog books, which concentrate on grooming, feeding and veterinary care. It is a book for dog-lovers everywhere, one which will lead to an even deeper bond of understanding and an insight into such remarkable and delightful creatures. Why do dogs bark? Why does a frightened dog put its tail between its legs? Why do puppies chew slippers? Why does a dog bury a bone? Why does a Pointer point? Why do we cure a hangover with the 'hair of the dog'? Do dogs have a sixth sense? Why do some dogs chase their own tails?

Harvest of My Years - An Autobiography Channing Pollock 2007-03 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, - such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Canine Ergonomics William S. Helton 2009-04-28 Since *Canis lupus familiaris* first shared a fire with man more than 15,000 years ago, dogs have been trusted and valued coworkers. Yet the relatively new field of canine ergonomics is just beginning to unravel the secrets of this collaboration. As with many new fields, the literature on working dogs is scattered across several non-overlapping disciplines from forensics and the life sciences to medicine, security, and wildlife biology. *Canine Ergonomics: The Science of Working Dogs* draws together related research from different fields into an interdisciplinary resource of science-based information. Providing a complete overview, from physiology to cognition, this is the first book to discuss working dogs from a scientific perspective. It covers a wide range of current and potential tasks, explores ergonomic and cognitive aspects of these tasks, and covers personality traits and behavioral assessments of working dogs. A quick look at the chapters, contributed by experts from across the globe and across the multidisciplinary spectrum, illustrates the breadth and depth of information available in this book. Traditionally, information concerning working dogs is mostly hearsay, with the exchange of information informal at best and non-existent at worst. Most books available are too general in coverage or conversely, too specific. They explain how to train a service dog or train a dog to track, based on training lore rather than empirical methods verified with rigorous scientific standards. This book, drawing on cutting edge research, unifies different perspectives into one global science: *Canine Ergonomics*.

Mechanisms of Animal Discrimination Learning N. S. Sutherland 2016-01-22 *Mechanisms of Animal Discrimination Learning* provides a review of the field of animal discrimination learning, with discussions into other areas such as generalization, partial reinforcement, and some aspects of comparative psychology. This book elaborates the origins of continuity-noncontinuity controversy, analysis of attentional learning, Lashley and

Wade's account of generalization, and evidence for a two-process analysis of the ORE. The reversal and nonreversal shifts, response unit hypothesis, inconsistent reinforcement and extinction of choice behavior, and aims and problems of comparative psychology are likewise described. This text likewise covers the Zeaman and House model, Lovejoy's Model III, determinants of generalization gradients, cognitive dissonance hypothesis, and theoretical relevance of comparative psychology. The killings were to take place in the dedication ceremony of Reagan's Library in Simi Valley California. The Presidents and their wives had known too much. And there was the astounding fact that the plotters, one of them was arrested, were also involved in the assassinations of JFK and RFK. But, far more astounding was the fact that the Secret Service released the suspect and killed the investigation. In Washington, D.C., the Senate Judiciary Committee is holding hearings on the Dossiers, the Secret Files - the Committee members, Senators Joseph Biden, Dianne Feinstein, Strom Thurmond, Howell Heflin, Edward Kennedy, Arlen Specter and others are committing evil acts to cover up their involvements and their part in the horrendous conspiracy to destroy the Constitution and make serfs and slaves of the American people.
