los estudiantes del español como lengua de herencia se vean representadas en el contexto de la formación profesional de traducción e interpretación. Basado en un estudio empírico con estudiantes universitarios, esta monografía ofrece pautas para fomentar el desarrollo de habilidades de traducción a partir de tres dimensiones principales: como estrategia plurilingüe, actividad pedagógica y destreza profesional. Por su carácter introductorio, este libro es de particular interés para profesores e investigadores del ELH que buscan integrar de manera sistemática la práctica de la traducción en sus actividades docentes. Asimismo, los profesores de traducción e interpretación que deseen aprender como potenciar la mediación como componente de aprendizaje en las habilidades de traducción e interpretación encontrarán en esta obra numerosas sugerencias para conseguirlo. Traducción, competencia plurilingüe y español como lengua de herencia (ELH) explores the connections between Spanish heritage language (SHL) education and translation competence. The volume identifies strategies to represent the linguistic experiences and practices of SHL students in the context of professional translation and interpreting training. Based on an empirical study with undergraduate students, this monograph provides insight on how to develop translation skills in three ways: as a plurilingual strategy, a pedagogical activity, and a professional skill. Because of its introductory nature, this book is of particular interest to SHL teachers and researchers seeking to systematically integrate translation practice into their teaching. Likewise, teachers of translation and interpreting who wish to learn how to enhance mediation as a learning component in translation and interpreting skills will find numerous suggestions on how to do so in this volume.

independent Catalonia has brought renewed urgency to questions about what it means, personally and politically, to speak or not to speak Catalan and to claim Catalan identity. In this book, Kathryn Woolard develops a framework for analyzing ideologies of linguistic authority and uses it to illuminate the politics of language in Spain and Catalonia, where Catalan jostles with Castilian for legitimacy. Longitudinal research across decades of political autonomy contextualizes this ethnographic study of the social meaning of Catalan in the 21st century. Part I lays out the ideologies of linguistic authenticity, anonymity, and naturalism that typically underpin linguistic authority in the modern western world, and gives an overview of a shift in the ideological grounding of linguistic authority in contemporary Catalonia. Part II examines discourses in the media surrounding three public linguistic controversies: an immigrant president's linguistic competence, a municipal festival, and an international book fair. Part III explores individuals' linguistic practices and views, drawing on classroom ethnographies and interviews with two generations of young people from the same high school. The book argues that there is an ongoing shift at both public and personal levels away from the ethnolinguistic authenticity that powered relations in the early transition to political autonomy, and toward new discourses of anonymity, rooted cosmopolitanism, and authenticity understood as a project rather than a matter of origins and essence. This shift is reflected in the current sovereignty movement.

Guide to Psychological Assessment with Hispanics Lorraine T. Benuto 2012-09-19 This book focuses on diversity, culture, and ethnicity as they relate to psychological assessment of Hispanics. It is a how-to guide for clinicians, researchers, and instructors working with Hispanic clients. Each chapter contains an overview

of cultural considerations needed for assessing the Hispanic client followed by a specific exploration of the assessment measures available and the research that has been conducted on these measures with Hispanic participants. An exploration of the strengths and limitations of each assessment measure is included. Considering that ethnocultural minority individuals who are of Hispanic/Latino origin make up the largest ethnocultural minority group in the United States, guidelines for working with this population are a must. Given that a large subset of this percentage is composed of immigrants many of whom do not speak English or who have learned English as a second language, special considerations for effective psychological assessment are necessary. This book fills a gap in the scientific literature by consolidating the research on psychological assessment with Hispanic samples into one comprehensive volume and providing simple recommendations for the psychological assessment of Hispanic clients. An exploration of the general psychological assessment domains (e.g., personality, intelligence) is included with references to research on the major assessment measures used in the field. A more specific exploration of psychodiagnostic assessment measures follows, including the assessment of mood disorders, anxiety disorders, sexual dysfunction, psychosis, etc. Several chapters are dedicated to specialized assessment, including neuropsychological assessment, forensic assessment, and school-based assessment, overall creating the most comprehensive, up-to-date, research-based compendium of psychological assessment measures for use with Hispanic clients.
